

Where is your ERP now?

ERP systems are more versatile than ever. Once they organized and distributed data. Now they actively collect, filter and analyze data in real time. They can even act on the data to perform business processes on our behalf. Yet few ERP users have moved beyond the traditional starting point. Make great strides with small steps that get you over hurdles and tracking autonomy.

According to a recent survey of 450 executives

73%

of digital projects fall short of being transformational.¹

What's in your way?

Companies with more advanced mobile capabilities are **71% more profitable.**²

Most standard machine learning projects see **ROI that is 2-5x the cost** in the first year.⁴

According to a Cisco survey of IT and business decision-makers who implemented IoT, **70% reported improved customer satisfaction.**³

5 steps to help you get there

1

Find a business partner. IT can't do it alone.

2

Walk the floor.

3

Develop a data strategy.

4

Invest in use cases.

5

Go beyond traditional ROI calculations.

Take your company to the next level of productivity, customer satisfaction and profitability with digital transformation. Learn more at [ersuites.com](https://www.ersuites.com).
