

Great turf starts with Frontier Core Aerators

Revitalize your turf with a Frontier Core Aerator.

These rugged tools are built for years of dependable use across all types of turf, from large yards to sports fields and municipal parks. With three productive sizes in our Economy-Duty series and two efficient sizes in our Standard-Duty series, there's a Frontier Core Aerator just right for your needs.

The 20 Series Economy-Duty Core Aerators are compatible with tractors of 20 to 50 horsepower. They're perfect for landscaping professionals and homeowners with big yards. Six aerating spoons per hub penetrate heavy thatch and tough soils to break up soil compaction and revitalize lawns.

For tractors of 25 to 70 horsepower, the 20 Series Standard-Duty Core Aerators work well on extra large lawns and high-traffic areas such as school grounds, municipal parks, and sports fields. Eight spoons per hub allow you to work at faster speeds yet still get the desired aerification.

Spoons are 3/4-inch, case-hardened steel and can penetrate down to 4.5 inches. Fill the optional weight tanks with sand, and increase the down pressure to bust through the hardest ground.

Frontier Core Aerators are backed with a one-year warranty and the best dealer network in the industry — John Deere. To help you choose the right Frontier Core Aerator, talk to your John Deere dealer, your exclusive distributor of Frontier Equipment.

Economy-Duty • Standard-Duty

Frontier 20 Series Core Aerators – Rugged. Reliable. Ready.

DETAILS

Aerification revitalizes turf health by improving water and air movement into the soil, which increases rooting. It can be done before reseeding a lawn to fill in patches, or to maintain the health of an existing lawn.

Weight tanks (optional) can be filled with sand to give the core aerator additional bite when working hard soil.

All models have two greaseable bronze bushings per rotor for increased wear life.

Spoons are 3/4-inch case-hardened steel and can penetrate down to 4.5 inches.

All models are iMatch compatible. The iMatch quick-hitch system converts the tractor's 3-point hitch to fixed hooks and attaching points for a super-quick connection. (iMatch Hitch sold separately.)
