

Cardinal Health™ Cesarean Birth Drape with clear anesthesia screen

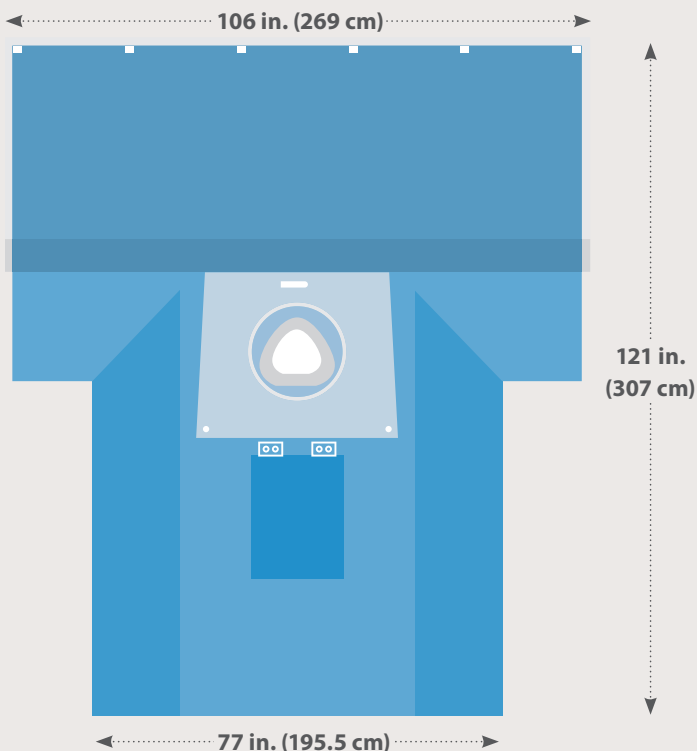

Winner of the 2017 Excellence in Surgical Products Award

This new product was developed to address unmet patient and clinician needs in Labor and Delivery, specifically relating to cesarean sections. The C-section is the most common surgery in America — about 1 in 3 babies are delivered this way.¹ But for many women, being told they need a C-section can be unpleasant news.

Mothers who deliver vaginally are able to benefit immediately from skin-to-skin and visual contact with the baby while C-sections have been viewed as more “sterile” and “surgical” birthing processes. For clinicians, this product provides AAMI Level 4 protection and maintains sterility. For patients, it provides the mother a way to participate in a cesarean birth in a meaningful way.

Patient-centered care and clinical input fueled development of our award winning C-section drape that features a clear anesthesia screen allowing for a more family-centered cesarean.

Features of the drape include:

Dual layer anesthesia screen, clear plastic layer on top of fabric with Velcro® Tabs joining them together

360° fluid control pouch with contoured foam ring, Velcro® Cord-Holding Tab and ports

Armboard covers

Fenestration, pear-shaped 12 x 14 in. (30.48 cm x 35.56 cm) with 2 in. (5 cm) incise aperture

Reinforcement, 17 x 22 in. (43 x 56 cm)

Cord-holding tabs

Ordering information

Cat. no.	Description	Qty. cs
29442	Cesarean drape with clear anesthesia screen, sterile	7
29442N	Cesarean drape with clear anesthesia screen, non-sterile	N/A
