WHAT IS S.T.E.A.M - Pg 3

WHAT IS S.T.E.A.M EDUCATION?

STEAM Stands for Science, Technology, Engineering, Arts and Maths. Its a curriculum that brings reality into the classroom, and connects the different subjects together in the way that they would relate to the business world and each other. It encourages students to think, innovate and create and equip them with 21st century skills that our students need.

The Australian Government has committed an extra $12 million to restore the focus, and increase student uptake of, Science, Technology, Engineering, Arts and Mathematics (STEAM) subjects in primary and secondary schools across the country.

Restoring the focus on STEAM subjects is about ensuring Australia's young adults are equipped with the necessary skills for the economy of the future. Encouraging students to study STEAM subjects and showing them some of the great careers built on science, engineering, maths and technology will also help secure the nation's future. Starting this interest at the school level will help increase the number of students taking up STEAM subjects in higher education and in their careers and help keep Australia competitive internationally in these important fields.

WHAT IWORLD HAS TO OFFER

As we see a growth toward STEAM Education in Australia, we have sourced a wide range of products specific to the 5 disciplines - Science, Technology, Engineering Art and Mathematics. These products also show versatility, extensibility and playability making them prefect for STEAM Education.

We also have a wide range of protective cases for Macbooks, iPads, and also offer special Education Buy breaks.

ARCKIT®

IMAGINE IT BUILD IT
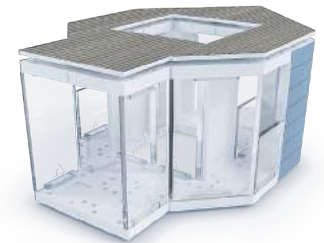

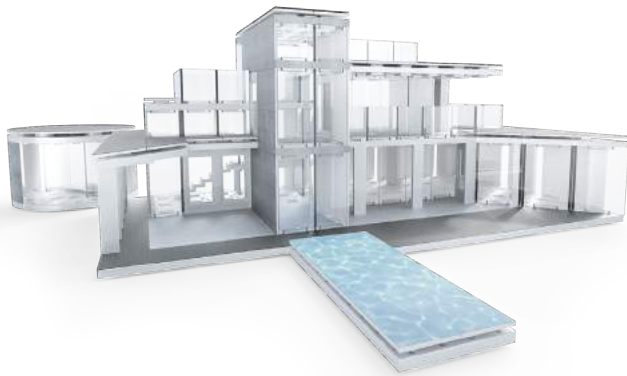

WHAT IS ARCKIT?

Arckit scaled model building sets are freeform kits that contain everything you need to design, build and modify a diverse range of architectural scaled models. From starter model sets for budding young architects through to educational STEAM products and even model building sets for professional architects, we have everything you need to bring your ideas to life with incredible detail. The only limit to what you can design is your imagination! **Suitable for Ages 10+**

ARCKIT EDUCATION

Arckit Education is a series of interactive courses designed for teachers and students who want to explore the world of architecture.

Arckit has become an essential hands-on design tool within schools, universities and organisations around the world because of its advanced educational benefits. In particular, the STEM/STEAM community (science, technology, engineering, art and math) have embraced our system as a way to teach valuable design and technology skills. Today we're working alongside senior professors in the US on some exciting developments to make Arckit a fundamental building block within education. Learn more at http://arckit.com/educate/

ARCKIT | MINI CURVE

ARCKIT is a multi-award winning architectural model system suitable for any architect, student or hobbyist looking to bring their designs to life.

The Arckit Mini Curve contains specialist components and everything else you need to create a range of contemporary curved structures. Perfect as a stand-alone kit or as an advanced add-on to your existing Arckit collection.

Product Details
• 90+ Pcs
• Item Size: W 220 x D 160 x H 45 mm
• Item Weight : 290g
• Recommended Age : 12 +

Product code & UPC
• AK-A10029 : 5391525340364

RRP : $69.95

• Pack Size : H 17 x W 59 x D 22.5 cm
• Weight : Kg
• Master Carton Qty : 12
• Inner Carton Qty :

ARCKIT | MINI ANGLE

ARCKIT is a multi-award winning architectural model system suitable for any architect, student or hobbyist looking to bring their designs to life.

The Arckit Mini Angle contains specialist components and everything else you need to create a range of innovative angular designs. Perfect as a stand-alone kit or as an advanced add-on to an existing Arckit collection.

Product Details
• 85+ Pcs
• Item Size: W 220 x D 160 x H 45 mm
• Item Weight : 204g
• Recommended Age : 12 +

Product code & UPC
•   AK-A10030 : 5391525340371

RRP : $69.95

• Pack Size : H 17 x W 59 x D 22.5 cm

ARCKIT | MINI DORMER

ARCKIT is a multi-award winning architectural model system suitable for any architect, student or hobbyist looking to bring their designs to life.
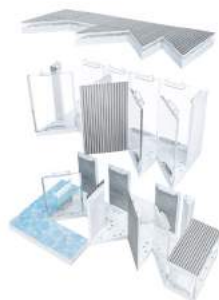

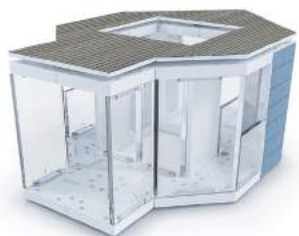

The Arckit Mini Dormer contains specialist components and everything else you need to create a range of quick and creative dormer designs. Perfect as a stand-alone kit or as an advanced add-on to an existing Arckit collection.

Product Details

- 115+ Pcs
- Item Size: W 220 x D 160 x H 45 mm
- Item Weight : 267g
- Recommended Age : 12 +

Product code & UPC

- AK-A10031 : 5391525340388

RRP : $69.95

- Pack Size : H 17 x W 59 x D 22.5 cm
- Weight : Kg

ARCKIT | GO COLOURS

ARCKIT is a multi-award winning architectural model system suitable for any architect, student or hobbyist looking to bring their designs to life.

Inspired by real colours used in modern architecture, GO Colours is a fun way to learn design skills early on. Large floor plates and easy 'click and connect' components make this the perfect starter set for younger architects collection.

Product Details
- 170+ Pcs
- Item Size: W 235 x D 200 x H 60 mm
- Item Weight : 395g
- Recommended Age : 10 +

Product code & UPC
- AK-A10032 : 5391525340395

RRP : $99.95

- Pack Size : H 21 x W 24.5 x D 10 cm
- Weight : 0.5 Kg
- Master Carton Qty : 10
- Inner Carton Qty :

ARCKIT | GO PLUS

ARCKIT is a multi-award winning architectural model system suitable for any architect, student or hobbyist looking to bring their designs to life.

The next level up from Arckit GO, the advanced GO Plus oers even more capabilities with exciting new components and pre-printed adhesive sheets that allow users to complete models with the realistic building finishes.

Product Details
- 170+ Pcs
- Item Size: W 235 x D 200 x H 60 mm
- Item Weight : 395g
- Recommended Age : 12 +

Product code & UPC
- AK-A10033 : 5391525340401

RRP : $99.95

- Pack Size : H 21 x W 24.5 x D 10 cm
- Weight : 0.5 Kg
- Master Carton Qty : 10
- Inner Carton Qty :

chibi® tronics

circuit stickers

WHAT IS CHIBITRONICS?

Chibitronics LED Circuit Stickers combines arts and craft with technology. It's a new and fun way of learning the basics of electronics and allows you to be creative at the same time. No soldering or wires required! simply use LED stickers with conductive tape to draw circuits on paper or any other sticker-friendly surface, such fabric or plastic. Light-up cards and create interactive art-work. The sky's the limit! **Suitable for Ages 9+**

CHIBITRONICS EDUCATION

Chibitronics is an evolution of Jie Qi's passion for technology and art in the form of paper electronics. She hopes to share this new way of learning circuits and creating art, so that everyone can become technology creators rather than technology consumers. Visit Chibitronics educational resource page where you'll find lesson plans, templates and fun activities for teachers, educators and students. https:// chibitronics.com/teach/
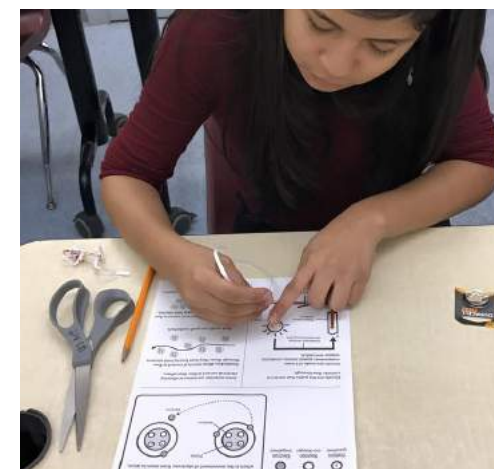

CHIBI LIGHTS INTRO PACK
LED Circuit Stickers

Create a light-up shining star card with this fun activity project! This intro kit includes a colorful activity card, 3 circuit stickers, copper tape, battery and binder clip. Build a simple circuit, and watch your star shine! Use the extra stickers and tape to make your own light-up creation.

