

Quick Reference Guide Hydraulic & Industrial Hose

Overview and Pull-out Chart

ENGINEERING YOUR SUCCESS.

HOSE PRODUCTS DIVISION

The market leader and your supplier of choice

Parker offers the most comprehensive line of hoses, fittings, equipment and accessories you'll need. And if there's something you need that's not a standard product, we're able to design and manufacture it for you with ease.

You'll also benefit from our ultimate competitive advantage – our network of distribution outlets that can provide our products nearly **anytime** and **anywhere**. We strive to provide customers with local engineering, local products and local service. Parker offers the largest selection of hoses plus more fitting sizes than any other manufacturer. You'll find a wide variety of hoses including braided, spiral and multi-purpose, and more than 4,500 fittings. Parker products have been designed, tested and approved to meet and exceed global standards.

The right product is available for your application, including hose that features a variety of abrasion-resistant cover choices, flexibility, a wide range of media compatibility and more – characteristics that make Parker the hose supplier of choice for customers that demand the most from their equipment.

SAFETY GUIDE FOR SELECTING HOSE, TUBING, FITTING AND RELATED ACCESSORIES

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF HOSE, TUBING, FITTINGS, ASSEMBLIES OR RELATED ACCESSORIES ("PRODUCTS") CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE. POSSIBLE CONSEQUENCES OF FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THESE PRODUCTS INCLUDE BUT ARE NOT LIMITED TO:

- Fittings thrown off at high speed
- High velocity fluid discharge
- Explosion or burning of the conveyed fluid
- Electrocution from high voltage electric power lines
- Contact with suddenly moving or falling objects that are controlled by the conveyed fluid
- Injections by high-pressure fluid discharge
- Dangerously whipping hose
- Contact with conveyed fluids that may be hot, cold, toxic or otherwise injurious
- Sparking or explosion caused by static electricity buildup or other sources of electricity
- Sparking or explosion while spraying paint or flammable liquids

Before selecting or using any of these products, it is important that you read and follow the instructions. Only hose from Parker's Stratoflex Products Division is approved for in flight aerospace applications, and no other hose can be used for such in flight applications (Parker Publication No. 4400-B1).

OFFER OF SALE

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the "Offer of Sale."

**ANY PRESSURE.
ANY PROJECT.**

ONE SOLUTION

GlobalCore is the future that OEMs and end users around the world have been asking for: a unified family of robust hydraulic hoses designed to endure the tough conditions where work gets done. Specified by working pressure, not construction, GlobalCore is the world's first high-performance cohesive hose and fitting system. Designed, built, and tested to the ISO 18752 specification, the GlobalCore system simplifies specification for OEMs and end users around the globe by providing a comprehensive family of products for the most commonly used constant working pressure classes. Choose from six hoses, three cover options, and two fitting series, all available through a worldwide network of distributors.

OUR HOSES ARE EASILY IDENTIFIED BY APPLICATION, MARKET OR BRAND

To meet our customers' specific application requirements, we offer a broad range of innovative products designed to enhance performance, productivity, and safety for both the industrial and hydraulic hose markets.

GlobalCore

Specifying GlobalCore, a unified system that delivers hoses built on the ISO 18752 specification, provides opportunities for OEMs and end users to improve efficiency in operations, increase uptime with a streamlined selection process and longer service life for 1,000 to 6,000 psi applications.

Hydraulic Industry Standard

Industry standards set specific requirements concerning construction type, size, tolerances, burst pressure, and impulse cycles. Available in either braided or spiral constructions. For use with petroleum-based fluids, diesel fuel, hot lubricating oil, air, ethylene glycol anti-freeze, and water.

Transportation

For marine fuel lines, L.P.G. and C.N.G. hose, and truck applications such as power steering, cab tilt, air intake, diesel fuel, air brake, and lube line systems.

Specialty Hoses

Designed to offer the widest range of low, medium and high pressure specialty hydraulic, pneumatic, industrial and hybrid hoses in the industry. They are resistant to heat, fire, ozone, weather, chemicals, oil, flames, UV and abrasion and deliver engineered solutions to all your specialty hose product needs and applications.

