

Sustainability Reporting Frameworks

Task Force on Climate-related Financial Disclosures (TCFD)

The following table indicates where we provide climate-related disclosures identified in the TCFD framework. For more detailed discussion, see the referenced documents. This is our first disclosure mapping to the TCFD framework, and we intend to continue mapping our progress as we further develop our sustainability strategy and reporting.

TOPIC	RECOMMENDED DISCLOSURE	RESPONSE OR LOCATION
Governance		
Disclose the organization's governance around climate-related risks and opportunities.	a. Describe the board's oversight of climate-related risks and opportunities.	2020 Sustainability Report: <i>Board Oversight</i> , pages 39-44 2021 Proxy Statement: <i>Key Areas of Board Oversight</i> , pages 18-20 GE Governance Principles, page 3 GE Governance and Public Affairs Committee Charter, page 2
	b. Describe management's role in assessing and managing climate-related risks and opportunities.	2020 Sustainability Report: <i>Energy transition governance at management level</i> , pages 43-44
Strategy		
Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.	a. Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term.	2020 Form 10-K: <i>Risk Factors</i> , pages 44-51 (including risk factors related to "Industry dynamics and outlooks," "Customers & counterparties," and "Regulatory.") 2020 Sustainability Report: <i>Integrated approach to strategy, risk and sustainability</i> , pages 42-44
	b. Describe the impact of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning.	2020 Sustainability Report: <i>Energy transition governance at management level</i> , pages 43-44
	c. Describe the resilience of the organization's strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario.	
Risk Management		
Disclose how the organization identifies, assesses, and manages climate-related risks.	a. Describe the organization's processes for identifying and assessing climate-related risks.	2020 Sustainability Report: <i>Integrated approach to strategy, risk and sustainability</i> , pages 42-44
	b. Describe the organization's processes for managing climate-related risks.	
	c. Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management.	
Metrics and Targets		
Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.	a. Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process.	2020 Sustainability Report: <i>Framework for climate change related risks and opportunities</i> , pages 43-44
	b. Disclose Scope 1, Scope 2 and, if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the related risks.	2020 Sustainability Report: <i>Climate change</i> , page 66 (Scope 1 and 2 emissions). See also page 69 regarding our ambition for GE to be a net zero company including the use of our sold products by 2050 (Scope 3 emissions).
	c. Describe the targets used by the organization to manage climate-related risks and opportunities and performance against targets.	2020 Sustainability Report: <i>2020 Climate change commitments</i> , page 67 (our goal of carbon neutrality for our own facilities and operations (Scope 1 and 2 emissions) by 2030). See also page 69 regarding our ambition for GE to be a net zero company including the use of our sold products by 2050 (Scope 3 emissions).

Sustainability Accounting Standards Board (SASB)

The following tables indicate where we provide disclosures identified in SASB standards related to our businesses. As a diversified industrial manufacturer, our businesses span several industries, so we have included metrics from the following SASB industry standards: (1) Resource Transformation – Aerospace & Defense, (2) Resource Transformation – Electrical & Electronic Equipment, (3) Renewable Resources & Alternative Energy – Wind Technology & Project Developers, and (4) Health Care – Medical Equipment & Supplies. This is our first disclosure mapping to SASB standards, and we have focused on a limited number of categories below that best align with available information and data. We intend to continue mapping our progress as we further develop our sustainability strategy and reporting.

TOPIC	ACCOUNTING METRIC	CATEGORY	UNIT OF MEASURE	CODE	RESPONSE OR LOCATION
RESOURCE TRANSFORMATION: AEROSPACE & DEFENSE					
Table 1. Sustainability Disclosure Topics & Accounting Metrics					
Energy Management	(1) Total energy consumed, (2) percentage grid electricity, (3) percentage renewable	Quantitative	Gigajoules (GJ), Percentage (%)	RT-AE-130a.1	Million MMBtu , Total MWh and Renewable MWh (converted to GJ) from 2020 column on table of page 11 and page 66 in ESG report.
Hazardous Waste Management	Number and aggregate quantity of reportable spills, quantity recovered	Quantitative	Number, Kilograms (kg)	RT-AE-150a.2	2020 Sustainability Report: Spills and Releases 2020 number page 11 and page 65
Data Security	Description of approach to identifying and addressing data security risks in (1) company operations and (2) products	Discussion and Analysis	n/a	RT-AE-230a.2	2020 Sustainability Report: <i>Privacy and Cybersecurity</i> , pages 50-52
Fuel Economy & Emissions in Use-phase	Description of approach and discussion of strategy to address fuel economy and greenhouse gas (GHG) emissions of products	Discussion and Analysis	n/a	RT-AE-410a.2	<p>The future of flight will continue to be defined by how the aviation industry innovates to improve sustainability and efficiency. Advances in engine architectures, aerodynamics, and materials developed by GE and Safran Aircraft Engines through CFM International* have resulted in today's aircraft engines consuming 40 percent less fuel – and emitting 40 percent less CO₂ – than engines manufactured in the 1970s and 1980s. We are currently developing the next suite of engine technologies – including open fan architectures, hybrid-electric and electric propulsion concepts, and advanced thermal management concepts – that offer the potential to achieve at least a 20 percent additional improvement in fuel efficiency compared to today's state of the art single-aisle aircraft engines. GE Aviation is also supporting industry initiatives to approve and adopt 100 percent Sustainable Aviation Fuel (SAF) and investigating hydrogen as the zero-carbon fuel of the future.</p> <p>2020 Sustainability Report: <i>Developing the Future of Flight: New Technology for Sustainability and Efficiency</i>, pages 31-36</p> <p>*CFM International is a 50-50 joint company between GE and Safran Aircraft Engines.</p>
Materials Sourcing	Description of the management of risks associated with the use of critical materials	Discussion and Analysis	n/a	RT-AE-440a.1	2020 Sustainability Report: Ethical Supply Chain and Responsible Mineral Sourcing, page 79 .
Business Ethics	Discussion of processes to manage business ethics risks throughout the value chain	Discussion and Analysis	n/a	RT-AE-510a.3	2020 Sustainability Report: <i>Always with Unyielding Integrity: GE's Ethics & Compliance Program</i> , pages 48-49 ; <i>Human Rights</i> , pages 77-78 ; <i>Ethical Supply Chain and Responsible Mineral Sourcing</i> , page 79

ACTIVITY METRIC	CATEGORY	UNIT OF MEASURE	CODE	2020 RESPONSE
Table 2. Activity Metrics				
Production by reportable segment	Quantitative	Number	RT-AE-000.A	GE discloses revenues by segment. 2020 Form 10-K: MD&A — <i>Segment Operations</i> , pages 9-19
Number of employees	Quantitative	Number	RT-AE-000.B	GE discloses General Electric Company and consolidated affiliates employed by segment. 2020 Form 10-K: <i>About General Electric</i> , pages 4-5

RENEWABLE RESOURCES & ALTERNATIVE ENERGY: WIND TECHNOLOGY & PROJECT DEVELOPERS					
Table 1. Sustainability Disclosure Topics & Accounting Metrics					
Workforce Health & Safety	(1) Total recordable incident rate (TRIR) and (2) fatality rate for (a) direct employees and (b) contract employees	Quantitative	Rate	RR-WT-320a.1	GE does not report fatalities by business segment. 2020 Sustainability Report: <i>Safety</i> , page 61
Materials Sourcing	Description of the management of risks associated with the use of critical materials	Discussion and Analysis	n/a	RR-WT-440a.1	2020 Sustainability Report: <i>Ethical Supply Chain and Responsible Mineral Sourcing</i> , page 79
Materials Efficiency	Description of approach to optimize materials efficiency of wind turbine design	Discussion and Analysis	n/a	RR-WT-440b.3	<p>Lean is a set of principles that emphasizes customer focus, elimination of waste, high-quality growth, and ruthless prioritization of work to improve safety, quality, delivery, and cost. In connection with GE's sustainability strategy, lean is more than a contributor – lean is fundamental to how we execute our strategy. Lean principles help us examine processes and continually improve them by solving problems at their root cause. Lean principles allow us to identify where we can ensure worker safety, limit emissions, eliminate hazardous wastes, reduce our footprint, and deliver essential, life-saving products quickly and efficiently. 2020 Sustainability Report: <i>Lean Principles Applied to Sustainability: Our Strategy for Continuous Improvement and Eliminating Waste</i>, page 45</p> <p>Backed by funding from the U.S. Department of Energy (DOE), GE researchers are incorporating superconducting magnets into offshore wind turbine generators that convert strong sea winds into electric power, lowering costs, simplifying the turbine-manufacturing supply chain and supporting DOE's goal of nearly tripling wind power's role in U.S. energy production – to 20 percent – over the next decade. The use of superconducting magnets also would eliminate the need for rare earth materials, essential ingredients in the permanent magnets currently being used in offshore wind turbines. 2020 Sustainability Report: <i>Leading the Energy Transition: Sustainability, Reliability and Affordability</i>, page 26</p>

ACTIVITY METRIC	CATEGORY	UNIT OF MEASURE	CODE	2020 RESPONSE
Table 2. Activity Metrics				
Number of delivered wind turbines, by wind turbine class	Quantitative	Number	RR-WT-000.A	<p>GE discloses Onshore and Offshore wind turbine sales units and Repower sales units 2020 Form 10-K: Onshore and Offshore (in units), page 13</p> <p>2020 Sustainability Report: <i>Our Innovation: GE is Building Technology for a Sustainable Future – Energy Transition</i>, page 16</p>