This is the perfect set to try out our fun stickers.

Product Details
• Chibitronics Circuit Stickers
• Colorful activity card
• 3 x circuit stickers
• Copper tape
• Battery
• Binder clip
• Recommended Age : 9+

Product code & UPC
• CT-KIT-INTRO1.EN-RETAIL-V1 : 799439675384

RRP : $16.95

• Pack Size : H 18 x W 12.5 x D 1.5 cm
• Weight :   0.08 Kg
• Master Carton Qty : 60
• Inner Carton Qty : N/A

CHIBI LIGHTS STEM STARTER KIT
## LED Circuit Stickers

Chibitronics Chibi Lights Circuit Stickers are a creative and fun way to learn electronics. Circuit stickers are LED circuits on peel-and-stick stickers. Build circuits without soldering, plugging wires, or clips. Instead, use the stickers with conductive tape to draw circuits on paper and other crafts. Learn to build circuits and create interactive artwork. It's easy, fun, safe and creative.

Product Details
• Learn and create electronics through craft with Circuit stickers.
• Its Fun & Safe to use! No Soldering or wires required. simply use stickers with conductive tape to draw circuits on paper.
• Peel-and-stick circuits can be added to any sticker-friendly surface. paper, fabric, plastic, the sky's the limit!
• Includes illustrated Circuit Sticker Sketchbook that guides you though five circuit concepts including parallel circuits, switches and resistance-based sensors.
• Every activity comes with a circuit theory lesson, a template with drawing activity and an open-ended activity for you to design and create your own circuits.
• Kit includes :- Chbitronics Chibi Lights, Circuit Sticker Sketchbook, 2 x lithium CR 2032 batteries, Circuit stickers, 2 x clips, Copper tape
• Recommended Age 13+

Product code & UPC
• CT-KIT-STEM1.EN-RETAIL-V1 : 799439668133

RRP : $49.95

• Pack Size : H 19.1 x W 15.6 x D 4 cm
• Weight :   0.28 Kg
• Master Carton Qty :
• Inner Carton Qty :

COPPER TAPE

Conductive Tape

Use our roll of copper tape to make even more light-up creations with our circuit stickers. The roll measures 16 feet/3M of copper tape. Circuit stickers and batteries not included.

Product Details
• Copper conductive tape to draw circuits on paper.
• Peel-and-stick circuits can be added to any sticker-friendly surface.
paper, fabric, plastic, the sky's the limit!
• 5 Meter (16 Feet) Roll
• Recommended Age 13+

Product code & UPC

Science Supply Australia
circuitScribe™

WHAT IS CIRCUIT SCRIBE?

Let your creativity merge with science as you build exciting circuits using Circuit Scribe conductive ink pen, magnetic modules, and plain old printer paper. By placing the paper over a steel sheet, included in every kit, your paper becomes the base for blinking lights, beeping buzzers, and whirling motors. Kits & Bundles include everything you need in one convenient package. **Suitable for Ages 5+**

HOW IT WORKS

The water-based, non toxic conductive ink allows you to see how the circuit works and adds a whole art dimension to your project, It's as simple as doodling on a piece of paper then connecting magnetic components that snap right into your circuit. No glue or soldering required.

EDUCATION

Circuit Scribe makes learning electronics fun and revolutionises how kids are taught electronics in schools. its about learning through creating. Circuit Scribe have a selection of kits & bundles on offer, ranging from basic to advanced. You can also use Circuit Scribe with Arduino, Makey Makey, and many other electronic platforms. Together, these products have broad applications in the STEM education and do-it-yourself (DIY) communities.
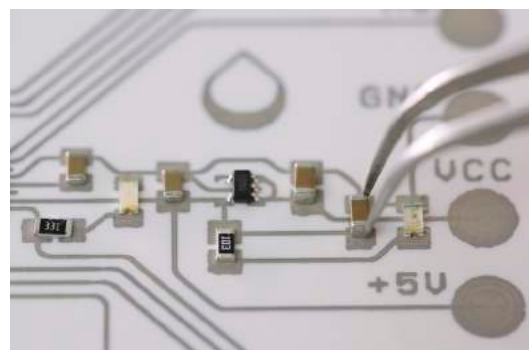

MINI KIT

The newest (and smallest) member of the Circuit Scribe family is the mini kit! Featuring a miniature version of our conductive ink pen, it is an accessible introduction to electronics. The kit comes with a coin cell battery holder (which boosts the voltage to 5V), a slide potentiometer, and an LED. Explore basic circuit concepts by drawing conductive doodles, creating paper-based switches, and fading the LED on and off with the slider.

Product Details
Kit Contains:
• 5V coin cell holder (with one coin cell battery)
• Slider
• bi-LED
Additional Items:
• Mini Conductive Ink Pen
• Circuit Stencil
• Mini Steel Sheet
• Instruction booklet
• Recommended Age : 8+

Product code & UPC
• CS-KIT-MINI : 867790000203

circuitScribe™

BASIC KIT

Get started with drawing circuits on paper. The Basic Kit contains a Circuit Scribe pen, six modules, a 9V Battery and other accessories (see below for full list). Explore basic circuit concepts like conductivity and work up to creating a touch-sensitive circuit using the NPN transistor.

Product Details

Contains 6 Modules:
• 9V Battery adapter with 9V battery
• x2 Bi-LED
• SPST Switch
• NPN Transistor
• 2-Pin Adapter with 5x resistors (100, 1k, 10k, 100k and 1M ohm), 2x capacitors (0.1uF, 1.0uF), and one photoresistor (10k ohms)

Additional Items:
• Conductive Ink Pen
• Circuit Stencil
• Jumper Sticker Sheet
• Steel sheet
• Recommended Age : 8+

Product code & UPC

• CS-KIT-BASIC : 868693000000

RRP : $69.95

• Pack Size : H 3 x W 24x D 16.5 cm
• Weight : 0.35 Kg
• Master Carton Qty : 30
• Inner Carton Qty :

MAKER KIT

An introduction to more advanced concepts, the Maker Kit contains a pen, eleven modules, a 9V Battery and other accessories to take your circuit sketches to the next level. This kit allows you to explore all the concepts that the basic kit presents, while building your understanding of inputs, outputs, and signal processing in your circuits. Additional topics to explore include light sensing, timed circuits, piezoelectric materials, and more.

Product Details
Contains : 11 Modules:
• 9V Battery adapter with 9V battery
• x2 Bi-LED
• SPST Switch, NPN Transistor
• 2-Pin Adapter with 5x resistors (100, 1k, 10k, 100k and 1M ohm), 2x capacitors (0.1uF, 1.0uF), and one photoresistor (10k ohms)
• Potentiometer – 10k ohms
• Blinker & Buzzer
• RGB LED & Light Sensor
Additional Items:
• Conductive Ink Pen
• Circuit Stencil
• Jumper Sticker Sheet
• Workbook, Steel sheet
• Recommended Age : 8+

circuitScribe™

ULTIMATE KIT

Everything you need to create dynamic and fun paper circuits. The kit features 10 magnetic connection cables let you hook up your paper circuits to programmable platforms like Arduino. (Arduino not included.) The kit includes everything from our Maker Kit plus extra LEDs, two DPDT switches, and a motor (see below for full list). With the Ultimate Kit, you can make complex, robust circuits while still using our accessible Circuit Scribe technology.

