Luminex
NETWORK INTELLIGENCE

**Setup a Pro AV Network
Without any IT Knowledge!**

- **Tailored for AV industry:** Pre-configured settings that are common in the AV industry, such as QoS and IGMP snooping.
- **Easy set-up:** Easy group function with pre-configured VLAN's for a quick set-up (without IT knowledge).
- **12, 14R, 16Xt are Touring approved:** Metal housing and ruggedized Ethercon connectors, ideal for touring and live events. **26i is Ideal for fixed installations:** Designed for fixed installations in buildings, theaters, cruise ships, theme parks
- **Converged networking:** Transfer multiple protocols (Dante™, RAVENNA/AES67, ArtNet, MANet 1&2, sACN, Q-LAN
- **Ultimate link redundancy:** RlinkX redundancy protocol automatically takes over signal in milliseconds in case of a link failure.

Luminex
NETWORK INTELLIGENCE

**Luminex GigaCore 12 Rackmount
Touring 12-Port EtherCON
Gigabit Ethernet Switch**

The GigaCore 12 is a managed Gigabit Ethernet switch designed to setup professional lighting and AV networks, but in a truly user friendly way. The unit offers 12 Gigabit ports on shielded Neutrik Ethercon ports, making the product a hard environment friendly device. All configurations are done through the industry oriented web interface.

Focus on being creative again. Stop wasting time on programming your network or spending money on IT consultants to do it for you. With Luminex GigaCore switches and only some basic AV knowledge, you can do it all by yourself in just the blink of an eye. Now you can finally focus on your core business as an AV technician or designer: "being creative"!

Free software included LumiNet Monitor is a free software pack that will increase the comfort of working with Luminex equipment and together with the easy-to-use web interface for GigaCore's, it adds high value to your project monitoring and preparation.

Luminex
NETWORK INTELLIGENCE

**Luminex GigaCore 26i Install 24-Port &
6-SFP Port Gigabit Ethernet Switch**

The Luminex GigaCore 26i is a Gigabit Ethernet switch providing a budget friendly solution when port density matters. The unit comes with all the advanced functionalities of the GigaCore Ethernet switches range, in a fully AV-installation oriented package. The unit offers 26 Gigabit ports that are all connected on the front panel. Each port on the switch will have coloured mode led indications which will indicate different properties of the port such as: PoE, redundancy and group membership.

Same technology, different applications The GigaCore 26i has considerably more ports than all its predecessors in the GigaCore range. This high port density switch (24x RJ45 and 6x SFP) is designed to offer more capacity for large system integrations such as theaters, concert halls, convention centers, sports arenas, studios, cruise ships, theme parks, hotels, houses of worship and other fixed installations.

**Luminex GigaCore 14R Rackmount
Touring 12-Port EtherCON & 2-SFP
Port Gigabit Ethernet Switch**

The GigaCore 14R is a Gigabit Ethernet switch designed to cope with the most demanding lighting and AV installations. Managed through a web interface, the device offers a user friendly experience with an industry specific oriented interface. Fitted with two SFP cages, the switch can support any compliant fiber transceiver, breaking the limit of copper cable run. Two power backup ports at the rear of the unit makes the switch a reliable Gigabit core for your network. The GigaCore 14R comes with a bunch of industry oriented feature, providing a user friendly solution and lowering down setup time.

When distance matters: Fiber to the rescue The Luminex GigaCore 14R provides users with two SFP cages for Fiber connectivity. Just connect a multimode or single mode Fiber transceiver to each cage and it will enable you to cover greater distances with a total link immunity up to 10km!

Optional: Redundant Power Supply Unit (RPSU) Connect the GigaCore 14R to a GigaCore RPSU for ultimate redundancy, even on power level (and PoE). If for some reason the built-in power supply fails, the RPSU keeps your system up and running.

