Since 1947

GLOBAL FOOTPRINT

Schumacher is Headquartered in Mount Prospect, IL, and with factories in China, Mexico, Italy and Belgium, designs and produces the most reliable battery chargers in the world and custom transformers for the electronics industry. Product lines include jump starters, power inverters, booster cables, 12 Volt accessories, lithium products, electronic assemblies, smart home connected products, specialty assemblies products, linear power transformers and high frequency magnetics, for retail and professional markets.

TABLE OF CONTENTS:

BATTERY CHARGERS	7–24
JUMP STARTERS	25–33
BOOSTER CABLES	34
PORTABLE POWER	39–38
POWER INVERTERS	39–43

SHIP 'N SHORE	69–74
EV	75–76
DSR PROSERIES	77–84

HISTORY & DNA

The company was formed in 1947 in Chicago, Illinois. We rented a loft building with an area of 5,000 square feet to manufacture coils, small chokes and output transformers. In 1949, we moved to a larger building and leased 14,000 square feet to manufacture chokes, output transformers, yoke coils for TV picture tubes and large power transformers.

By 1958, we purchased the 60,000 square foot building due to the expansion of color TV. In 1959, the company formed Apex Coil, Transformer and Solenoid manufacturing in Quincy, Illinois. We also purchased Acme Corporation to manufacture ballasts for the lighting industry. By 1961, we purchased a battery charger company. That was also the year we built the Rensselaer, Indiana plant. In 1963, we purchased the Crest Transformer plant in Hoopeston, Illinois.

Today, Schumacher Electric Corporation is one of the largest battery charger manufacturers.

OVER 70 YEARS OF INNOVATION + **ICONIC AMERICAN BRAND**

OVER 70 YEARS OF INNOVATION

Since 1947, **Schumacher Electric Corporation** has been leading change and driving performance to exceed its customers' expectations. Engineered patented technologies and award-winning marketing makes Schumacher the brand of choice. Schumacher's legacy is its commitment to quality and exceptional customer service. Schumacher brings experience, innovation and excellence to the next generation of battery maintenance... the #1 name in battery chargers around the world.

Schumacher is an industry giant. We produce new products for an ever-growing market constantly. When solar power started becoming popular, we brought out a handful of solar chargers and maintainers to meet that demand. Next came lithium ion battery jump starters, and we gave the world a variety to choose from. Work lights, road-side emergency kits, and now tactical lights that double as jump starters themselves, we've produced them all the moment we got wind of a need for them in the market. We are not just on the cutting edge of innovation, **we are the cutting edge**. **That is why we are the industry leader**.

Being the industry leader in battery chargers, jump starters, portable power and power conversion is something we take very seriously. **Our mission is to maintain our position by producing the best products at reasonable prices** to keep our loyal and new customers happy. Our loyal customers know this and have known it for the past 73 years. Schumacher makes it a priority to give our customers all of our excellence, experience and innovation into every automotive product we create.

Schumacher is unique in being an **American automotive brand** that is the **number one brand in battery chargers around the world**. American brands have become quite popular in recent years, but with Schumacher, you know you're also getting the best in the world.

Since 1947

BATTERY CHARGERS

EXPERIENCE THE MOST ADVANCED CHARGING TECHNOLOGY.

Schumacher Electric's innovative battery chargers offer a wide range of features and amperages and various sizes and shapes, from heavy-duty wheel chargers with built-in testers to maintainers that fit in your hand. Features include maintain, boost, charge and engine start modes, along with 6V, 12V or 24V output. Schumacher chargers and maintainers are fully automatic, microprocessor controlled and easy to set up: "Connect it and forget it". The connected charger features innovative technology, such as auto-voltage detection, multi-stage charging and quick connectability. All of your charging needs are covered in this DOE compliant line.