Product Details
• 9V Battery adapter with 9V battery
• x4 Bi-LED
• SPST Switch, NPN Transistor
• 2-Pin Adapter with 5x resistors (100, 1k, 10k, 100k and 1M ohm), 2x capacitors (0.1uF, 1.0uF), and one photoresistor (10k ohms)
• Potentiometer – 10k ohms
• Blinker, Buzzer
• RGB LED, Light Sensor
• Motor
• x10 Connectors
• x2 DPDT Switch
   Additional Items:
• Conductive Ink Pen

BASIC CLASSROOM KIT

10 Basic Kits and an extra workbook, perfect for younger students.

Our Basic Classroom Kit is perfect for introducing electronics into any classroom. Containing 10 Basic Kits, it is suitable for a class with anywhere from 10 to 20 students. It allows you to teach just about anything from conductivity and resistance to parallel and series to transistors, diodes and basic digital electronics. With this kit you will be able to expand and supplement knowledge gained in your curriculum while teaching lessons relevant to today's world.

Product Details
• Bundle includes 10x Bacic Kits

Each Kit contains 6 Modules:
• 9V Battery adapter with 9V battery
• x2 Bi-LED
• SPST Switch
• NPN Transistor
• 2-Pin Adapter with 5x resistors (100, 1k, 10k, 100k and 1M ohm), 2x capacitors (0.1uF, 1.0uF), and one photoresistor (10k ohms)
Additional Items:
• Conductive Ink Pen
• Circuit Stencil
• Jumper Sticker Sheet
• Workbook (Optional)
• Steel sheet
• Recommended Age 8+

littleBits™

littleBits™

WHAT IS LITTLEBITS?

littleBits makes technology kits that are fun, easy-to-use, and infinitely creative. The kits are composed of electronic building blocks that are color-coded, magnetic, and make complex technology simple and fun. Together they're interchangeable in millions of different ways to empower kids to invent anything - from a sibling alarm, to a wireless robot, to a digital instrument.

LittleBits has been created to be used by everyone, regardless of age. Since people pick up technology at different paces, littleBits is designed so everyone can learn at their own speed. That's why it's used at every level of education, from elementary school all the way up to university and beyond.

HOW IT WORKS

littleBits is a platform of easy-to-use electronic building blocks that empower you to invent anything, from your own remote controlled car, to a smart home device. The Bits snap together with magnets, no soldering, no wiring, no programming needed.

EDUCATION

POWERFUL STEAM LEARNING. SIMPLIFIED.

Inspire your students to create solutions to real-world problems with littleBits and powerful STEAM/STEM learning.

EASY TO TEACH - Color-coded electronic Bits snap together with magnets for foolproof inventing.

INVENTION-BASED LEARNING - Our method empowers students to engineer real world solutions through invention.

STEAM, THE NEW STEM - Adding 'Art' enables students to kickstart their creativity and develop creative confidence.

TIES TO STANDARDS - Lessons link to NGSS and Common Core Standards, making teaching fun AND effective.

littleBits™

Arduino Coding Kit

LEARN THE BASICS OF CODING AND CREATE YOUR OWN PROGRAMMABLE INVENTIONS. This kit contains 8 of our favorite prototyping Bits. It's everything you need to get started with electronics and programming.
Make your own Etch-a-Sketch™! Program a visual display! We'll walk you through the basics using the Arduino programming environment, without the breadboarding, soldering or wiring normally required. Perfect for hackers, designers, inventors and tinkerers of all levels.

Product Details
• INSTRUCTIONS FOR 8 ARDUINO SKETCHES including Analog Pong and DIY Etch A Sketch.
• Includes 8 BITS :- power, servo, bargraph, dimmers (×2), button, fork & Arduino Bit
• Materials & Accessories included : 9V battery + cable, mounting board (×2), micro USB cable, instruction card
• Recommended Age : 14+

Product code & UPC
•   LB-680-0002-0000B : 810876020367

littleBits™

CloudBit™ Starter Kit

This Kit includes the cloudBit plus 5 of our favorite prototyping modules; everything you need to create internet-connected devices in seconds. Recreate the most popular smart devices, use littleBits to prototype the next billion dollar idea, or invent a project that solves your own, unique problem. Perfect for hackers, designers, makers and tinkerers of all levels - without the programming, soldering and wiring normally required.

Product Details
• 5 PROJECT IDEAS including an SMS doorbell and internet-connected lamp. Thousands more ideas can be found online at littlebits.cc/projects.
• Includes 6 BITS :- USB power, long LED, button, servo, sound trigger, cloudBit
• Materials & Accessories included : USB power adapter + cable mounting boards
• Recommended Age : 14+

Rule Your Room Kit

CREATE TOUCH-ACTIVATED INVENTIONS TO CONTROL YOUR STUFF.
The Rule Your Room Kit gives kids the magic touch. With a handful of BitsTM and the brains in your head, you can now transform any boring old object into an awesome, interactive invention. You can prank your mom, create games from scratch and defend your domain from intruders – all with the power of electronics and the stuff you own.

Product Details
• 8+ INVENTIONS Comes with everything you need for 8 inventions, 1 challenge, and inspiration for tons more!
• 1 HUGE INVENTION GUIDE Get step-by-step instructions
for inventions and challenges, plus ideas for customizing your creations.
• INFINITELY CUSTOMIZABLE Create endless interactive inventions by combining littleBits with anything you have
in your room.
• Includes 7 Bits : power, Makey Makey® Bit™, bargraph, buzzer
sound trigger, dimmer , servo & hub
• Also includes 19 Materials & Acessories
• Recommended Age : 8+

Synth KORG Kit

CREATE YOUR OWN INSTRUMENTS AND ELECTRONIC MUSIC. Expand your creativity into the world of sound with the littleBits Synth Kit! Developed in partnership with Korg, a leading global manufacturer of electronic musical equipment, the littleBits Synth Kit allows music lovers and hobbyists to build their own infinitely customizable and expandable modular electronic instruments right at home, pushing the boundaries between technology and music.

Product Details
• INSTRUCTIONS FOR 10 INVENTIONS including Spooky Sounds, Percussion Party and Metal Music.

• 1 HUGE INVENTION GUIDE with information on the included Bits, and step-by-step instructions for all 10 inventions.

• Includes 12 BITS :- power, random, keyboard, delay, micro sequencer, mix, oscillator (×2), split, filter, envelope & synth speaker

• Materials & Accessories included : 9V battery + cable

• Recommended Age : 8+

littleBits™

Gizmos & Gadgets 2nd Edition

THE GIZMOS & GADGETS KIT, 2ND EDITION IS THE ULTIMATE INVENTION TOOLBOX. It transforms passive screen-time into a passion for hands-on inventing, problem-solving and creativity. It's the first littleBits kit for young inventors that allows them to build inventions AND control them with a tilt, shake or tap of their smart device. Invent a remote-controlled car and let your phone do the steering. Or build a caterpillar that crawls with the tap of a tablet! Comes with 13 electronic building blocks, instructions for 16 inventions, and all the accessories and tools you need to unleash the inventor within.

Product Details
• 16+ INVENTIONS Comes with everything you need for 16 inventions, 1 challenge, and inspiration for tons more!
• 1 HUGE INVENTION GUIDE Get step-by-step instructions for inventions and challenges, plus ideas for spin-offs and totally new creations.
• ULTIMATE CONTROLS First littleBits kit with Bluetooth Low Energy technology, allowing kids to build inventions they control from a smart device.
• Includes 13 BITS :- power, slide dimmer, light sensor, Bluetooth® Low Energy Bits (×2), wire, split, bargraph, DC motors (×2), servo & hub, buzzer fan, Aso includes Materials and accessories
• Recommended Age : 8-12

Code Kit

Build games.Learn to code.

The secret to learning? Make. It. Fun. So this kit's all about learning to build & code through games. With games, students embrace failure, make their own rules, think critically, and collaborate.

Product Details

- 4+ hands-on inventions - Comes with everything students need to build & code 4 fun games (including hot potato and tug-of-war), then get creative and invent their own!
- 100+ activities & 10 lessons
- Simple drag-and-drop code - The computer-based Code Kit app provides step-by-step instructions for easy, intuitive block-based programming.
- Fun & engaging - Teaching coding through game design gets the whole class involved and makes it something they WANT to do.
- Easy to teach - The simplicity of littleBits + block programming, plus an abundance of resources, sets educators up for success - even with no prior computer science experience
- 16 Bits, 30+ accessories, tons of resources & a computer-based Code Kit app.
- Suitable for 1-3 students (Grades 3-8)
- Recommended Age : 8+

STEAM Student Kit

The littleBits STEAM Student Set is the easiest way to integrate powerful STEM/STEAM learning into the classroom. Designed with educators, the toolbox engages students in learning through creating inventions while linking to NGSS/Common Core standards.