AJA Kumo 12G-SDI Routers

KUMO 12G-SDI routers support large format resolutions, high frame rate (HFR) and deep color formats, while reducing cable runs when transporting 4K/UltraHD over SDI. The routers offer network-based and/or physical control, and mirror the physical form of AJA's production-proven KUMO 3232 and KUMO 1616 routers, with a new USB port for configuring IP addresses via AJA's eMini-Setup software.

- The KUMO 3232-12G - compact 2RU profile with support for 12G-SDI/6G-SDI/3G-SDI/1.5G-SDI with 32x 12G-SDI inputs and 32x 12G-SDI outputs.
- The KUMO 1616-12G - compact 1RU profile with support for 12G-SDI/6G-SDI/3G-SDI/1.5G-SDI with 16x 12G-SDI inputs and 16x 12G-SDI outputs.

AJA-KUMOCPC

Cost-effective, without compromising power or flexibility, KUMO compact SDI routers provide powerful signal control and support full broadcast specifications over SDI, HD-SDI, and 3G SDI, with quality that exceeds SMPTE specifications. The super-compact 1RU and 2RU formats are just a few inches deep, making them a perfect fit for any broadcast, production, or post production environment, from mobile sports trucks and edit suites, through to corporate video installations or live event A/V rigs.

As 4K workflows continue to gain ground, KUMO routers can grow as you do. With a simple setting change, KUMO routers can be configured for ganged dual and quad port routing, allowing users to group together multiple inputs and outputs for Dual Link, 4K and UltraHD workflows. This allows seamless routing of uncompressed or RAW 4K and UltraHD signals throughout a production or post facility. Then switch the router back to HD/SD operation as needed, giving you the flexibility to route virtually any format in your facility.

- 3G-SDI Compact Routing • 4K, 3G, HD, SD Support • Powerful Signal Control
- Broadcast Quality • Simple Installation and Configuration • Redundant Power Supplies
- AJA 5-year International Warranty and Advance Replacement

Unlimited Extender Set
over Active IP Network**

HDM-C6IPX-SET, HDMI extender set is designed to extend your HD display with the resolutions of 1080p/60Hz up to 390 feet (100 meters) away from your HDMI or DVI-D source. Thanks to the use of the TCP/IP protocol, you can transfer your high-definition video over an existing TCP/IP network.

- The Tx and Rx units can extend 120 meters over a single CAT5/6 cable connection point to point
- The Tx can be connected to a switch to establish a IP address therefore sending 1080p video signals to Multiple Rx connected to the switch to the desired displays. **BONUS** up to 150 Displays with single Tx.
- Multiple Tx can be connected to a Managed Switch with IGMP/VLAN creating a STATIC address therefore sending different 1080p video signals to more than one Rx connected to the Managed Switch with IGMP/VLAN to the desired displays. Thus establishing a Matrix Function.

greenMachine is the first 100% APP driven AV appliance.

The LYNX greenMachine is not just another piece of terminal equipment... it is a revolutionary approach and brand new concept that allows near instant customization, reconfiguration and expansion of your signal processing workflow.

The greenMachine breaks the barrier of purchasing individual rack frames & dedicated boards for your processing requirements.

The hardware itself is a powerful all-purpose audio and video processing engine that is custom configured using a selection of APPs which are purchased and downloaded separately.

You are not limited to one APP per greenMachine, APPs can be mixed, matched and combined to custom build the desired functionality and work-flow in each individual processing channel.

The AJA Video FS2 Dual Channel HD/SD-SDI/Fiber Frame Synchronizer and Converter can simultaneously work with two independent streams of 3G/HD/SD 10-bit Broadcast quality video and two independent groups of 16 channel AES audio. Each FS2 video channel supports virtually any input or output: analog component or composite, 3G/HD/SD-SDI, Dual-Link and HDMI I/O. You can use the FS2 as two separate Frame Synchronizers/Format Converters, or combine the channels in a variety of powerful ways-for example HD sidebar keying where both the video and background graphics are upconverted and combined. To expand your possibilities further, each channel possesses its own still-store, keyer, and video proc amp/color corrector. The FS2 can up- or down-convert between SD and HD, and cross-convert between HD formats-including 3G 1080p50/60 formats. Additionally, the FS2 has full input and output signal routing, allowing any I/O port to be assigned to either processing channel.