BATTERY CHARGER FEATURES

12V charges 12V batteries

6V|12V charges 6V/12V batteries

12V|24V charges 12V/24V batteries

Fully Automatic Battery Charger/Maintainer
keeps stored lead-acid batteries charged, charges and maintains small batteries

Scrolling Digital Messaging
The easy-to-read, animated display provides step-by-step instructions to properly charge your battery

Hook Attachment
hang outside the work area for safety and convenience

Microprocessor Controlled
multi-stage charging for added precision, safety and battery life

Auto-voltage Detection
automatically detects 6 or 12 volt batteries

Float Mode Monitoring
automatically maintains optimum battery charge

Engine Start
powerful enough for starting SUVs and trucks

Reverse Hook-up Protection
helps protect battery and charger from damage

Start/Stop Button
simply press the button to start or stop charging

Charges compatible battery types
standard. AGM, Gel & deep-cycle batteries

"Connect It & Forget It" All Season
monitors and maintains the battery when fully charged; resumes continuous charging when battery becomes discharged

Schu Eco Energy
meets the highest industry standards for energy efficiency

BATTERY MAINTAINERS

Energy-efficient solutions for various applications—charge and maintain power sport, car and boat batteries.

12V 750~800 mAh
Fully Automatic Battery Maintainer

Great for basic maintaining applications—power sport, car and boat batteries. Easy to use.

- Rated for 300 CCA
- Charging status LED indicator
- Microprocessor controlled
- Multi-stage charging for added precision, safety & battery life
- Float mode monitoring
- Reverse hook-up protection

SC1278
750 mAh
Available in USA

CHARGER ACCESSORIES

Schumacher offers a wide variety of durable accessories for battery chargers and maintainers—great for both garage and under-the-hood environments. Accessories include quick-connect cables, wall mounts and battery indicators to help you get the job done. The ring terminals easily attach to hard to reach batteries, keeping your battery charged between rides and maintained in the off-season. Its covered, 7.5A in-line, replaceable fuse provides overload protection for the battery and cable, while the weather guard cap protects the cable from the elements when not in use. And the SA827 allows to mount a unit outside of the work area—perfect for some of our chargers/maintainers.

Wall Mount Bracket

Mount outside the work area for safety and convenience. Perfect for some Schumacher chargers/maintainers.

JUMP STARTERS

THE NEXT GENERATION OF LITHIUM

The SL1452 has the superior power of 4-Cell Lithium Technology in a compact design that is perfect to keep on hand for emergencies on the road. It provides up to 2000 peak amps of jump-starting strength, strong enough to jump 10.0L Gas | 10.0L Diesel engines, and can be used a whopping 50 times before needing a charge. Uses Auto Pre-Boost technology for ultimate cold temperature starting. Between the Wireless 10W Fast Charging, 3A USB Port, and 2.4A USB ports, keeping all of your smartphones, tablets and more fully charged is not an issue. The safety of Lithium Ion Protection prevents reverse polarity, short circuit, low voltage, high temperature, and reverse charging. Add in the auto reset and easy-to-read XL LCD Display and the SL1452 is undeniably safe and easy to use. The built-in 3-mode LED Light tops off the pure usefulness of this portable pack. Superior power and excellent design is what you can expect from any Schumacher product, and this jump starter & power pack is no exception.

JUMP STARTER FEATURES

4C LITHIUM Advanced 4-Cell High-Performance Lithium Technology

AGM AGM Technology—Lead-Acid Maintenance-Free

4.0L GAS

6.0L GAS | 3.0L DIESEL

8.0L GAS | 6.0L DIESEL

10.0L GAS | 10.0L DIESEL

PreBoost — Pre Boost Technology
for ultimate cold temperature starting

3.0 — 3.0A USB Port
4X faster charging. For fast chaging

2.4 — 2.4A USB Port
2X faster charging. Charge all USB devices, including smartphones and tablets

10W Wireless Charging
Forget the cables with wireless fast charging

2.0A USB Port Input
recharge ultra fast

XL DISPLAY — XL LCD Display
3X larger display. Back lite for charging status

Built-In LED Light
energy efficient ultra bright LEDs

12V — Reverse Hook-up Protection
helps protect battery and jump starter from damage

Power Inverter
120V AC power - 2 outlets to power small appliances and electronics

Air Compressor
with pressure gauge, nozzles & storage area; for sports balls, car and bike tires

High-Low Air Inflator/Deflator
for inflatable mattresses, pool rafts and beach balls

Schu Eco Energy
meets the highest industry standards for energy efficiency

LITHIUM ION JUMP STARTERS

Compact and lightweight, yet powerful, these lithium ion jump starters quickly start vehicles in emergencies. They also provide fast charging for mobile devices, such as smartphones, mp3 players and tablets.
Our water-resistant models are ideal for power sports and marine applications.