Product Details
• 8 INVENTION CHALLENGES with Bits & accessories, detailed instructions and companion lessons
• 72-PAGE STUDENT INVENTION GUIDE for group, educator-led or self-guided learning
• 100+ PAGE ONLINE TEACHER'S GUIDE with lessons, NGSS/Common Core links, and tips
• PRINTABLE INVENTION LOGS to guide students' documentation & reflection
• HUNDREDS OF LESSONS AND CHALLENGES at littleBits.cc/student-set and on the littleBits app
• 19 BITS including 2 POWER, 5 INPUT, 8 OUTPUT 4 WIRE and 47 ACCESSORIES

Steam Education Class Packs

ENGAGE YOUR ENTIRE CLASS, SCHOOL, OR DISTRICT IN POWERFUL STEAM LEARNING. STEAM Education Class Packs are bundles of the littleBits STEAM Student Set, configured for varying classroom sizes to make it easy for educators to decide which solution is right for them. Built for 3rd–8th grade classrooms of 16, 24, and 32 students, Class Packs make it easy to integrate science, technology, engineering, art, and math into your curriculum in an engaging way that ties to national standards.

The STEAM Student Set brings effective, invention-based learning into your classroom. Students understand challenging subjects by creating inventions that solve challenges they can relate to. Comes with a 72-page Student Invention Guide, and a 124-page online Teacher's Guide and Invention Logs. Each individual STEAM Student Set supports 1–4 students in an individual or group setting.

Product Details

• Includes 19 BITS : power USB power, slide dimmer inverter, light sensor, DC motors (×2), wires (×2), servo, fork buzzer, RGB LED long LED, button temperature sensor fan pulse, number.

Workshop Set

Inventors, rejoice! The new and improved Workshop Set is here, arming your classroom or makerspace with all the Bits you need to unleash creativity and get individuals and groups creating inventions, large and small. With 160 Bits (8 sets of 20 user favorites) and multiple accessories, this Workshop Set is gigantic!

Includes

- 8 Button
- 8 DC motor (tethered)
- 8 Fork
- 8 Latch
- 8 long led
- 8 power
- 8 Pulse
- 8 Servo
- Temperature Sensor
- 16 x Wire

- 8 Buzzer
- 8 Fan

Pro Library with Storage

At 304 Bits, the Pro Library is the biggest littleBits collection EVER. It's optimal for schools, libraries, makerspaces, design agencies, or anyone looking to create and prototype inventions with our electronic building blocks.

Product Features
• custom wall storage (five 18" by 19" panels)
• Comes with 3 tackleboxes to store hundreds of Bits on a shelf, or on the go
• Includes every Bit, featuring cloudBit, Arduino, wireless, and synth Bits
• Perfect for collaborative, project-based learning at all levels
• Inventors of all ages can prototype complex interactions in seconds
• Robust enough for demonstrations and presentations
• Includes Make: Getting Started With littleBits, a reference handbook co-written by littleBits founder Ayah Bdeir

littleBits™

POWER BITS
Blue Bits provide the juice to get inventions up and running.

P1 Power

The power Bit converts the 9 volts of electricity in the battery to the 5 volts that littleBits circuits run on. The power Bit also sends a signal through your circuit. Controlling this signal with inputs is how you control your circuit.

Product Code & UPC
LB-650-0061 : 810876020329
RRP : $14.95

P3 USB Power

The USB power may be the smallest in the series, but it's big enough to send juice to all your creations. Connect a USB cable (included) to your computer or phone charger to start the power flowing. Try it with an LED to make the simplest littleBits circuit. If you're looking for a permanent installation, the USB power adapter enables you to plug your USB power directly into the wall.

Product Code & UPC
LB-650-0063 : 859477003669
RRP : $24.95

littleBits™

INPUT BITS

Input Bits are pink. They are the eyes and ears of the system.

Makeblock
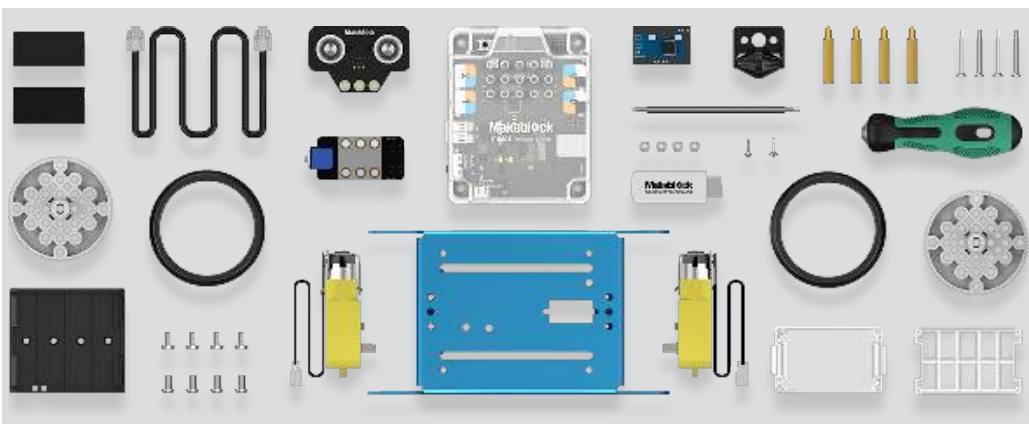

WHAT IS MAKEBLOCK?

Makeblock is a leading DIY robotics construction and programming learning platform for makers, STEM learners, educators and hobbyists. Makeblock provides over 500 mechanical parts and easy-to-use electronic modules, as well as graphical programming software, empowering people to turn their ideas into reality. Having delighted over 600,000 makers, students and educators in over 140 countries and still growing, Makeblock is one of the best robotics companies making a difference, with the aim to open the field to people of all skill levels. **Suitable for Ages 8+**

STEM KITS : Many great ideas are inspired by other great ideas. Makeblock provides kits with extension kits varying from Beginner to senior level for inspiration.

MAKER KITS : Introducing a series of award-winning inspiring robots that facilitate programming, learning, memorization and problem solving skills.

Makeblock
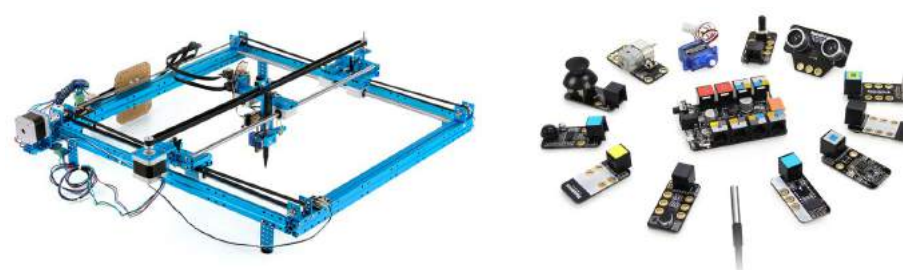

MBot V1.1- Blue (Bluetooth)
STEAM Kits

mBot is an all-in-one solution to enjoy the hands-on experience of programming, electronics, and robotics. Working with mBlock inspired by Scratch 2.0, connecting with computers or smart devices via Bluetooth or 2.4G (by different version), this easy-to-assemble mBot provides infinite possibilities for you to learn STEM (Science, Technology, Engineering, Mathematics).

Product Features

• Multiple building options: a line-following robot, a wall-avoidance robot, or a football player, etc
• Contains 38 assembly parts that can be assembled in 10 minutes.
Work with mBlock inspired by Scratch 2.0, ideal for learning graphical programming
• Control mBot wirelessly via Bluetooth. connect with smartphones, tablets, and PCs (iOS 7 or above & Android™2.3 or above)
• Children Safeguard : mBot v1.1 comes with a casing specially designed for protecting main control board.
• Online courses provided for kids and teachers to get started easier
• Add-on Packs Available (98050 & 98052 - Sold Separately)
• Recommended Age : 7+ Years

MBot V1.1- Blue (2.4G Wireless)
STEAM Kits

mBot is an all-in-one solution to enjoy the hands-on experience of programming, electronics, and robotics. Working with mBlock inspired by Scratch 2.0, connecting with computers or smart devices via Bluetooth or 2.4G (by different version), this easy-to-assemble mBot provides infinite possibilities for you to learn STEM (Science, Technology, Engineering, Mathematics).