HEVC, also known as H.265, is a next-generation compression standard that offers a number of enhancements over H.264. Compared to AVC (H.264) compression, HEVC is 50% more efficient, which translates into maintaining the same video quality at half the bitrate or double the video quality at the same bitrate. In other words, H.265 will save you on bandwidth overhead and cost, especially if you're transmitting over cellular networks.

ARRI

**ARRI SkyPanel Light
Panel Series with
Edison powerCON**

The ARRI SkyPanel is one of the most versatile and brightest soft lights on the market! Available in fully color tuneable and remote phosphor versions. Unlike other tuneable fixtures, SkyPanel makes no sacrifice when it comes to light output. SkyPanel puts out a tremendous amount of light, in a soft and uniform beam field. Brighter than a 2 kW tungsten soft light or a 6 kW tungsten space light, the SkyPanel has more than enough light for most applications. In some cases the fixture can even compete with natural sunlight; at the same time, it is able to perform beautifully at lower light levels.

SkyPanel is available in three sizes: the S120, S60 and S30. The S60 is a mid-range model, featuring a light aperture of 645 x 300 mm and accommodating the vast majority of applications. The S30 is a smaller, more portable version; half the length of the S60, it is perfect for on-the-go mobile applications. The S120 is twice as long as the S60, but weighs nearly the same.

- Fully Tuneable - between 2,800 K and 10,000 K - Get the color you want in seconds.
- Tremendous Output. One of the brightest soft lights on the market.
- True Soft Light Beam Quality. Soft and uniform is the name of the game.
- Outstanding Color Rendition.
- LED white light without sacrifices.
- A Single Soft, Clean Shadow. The proof is in the shadows.
- Interchangeable Front Diffuser Panels
- Operate on Location with On-Board Battery Input
- Largest Light Aperture in its Power Class
- Thin 5.1" Profile fits into Tight Locations

**ARRI SkyLink Receiver and Base Station
for L-Series and Skypanels**

ARRI and Innovative Dimmers have teamed up to create SkyLink: a two-part system that allows for wireless DMX and RDM communication to SkyPanels. The SkyLink Receiver and the SkyLink Base Station use LumenRadio for DMX/RDM communication and a WiFi chip in the Base Station allows for direct control from a DMX control application on a tablet or computer. Setting up a control network has never been easier.

- Two part system: SkyLink Receiver & SkyLink Base Station
- Wireless for all SkyPanels
- WiFi to Wireless DMX
- Fully RDM capable
- Compact and rugged design
- Power via USB port
- Outstanding range
- LumenRadio wireless technology

**Litepanels Brick
Bi-Color On-Camera LED 1 Light Kit**

The Litepanels Brick builds on the legacy of the original MiniPlus which revolutionized the lighting industry. Now more robust, Bi-Color and IP-65 rated, the Brick is a perfect on-camera solution for ENG camera operators on the go or who need full spectrum lighting during wet conditions.

- Output is up to 4X brighter than the original MiniPlus
- High performance LEDs with custom paired optics
- Higher intensity = Longer throw = Wider effective beam spread
- Adjustable (daylight to tungsten), accurate color temperatures
 - Superior color reproduction
 - High color rendition (CRI)
 - Efficient thermal management
 - Completely silent passive cooling
 - Ultra-smooth dimming from 100% to 0

Litepanels Sola 9 LED 9 Inch Fresnel Light

- Custom 9" Fresnel lens produces full spectrum, directional illumination.
- Proprietary DMX module allows for both remote dimming and remote focusing.
- Ultra-smooth dimming from 100% to 0, with no noticeable color shift throughout the entire range.
- Flicker-free at any frame rate or shutter angle.
- Robust, lightweight composite housing and Standard Yoke with Junior Pin enable easy mounting and positioning
- Incredibly energy efficient, these fixtures draw only 190W but are brighter and stronger than a 1K tungsten Fresnel.
- Low power consumption, reduced HVAC requirements, and no associated bulb replacement costs contribute to a return on your investment (ROI) in less than three years for typical studio applications.