600 Amp
Lithium Jump Starter

Advanced 4-Cell Lithium technology. Works with 4 cylinder cars—ideal for power sports and motorcycles.

BOOSTER CABLES

Having a sluggish vehicle battery can keep you from where you need to be, and Schumacher's line of booster cables will help start the battery power flowing again when you need it most. Our high amperage and extra long booster cables with strong contoured jaws for top or side terminal batteries can assist in starting everything from small vehicles to large trucks. Keeping a set of these cables around is a must in case of emergencies.

BC8
Available in USA and Canada

900 Amp | 25 Ft Length | 1 Gauge
Extreme Power Booster Cables

Extreme heavy-duty jaw design for use with top or side terminal batteries

- 25-foot hook-up flexibility: hood-to-hood, side-to-side, front-to-back
- Flexible to -40°F for best conductivity & power transfer
- Color-coded cables for easy polarity identification
- Heavy-duty spring for vise-like gripping power
- Zinc-plated steel clamps—protect against rust and corrosion
- Pressure-crimped connections for low resistance and best performance

PORTABLE BACKUP POWER

POWER ON-DEMAND, READY FOR CAMPING AND TAILGATING.

The Schumacher Portable Power Generators, a backup power system that can supply household electricity as an excellent alternative to a traditional generator. The unit is quiet and has no fumes or fuel, making it safe for indoor use. An excellent source of emergency power, or to power a tailgate event or campsite, the Portable Power Generator can run for 11 hours powering a table lamp, TV set, LED lights, a speaker and a laptop.

Built with either AGM batteries or Advanced Lithium Ion-powered battery cells, the Portable Power Generator has two 110V AC outlets and three USB outlets capable of powering a small refrigerator for almost 24 hours, keep a laptop running for more than four days, or even power a TV for an entire day. As a power source, it could recharge a typical cell phone 70 times, or recharge a laptop 17 times over. The unit also includes a bright LED light that can flash an "S-O-S" signal.

135 Amp
6V | 12V Battery Load Tester
12V Charging/Starting System Analyzer

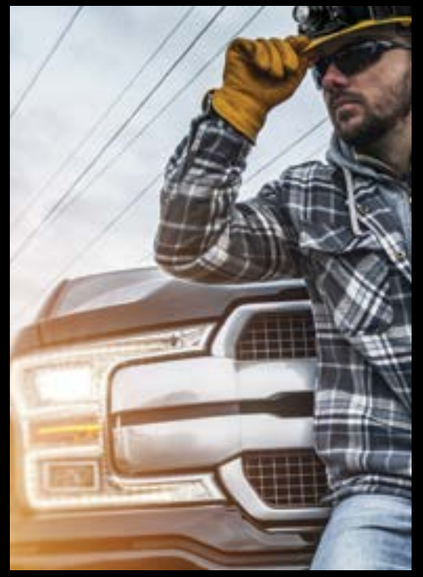
For conventional and maintenance-free batteries in cars, light trucks, lawntractors and RVs

- Test battery state of charge, battery cranking ability, charging system output and starter system
- Quick and easy to use—complete test done in less than 10 seconds
- Fully insulated, color-coded clamps
- Completely portable—external power source not required

WORK LIGHTS

Use the most advanced LED technology on your next project.