Product Features

• Multiple building options: a line-following robot, a wall-avoidance robot, or a football player, etc
• Contains 38 assembly parts that can be assembled in 10 minutes.
Work with mBlock inspired by Scratch 2.0, ideal for learning graphical programming
• 2.4G wireless serial enables wireless communication with the mBot, thus to achieve remote control
• Wireless connection with PC via 2.4G adapter
• Children Safeguard : mBot v1.1 comes with a casing specially designed for protecting main control board.
• Online courses provided for kids and teachers to get started easier
• Add-on Packs Available (98050 & 98052 - Sold Separately)
• Recommended Age : 7+ Years

Product code & UPC

• Wireless 2.4G : MBK-90058 : 6928819504516

Makeblock

Airblock - Programmable Drone
STEAM Kits

The first modular drone that can be turned into a hovercraft, car, and more! But the fun doesn't stop there... Airblock can be programmed like a real robot! Using easy drag & drop graphical codes to program stunts and manoeuvres. Airblock is an educational, user friendly device that offers limitless fun!

Product Features

- Easy DIY Assembly - The 6 modular parts use magnets to join pieces easily.
- Two primary vehicles you can build : Drone or Hovercraft
- Bluetooth App Controlled - IOS & Android
- Indoor friendly - Modular parts are made from styrofoam Expanded polypropylene, which is light-weight and easily absorbs impact.
- Durable blocks with a dedicated easy-to-use app
- Logic and reasoning introduces kids to basic computer programming, growing critical thinking skills.
- Learn programming easily with graphical code blocks
- Helps kids build fine motor skills and hand-eye coordination
- Code Cool Aerial Stunts, and endless tricks
- Challenge kids with specific building tasks
- Flight Speed : 0-2m/s Adjustable : - Flight time : 6min
- Product dimensions : Six axis air craft (235 x 54mm)
                          Hover craft (335 x 208 x 126mm)
- Weighs : 200grams
- Recommended Age : 8+

Makeblock

Makeblock Starter Robot Kit (Bluetooth)
STEAM Kits

Starter robot kit, as its name shows, is the perfect DIY Kit to test the waters of the robotics and maker world. With a set of beginner-friendly instructions that guide you step-by-step on learning robotics, electronics and programming.

Product Features
• STEM Education: Excellent choice for beginners to learn electronics, graphic programming Scratch, and Arduino programming.
• One Kit, Two Robots : Build a robot tank or a three-wheel robot car.
• Scratch & Arduino Programming: Graphic programming Scratch based on Scratch 2.0, and Arduino programming. This kit will teach you all about programming a micro-controller board to control physical objects using sensors.
• Easy wiring, no soldering required.
• Control your robot with your smart device wirelessly via Bluetooth.
• Recommended Age : 7+ Years

Music Robot Kit V2.0
STEAM Kits

The music robot kit uses an ultrasonic module to detect the position of gestures, then the stepper motor will be driven to move Xylophone's hammer. When the hammer moves to the right bar, robot will control electromagnet to hit the bar. Users can also control the music robot through upper computer, or play your own music with the robot.

Product Features
• Three different ways to play this Music Robot
> 1. Control by the position of gestures (Using an ultrasonic modules detect the position)
> 2. A pre-programmed tune can be played (or you programme to play)
> 3. Control by PC Software

• High quality stepper motor mates with high performance Me stepper motor driver
• Compatible with Arduino
• Reliable aluminum extrusion structure
• Easy wiring without soldering
• Play the xylophone either by gestures or software
• Recomended Age :

MBot Ranger - Robot Kit
STEAM Kits

mBot Ranger Robot Kit is a three-in-one STEM educational robot kit which supports 3 building forms: robot tank, three-wheel racing car, and a self-balance car. Program & Control mBot Ranger via iPad, tablets, or laptop to start your exploration!

Product Features

• 3-in-1 Robot Kit - Three forms for different scenarios: robot tank, self-balance car, and 3-wheel car.
• Wireless Control - Makeblock HD provides existing projects which enable you to interact with Ranger immediately. Push the button to control Ranger wirelessly and start having fun!
• Ready-to-use projects built-in Makeblock HD app for immediate fun and play.
• Graphical programming mBlock for kids to learn entry-level coding.
• Powerful Mainboard - Latest Me Auriga mainboard provides not only 5 on-board sensors, but also 10 extension ports that enable you to add more functions.
• Numerous online courses and guides for further study and development.
• Free Online Courses - 16 chapters of courses on graphical programming with Ranger, helping kids to enjoy the fun of programming in various game scenes step by step.
• Recommended Age : 9+ Years

XY Plotter Robot Kit - (Electronic)
STEAM Kits

XY Plotter Robot Kit is a drawing robot that can move a pen or other instrument to draw digital artwork on flat surface. Through X-axis and Y-axis positioning, the drawing accuracy is up to 0.1mm.

Product Features
- Featuring Over 60 components including beams, brackets, motors, and more...
- Software : mDraw and Benbox.
- Supported file types : SVG, BMP, JPG, PNG, DXF .etc
- Strong aluminum extrusion parts with anodizing surface
- Dual-way transmission mechanism
- Super easy-to-use stepper motor driver:A4988
- Stable working status and high accuracy
- Recommended Age : 18+ Years

Product code & UPC
- MBK-90014 : 6928819500044
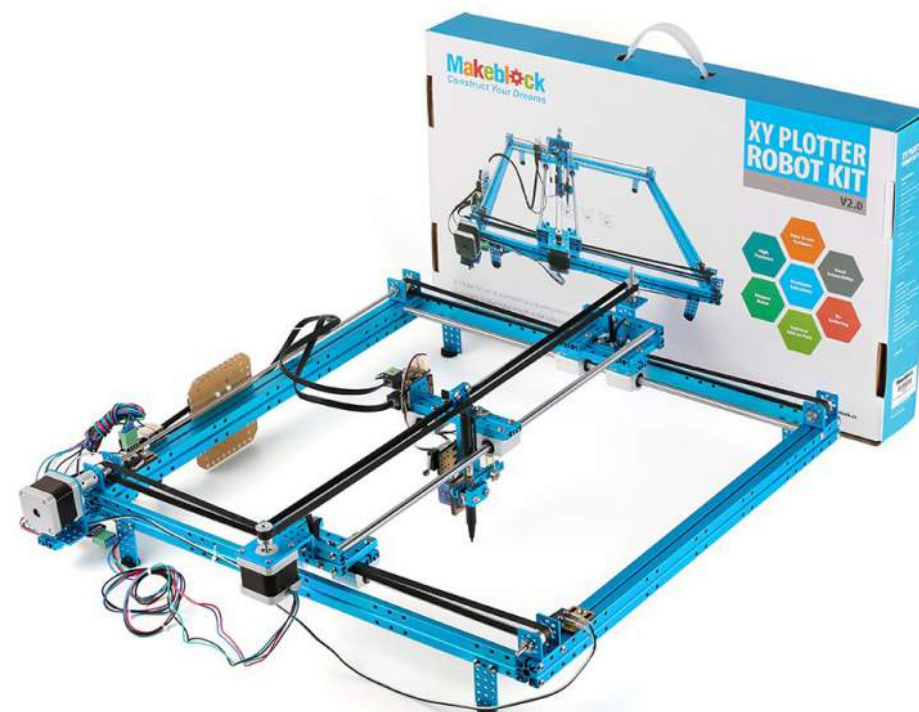

RRP : $599.95

- Pack size : H 33.3 x W 56.6 x D 7 cm

Makeblock

Ultimate 2.0 - 10-In-1 Robot Kit
STEAM Kits

Ultimate 2.0 is a flagship robot kit based on Makeblock platform with rich features and strong compatibility. Whether you are an enthusiast of Raspberry Pi or Arduino, a mechanical or electronics engineer, a teacher, or a student, it helps you learn the knowledge of mechanical structures, electronic modules and programming skill with ease. Please visit Learn for more resource.

Product Features

• Featuring over 160 pieces, compatible with Arduino and Raspberry Pi allowing you to create your own unique robot.
• Get creative with our all new powerful Mega Pi control board, 3 encoder motors, 1 robotic arm, 4 DC motors, 3 sensors and 1 Bluetooth module. It also comes with a shutter and phone stand for easy photo taking.
• Ten building forms will meet all your needs for different application scenes;
• Great for learning robotics, electronics, graphical programming, Arduino programming and Python programming;
• Anodized 6061 aluminum mechanical parts with threaded-slot design brings an easy way of building the robot;
• Three powerful encoder motors enable you to feel every step of the robot;
• App enabled - Wirelessly control your robot with smart devices through Bluetooth connection.
• Recommended Age : 15+ Years

Product code & UPC

Mecanum Wheel Robot Kit

Mecanum Wheel Robot Kit is a type of mobile chassis robot based on Makeblock open source hardware. The chassis of this kit consists of mecanum wheel, encoder motor driver, mechanical structure and other electronic modules (e.g. main controller). This robot kit is for projects that move in narrow space or projects that need to move in all directions.

Product Features

- Two-in-one base which allows you to build into two different sizes.
  - Size 1 : 360 x 386 x 100mm - Load 10kg - Speed m/s 1
  - Size 2: 496 x 512 x 100mm - Load 40kg - Speed m/s 1
- Easy Wiring - All modules equipped with RJ25 ports for easy wiring.
- Frame : Anodized Aluminum
- Connection: 2.4G Wireless Serial
- Power Supply: DC 12V
- Main Controller: Makeblock Orion (Arduino UNO compatible)
- Software: Arduino
- Speed: 1 m/s
- Package Contains: Aluminum Extrusion Parts, 100mm Mecanum Wheel, 12V 36mm Encode DC Motor, Me High-Power & Encoder Motor Driver.

Rectilinear Motion Robot Pack
Extension Kit

The Makeblock Rectilinear Motion Robot Pack contains four kinds of Makeblock components, mainly used to build linear motion mechanisms. For example, attach a nylon pulley to Makeblock beams to give your robot a smooth linear motion.

NEW

Product Features

• Includes :-

    4 x Threaded Shaft 4x39mm
    4 x Shaft Collar 4mm
    4 x Nylon Pulley with bearing
    8 x 4X8X3MM BEARING
    4 x Headless Set Screw M3x5
    4 x Nut M4

• Recomended Age :

MBot Add-On Pack - Servo Pack
Extension Kit

mBot servo pack is a 3-in-1 pack based on mBot. You can construct "Dancing Cat", "Head-Shaking Cat" and "Light-Emitting Cat" with mBot and the components in this pack.

mBot servo pack makes mBot more vivacious and enjoyable, which is of benefit to children's creative thinking. (*Please Note : mBot Sold Separately)
RECOMMENDED AGE : 7+ Years

• Cat one: Dancing Cat
Dancing cat dances with music, waving little claw, calling you home.

• Cat two: Head-Shaking Cat
Looking around for you with its big eyes.
Cute, lively and cheerful.

• Cat three: Light-Emitting Cat
A nice cat brightens up your life. The light pierces the darkness, It's brighter in the sun.

mBot Ranger Add-on Pack Laser Sword Extension Kit

Lightsaber is a decisive weapon in the world of the Star Wars. Now just buy an expansion pack, and then you can transform your mBot Ranger into a Laser Sword of your own. You will take great pleasure in DIY through reproducing the lightsaber effects as shown in the film and improving your do-it-yourself ability. (Please Note : mBot Ranger Separately)

Product Features

• Various presets and cool light effects, such as Lightsaber, Varying-color Charge Sword, Auroral Sword, Rainbow Sword, Breath-taking Sword, Sound Control Lamp, Optical Control Lamp and much more.

• Supports mBlock and Makeblock programming, so that you can define Laser Swords at free will.

• Support four control modes including gravity sensor, sound control, light control and touch control, thus allowing you to play Laser Sword in endless ways.

Includes :-
2 × Beam 0808-504-Blue, 1 × Beam 0824-048-Blue, 1 × Me RJ25 Adapter Module, 1 × LED RGB Strip (1m) , 2 × Laser Sword Acrylic Plate, 16× M4 Nut, 25× Plastic Spacer 4×7×3mm, 2 × M4×35mm Screw, 12× M4×22mm Screw, 12× M4×14mm Screw, 15× M4×8mm Screw

Laser Engraver Upgrade Pack for XY-Plotter Robot Kit Extension Kit

Laser Engraver Upgrade Pack can be used with XY Plotter Robot Kit (SKU: 90014) and mDrawBot (SKU: 90070 & SKU: 90078) adding laser engraving function to these 2 robot kits.

Easy assembly and suitable for places required engraving or cutter, such as at home, in hackerspace, at school, in companies, etc.

Controlled by mDraw or Benbox, Laser Engraver Upgrade Pack is able to engrave awesome patterns and words on phone case, wallet, jeans, wooden board, paper board, Acrylic plate, etc, hence customizing your own special items.

Engraving graphic display

Laser Engraver Upgrade Pack uses a beam of light to cut, engrave, and shape designs from a variety of materials.

Follow the instruction, assemble the lasers elements to the assembled XY Plotter Robot Kit V2.0 and upload the firmware to the Me Baseboard. You can use mDrawBot or Benbox Laser Engraver to control the laser engraver robot to engrave fabulous artworks.

Product Includes:-

1 x 450-500mW Laser Components, 4 x Screw M4x8, 1 x Motor Cable Jeck plug, 4 x Foot pads, 1 x Cross &2.5mm HEX Screwdriver, 1 x DC power cord 5.5*2.1MM, 4 x Nylon Cable Ties, 4 x Colorful paper card, 1 x Bracket 3x6, 4 x Countersunk Screw M3x8, 1 x Blue-violet laser goggles

Product dimensions : 33mm X 79mm - Weight : 0.94 KG

Product code & UPC

Linear Motion Guide Module Pack
Extension Kit

Makeblock Linear Motion Guide Module Pack is a ball linear guide which can be assembled as a linear motion guide robot. The pack can be assembled as a liner motion guide with electronic or without electronic.

It is to support and guide the moving parts, meanwhile transform circular motion to linear motion, such as 3D printer, CNC machine. Pls refer to below image of 3D printer with 4 Linear Motion Guide Modules

Product Features
• Strong aluminum extrusion parts with anodized surface
• Easy-use stepper motor driver
• Stationary motion
• High accuracy with small friction and low noise

Specification:
• Frame: Anodized aluminum
• Physical Dimensions (L×W×H): 504mm × 65mm×75mm
• G.W.: 1.6kg
• MEAS: 520×100×100mm

Electronic Add-on Pack for Starter Robot Kit Electronic Kit

The Electronic Add-on Pack is to expand on your Starter Robot Kit. There are 8 electronic modules in it. With this add-on pack and Starter Kit, you can create a lot of cool project. You can also implement several projects in Inventor Electronic Kit.

Product Features

- Expand an Makeblock Starter Robot Kit to build more interesting projects. 8 electronic modules included.
- Includes :-

        1 x Me Light Sensor
        1 x Me PIR Motion Sensor
        1 x Me Temperature Sensor - Waterproof (DS18B20)
        1 x Me RGB LED
        1 x Me 7-Segment display - Red
        1 x Me Joystick
        1 x Me Potentionmeter
        1 x Me RJ25 Adapter
        2 x 6P6C RJ25 cable - 20cm

WHAT IS A MAKERSPACE?

A Makerspace is a place or community where people come together to learn, design, make & create. Essentially it is a collaborative and creative learning environment. With the Popularization of the "Maker" culture, Makeblock have created the perfect platform that gives you the tools and resources to create a place that promotes learning through play, a place where you can share ideas, inspire and be inspired by fellow makers.

Makerspaces are ideal in a school invironment, library or even a public expo or event.

MAKERSPACE KITS : The Makeblock MakerSpace Kit is a series of engineering building blocks released for Maker Education.

The Kit contains 11 categories, packed into 17 boxes. Scientifically proportioned and configurable, the Kit is designed for various ages and educational institutions with different budgets. Elaborately designed packages are intended to bring better experience of storage and exhibition. Software is also provided for MakerSpace, including complete instructions, integrated operation plans and workshop cases with different levels of difficulty. Additional kits are also available.

Makeblock

MakerSpace Kit

MakerSpace Kit is a series of engineering building blocks released for Maker Education. The Kit contains 11 assembly parts of 6 broad categories, packed into 17 boxes. Scientifically proportioned and flexibly configurable, the Kit is designed for various ages and educational institutions with different budgets. Elaborately designed packages are intended to bring better experience of storage and exhibition. Software is also provided for MakerSpace, including complete instructions, integrated operation plans and workshop cases of different difficulties.

The 11 parts are beams 0824 (double-hole beam), beams 0808 (single-hole beam), connectors, basic motion part, motion shafts, hardware and tools, electronic module, motor module, motion module, advanced motion part and large component expansion pack.

