

Cisco Meraki MV Smart Cameras for K-12 Schools

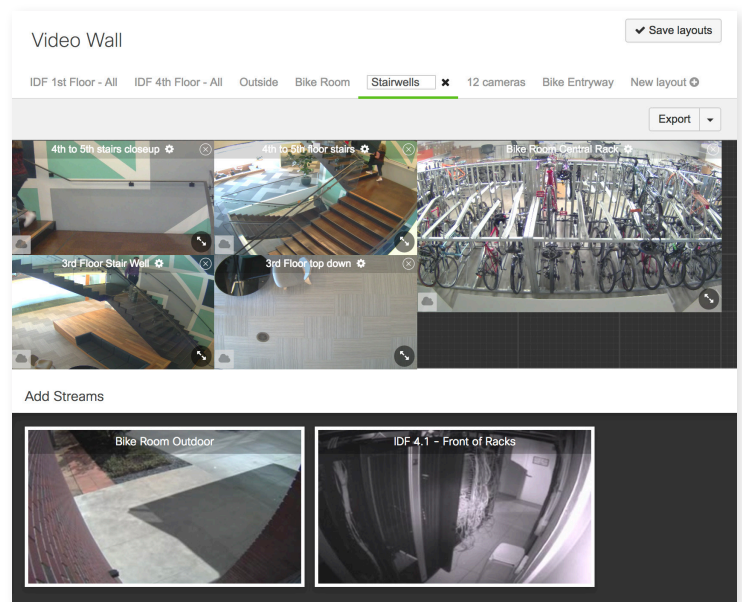

Intelligence, security, and simplicity in a single package

Overview

Cisco Meraki MV smart cameras make it easy to help keep students and faculty safer with intelligent tools and powerful, advanced analytics. Video is stored and processed on the camera, and all configuration and management is done from the Meraki dashboard. This simplified architecture reduces the cost and complexity associated with traditional systems, and eliminates the need for NVRs, software, or plugins.

Like all Meraki products, MV cameras provide zero-touch deployment and remote, centralized management through the cloud. Using just serial numbers, an administrator can add devices to the Meraki dashboard and begin configuration before the hardware even arrives on site.

Through the web-based dashboard, easily stream video and create video walls to monitor key areas at once. With granular access permissions, department heads and law enforcement can access footage from anywhere. With the MV Sense API, IT teams can access MV's machine learning-based analytics to create custom solutions that enhance the safety and security of schools.

Key Features

- Remote management through the cloud
- Intuitive dashboard interface is accessible from an internet browser, requiring minimal training
- On-camera video storage and optional cloud archive eliminate network video recorders (NVR) or servers, minimizing physical infrastructure
- Easily scale from one camera to thousands
- Time-saving tools like motion search and video clip export
- Granular access controls and user permissions
- Mobile app support for quick camera installation
- Wireless capable for easy analog upgrades
- Built-in analytics like motion heat maps and machine learning-based object detection

MV K-12 Case Studies

New Albany Plain Local Schools 4,800+ students

The 5-person IT team at New Albany Plain Local Schools seamlessly manages over 220 MV security cameras deployed across their middle school and high school buildings, without having any in-house knowledge about cameras. Thanks to email alerts configured in the Meraki dashboard, the team is made aware of issues as soon as they occur and can fix them with ease.

"With Meraki, there's no in house server to setup and maintain. With a small department, that's one less thing that we have to do. The cameras are all on the network in one spot and accessible from anywhere."
- Michael Voss, Director of Technology

Mount Vernon Independent School District 1,600+ students

Specialized access controls in the Meraki dashboard allow the security officer at Mount Vernon ISD to access MV security camera footage, without having to go through the IT team. Using the MV Motion Search feature, the officer was able to easily determine who backed into one of the coach's cars in the parking lot, without sifting through hours of footage.

"We work closely with our school security officer to determine where to place the cameras and what level of dashboard access is needed for individual users. When we add new cameras, we simply tag to a specific school and our existing users automatically gain access to those specific cameras. It's a no-brainer."
- Woodrow Thomas, Director of Technology

Benefits of the Cloud

- Automatic firmware upgrades and bug fixes
- Hardware purchases gain value over time with access to new features as they're developed
- No software, plug-ins, or drivers to download—everything is hosted natively in-browser
- Access all security cameras from anywhere in the world

Easy Licensing Model

- 1 license per each piece of hardware
- License includes 24/7 end customer support
- Provides access to the newest feature releases and bug fixes

The Meraki Product Portfolio

All Cisco Meraki devices are centrally and securely managed from the cloud using a single web-based dashboard. Our feature-rich, intuitive architecture enables customers to save time, reduce operating costs, and solve new business problems.

Wireless Access Points
Optimized for high-density with 802.11ac & Bluetooth

Security Appliances
Feature rich security & unified threat management platform

Switches
Layer 2 & Layer 3 switches for mission-critical networks

Insight
Improved user experience & deeper insight into your WAN

Endpoint Management
Unified management & control of thousands of devices

Security Cameras
Streamlines deployment & monitoring of video security systems