Keep your work area illuminated, these lights feature different colors, magnets and hooks to free your hands, swiveling heads to aim it where you need it and various lumens to fulfill your lighting needs. Having light readily available at your pocket is ideal in most shops and garages. These work lights have you covered with pocket clips and hooks. Plus, the penlight is extra lightweight and the adjustable magnetic pocket clip allows for hands-free use. All of these lights either have advanced rechargeable lithium-ion batteries or replaceable batteries and a bonus torch light on the ends of most lights



WORK LIGHT FEATURES

LITHIUM ION — Lithium Ion Technology	Replaceable AAA or AA batteries
LED Charging Level Indicators	Green LED Beam
SMD Technology (Surface Mount Device)	Red LED Beam
COB LED Technology (Chip On-Board)	Motion Sensor Activation
Cree® LED — Cree High-Performance LED	Hat Clip
CRI — Color Rendering Index Rated	Belt / Pocket Clip
Color Match—Accurately Match Color For Bodywork	180 Degree Swivel
Magnetic Base or Rear	Swivel Hook
360° — Unique ball joint Enables 360 Degree Swivel and Tilt	Torch Light
Compact Pen Shape Design	USB Power Pack

FARM & RANCH

Built for heavy-duty farm equipment.

The growing Farm and Ranch market hasn't gone unnoticed by manufacturers and retailers. That's why Schumacher has created an expanded line of battery chargers, jump starters and power inverters with special features and packaging that appeals to our rural customers. New additions include battery maintainers for vehicles in storage, chargers suitable for most charging applications, as well as heavy-duty chargers with engine starting capability. New jump starters range from 800 to 1200 peak amps and feature DC power, lights and USB ports. Several models also include an air compressor.

Ship'n Shore®

SHIP 'N SHORE

Charge and maintain marine batteries.

Our Ship 'n Shore line of battery chargers, jump starters, power converters and accessories continues to grow. We've introduced jump starters and multi-bank chargers to this line for those who need to charge multiple batteries at the same time. As always, we've developed exciting, attention-grabbing product and packaging that expresses the uniqueness of these chargers, targeted at this rapidly growing market. Get "on-board" with Schumacher.

Keeping your battery charged year around is an important part of your boat's regular maintenance. Because both cold and heat affect your battery's ability to perform at peak level, the Schumacher Ship 'n Shore multi-bank is an important part of your on-board checklist. Don't get caught on the water without it.

12V 15A 2-Bank
On-Board Sequential Battery Charger

Ideal for marine deep-cycle batteries—charges up to two batteries sequentially.

- IP65 waterproof construction.
- Easy push-button controls
- 6 ft input and output cables
- Can be permanently mounted

SC1389
Available in USA and Canada
EN FR SP

12V 15A 3-Bank
On-Board Sequential Battery Charger

Ideal for marine deep-cycle batteries—charges up to three batteries sequentially.

- IP65 waterproof construction.
- Easy push-button controls
- 6 ft input and output cables
- Can be permanently mounted

SC1485
Available in USA and Canada

12V 2.4W
Solar Battery Charger/Maintainer

This water-resistant solar panel trickle charges 12V battery and extends battery life. Ideal for boat, car, motorcycle, snowmobile, watercraft, lawn tractor, truck, ATV, RV and more

- Environmentally safe
- Water-resistant
- Works in cloudy conditions
- Extends battery life with minimal maintenance

12V 4.8W
Solar Battery Charger/Maintainer

This water-resistant solar panel trickle charges 12V battery and extends battery life. Ideal for boat, car, motorcycle, snowmobile, watercraft, lawn tractor, truck, ATV, RV and more

- Environmentally safe
- Water-resistant
- Works in cloudy conditions
- Extends battery life with minimal maintenance

SA1471
Available in USA and Canada

12V Ring Terminal Battery Indicator Cable

Pass through connector allows quick-connect for battery charging.

- Durable design for outdoor and under-the-hood environments
- Ring terminals connect quickly and easily to battery
- 24-inch, 18 AWG cable
- 3-color battery status LED provides 24/7 battery health information
- Weather-guard cap
- 15A replaceable in-line fuse for extra overload protection

EV CHARGERS

Experience the most advanced charging technology.

When it comes to keeping your electric vehicle charged, the SC1455 has you covered. It is 3 times faster than a Level 1 charger, has a whopping 28 feet of cord to reach the driveway from the wall socket, and LEDs show the charge status even in the dark. An ergonomic design that also helps keep out water and dirt, plus the overcurrent and overvoltage protection make this charger a comfortable and safe choice. It is compatible with any electric vehicle with the standard J1772 connector including Chevy Volt, BMW, Nissan Leaf, Prius Prime, Honda Clarity, Kia Niro, Toyota Prius, Fiat, Ford, and Tesla. Superior power and excellent design is what you can expect from any Schumacher product, and this EV Charger is no exception.

LEVEL 1 : 120V

3X

3X FASTER CHARGING
Charging Speed Up to 3x faster: This Level 2 EV charger can charge your vehicle 3x faster than the Level 1 charger. Always be prepared before you drive, 28-feet cord is long enough to reach the driveway from the wall socket.

LEVEL 1 & LEVEL 2
Two Different Charging Options: This Level 2 EV charger works at 240V/16A with a NEMA 6-20P (like the dryer/washer outlet), and with a free adapter it could be changed into 120V/16A charging with NEMA 5-15.

UNIVERSAL CONNECTOR / CONNECTEUR UNIVERSEL
Works with any EV with standard J1772 connector in North America, compatible with Chevy Volt/BMW/Nissan Leaf/Prius Prime/Honda Clarity/Kia Niro/Toyota Prius/Fiat/-Ford and Tesla (with J1772 adapter).

28FT **28 FT CORD**

LEVEL 2 : 240V

PROTECTION & PERFORMANCE
Excellent Protection Performance: Indoor installation for longer life span. Secure your charger with lighting / leakage / overcurrent / overvoltage protections. LED indicators help read the charging status and are easily visible in the dark.

Connector for Electric Vehicles 2251

RELIABLE ASSURANCE
The SAE Standard J1772 is UL listed.

LED INDICATORS
The four LEDs show charging status and are easy to see at night. See the user manual for more details.

ERGONOMIC DESIGN
The hand-held ergonomic design is comfortable to hold and the rubber cover on the top is helps keep out water and dirt.

16A Level 1: 120V | Level 2: 240V
EV Charger

Charging Speed Up to 3x faster. Works with any EV with standard J1772 connector in North America

- Excellent Protection Performance
- SAE Standard J1772 is UL listed.
- Four LEDs show charging status and are easy to see at night.
- Hand-held ergonomic design
- 28 Ft cord

DSR CORPORATION
POWERED BY SCHUMACHER

DSR PROSERIES

BUILT FOR PROFESSIONALS.

Designing products for today's professional requires manufacturers of technical tools and equipment to identify the current and future needs of the new generation of technicians and the technologies they service. DSR provides a never-ending commitment to produce the best products possible and technical capabilities that are already two steps into the future. DSR products are designed with commercial-grade, heavy-duty construction and have patented, state-of-the-art charging, testing and safety technologies built in for ease of use and functionality. With patented microprocessor controlled technology and Thermal Runaway Protection, DSR products feature the latest in engineering design and technology. Select models charge standard, AGM, gel and deep-cycle batteries for industrial, automotive, power sport, RV, lawn and garden, and farm and ranch equipment.

DSR PROSERIES
FEATURES

12V charges 12V batteries

6V|12V charges 6V/12V batteries

12V|24V charges 12V/24V batteries

Fully Automatic Battery Charger/Maintainer
keeps stored lead-acid batteries charged, charges and maintains small batteries

Scrolling Digital Messaging
The easy-to-read, animated display provides step-by-step instructions to properly charge your battery

Hook Attachment
hang outside the work area for safety and convenience

Microprocessor Controlled
multi-stage charging for added precision, safety and battery life

Auto-voltage Detection
automatically detects 6 or 12 volt batteries

13.6V Service mode
maintains a stable voltage at 13.6V and prevents discharged batteries during service or when sitting idle in a showroom.

Massive Engine Starting Power
powerful enough for starting SUVs, trucks and large engines

Heavy-Duty Retractable Handle
for compact storage

Start/Stop Button
simply press the button to start or stop charging

Flash Reprogramming
Power supply for consistent and stable power at OEM specific voltage up to 70 Amps continuous, 100 Amps peak.

Memory Saver Mode
12V DC port connection for maintaining or saving vehicle settings while changing battery

Schu Eco Energy
meets the highest industry standards for energy efficiency

12V 10A
Battery Charger with Service Mode

Fully automatic, microprocessor-controlled ProSeries Rapid Charger.

- LED Indicators—show charging status
- Hook Attachment—allows unit to hang safely outside the work area
- 13.6V Service mode—maintains a stable voltage at 13.6V and prevents discharged batteries during service or when sitting idle in a showroom.

DSR117
Available in USA and Canada
EN FR SP

6V/12V 30A
Fast Charger

Designed for most battery types—standard, AGM, gel cell and $LiFePO_4$. Features 4 distinct charging modes.

- Service Mode—maintains a stable voltage at 13.6V and prevents discharged batteries during service or when sitting idle in a showroom.
- Recovery Setting
- Patented “Thermal Runaway” Protection
- Zero Start—Starts charging at 0.0 volts.
- Start/Stop Interface and LED Scrolling Display
- Reverse polarity, overcharge and short circuit protection

DSR137
Available in USA

6V/12V 60A
Fast Charger

Four distinct charging modes. Rugged construction—powder-coated heavy-duty steel case for durability.

- Patented “Thermal Runaway” Protection
- Start/Stop Interface and LED Scrolling Display
- Zero Start—Starts charging at 0.0 volts
- Recovery Setting
- Reverse polarity, overcharge and short circuit protection
- 4GA Ultra-Flexible Cables

DSR134
Available in USA
EN FR SP

12V 100A
Flash Reprogrammer/Power Supply with Battery Support

Up to 100 Amp power supply maintains stable voltage under varying loads during major vehicle ECU reprogramming and diagnostic work.

- Exchangeable power cord to accommodate different regional users
- Dual temperature controlled cooling fans
- Durable aluminum case
- Adjustable mounting brackets for easy installation to most shop vehicle lifts
- Flash Reprogram Function
- Mode button to select between Service and Boost modes

INC100

6V/12V 125A
Battery Charger with Engine Start

Powerful enough for SUVs, trucks and large engines. Designed for rugged use.

- 15<>40A Boost Mode/6A<>2A Charge
- Service Mode—maintains a stable voltage at 13.6V and prevents discharged batteries during service or when sitting idle in a showroom
- Scrolling Digital Display
- Battery Tester—provides charge level and helps diagnose electrical problems
- 125A Clamps with copper cable—for top- and side-mount battery posts

6V|12V AVD AUTO SOC

DSR145
Available in USA and Canada
EN FR SP

6V/12V 125A
Battery Charger with Engine Start

125A Engine Start. Powerful enough for SUVs, trucks and large engines.

- 15<>40A Boost/Service Mode; 6A Charge
- Advanced 5-Stage Charging
- Push-To-Start Charging—manually starts charger for use on batteries as low as zero volts
- Safe-start, reverse polarity and short circuit protection
- Alternator Tester

6V|12V AVD AUTO SOC

Available in USA
EN FR SP

6V/12V
4 Bank Battery Charger

Four Charging Banks—capable of charging 4 different batteries at the same time—each fully automatic & microprocessor controlled.

- Dual-bank charging—for large batteries, connect two banks to the same battery
- Multiple battery type settings—separate standard, AGM and lithium settings to assure a complete charge
- Safe-start, reverse polarity, short circuit, overcharge and thermal runaway protection
- Fan-cooled for durability and peak performance

6V|12V AVD START STOP SOC

DSR127
Available in USA
EN

6V/12V
8 Bank Battery Charger

Fully automatic, microprocessor-controlled charging banks—charge 8 different size batteries at the same time.

- Separate digital display for each bank
- Multi-stage charging algorithm
- Charger automatically selects from 2 to 12 amps output per bank
- Eight detachable 6 foot cables with 75 Amp, color-coded clamps
- Heavy-duty, fan-cooled steel case for durability and peak performance
- Recovery Mode – to recover sulfated Standard and AGM batteries

6V|12V AVD START STOP SOC

12V 1200 Peak Amp
Ultracapacitor/Lithium Ion Hybrid Jump Starter

Maintenance-free, suitable for gasoline and diesel engines. Ease of use with the most modern technology makes this jump starter a must have.

- Capacitor 3V 850F x 5 PCS
- Lithium Ion Battery 11.1V / 2200mAh
- 900A Cranking Amps
- 3 ways to recharge: connect clamps to vehicle's battery; to vehicle's 12V DC port; or lithium ion back-up battery