Steam

Parker's steam hoses transfer steam as part of high temperature cleaning systems for in-plant/ refinery service – such as railcars, tanks and vessels – and to keep process equipment operating efficiently. The hoses provide a selection of several inner tube and outer cover materials to handle a wide range of service conditions.

Oil & Gas

Parker provides the knowledge needed to produce hoses fit for severe conditions in today's oil and gas industry. Parker's hoses are made for reliable, continuous use in offshore/ onshore upstream applications, as well as midstream/ downstream transfer applications.

Water

Parker's water hoses are offered in multiple pressures and sizes for cleaning, irrigation, spray, wash down and large diameter suction and discharge applications. Our water hoses are abrasion and weather resistant for robust service in harsh environments and applications.

Fuel

Parker fuel hose handles a wide variety of petroleum based fuels in depot, dispenser, dock, engine fuel line, in-plant transfer, transport and tank truck suction and discharge service safely and efficiently. The hoses are compatible with numerous fuels such as avgas, biodiesel, diesel, gasoline and jet fuel, and are available in a diverse range of pressures, sizes and temperature capabilities.

Petroleum

In the petroleum industry, a faulty or broken hose can have extremely serious consequences. That's why the inner tubes and covers on Parker's industrial hoses are specifically chosen and engineered to provide maximum life even in the most demanding petroleum applications such as transfer, suction and discharge and blending.

PVC

Flexible PVC tubing also offers a broad range of chemical and corrosion resistance, excellent abrasion and wear resistance, rubber-like flexibility with outstanding flow characteristics. These features, along with various construction options offered and the different formulations available, makes PVC hose suitable for so many applications.

Air & Multipurpose

Parker air hose provides robust service in air tool, compressor, manufacturing/process equipment and general industrial applications. Serving a broad range of markets, the hoses are offered in flexible rubber constructions and lightweight, abrasion resistant thermoplastic constructions, each in multiple colors, pressures and sizes.

Material Handling

Our vast assortment of hoses includes specifically engineered material handling hoses that are constructed to withstand the most abrasive materials needing transfer, and to required standards.

Chemical

Parker chemical hoses safely handle a wide variety of acids and chemicals for depot, dock, in-plant transfer, tank truck and transport suction and discharge service. The hoses feature several different inner tube materials to cover a wide of range of media, pressures, sizes and temperature capabilities.

QUALITY SERVICES FOR A COMPETITIVE ADVANTAGE

Asset Management System

Parker Tracking System (PTS) is an innovative component-tagging and asset management solution. In addition to labeling components, users can document, replace, track, inspect, plan and analyze key equipment data with PTS.

www.parker.com/pts

Hose Cleaning Services

Parker offers hose cleaning services to protect the life of hose assemblies from dirt and debris, which can cause unwanted hose failures. A pellet flushing system is used after hoses are cut and crimped to remove debris from inside the assembly. To ensure cleanliness, we recommend utilizing Parker Clean Seal Caps. Both the pellets and the caps are an easy and quick way to ensure you have a contamination-free hose assembly.

www.parkerhose.com

Custom Tube Assemblies & Hose Tube Combinations

Parker's tube assemblies or hose and tube combinations provide an alternative to rubber hose. Tube assemblies are a viable alternative in some applications where the port to port mounting is consistent and where the vibration and movement is limited. All assemblies are custom made to your specifications. Parker is ideally suited to supply high volume assemblies for equipment manufacturers but can also supply for quantities as small as five.

For more information, please call:

440-943-5700

ParkerStore

ParkerStores are a global network of independently-owned industrial retail operations with more than 3,500 service points around the world. Whether it's through a brick-and-mortar location or from one of our mobile Hose Doctor operators, Parker is your best bet for on-the-job help.

www.parkerstore.com

HOSE ACCESSORIES

Spring Guard & Armor Guard: Constructed from steel and designed to prolong the life of your hose lines that are exposed to rugged operating conditions.