Product Features

- 11 assembly parts
- 6 broad categories
- 1455 Parts
- 17 boxes.
- Scientifically proportioned and flexibly configurable.
- Made from aluminum extrusions. Rigid and professional.
- Easy storage, aesthetic exhibition and convenient use.
- Low threshold of use, with great potentials and extensibility.
- Provides different integrated campus solutions for different users.

Strawbees.®

WHAT IS STRAWBEES?

Strawbees is an award-winning, light-weight, construction system for makers of all ages. It is a kit based on simple units called Strawbees that let you connect straws to each other and build little to huge mechanical objects from just straws and cardboard, which stimulates the imagination and encourages storytelling endlessly. **Suitable for Ages 5+**

STRAWBEES EDUCATION

We believe playing and having fun is the best way to learn about the world, so we try to bring this into classrooms with Strawbees EDU, and encourage learning by making. We partner up with world class educators that share our values, to co-create quality content and curriculums for classrooms to be used along with Strawbees. The curriculums are available in 5 different levels: easy, medium, hard, expert and legendary. So there's something for everyone. Learn more at http://education.strawbees.com

Quirkbot Robotic Creatures

Create your own robotic creatures with Quirkbot! With Quirkbot Robot Kit you can program and construct different shapes and forms. Connect Strawbees, motors, LEDs and sensors to make your own creatures! It's a fun and easy way to learn the basics of physical programming, electronics and mechanics, and encourages children to explore coding. Quirkbot is pefect for kids, grown-ups and educators.

Product Features

• Easy to program - Give your Quirkbot a personality! Programming can be done completely in Visual mode. Just drag & drop a few nodes, connect them and press UPLOAD — it's really that easy!
• Quirkbot CODE is a simple, creative tool for the whole STEAM field.
• Create and Construct different shapes or forms.
• Pack includes : 1x Quirkbot Board, 1x Motor Backpack, 1x Servo Motor 120°, 1x Small strawbees pack, 1x Electric Strawbee, 1x Straws pack (50 straws) 1x LED 3mm RB, 10x cut legs, Light Sensor, 3x cut legs, 1x USB Cable, Intro Booklet, Sticker, Small screwdriver, 1x Servo extension cable, & 6x Alligator clips

# art and science at play

ZOMETOOL ®

art and science at play
ZOMETOOL ®

WHAT IS ZOMETOOL?

Zometool is a modern, simple and extremely versatile construction system. Children, teachers and Nobel Prize winners all love Zometool, because it links nature, science, mathematics, art and architecture in a light and easy manner. Zometool is a unique system, which works perfectly. This is due to the brilliantly conceived connecting balls and the color-coded struts, whose lengths conform to the rules of "Divine Proportion". Suitable for 5 year olds and adults alike to build beautiful and elegant models.

HOW IT WORKS

The sophisticated key to the whole system is the ball with its 62 openings in three different shapes. Color-coded struts, set into the correspondingly shaped openings in the ball, make it easy to build even complex structures. Building with Zometool means thinking in 4 dimensions: from a line (1-D), to a surface (2-D), to a solid (3-D) and on to hyperspace (4-D).

EDUCATION

LEARNING THROUGH DISCOVERY - We've all had to experience rote learning. But few of us had the chance as children to discover the phenomena which give rise to fundamental concepts in art, chemistry, physics, architecture, math, engineering and many other disciplines. Concepts such as proportion, fractals, symmetry, chirality, minimal surfaces, polyhedra, stellations, tessellations, trusses, lattices and space frames.

It's not just that they can learn the concept. They can explore the concepts in such a way that they gain a sense of ownership over their understanding.

For more info on Educational resources visit http://www.zometool.com/resources-for-educators/

Crazy Bubbles
Project Kit

These are jewels disguised as bubbles!

Square bubbles, cubic bubbles, spiral bubbles. Saddle-shaped bubbles, wormhole bubbles, parabolic bubbles!!
Discover a whole new world of bubble-making, tons of fun for the whole family!

For the science-minded there is plenty to chew on here, explore minimal surfaces, experiment with Hamiltonian paths and more. Great for science projects!

Product Details
• Discover a whole new world of bubble-making

• Inner Carton Qty :

C60 - The Fullerene
## Project Kit

A little over 30 years ago, the experiments that would lead to the discovery of the C60 molecule (also known as Fullerene or Buckyball) began in earnest. It was first observed on September 2nd, 1984.

Twenty-five years after their discovery, fullerenes provide abundant research opportunities in pure chemistry, materials science, pharmaceutical chemistry, and nanotechnology.

With this kit you can choose between building the (super cool) all-black version, the "anatomically correct" version (with double bonds indicated with white struts) or the icosahedron version which shows clearly why the C60 is shaped like a truncated icosahedron.

Product Details
• Learn about the C60 molecule also known as Fullerene or Buckyball)
• Includes 150 Pieces + Instructions
• Dimensions : H 6 x L 13.7 x W 13.7 cm
• Weight : 0.227 kg

Product code & UPC
• ZT-0B-C60-PRJ : 709743242608
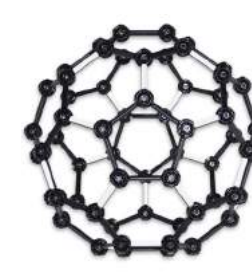

RRP : $79.95

• Pack Size : H 6 x W 13.7 x D 13.7 cm
• Weight : 0.227 Kg
• Master Carton Qty : 8
• Inner Carton Qty :

Crystallography
Project Kit

A beautiful introduction to the world of crystal and mineral structures.

Build all 14 Bravais lattices, including all 7 simple crystal structures (which can be built simultaneously.) Explore shadows, symmetry, coordinate planes and more.

Teachers can build models for in-class demonstrations. Includes colorful, thoughtfully written and illustrated instructions that open up into a beautiful 22"x14 (56x36cm) poster. An inspiring introduction to the wonder of crystals!

Product Details
• Learn the world of crystal and mineral structures.
• Includes 256 Pieces + Instructions
• Recommended Age : 12+
• Dimensions : H 22.2 x L 12.1 x W 12.1 cm
• Weight : 0.397 kg

ZOMETOOL®

Green Lines
Project Kit

Green lines make Zometool more versatile and complex.

Green lines hijack the pentagonal (red) holes in the ball. But because of their design (double kinked) each strut can go into a hole in one of five different ways adding 30 new directions from each ball!

The most basic way to picture what the green lines do with a square. The green line is the diagonal line between corners.

Of course, this is just the beginning, Green lines open up a fascinating new world of building possibilities including truncations, ruled surfaces and some important basic shapes as well; for example, 2 of the platonic solids (tetrahedron and octahedron) can only be built properly with Green lines.

Product Details
• Includes 222 Pieces + Instructions
• Recommended Age : 10+
• Dimensions : H 22.2 x L 12.1 x W 12.1 cm
• Weight : 0.482 kg

Kepler's Kosmos
Project Kit

Renowned German mathematician, astronomer and astrologer Johannes Kepler (1571-1630) believed that the relationships between the 5 platonic solids governed the order of the universe.

He believed in a geometrical basis for the universe and thought the planets were arranged in their orbits through the relationships between the five "perfect" three-dimensional forms. He turned out to be wrong, but in the process of trying to prove his theory he laid down the foundation for modern astronomy.

This particular model of the nested Platonic solids was proposed by renowned mathematician John H. Conway

Product Details
• Includes 158 Pieces + Instructions
• Recommended Age : 6+
• Dimensions : H 13.7 x L 13.7 x W 13.7cm
• Weight : 0.363 kg

Product code & UPC
• ZT-0B-KPK-KIT : 709743200226
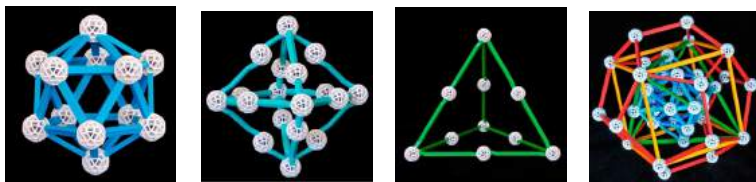

RRP : $129.95

• Pack Size : H 13.7 x W 13.7 x D 13.7 cm
• Weight : 0.363 Kg
• Master Carton Qty : 8
• Inner Carton Qty :

Platonic Solids
Project Kit

In our Universe, there can be only 5 perfect 3D forms; they are known as the Platonic Solids.

Sought and studied for over a thousand years, these shapes have fascinated some of mankinds' greatest scientists, artists and philosophers.

With this kit, you will be able to build the 5 solids at the same time, as well as explore some of the fascinating relationships between the five solids, including building each of their duals.

More than one great mind made them the basis for some of the earliest "Theories of Everything".

Join some of the brightest minds in history as you explore the Platonic Solids!

Product Details
• Includes 276 Pieces + Instructions
• Recommended Age : 12+
• Dimensions : H 13.7 x L 13.7 x W 13.7cm
• Weight : 0.499 kg

• Weight : 0.363 Kg
• Master Carton Qty : 8
• Inner Carton Qty :

The Hyperdo
Project Kit

Beautiful, amazing and deep; that is the Hyperdo in a nutshell.

Just as 3D objects can cast flat (2D) shadows, 4D objects can cast 3D shadows. THAT is what this model represents:

The Hyperdo is a 3D projection of a 4D object called the 120-cell (aka Hyperdodecahedrōn).

But instead of trying to understand these words, get your hands on this kit and enjoy this stunning model!

Product Details
• Includes 970 Pieces + Instructions
• Recommended Age : 12+
• Dimensions : H 17.1 x L 14 x W 14 cm
• Weight : 0.822 kg

Product code & UPC
• ZT-0B-HYP-PRJ : 709743200233

Cryptocube
Artist Series

The modest Cube.

Probably the most iconic and familiar shape of our time. Yes, it's one of the five perfect 3D shapes but it seems so basic and simple, so familiar it is almost unremarkable.

So what is a Cryptocube? A puzzle / brainteaser. You start by building an all-black Cube and the challenge is to build a maze-like structure that allows you to remove the black edges (struts) while keeping the Black Cube's corners undisturbed. Countless solutions are possible, some simple, some mind-bogglingly complex!

Product Details
- Includes 370 Pieces + Instructions
- Recommended Age : 10+

Edwin the Duck | App enabled Toy

Edwin is the World's 1st Smart Duck. A lovable sidekick for parents of preschoolers, toddlers, and newborns. An App-enabled Smart Duck your kids will love.

Product Features

• Night Light - Improve sleep habits with Edwin's app-controlled sound soother and nightlight.
• Thermometer - Make bath time safe and fun with Edwin's waterproof speaker, thermometer, and bath time app.
• Bluetooth Speaker - Give your child a safe place to learn and play with original songs, stories, educational games, and more in Edwin's interactive apps. (Apps updated every month)
• Sing-Along Songs - Edwin's built-in speaker allows him to make sounds during game-play and sing-a-long with original animated Edwin songs that teach kids about bath time and more!
• Interactive Stories - Tap, tilt, and toss Edwin to help him solve puzzles, play games, and sing-along with your favorite songs in free apps available.
• Hands On Learning Games - Play games and solve puzzle without ever touching the screen! Edwin combines learning and game-play in a new way using technology that allows Edwin to control movements in the app.
• Includes Charging Nest, USB Cable & Wall Plug.

Interactive wooden toys for tablet

EDUCATIONAL APPS AVAILABLE

Available on the App Store

Get it on Google play

![marbotic logo]

WHAT IS MARBOTIC?

As tech-lovers and education experts, Marbotic have created the ultimate learning experience mixing traditional wooden toys and touchscreen technology.
Stamp a wooden piece on the tablet's screen and let the magic happen!
Learn counting, reading and writing with these beautiful interactive wooden toys for tablets. **Suitable for Ages 3+**

EDUCATION

Marbotic collaborates with teachers to create the best educational apps and connected toys. Lesson Plans have been developed with teachers, they are aligned with Common Core standards and learning objectives. **Math skills developed with Smart Numbers Include** : Fine Motor Skills, Counting and cardinality, Number Sense, One to One Correspondence, Number and Operations in Base Ten, Enumeration, Subitizing, Addition & Subtraction Skills, Double Facts & Numbers in written form. **Literacy skills developed with Smart Letters include** : Fine Motor Skills, Upper and lower-case letters, One to one letter-sound correspondence, Phonics, Isolation of the initial sound of a word, Syllables, Word building, Nouns & Vocabulary.

Safe toys for your kids

No Wifi   No Bluetooth   No Battery   Gentle to the tablet screen

Smart Numbers - Interactive toy
App Enabled For Tablets

Smart Numbers is the ultimate learning experience for kids aged 3 to 6. These 10 wooden connected digits interact with tablets and 3 free educational apps to learn to count and calculate.

Our connected toys work with static body : the wooden pieces don't have any electronics inside! The game therefore operates without batteries. The wooden pieces must be held by the metal handle to the tablet detects its presence.

The sensors that allow interaction with the tablet are made with flexible material, intended to prevent damage to the tablet's screen.

Product Features
• 10 interactive wooden numbers for tablets. Covers counting, addition & subtraction for children aged 3 and up
• Designed by educations experts, with the help of teachers, inspired by the Montessori methods
• Smart Numbers brings the best of physical and digital play together by connecting wooden numbers to 3 learning apps for tablets
• Superb traditional wooden toys
• Child-proof: no Wi-Fi, no Bluetooth, no battery required. Gentle to the tablet screen. Compatible with all iPads & selected Android tablets. Includes English, Spanish, French, German and more
• Recommended Age : 3+

Smart Bundle - Interactive toy
App Enabled For Tablets

Smart Letters & Smart Numbers is the ultimate learning experience for kids aged 3 to 7. The bundle includes 10 numbers, 26 letters and 6 apps to download for free.

Our connected toys work with static body : the wooden pieces don't have any electronics inside! The game therefore operates without batteries. The wooden pieces must be held by the metal handle to the tablet detects its presence.

The sensors that allow interaction with the tablet are made with flexible material, intended to prevent damage to the tablet's screen.

Product Features

• Includes 10 numbers & 26 Letters, interactive wooden pieces for tablets. Covers phonics, reading and writing, counting, addition & subtraction for children aged 3 and up

• Designed by educations experts, with the help of teachers, inspired by the Montessori methods

• Smart Letters brings the best of physical and digital play together by connecting wooden letters to 3 learning apps for tablets

• Superb traditional wooden toys

• Child-proof: no Wi-Fi, no Bluetooth, no battery required. Gentle to the tablet screen. Compatible with all iPads & selected Android tablets. Includes English, Spanish, French, German and more.

• Recommended Age : 3+

What is Cubetto?

Cubetto is designed for children ages 3 and up to help them learn the basics of computer programming, along with other STEM skills too. Unlike other similar coding toys it doesn't use a screen, but comes with a set of instruction blocks that equate to a coding language you can actually touch.

HOW IT WORKS

The Cubetto Playset is the easiest way for children to start learning computer programming, and it consists of a friendly wooden robot named Cubetto, a physical programming console, a set of expandable coding blocks, a collection of beautifully illustrated maps and an activity book. By placing the blocks in different patterns on the control panel, children create sequences of instructions that program the robot's movement. In the process, they develop computational thinking skills that help them understand the basic principles of coding -- all of this, in a very age-appropriate way that respects a child's natural way of learning

EDUCATION

Teach coding with Cubetto - Learning to code in early years learning is fundamental. Cubetto makes it easy for both students and educators with an instant solution thats fun to play and easy to integrate.

150+ hours of lesson plans and activities - Cubetto is a cross curricular early learning resource that helps young learners develop coding skills, problem solving, communication, and creativity through adventure and play.

20,000+ educators and parents in 90+ countries use Cubetto to introduce coding in Montessori Kindergartens, Primary Schools, Early learning centres, Homeschooling, SEN classrooms, Afterschool programs, Public Libraries and Community Centers.

Cubetto Play Set - Robot Coding Kit

Cubetto is made up of 3 separate elements. A friendly wooden robot, a tangible interface board, and 16x instruction blocks that make up a programming language you can touch. The playset comes with a charmingly illustrated 1x1m World Map and story book that make every play session with Cubetto a unique and memorable adventure. Montessori approved, LOGO Turtle inspired.

Product Details
• Made from Material: Linden plywood, ABS
• Requires 6x AA batteries (Not included)
• Connection via Bluetooth
• Includes 1x Cubetto Robot, 1x Interface Board, 1x Instruction Manual 1x Story Book, 1x World Map, 16x Coding Blocks
• Recommended Age : 3+
