Disclaimer

OMCAN IS NOT RESPONSIBLE FOR ANY DAMAGES DUE TO WATER LEAKS. WARRANTY FOR WATER LEAKS IS VOID IF THE AMBIENT ROOM TEMPERATURE EXCEEDS 75°F AND 55% RELATIVE HUMIDITY, AND THE APPLIANCE DRAIN IS NOT CONNECTED DIRECTLY TO A FLOOR DRAIN.

General Information

Omcan Manufacturing and Distributing Company Inc., Food Machinery of America, Inc. dba Omcan and Omcan Inc. are not responsible for any harm or injury caused due to any person's improper or negligent use of this equipment. The product shall only be operated by someone over the age of 18, of sound mind, and not under the influence of any drugs or alcohol, who has been trained in the correct operation of this machine, and is wearing authorized, proper safety clothing. Any modification to the machine voids any warranty, and may cause harm to individuals using the machine or in the vicinity of the machine while in operation.

CHECK PACKAGE UPON ARRIVAL

Upon receipt of an Omcan shipment please inspect for external damage. If no damage is evident on the external packaging, open carton to ensure all ordered items are within the box, and there is no concealed damage to the machine. If the package has suffered rough handling, bumps or damage (visible or concealed), please note it on the bill of lading before accepting the delivery and contact Omcan within 24 hours, so we may initiate a claim with the carrier. A detailed report on the extent of the damage caused to the machine must be filled out within three days, from the delivery date shown in the shipping documents. Omcan has no recourse for damaged products that were shipped collect or third party.

Before operating any equipment, always read and familiarize yourself with all operation and safety instructions.

Omcan would like to thank you for purchasing this machine. It's of the utmost importance to save these instructions for future reference. Also save the original box and packaging for shipping the equipment if servicing or returning of the machine is required.

Omcan Fabrication et distribution Compañie Limité et Food Machinery d'Amérique, dba Omcan et Omcan Inc. ne sont pas responsables de tout dommage ou blessure causé du fait que toute personne ait utilisé cet équipement de façon irrégulière. Le produit ne doit être exploité que par quelqu'un de plus de 18 ans, saine d'esprit, et pas sous l'influence d'une drogue ou d'alcool, qui a été formé pour utiliser cette machine correctement, et est vêtu de vêtements de sécurité approprié. Toute modification de la machine annule toute garantie, et peut causer un préjudice à des personnes utilisant la machine ou des personnes à proximité de la machine pendant son fonctionnement.

VÉRIFIEZ LE COLIS DÈS RÉCEPTION

Dès réception d'une expédition d'Omcan veuillez inspecter pour dommages externes. Si aucun dommage n'est visible sur l'emballage externe, ouvrez le carton afin de s'assurer que tous les éléments commandés sont dans la boîte, et il n'y a aucun dommage dissimulé à la machine. Si le colis n'a subi aucune mauvaises manipulations, de bosses ou de dommages (visible ou cachée), notez-le sur le bond de livraison avant d'accepter la livraison et contactez Omcan dans les 24 heures qui suivent, pour que nous puissions engager une réclamation auprès du transporteur. Un rapport détaillé sur l'étendue des dommages causés à la machine doit être rempli dans un délai de trois jours, à compter de la date de livraison indiquée dans les documents d'expédition. Omcan n'a aucun droit de recours pour les produits endommagés qui ont été expédiés ou cueilli par un tiers transporteur.

General Information

Avant d'utiliser n'importe quel équipement, toujours lire et vous familiariser avec toutes les opérations et les consignes de sécurité.

Omcan voudrais vous remercier d'avoir choisi cette machine. Il est primordial de conserver ces instructions pour une référence ultérieure. Également conservez la boîte originale et l'emballage pour l'expédition de l'équipement si l'entretien ou le retour de la machine est nécessaire.

Omcan Empresa De Fabricacion Y Distribucion Inc. Y Maquinaria De Alimentos De America, Inc. dba Omcan y Omcan Inc. no son responsables de ningun daño o perjuicio causado por cualquier persona inadecuada o el uso descuidado de este equipo. El producto solo podra ser operado por una persona mayor de 18 años, en su sano juicio y no bajo alguna influencia de droga o alcohol, y que este ha sido entrenado en el correcto funcionamiento de esta máquina, y ésta usando ropa apropiada y autorizada. Cualquier modificación a la máquina anula la garantía y puede causar daños a las personas usando la máquina mientras esta en el funcionamiento.

