

54 Series Remote Control

Features

Voice Commands

Take the guesswork out of navigating your Hopper system by using voice commands to find your programming, tune to channels, launch Netflix, and more!

Since the Google Assistant is built into your receiver, you can also use voice commands to find a recipe, get information on an actor, find weather and traffic in your area, manage your appointments, and get answers on pretty much anything else you want to know about.

Voice functionality requires active internet connection.

Remote Finder

Can't find your remote? Don't panic! Simply press the Locate Remote button on the front panel of your receiver.

Personalize Your Remote

With customizable buttons, you can turn closed captioning on and off, launch Netflix®, turn on Picture-in-Picture (PiP), record a program, and more, with just one click.

Let There Be Light

Too dark to see the buttons on your remote? Activate the backlighting on your remote by simply picking it up, moving it, or shaking it gently in a dark room.

Remote Buttons

Click a button on the remote to see its functions, or get a list of all buttons with their functions.

[Log in to shop remotes.](#)

Feature FAQ's

Why don't I have Google Assistant on my Voice Remote?

Follow these instructions to activate the Google Assistant on your receiver.

Why won't the Google Assistant show my calendar and other personal information?

Your Google account must be linked to your receiver to view personal information on your TV.

Why won't my remote change the volume on my TV?

Your remote may not be programmed to control functions on your TV. Check out these step-by-step instructions to pair your remote to your TV or another device.

Why won't my remote work with my DISH receiver?

Often, this problem is due to dead batteries, or a remote or receiver error. Follow these steps to resolve your remote control issue.

What type of batteries does my remote take?

Your remote takes two AA batteries.