Sescom SES-A-V-SYNC A/V Lip-Sync Corrector

The SES-A-V-SYNC is a L/R In-Out audio-video synchronization corrector. Another way to describe it is it is a compact device that corrects audio delays between audio and video. When distributing video over long distances through multiple devices like distribution amplifiers and set top boxes there can sometimes be a noticeable video processing delay which results in audio being played before the video. This also happens when the audio from sources is sent to audio amplifiers over analog lines while the video is sent to the display over HDMI or digital lines. The SES-A-V-SYNC can be manually adjusted so the audio delay can be set from 0~300ms in set increments so you can perfectly synchronize your audio and video. The SES-A-V-SYNC is also sometimes referred to as a "Lip-Sync-Corrector"

- High Resolution Audio Sample Rate Of 48 kHz
- Powered via included external universal AC/DC adapter (input: 100V~240V AC, 50~60Hz)
- Zero Delay signal bypass Option
- Low power consumption
- Up to 24-bit resolution

Belden 2183P CMP Plenum 4K UHD HDBaseT Ethernet Cable

- 100% shielding provides protection from noise interference with AV signal
- Single overall shield construction saves significant termination time
- UL Limited Power (LP) rated to 0.6A per conductor
- Interoperable with leading manufacturers' AV equipment
- Up to 25% smaller than Category 7a
- Easy to bend and fit into small spaces
- Resistant to rigors of installation with Bonded-Pair, durable shield and helical drain
- Designed and tested specifically for optimal 4K UHD performance

**Belden 10GXS12 CAT6A Cable
4 PR 23 AWG - Riser-CMR**

The Gold Standard of 10G Networking

Through a unique combination of advanced engineering expertise and precision manufacturing, Belden has built upon the enabling technologies of its 10GX System to offer better noise immunity and performance that meets or exceeds Category 6A specifications. It not only gives you the performance you need to run current-day applications, but provides room for future growth and expansion.

10GXS cable has an improved shape for easier handling - a durable and lightweight round construction provides up to 25% space and weight savings. Superior crosstalk isolation and EMI suppression and up to 10dB of alien crosstalk headroom provide an optimized electrical performance.

MTP/MTP 24 Fiber Field Cable - 50 Meters

The Complex opticalCON MTP/MTP singlemode field cable with 24 fiber Neutrik opticalCON MTP connectors simplifies connections and reduces installation time by running multiple fibers in one cable. This ruggedized Complex cable saves space for field deployable broadcast AV applications and data transmission over singlemode fiber trunks.

- Outdoor field deployable
- Low insertion loss and optimized optical return loss values
- Space saving multi-fiber design reduces cleaning and mating time

Complex Adjustable Fiber Enclosure for 19 or 23-Inch Racks - Holds 12 Modules for up to 288 Fibers

The CMX-MPR-4RU adjustable rackmount fiber optical enclosure fits both 19 & 23-inch racks and holds 12 Modules for up to 288 fiber termination points. Complex rackmount fiber optic enclosures deliver simplified interconnections in video studio, OB truck and IT cabling systems between routing, video extenders and other active equipment. Our low cost fiber patching solutions offer the added benefit of protecting the mechanical connections of your devices and extend the equipment life.

- 4RU Cabinet with Termination Densities from 144 to 288 Fibers
- Toolless Entry with Sliding Tray for Easy Access
- Internal Mounting
- Holes for Cable Tie-Down, Fiber Management, and Splice Tray
- Routing Guides Limit Internal Bend Radius
- Corrosion Resistant Black Powder-Coated Metal Steel Enclosures
- Heavy Duty Metal Construction

CANARE SMPTE HFO

Markertek is Your Established Volume Manufacturer for Hybrid Camera Cables!

Complex HF-FCFAFCMA series Canare HFO SMPTE hybrid fiber optic camera cables from a Canare certified shop. Designed for studio and broadcast applications with a polyurethane jacket providing tear resistant characteristics ensuring superb mechanical strength. Meets the most demanding applications for high-speed uncompressed HD video transmissions over long distances. All assemblies are multi-stage machine polished and tested for <.55db RL. Meets or exceeds SMPTE 304M/311M standards.

The Canare FC Series Hybrid Fiber Optic Connector

Offers easy maintenance with a detachable alignment sleeve and insulator. The quality construction includes a stainless steel tip and solder contacts fixed in the insulation housing. Designed for long life and hassle-free cleaning. Canare HFO SMPTE connectors are LEMO compatible.

Complex Singlemode ProTac Fiber Optic Snake Reels

Extremely Rugged & Lightweight Tactical Fiber Snakes Designed for Broadcast & Pro-AV Applications!

Tactical fiber cable reels designed for Broadcast & Pro-AV deployments and manufactured to meet all outdoor rated crush and impact resistant applications. The tough Thermoplastic Polyurethane Core-Locked design is perfect for any situation where ordinary PVC jacket cables do not provide adequate protection in the field. Featuring Senko LC or ST premium fiber connectors. All assemblies are machine polished and interferometer tested to industry standards. All products are 100% tested and a complete set of test documentation of your cable is available upon request.

- Complex Tactical Cable & Senko Heavy Duty Connectors with Dust Caps
- Broadcast Deployable
- Indoor/Outdoor rated jacket.
- Typical RL <-55dB and IL<0.25dB.
- Wide temperature range (typically -55°C to 85°C)
- 500um primary acrylate buffer with 900um secondary hard buffer
- Excellent crush and impact resistance due to their polyurethane Core-Locked outer jacket
- Designed to withstand crush and impact after deployment
- Strong, lightweight and extremely durable cable

Complex ProTac Field Snakes

The Ultimate Fiber Optic OB & ENG Tactical Snake!

The Complex ProTac tactical snake is a special ruggedized version of our popular fiber optic snakes featuring a translucent, crush resistant, reusable protective tube for pulling and field deployment. The ProTac series offers maximum critical protection where it's needed most, at the Connector and Fan-Out area. Fan-outs are safely housed in the ProTac cover and the cover has a convenient pulling eye. Designed for maximum protection, the ProTac fiber deployment reel system is IP68 rated with the pulling sock is installed. The pulling eye and tactical sleeve protect fiber and connectors by transferring the tensile or pulling force to the cable structure.

Complex Singlemode LC Fiber Optic Splitter Cables

A Complex exclusive 1x3 fiber optic passive splitter. Singlemode fused splitters offer a handy solution to split optical signal for routing to multiple devices, inputs or patch panels when used with a Neutrik NZPFD-2. 1x3 splitters provide 100-33/33/33 split. Designed to operate with 1310nm and/or 1550nm bands. Note: These assemblies are not for combining optical signals, however, they can be used as alternate inputs when accounting for optical budget losses.

FEATURES:

- Singlemode fused optical splitter
- LC fiber assemblies split 1 signal into 2 or 3 signals
- 1x3 offer 100 to 33/33/33 split
- 1x2 offer 100 to 50/50 split
- Splits optical signal for routing to multiple devices
- Operates with 1310nm and/or 1550nm bands
- Can be used with Neutrik NZPFD-2

CAMPLEX® Complex Single Channel Tactical Fiber Cables

These cables are designed for Military Tactical deployment applications and meets all outdoor tactical needs for broadcast applications requiring an outdoor rated crush and impact resistant design. The tough Polyurethane Core-Locked design is perfect for any situation where ordinary PVC jacket cables do not provide adequate protection in the field. Featuring Senko ST and LC premium fiber connectors. All assemblies are machine polished and 100% interferometer tested to industry standards.

Markertek

is your factory trained & certified Neutrik opticalCON fiber optic assembly shop serving the needs of broadcasters, integrators and dealers. Our state-of-the-art fiber lab can quickly fabricate assemblies, breakouts, panels, wall boxes and more. The Neutrik opticalCON Advanced fiber optic connector system is fast becoming a broadcast and pro-audio standard for an extremely robust hybrid and multichannel fiber optic connection.

NEUTRIK[®] opticalCON DUO

The opticalCON system is based on LC-Duplex connectors but eliminates its weakness and guarantees a safe, dust protected and rugged connection. Being compatible to conventional LC connectors the opticalCON DUO offers the

choice of using cost effective LC cables or the rugged opticalCON cable assembly for mobile applications. The opticalCON DUO is the ideal solution for equipment connections and system integration offering LC compatibility on chassis connector front and rear.

opticalCON DUO 2-Channel Field Cables

Assembled 2 fibers rugged and lightweight mobile field cable, excellent cable retention due to aramid yarn, black PUR outer jacket, available in multi- and single mode (PC or APC), military approved.

JackReel-XL1 High Capacity Broadcast Cable & Fiber Optic Cable Reel

Rugged High Capacity Cable Reel for Broadcast, Fiber Optic & Pro-Audio Applications!

The JACKREEK-XL1 is a fantastic value for a super high capacity steel cable reel that is specially designed for multi-channel tactical fiber optic cables, SMPTE fiber optic camera cables, audio snake cables and similar cable assemblies. The JACKREEK-XL1 features rugged steel and aluminum construction with round tubing protective frame, non-reflective black matte finish, adjustable cam-lock drag brake for fast cable roll-out and storage and large heavy duty locking caster wheels. The main cable drum is specially engineered to protect the bend radius of fiber optic cables. A special drum divider plate protects connectors and fan-outs separating them from the main cable run during storage and roll-out.

NEUTRIK®

Built with Neutrik 75 Ohm 4K/8K UHD D-Style chassis mount BNC connectors. The connector's optimized insulator design achieves the best available headroom to deliver additional return loss reserve for potential impedance deviations resulting from cable bending, incorrect connector assembly or faulty connection interfaces without signal interruption. Connectors are studio-standard recessed to keep cables well protected in a Neutrik's standard D-shape housing. The machined brass connector body provides an extremely rugged and non-abrasive connection for long term use. Utilizing feed-thru barrel connectors saves you time on installation versus traditional solder-back connections. Assures your truck, ENG mobile rig or studio are future ready!

Laird 4505R-B-B 12G-SDI/4K UHD Single Link BNC Cable

- These next-gen RG59 BNC cables are designed to handle 12GHz 4K UHD signals over 200 feet (3G-SDI up to 433 feet) and provide the critical link between your switchers, cameras and other 4K video gear.
- Hand crafted assemblies featuring 4505R 4K Ultra-High-Definition RG59 coaxial cable for 12G-SDI, these cables the simple choice when setting up your studio backbone and infrastructure.
- The 4505 Series is the 12G-SDI equivalent of Belden's famous 1505 cable.
- It features a silver plated copper center conductor and a cable diameter of less than 1/4" making it the ideal choice for low profile cable runs.

Amphenol 12GHz BNC Crimp Plugs

Ultra High Definition Video (also known as "Ultra HD" or "4K UHD") requires an interconnect system that can transfer data at a rate of up to 12 Gbps. Using non-12G BNC connectors, this could require 2 or 4 channels. Amphenol RF's line of 12G BNC products are optimized for 4K Ultra HD Broadcast, providing crystal clear signal transmission on a single channel. These connectors are designed for 12G-SDI video cable termination applications.

Switchcraft Q-G 2-Piece XLRs

The AAA Series or Q-G Twist XLR features an easy twist on combination handle/strain relief, and a reduced number of assembly parts. Only two parts to assemble - slide the handle onto the cable, solder the terminations, and twist on the handle. As the handle is tightened, the strain relief tightens around the outer jacket of the cable. Teeth on the strain relief keep it from rotating around the cable jacket and twisting the cable.
