Item 8.01 Other Events.

On August 17, 2020, 313 Acquisition LLC (“313 Acquisition”), an affiliate of The Blackstone Group Inc., entered into an agreement to sell an aggregate of 11,627,907 shares of common stock, par value \$0.01 per share, of Vivint Solar, Inc. (“Vivint Solar”) to Coatue US 24 LLC (“Coatue”), a vehicle affiliated with Coatue Management, L.L.C. (the “Resale”). On August 18, 2020, Vivint Solar and Sunrun Inc. (“Sunrun”) issued a joint press release announcing the Resale, a copy of which is attached hereto as Exhibit 99.1 and incorporated by reference herein.

Of the shares being sold in the Resale, 313 Acquisition is selling 8,706,976 shares pursuant to Vivint Solar’s effective registration statements on Form S-3 (File Nos. 333-227014 and 333-248091), filed with the Securities and Exchange Commission (the “Commission”) on August 24, 2018 and August 17, 2020, respectively, as well as the prospectus forming part of the registration statements and a prospectus supplement filed with the Commission on August 19, 2020 (the “Public Resale”). A copy of the opinion of Wilson Sonsini Goodrich & Rosati, Professional Corporation, relating to the legality of the shares sold in the Public Resale is filed as Exhibit 5.1 hereto and incorporated by reference herein.

Following the closing of the Resale, 313 Acquisition will hold approximately 46.1% of Vivint Solar’s outstanding shares of common stock and, as a result, Vivint Solar will no longer qualify as a “controlled company” within the meaning of the New York Stock Exchange (“NYSE”) corporate governance rules. Vivint Solar intends to comply with the applicable NYSE corporate governance rules according to the phase-in compliance period provided for in Section 303A.00 of the NYSE Listed Company Manual.

In connection with the Resale, Sunrun and Coatue entered into a support agreement (the “Coatue Support Agreement”) pursuant to which Coatue agreed, among other things, not to transfer any of its shares of Vivint Solar’s common stock, subject to certain exceptions including for certain permitted transfers, and to vote the shares it acquired in the Resale in favor of, and against any alternative proposal to, the adoption of the previously disclosed Agreement and Plan of Merger (the “Merger Agreement”), dated as of July 6, 2020, by and among Sunrun, Viking Merger Sub, Inc. (“Merger Sub”), a direct wholly owned subsidiary of Sunrun, and Vivint Solar, pursuant to which, subject to the terms and conditions set forth in the Merger Agreement, Merger Sub will merge with and into Vivint Solar (the “Merger”), with Vivint Solar continuing as the surviving corporation of the Merger as a direct wholly owned subsidiary of Sunrun. The foregoing description of the Coatue Support Agreement does not purport to be complete and is qualified in its entirety by reference to the Coatue Support Agreement, which was filed as Exhibit 10.1 to Sunrun’s Current Report on Form 8-K filed with the Commission on August 18, 2020.

In connection with the Resale, Sunrun and 313 Acquisition also amended their previous support agreement to reflect 313 Acquisition’s beneficial ownership of Vivint Solar’s common stock following the Resale, which amendment does not impact 313 Acquisition’s obligations pursuant to the original support agreement, including its obligations to vote its shares of Vivint Solar’s common stock in favor of the adoption of the Merger and against any alternative proposal.

Forward-looking statements may include, but are not limited to, statements concerning the expected benefits of the transaction; cost synergies and opportunities resulting from the transaction; Sunrun’s leadership position in the industry; the availability of rebates, tax credits and other financial incentives including solar renewable energy certificates, or SRECs, and federal and state incentives; regulations and policies related to net metering and interconnection

limits or caps and decreases to federal solar tax credits; determinations by the Internal Revenue Service of the fair market value of Sunrun's and Vivint Solar's solar energy systems; changes in regulations, tariffs and other trade barriers and tax policy; the retail price of utility-generated electricity or electricity from other energy sources; federal, state and local regulations and policies governing the electric utility industry and developments or changes with respect to such regulations and policies; the ability of Sunrun and Vivint Solar to manage their supply chains (including the availability and price of solar panels and other system components and raw materials) and distribution channels and the impact of natural disasters and other events beyond their control; the ability of Sunrun and Vivint Solar and their industry to manage recent and future growth, product offering mix, and costs (including, but not limited to, equipment costs) effectively, including attracting, training and retaining sales personnel and solar energy system installers; Sunrun's and Vivint Solar's strategic partnerships and expected benefits of such partnerships; the sufficiency of Sunrun's and Vivint Solar's cash, investment fund commitments and available borrowings to meet anticipated cash needs; the need and ability of Sunrun and Vivint Solar to raise capital, refinance existing debt and finance their respective obligations and solar energy systems from new and existing investors; the potential impact of interest rates on Sunrun's and Vivint Solar's interest expense; the course and outcome of litigation and investigations and the ability of Sunrun and Vivint Solar to consummate the transactions contemplated by the definitive transaction agreement in a timely manner or at all. These statements are not guarantees of future performance; they reflect Sunrun's and Vivint Solar's current views with respect to future events and are based on assumptions and estimates and subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from expectations or results projected or implied by forward-looking statements. These risks include, but are not limited to: the occurrence of any event, change or other circumstances that could give rise to the termination of the definitive transaction agreement or the failure to satisfy the closing conditions; the possibility that the consummation of the proposed transactions is delayed or does not occur, including the failure of the parties' stockholders to approve the proposed transactions; uncertainty regarding the timing of the receipt of required regulatory approvals for the Merger and the possibility that the parties may be required to accept conditions that could reduce or eliminate the anticipated benefits of the merger as a condition to obtaining regulatory approvals or that the required regulatory approvals might not be obtained at all; the outcome of any legal proceedings that have been or may be instituted against the parties or others following announcement of the transactions contemplated by the definitive transaction agreement; challenges, disruptions and costs of closing, integrating and achieving anticipated synergies, or that such synergies will take longer to realize than expected; risks that the Merger and other transactions contemplated by the definitive transaction agreement disrupt current plans and operations that may harm the parties' businesses; the amount of any costs, fees, expenses, impairments and charges related to the Merger; uncertainty as to the effects of the announcement or pendency of the Merger on the market price of the parties' respective common stock and/or on their respective financial performance; uncertainty as to the long-term value of Sunrun's and Vivint Solar's common stock; the ability of Sunrun and Vivint Solar to raise capital from third parties to grow their business; any rise in interest rates which would increase the cost of capital; the ability to meet covenants in investment funds and debt facilities; the potential inaccuracy of the assumptions employed in calculating operating metrics; the failure of the energy industry to develop to the size or at the rate Sunrun and Vivint Solar expect; and the inability of Sunrun and Vivint Solar to finance their solar service offerings to customers on an economically viable basis. These risks and uncertainties may be amplified by the ongoing COVID-19 pandemic, which has caused significant economic uncertainty and negative impacts on capital and credit markets. The extent to which the COVID-19 pandemic impacts Sunrun's and Vivint Solar's businesses, operations, and financial results, including the duration and magnitude of such effects, will depend on numerous factors, many of which are unpredictable, including, but not limited to, the duration and spread of the pandemic, its severity, the actions to contain the pandemic or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume.

Any financial projections in this filing are forward-looking statements that are based on assumptions that are inherently subject to significant uncertainties and contingencies, many of which are beyond Sunrun's and Vivint Solar's control. While all projections are necessarily speculative, Sunrun and Vivint Solar believe that the preparation of prospective financial information involves increasingly higher levels of uncertainty the further out the projection extends from the date of preparation. The assumptions and estimates underlying the projected results are inherently uncertain and are subject to a wide variety of significant business, economic and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the projections. The inclusion of projections in this filing should not be regarded as an indication that Sunrun and Vivint Solar, or their representatives, considered or consider the projections to be a reliable prediction of future events.

Annualized, pro forma, projected and estimated numbers are used for illustrative purpose only, are not forecasts and may not reflect actual results.

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein and elsewhere, including the risk factors included in Sunrun's registration statement on

Form S-4, filed with the Commission on August 14, 2020 and Sunrun's and Vivint Solar's most recent reports on Form 10-K, Form 10-Q, Form 8-K and other documents on file with the SEC. These forward-looking statements represent estimates and assumptions only as of the date made. Unless required by federal securities laws, Sunrun and Vivint Solar assume no obligation to update any of these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated, to reflect circumstances or events that occur after the statements are made. Given these uncertainties, investors should not place undue reliance on these forward-looking statements. Investors should read this document with the understanding that Sunrun's and Vivint Solar's actual future results may be materially different from what Sunrun and Vivint Solar expect. Sunrun and Vivint Solar qualify all of their forward-looking statements by these cautionary statements.