PolyGuard & Parkoil: Protect and bundle your hoses with these spiral guards that minimize kinking and cannot rust. Both the PolyGuard and Parkoil install without removing the hose.

Partek Sleeve: Nylon woven protective sleeving gives you tough hose abrasion resistance with two versions of coverage – standard “AS” and a lighter “PS” – both providing protection and bundling capability.

Firesleeve: A flame-resistant sheath that protects your hose from extreme high temperature conditions.

NEXWRAP™ Polyethylene Spiral Chafe Guard: A polyethylene spiral chafe guard designed as a conduit/harness to protect and bundle cable, hose, tubing and wiring.

Strain Relievers: Helps prevent the hose from bending too close to the fitting and remove stress from the end of the crimp.

Partek Defense: A nylon woven hose sleeve designed to provide reliable, long-lasting, protection to personnel and equipment in the event of a hose burst by containing the energy of the burst.

Partek Wrap: A lightweight, highly flexible nylon sleeve designed for added abrasion resistance and bundling multiple hoses or cables after assembly.

EXTREME HOSE FLEXIBILITY WHERE TIGHT ROUTING IS A CHALLENGE

Designed to handle extreme bends while allowing full-flow, kink-free performance, E-Z Form hose effectively replaces preformed hoses and hose bent metal tube assemblies in many applications – eliminating special design, tooling and fabrication costs and associated long lead times. E-Z Form is crush resistant and kink resistant for unimpeded flow, offers superior flexibility for easy handling and installer/operator convenience, and is resistant to abrasion and weathering for maximum performance.

E-Z FORM

In addition to our Parkrimp crimpers, we offer a complete line of adjustable and production crimpers. Many are also available with programmable touchscreen controllers, ensuring that the assembly process is as easy as possible.

PARKER'S EXTENSIVE EQUIPMENT LINE

also includes hose saws, push-on stands, power units as well as cleaning and capping systems to help you every step of the way while fabricating hose assemblies.

Cut-Off Machines: Fast cutting and relatively low initial investment in equipment.

Hose Insertion Depth Blocks and Fitting Push-on Stands: Boost productivity and quality of hose assemblies.

Portable Crimper Power Units: Increase productivity and versatility for smaller hose assembly needs.

Hose Cleaning and Capping Systems: Rid the assembly of any possible contamination and extend hose life.

TH8-380
Production Crimper

CRIMP SPECS: QUICK, EASY & EXACT

To help you with your equipment, Parker provides an exclusive online software application: **CrimpSource**. CrimpSource supplies you with the necessary crimp specifications to adhere to our strict safety standards. It is the industry's most complete resource for crimper technical information. It provides easy access to all the specifications necessary to correctly fabricate a factory-quality hose assembly. With a series of drop down menus, users can choose a crimper, the type of hose, and compatible fittings. Once the crimper is selected, the user is provided with crimp specs, crimper die recommendations, technical manuals, and crimper decals available for immediate printing.

For complete product information on all of Parker's crimpers, please visit: www.parker.com/crimpsource

MULTIPLE FITTING CONFIGURATIONS FOR BOTH HYDRAULIC AND INDUSTRIAL APPLICATIONS

FLANGES

Available in SAE Code 61, SAE Code 62, DIN, ISO and Caterpillar® specification. Flanges come in an array of configurations and sizes.

Material Steel and stainless steel
 Sizes 1/2" through 2-1/2"
 Pressure Up to 6000 psi

SEAL-LOK®

Designed with a flat face and O-ring to create the optimal seal for leak-free hydraulic applications.

Material Steel and stainless steel
 Sizes 1/4" through 2"
 Pressure Up to 6000 psi

METRIC

Fittings are available in DIN, BSP, BSPP, ISO, French and JIS standards.

Material Steel and stainless steel
 Sizes 1/8" / 3 mm through 2" / 38 mm
 Pressure Up to 6000 psi

JIC 37° and SAE 45°

Flared fittings come in many shapes and sizes to meet your connection requirements.