REVISE EL PAQUETE A SU LLEGADA

Tras la recepcion de un envio Omcan favor inspeccionar daños externos. Si no hay daños evidentes en el empaque exterior, Habra el carton para asegurarse que todos los articulos solicitados estén dentro de la caja y no encuentre daños ocultos en la máquina. Si el paquete ha sufrido un manejo de poco cuidado, golpes o daños (visible o oculto) por favor anote en la factura antes de aceptar la entrega y contacte Omcan dentro de las 24 horas, de modo que podamos iniciar una reclamación con la compañía. Un informe detallado sobre los daños causados a la máquina debe ser llenado en el plazo de tres días, desde la fecha de entrega que se muestra en los documentos de envío. Omcan no tiene ningun recurso por productos dañados que se enviaron a recoger por terceros.

Antes de utilizar cualquier equipo, siempre lea y familiarizarse con todas las instrucciones de funcionamiento y seguridad.

Omcan le gustaría darle las gracias por la compra de esta máquina. Es de la mayor importancia para salvar estas instrucciones para futuras consultas. Además, guarda la caja original y el embalaje para el envío del equipo si servicio técnico o devolución de la máquina que se requiere.

Safety and Warranty

READ ALL INSTRUCTIONS BEFORE USING

WARNING!

Use this cooler only for the purpose that it was made for as described in this manual. Proper installation, care and maintenance are essential for perfect operation and maximum energy efficiency. In the event you find a problem not described in this manual, do not attempt to solve it by yourself; call Omcan's Technical Support Services for assistance.

Safety and Warranty

IMPORTANT

We strongly recommend you ask for assistance from our Technical Support Services or from our qualified technicians for any failure, problem or malfunction of this cooler.

SAFETY PRECAUTIONS

- Before using, this cooler must be installed and placed following the instructions contained in this manual. Save these instructions for future reference.
- Do not allow individuals to climb, stand on, or hang from the outer portion of the cooler, on the shelves or inside the cabinet. This may cause the cooler to tip over and damage the device or cause serious injuries or death.
- Do not touch the inner surfaces of the cooler when hands are damp or wet. Skin may adhere to these extremely cold surfaces.
- Do not store or use solvents, flammable vapors or liquids in the vicinity of this or other electrical devices.
- Unplug the cooler before cleaning or performing any kind of repair.
- Wipe up any spills inside the cabinet immediately.
- If the cooler is equipped with power switches, turn the cooler on and off through these buttons. If the cooler does not have them, shut down directly from the plug, but never pull the cable to do so. For any maintenance you must disconnect it.
- Children must be supervised to make sure they do not play with the cooler.
- This cooler is not designed to be used by people with physical or intellectual disabilities, children or people with no experience and knowledge of use, unless they are supervised by an adult who has properly read and understood this manual and looks out for their safety.
- Do not use or operate this device if its use has been excessive, misused, altered or modified from manufacturer's original specifications.
- Be extremely careful when closing doors, keeping fingers out of the clearances between the doors and cabinet, to prevent injury.
- This cooler contains a charge of refrigerant at a pressure determined by the type of refrigerant used and the internal volume. The installation and welding of the piping should be treated by a service technician authorized by Omcan who is properly trained in the use and management of refrigerants.
- Never stack two or more coolers; leveling feet are not designed for this purpose, and doing so compromises use safety. Stacking of one cooler, only, on top of the same model is approved if using pods, skids or pallets, and supported by the cabinet corners only.
- Refrigeration system on this cooler must not be damaged or manipulated by untrained personnel

AVOID RISKS

- If power cord or other electronic components are damaged, only the manufacturer or an authorized technician may repair it to avoid danger.

PRECAUTION

- This cooler uses highly flammable HC refrigerant. Do not perforate cooling system tubing. This may cause fire or explosion.
- Do not store explosive substances, such as spray cans with flammable propellant, inside cooler.

Safety and Warranty

WARNING

- Do not obstruct cooler venting grills, it is important to maintain adequate air flow.
- Do not use mechanical devices or other means to speed up deicing process, other than those recommended by the manufacturer.
- Do not damage cooling circuit.
- Do not use electrical equipment inside cooler's storage compartment except for types recommended by the manufacturer.
- In order to reduce flammability danger, cooler installation must be performed by qualified personnel only.

DANGER

- Fire or explosion risk. This cooler uses highly flammable HC refrigerant. Any cooler repairs must be performed by qualified personnel.

IMPORTANT

- Omcan reserves the right to perform product improvements. Design and specifications are subject to change without notice.

OMCAN IS NOT RESPONSIBLE FOR ANY DAMAGES DUE TO WATER LEAKS. WARRANTY FOR WATER LEAKS IS VOID IF THE AMBIENT ROOM TEMPERATURE EXCEEDS 75°F AND 55% RELATIVE HUMIDITY, AND THE APPLIANCE DRAIN IS NOT CONNECTED DIRECTLY TO A FLOOR DRAIN.

RESIDENTIAL USERS: Vendor assumes no liability for parts or labor coverage for component failure or other damages resulting from installation in non-commercial or residential applications. The right is reserved to deny shipment for residential usage; if this occurs, you will be notified as soon as possible.

3 YEARS PARTS AND LABOUR WARRANTY & 5 YEARS PARTS WARRANTY ON COMPRESSOR ONLY

Within the warranty period, contact Omcan Inc. at 1-800-465-0234 to schedule an Omcan authorized service technician to repair the equipment locally.

Unauthorized maintenance will void the warranty. Warranty covers electrical and part failures, not improper use.

Please see <https://omcan.com/disclaimer> for complete info.

WARNING:

The packaging components are classified as normal solid urban waste and can therefore be disposed of without difficulty.

In any case, for suitable recycling, we suggest disposing of the products separately (differentiated waste) according to the current norms.

Safety and Warranty

DO NOT DISCARD ANY PACKAGING MATERIALS IN THE ENVIRONMENT!

Item Number	41221

*Energy consumption based on ANSI/ASHRAE Standard 72-2005.

Installation

- Install this cooler avoiding direct sunlight.
- Do not install this cooler outdoors.
- This cooler must not be used or stored where ambient temperature is under 14°F or greater than 140°F and where relative humidity is greater than 90%.
- Never install equipment close to heat sources; otherwise, cooler may consume more energy or function incorrectly.
- Do not introduce hot objects or warmer than ambient temperature inside cooler.
- Never obstruct or place objects along front grill which may obstruct free air flow; this may cause inefficient cooler operation and will increase the energy consumption.

Installation

- Never place objects over the cooler. Consider that the cabinet's structure has been constructed mainly of laminated sheet metal and polyethylene foam that may easily bend or deform when hit, and it may even deform over time due to placement of TV, microwave oven and other objects.
- For adequate cooling, cooler separation on back and sides must be at a minimum distance of 10cm (4") with respect to walls or other nearby objects.

IMPORTANT: do not use a cutter knife or blade for cooler handling. Inappropriate use may scratch or cut off components.

ACCESSORY INSTALLATION

Before turning the cooler on or connecting to power supply, make sure you use the installation kit, such as wall separators, level supports or other accessories. Depending on your cooler's model, you may have some of the following accessories:

leveling skid

leveling screw

Used to provide support and adequate inclination for door closure.

wheel

Some models have optional wheels for easy mobility inside the establishment. If this is the case, wheels are factory-installed, and it is only necessary to remove transport pods.

wall separator

This accessory is designed to provide adequate separation between cooler back and wall.

TOOLS TO BE USED

safety shoes

gloves

safety goggles

Phillips or flat screwdriver

pliers

LEVELING SKID / LEVELING SCREW

WHEEL

WALL SEPARATOR

Installation

SHELVES

Floor shelf

Level shelf

These accessories must be used to place products inside the cooler. They are designed to optimize cooler's internal space.

Depending on your cooler's model, it may have different types of shelves. These are some types:

FLOOR SHELVES

Type A

Type B

Type C

Type D

Observe that these shelves have supports to place them over cooler's floor, as well as enough rods to support product load.

LEVEL SHELVES

Type E

Type F

Type G

Shelves must have an adequate orientation and position, never to be forced or exert pressure on the cooler walls or any other accessory.

All shelves must be firmly supported on all four corners with provided accessories:

Metallic clips

plastic supports

Multilevel frames

Installation

Make sure the shelf and the product allow the door to close completely.

IMPORTANT: shelves must have an adequate orientation and position, never to be forced or exert pressure on cooler walls or any other accessory.

VISISLIDE (OPTIONAL)

The Visislide system allows placing shelves and product in an angle; thus, bottles will always slide to the front.

BASKETS (OPTIONAL)

Cooler may also have plastic or metal baskets to exhibit product.

ELECTRICAL CONNECTION

WARNING: ELECTRIC SHOCK RISK

- Connect to a three-pin outlet.
- Do not remove outlet ground pin.
- Do not use power adapters.
- Do not use extension cords.
- If failure occurs when following these instructions, it may cause fire or electric shock.

Installation

OmcAN coolers with HC refrigerants (R290 / R600) are designed to operate under a specific electric voltage. Check cooler's serial label to make sure that the electrical classification is adequate for installation.

IMPORTANT: ground connection is a protection system for equipment connected to electrical network. It is used in electrical installations to avoid current pass-through to user due to an isolation failure of active conductors.

- This cooler must be connected to physical ground. In case a short circuit occurs, ground connection reduces the risk of electrical shock.
- Cooler is equipped with a power cord with a ground cable with a physical ground connection plug. Plug must be connected to an adequately-installed outlet and ground connected; if you don't have this type of plug, it is your responsibility and obligation to have it installed.
- Please contact a certified electrician or a certified technician if you have questions about ground connections.
- Never use extension cords, as that action will void the warranty.
- Under no circumstances cut off or remove the third ground connection pin from power cord. Do not use an adapter; if this recommendation is not followed, it may cause burns or death to user due to electrical shock.
- For optimal operation, it is recommended to have this equipment connected to a dedicated circuit outlet that is for cooler use only.
- Connect plug firmly to electrical outlet making sure it is inserted all the way in.

POWER CORD

Cooler is equipped with a polarized power cord, with ground connection. Do not attempt to eliminate ground connection or use two-terminal adapters.

AVOID RISKS: if the power cord or other electronic components are damaged, only the manufacturer or authorized technician may repair them to avoid danger.

Operation

TURNING ON THE COOLER

After having transported and installed the cooler, let it stand for at least twelve hours to allow compressor oil to fully settle.

Once the installing instructions have been followed, connect the cooler per electrical specifications indicated on serial number label (placed inside cabinet). For your own safety, avoid touching the device with wet hands or damp or feet. You should not handle cooler when barefoot.

STORING PRODUCT INSIDE COOLER

- If a floor shelf is included (Type A, B, C, D), place it directly inside cooler, and right after that, place shelves (Type E, F, G), using metallic clips (make sure they are aligned at the same height). If a floor shelf is not included use clips to place a shelf.
- If the cooler has a plastic rack included, it includes supports for each grill, without using metal clip.
- If the cooler has been turned off and it is necessary to turn it on, wait for at least one hour to cool the interior of the cooler before introducing product.
- When the cooler is filled up, arrange and order product inside; do not throw or drop product when placing it inside as that action will damage.

Airflow inside cabinet is priority for the cooler, thus make sure that:

- Product does not exert pressure on internal walls and it does not go beyond perimeter or grill limits.
- Avoid introducing containers inside closed boxes, such as carton board, trays, bags or plastic covers.
- If your cooler has a bin and fan avoid placing product and other objects against, or in a way that obstructs, fan air outlets.

IMPORTANT

Some models are designed to cool products (i.e. beer), under 0°C. Do not use this type of cooler for other products that may be quality-affected due to these low temperatures. Some products freeze when subjected to these temperatures and the containers may explode. If product containers are made of glass, they may cause cuts and serious wounds to you; thus, always follow recommendations and instructions from your supplier. Do not introduce unauthorized containers or product or, ask the Service Center for further details.

It is recommended that before closing your business, fill up your cooler so that on the next day you have cold product available for your customers; doing so will contribute to energy saving due to the fact that doors will be kept closed overnight and cooling will be more efficient.

IMPORTANT: horizontal shelf maximum load must not exceed equivalent weight of three can trays of 355ml (12oz).

TEMPERATURE CONTROL

All temperature controls are electronic and are previously configured by manufacturer. Thanks to this technology, neither height nor exterior temperature affect the interior environment, thus, no adjustments are necessary.

Your cooler may include one of these controls:

- CIF: Intelligent Control Function.
- ETC1H: Electronic Controller.

The temperature control display is usually located on the plastic front grill.

In the case of ETC1H control, it is located on the condenser unit. It is protected by the front plastic grill. In smaller coolers, ETC1H is located on the back of cooler. It does not have a display.

Operation

If your cooler has a Intelligent Control Function (CIF), follow the instructions attached to cooler for further detail.

Each CIF has its own cooling configuration. It may also include energy savings modes and it may transmit information to your suppliers. Energy savings modes may be activated with the display button or automatically when the cooler is not in use.

In case of coolers without door, although some versions have CIF, they don't include the savings mode due to lack of a door; however, you must use the night curtain just before closing your business to reduce energy consumption and to allow compressors to rest.

If the cooler includes an EMS controller, it will also be preconfigured. It analyzes temperatures inside and outside the cooler for better cooling of product. Temperatures and alarms are shown on integrated display.

The ERC controller is preconfigured and allows the user to set the right temperature for the product. It includes inner temperature sensor and also has sensors for the refrigeration and lighting system that allow a better performance.

The LAE control is preconfigured, allowing user to select an adequate temperature for different products. Alarms are shown on the display. It also includes an automatic deicing mode, manual deicing, and lighting control.

IMPORTANT: if the cooler has a temperature control issue or, if failure alarms occur on CIF, EMS, LAE or ERC displays, never attempt to make control adjustments; please call the Customer Service Center. You will be assisted by experienced and authorized personnel.

The ETC1H control in some models is also preconfigured by the manufacturer to maintain product temperature. It does not include a display that shows temperature or alarms. If you notice malfunctioning, please notify the Customer Service Center.

There are many CIF models to provide various solutions for multiple cooling needs for each product.

Operation

ETC1H

LIGHTING

Consider that this cooler has been designed with the intention to exhibit products to encourage your and your supplier's sales. For best results, lighting must be turned on during sale hours.

Our LED lighting technology allows an improved electric efficiency, reducing and providing more operation years with regard to lighting. LED lighting is located around the door perimeter, on the internal cabinet upper portion, or around the perimeter of the internal cabinet.

Your cooler may include a switch that allows you to turn off lighting manually. Use it only when your business is closed. During sale schedule, this lighting technology represents a minimum percentage of the cooler's total energy consumption.

If the cooler includes a Intelligent Control Function (CIF), lighting will be tuned off automatically in savings mode. You don't have to worry about this, each control will turn lighting off according to cooler characteristics and the products contained in it. Just open the door to exit savings mode.

IMPORTANT: if you notice any lighting malfunction, please contact the Customer Service Center.

HINGED DOOR

Cooler's door is designed to thermally isolate the refrigerated product from the environment. If it gets fractured or broken, do not attempt to repair it; call the Customer Service Center.

With a moistened cloth, clean glass solid and glass door internal and external surfaces at least once per week.

At least every three months, clean the door's seal, check it for perfect condition, and check whether it makes contact with frame inside cabinet.

Door hinges and supports have been designed for an adequate turning radius and a proper seal separation distance. If for any reason you need to replace or adjust, request support from the Omcan Tech Support Department at 1-800-465-0234.

Operation

If the cooler includes reversible doors and requires a change at the opening, allow this task to be performed by a knowledgeable authorized technician with regard to the self-closing system and electrical installation.

Keep fingers out of risk areas such as door frame and hinges, always use the handle. Pay special attention when closing doors especially when children are nearby.

Door opening must be free from objects or obstacles as they might fall down or slide down causing injuries or wounds to users.

SELF-CLOSING SYSTEM FOR HINGED DOORS

Door may be equipped with a self-closing system that keeps door from being left open carelessly, forcing it to close by an internal spring part of its mechanism. If you notice that it lacks sufficient force to fully close or it closes with too much force such that damage the to door or refrigerated product may be at risk, call the Omcan Tech Support Department at 1-800-465-0234.

The cooler may include a self-closing system with lock, with two user modes:

1. Automatic closure: thanks to an internal spring in the mechanism, the system closes the door automatically when it is positioned from 20° to 90° in aperture.
2. Reloading: if aperture is greater than 90°, the door lock will be activated and door will remain open at 90°. Thus, you can conveniently reload cooler. To release lock, you simply push the door again from 90° to 75° to return to mode 1.

SLIDING DOOR

Just as with hinged doors, sliding doors are designed to provide optimal thermal isolation of refrigerated products, making product display more efficient at the point of sale. If the sliding door is damaged, do not attempt repairing it yourself. Call our Technical Support Service.

Sliding doors are supported by a set of rails, allowing door opening with minimal force, providing access to product.

With a moistened cloth, clean glass solid door internal and external surfaces at least once per week.

At least once per month, clean sliding door rails and check for perfect conditions for adequate door slide.

Operation

SELF-CLOSING SYSTEM FOR SLIDING DOORS

The cooler may be equipped with an integrated self-closing sliding door system inside the frame, which prevents doors from remaining open carelessly, forcing them to close by an internal spring part of its mechanism. If you notice that it lacks sufficient force to fully close or it closes with too much force, such that it could damage the door or refrigerated product may be at risk, call the Customer Service Center.

To open doors, just slide from left to right on the opposite side where they are located.

To refill cooler, open left door and turn right door lock. Thus, you may keep doors open temporarily, while you fill the cooler with product to be refrigerated.

Maintenance

IMPORTANT: disconnect the cooler from wall outlet before you perform any maintenance or cleaning task.

IMPORTANT: do not perform any cleaning task with water hose or jet wash as it may cause damage to electrical components and cause electric shock.

It is preferable to perform cleaning and maintenance tasks using safety work gloves.

GENERAL CLEANING

- Cleaning the cooler regularly prevents deterioration and reduces malfunctioning that may alter product preservation. Clean with a piece of cloth only, warm water and neutral soap. Dry surfaces using a soft cloth or rag.
- Avoid cleaning surfaces with water hose or jet wash.
- Do not use solvent or abrasive products for cleaning tasks as they may damage surface finish.
- Do not use sharp points to remove excessive dirt; use brush if required.
- Use a broom or mop to clean area under cooler. Avoid splattering water directly under cooler's internal front area.

CONDENSER CLEANING

- Condenser must be cleaned once per month or when required to prevent dirt from reducing cooling system efficiency.
- To clean condenser, it is necessary to remove the cooler's front grill.
- Remove dust, lint and trash with soft bristle brush or broom.
- In grease-based locations, such as kitchens and/or food cooking areas, accumulated grease or grime must

- be cleaned off with water and degreasing agents.
- Do not use sharp pointed objects to remove excessive grime, use brush if required.

IMPORTANT: do not use solvent or abrasive products for cleaning as they may damage surface finishing.

EVAPORATOR DEICING

- Cooler has an automatic evaporator deicing system to guarantee adequate interior air flow.
- If you notice that the cooler is forming ice and it does not cool properly, report this issue to the Customer Service Center.

MANUAL DEFROSTING - FOR FREEZER

1. Remove the front grill.
2. Push and hold the button 10 for seconds. Manual defrosting is activated by pressing 10 seconds the night mode button. To observe that the same temperature remains in the control CIF before the defrost cycle.
3. Check that the red and green LEDs illuminate at the same time. During the defrost cycle, green and red LED remain on.

IT IS IMPORTANT TO KNOW THAT:

It is disabled by time or by temperature, whichever occurs first:

- Time limit: 30 minutes.
- Temperature at defrost sensor limit: 41°F (5°C).
- Defrost time 12 minutes.
- Drip time 5 minutes.
- Sweep time 5 minutes (fan turn after 5 minutes have ended the defrost).
- After 10 minutes of finishing the defrost compressor kicks in.

TECHNICAL MAINTENANCE

- If your cooler requires major maintenance due to refrigeration, electric or lighting system failure, please contact the Customer Service Center.
- All repairs must be performed by an authorized technician. Attempts to repair this equipment by inexperienced personnel or yourself may create malfunctions, damage to equipment or to yourself. Such attempts will be considered to automatically void the warranty.
- Request and make sure original spare parts are used with the same characteristics to guarantee the cooler's optimal operation.
- Before calling the Customer Service Center, check the Troubleshooting Guides included in this manual.

Troubleshooting

Failure	Possible Causes	Check	Corrective Actions
Cooler cannot be turned on.	Power supply failure.	Electric power in the business.	Wait until electricity service is restored.
	Cooler is not well connected.	Outlet must have electrical power.	
	Loose connection.	Plug is well connected.	Correctly connect plug to contact.
	Just connected and no more than 5 minutes have passed.	N/A.	Wait for at least 5 minutes for compressor to start running.
	Burned fuse or tripped circuit breaker.	Physical state of fuse or circuit breaker.	Replace fuse or reset circuit breaker.
Cooler vibrates and/or makes noises.	It is not correctly leveled on a firm and flat surface.	Cooler stability.	Make sure you place cooler on a firm and flat surface.
		No objects are kept under cooler that might cause instability.	Remove any carpeting, carton, or other objects from under cooler.
	Level supports are unlevelled.	Leveling supports are correctly adjusted.	Adjust leveling supports until 4 support points are firm.
	Loose parts vibrate or against surfaces or walls.	Loose components.	Locate and tighten loose parts or adjust those that might hit others.
	Tubing vibration is transmitted.	N/A.	Separate parts that due to contact may be vibrating together.
Lighting turns off.	It is set in energy saving mode.	It is not necessary to check anything, operation is normal.	When door opens, energy savings mode will be deactivated.

Troubleshooting

Equipment works continuously for long periods of time.	Condenser coil is dirty.	N/A.	Clean coil to remove dust, lint and waste.
	Evaporator coil blocked by frost or frozen.	Door closure and seals are firm and adequate throughout perimeter.	Turn cooler off to defrost coil. Do not to use a cutter knife or blade for handling. Inappropriate use may scratch or cut off components.
	Doors remain open for a long time or doors don't close.	Doors closed when not used.	Do not allow doors to remain open for prolonged periods of time.
	Door magnetic seals do not close or seal.	Seal wear.	Adjust door or change seals, if necessary.
	Hot product load in cabinet is excessive.	N/A.	Allow enough time to cool product.
Compressor does not start, makes buzzing noises or stops due to thermal protector.	Voltage variation is excessive or undervoltage is observed.	If business lamps vary their intensity.	Allow for voltage restore and voltage increase.
	Vent motor is protected or burnt. Fan blade is damaged.	Fan rotation without variations and for complete blade.	Call Customer Service Center if required.
	Condenser coil is dirty.	N/A.	Clean dust, lint and waste from coil.
	Insufficient air flow or blocked.		Remove objects that may obstruct air flow or move to provide enough space around it.

Troubleshooting

Cooler inside temperature is too high or does not cool product.	More than three hours have not passed since cooler was connected.	N/A.	Wait for a minimum of 14 hours until cooler recovers its temperature.
	Condenser coil is dirty.		Clean dust, lint and waste from coil.
	Evaporator coil blocked by frost or frozen.	Door closure and seals are firm and adequate throughout perimeter.	Turn cooler off to defrost coil.
	Doors remain open for a long time or doors do not close.	Doors closed when not used.	Do not allow doors to remain open for prolonged periods of time.
	Hot product load in cabinet is excessive.	N/A.	Allow enough time to cool product.
	Poor or obstructed air flow.		Arrange product to allow adequate air flow. Ensure load does not exceed max fill height label
Temperature inside cooler is too low and freezes product.	Product is located too close to evaporator.	Product is not near fan inlet.	Place product at least 2 inches away.

Thank you for choosing Omcan | Merci d'avoir choisi Omcan | Gracias por elegir Omcan

Since 1951 Omcan has grown to become a leading distributor of equipment and supplies to the North American food service industry. Our success over these many years can be attributed to our commitment to strengthen and develop new and existing relationships with our valued customers and manufacturers. Today with partners in North America, Europe, Asia and South America, we continually work to improve and grow the company. We strive to offer customers exceptional value through our qualified local sales and service representatives who provide convenient access to over 5,000 globally sourced products.

Depuis 1951 Omcan a grandi pour devenir un des “leaders” de la distribution des équipements et matériel pour l’industrie des services alimentaires en Amérique du Nord. Notre succès au cours de ces nombreuses années peut être attribué à notre engagement à renforcer et à développer de nouvelles et existantes relations avec nos clients et les fabricants de valeur. Aujourd’hui avec des partenaires en Amérique du Nord, Europe, Asie et Amérique du Sud, nous travaillons continuellement à améliorer et développer l’entreprise. Nous nous efforçons d’offrir à nos clients une valeur exceptionnelle grâce à nos ventes locales qualifiées et des représentants de service qui offrent un accès facile à plus de 5000 produits provenant du monde entier.

Desde 1951 Omcan ha crecido hasta convertirse en un líder en la distribución de equipos y suministros de alimentos en América del Norte industria de servicios. Nuestro éxito en estos años se puede atribuir a nuestro compromiso de fortalecer y desarrollar nuevas relaciones existentes con nuestros valiosos clientes y fabricantes. Hoy con socios de América del Norte, Europa, Asia y América del Sur, que trabajan continuamente para mejorar y crecer la empresa. Nos esforzamos por ofrecer a nuestros clientes valor excepcional a través de nuestro local de ventas y representantes de los servicios que proporcionan un fácil acceso a más de 5,000 productos con origen a nivel mundial.