Material Steel and stainless steel
 Sizes 1/4" through 2"
 Pressure Up to 6000 psi

SAE 100R5

Fittings available in shapes and sizes that meet most SAE 100R5 hose and air conditioning hose applications.

Material Steel and brass
 Sizes 3/16" through 1-13/16"
 Pressure Up to 3000 psi

SAE STRAIGHT THREAD

Fittings provide leak-free port connections. The threads hold the fitting in place while the O-ring creates the seal.

Material Steel and stainless steel
 Sizes 1/4" through 2"
 Pressure Up to 6000 psi

PIPE FITTINGS

Fittings create a metal-to-metal seal. Threads of the fitting mate with the threads of the connecting port or coupling.

Material Steel and stainless steel
 Sizes 1/8" through 2"
 Pressure Up to 12000 psi

ENHANCED SUPPORT FOR OUR HOSE SOLUTIONS

Circle of Safety: Many industrial hose manufacturers will suggest hose and fitting configurations for a given application, but they won't guarantee the combination will perform to the rated burst pressure of the hose. However, one of the benefits of working with Parker is that we assure the promise of quality industrial hose assemblies. Our Circle of Safety program establishes Parker's Hose Products Division as a single, accountable source with a specific performance guarantee to protect distributors and end users from accidents, unplanned downtime and increased liability.

www.parker.com/safehose

Industrial Hose Selector: Need a hose or fitting? Our hose selector application allows you to search the entire catalog of products from Parker's Hose Products quickly and efficiently. Narrow down precisely what you need with the STAMP process, or browse thousands of products by category.

www.parker.com/safehose

CADs: Parker has CAD models available for more than 4,000 of its hydraulic and industrial adapters and fittings. Models are accessible with all major CAD applications at:

www.parker.com/HPD_CAD

Instructional Videos: Hose Products Division offers a series of videos to help you better understand our products, services and capabilities in quick, easy-to-digest segments. Subjects include GlobalCore™, the Parkrimp™ crimping system, the basic elements of hoses, and more.

www.parker.com/HPD_Videos

INDUSTRY LEADING EQUIPMENT

PARKER DELIVERS EXCEPTIONAL QUALITY AND RELIABILITY WHEN IT COMES TO EQUIPMENT AND TOOLING. FACTORY-QUALITY HOSE ASSEMBLIES CAN BE QUICKLY, EASILY, AND COST EFFECTIVELY MANUFACTURED WITH PARKER'S INDUSTRY LEADING EQUIPMENT.

Parker's Parkrimp family of crimping machines enable any user to make factory-quality hose assemblies quickly, easily and cost-effectively. The Parkrimp-style crimpers are designed to crimp fittings to the proper diameter every time. Parker's Parkrimp system provides several key advantages such as:

Perfect alignment: Our exclusive Parkalign system positions the fitting in the die for a perfect crimp every time.

Efficient design: Bottom loading crimpers make it easier for operators to manage long hose lengths.

Color-coded linked dies: Our linked dies are color-coded by size for easy identification.

Durability: Parkrimp crimpers have been designed and manufactured to provide years of reliable service.

Parker Fluid Connectors Group

North American Divisions & Distribution Service Centers

Your complete source for quality tube fittings, hose & hose fittings, brass & composite fittings, quick-disconnect couplings, valves, and assembly tools, locally available from a worldwide network of authorized distributors.

Fittings:

Available in inch and metric sizes covering SAE, BSP, DIN, GAZ, JIS, and ISO thread configurations, manufactured from steel, stainless steel, brass, aluminum, nylon, and thermoplastic.

Hose, Tubing, and Bundles:

Available in a wide variety of sizes and materials including rubber, wire-reinforced, thermoplastic, hybrid and custom compounds.

Worldwide Availability:

Parker operates Fluid Connectors manufacturing locations and sales offices throughout North America, South America, Europe, and Asia-Pacific.

For information, call toll-free:
