- (a) - Temperature is 85 C for suffix N-N
- (b) - Temperature is 105 C for suffix T105
- (c) - These switches are SPST switches
- (d) - These switches are SPDT switches
- (e) - These switches are DPST switches
- (f) - These switches are DPDT switches
- (g) - These switches are SPTT switches
- (h) - These switches are DPTT switches

\* (a) - UL61058-1 - This is a tool switch with mechanical contacts and optional internal potentiometer, it does not contain a Solid State Switching device (tested mechanical only).

\* (b) - UL61058-1 - This is a tool switch with mechanical contacts serial and parallel to the Solid State Switching Device (SSD). Tested mechanical and electronically. Endurance was tested with simulated load, Heating test for the SSD was conducted based on the declared thermal current.

\* (c) - UL61058-1 - This is a tool switch with mechanical contacts serial to the solid state.

\*D1 - UL61058-1 - Switches with momentary contact.

\*E1 - UL61058-1 - The declared thermal current is 19A.

\*E2 - UL61058-1 - Heating Test for other parts has only been conducted for a duty cycle S3 with N/R=N/R=0.65, where N=13 minutes and R=20 minutes is.

\*G3 - UL61058-1 - IPX7 testing was completed on the complete switch without an end product enclosure. The switch gasket (seal) to the end product enclosure is evaluated in the end product testing.

\*Noe B4 - UL61058-1 - The tests were conducted with wire size 16AWG, stranded only.

\*Note 4 - UL61058-1 - the solder type terminal has evaluated the solderability of 260C.

\*Note A - UL61058-1 - When mounted in accordance with the manufacturer's instruction, this switch gets a protection degree of IP40.

\*Note A1 - UL61058-1 - These switches employ an integral potentiometer. The investigation was limited to the switching function of the switch. The insulating materials and spacings of the integral potentiometer should be investigated for compliance with the end-use product standard.

\*Note B - UL61058-1 - The tests were conducted with wire size 12AWG only, except the R-M rating. The tests for the R-M rating have been conducted with 1mm<sup>2</sup>.

\*Note B1 - The tests for rating R-M 13(12)A were conducted with wire size 18AWG on load side and 16AWG on line side, stranded only.

\*Note B2 - UL61058-1 - The tests were conducted with wire size 18AWG on load side and 16AWG line side, stranded only.

\*Note B3 - UL61058-1 - The tests for rating 4<13A were conducted with wire size 18AWG on load side and 16AWG on line side, stranded only.

\*Note B5 - UL61058-1 -The tests were conducted with wire size 1mm<sup>2</sup>, stranded only.

\*Note B6 - UL610581 - The tests were conducted with wire size 2.5mm<sup>2</sup>.

\*Note C - UL61058-1 the heating test with the contacts in series to the SSD were tested with the contacts short before bypass the SSD with the declared thermal current. In the end-use application the heating test should be conducted under the declared cooling conditions.

\*Note C1 - UL61058-1 - The declared thermal current is 4A.

\*Note C2 - UL61058-1 - The declared thermal current is 5.5A.

\*Note C3 - UL61058-1 - If provided with a "Unidirectional or Bidirectional Transient Voltage Suppressor Diode" connected to the motor terminals, the function shall be evaluated for compliance with the end-use Standard within the end product.

\*Note C4 - Switch 2711.888x has may a customer specific battery terminal and a female connector at the motor wire leads. Both terminals shall be investigated in the end use application.

\*Note D10 - UL61058-1 - Change Over Switch type 1202, described in this report can be optional mounted on this switch 1298.

\*Note D11 - UL61058-1 - Change Over function has been evaluated for no load switching only. Temperature test has been conducted with 13A as declared under electrical ratings. the change over switch can be mounted as accessory on switches where also declared. The switch has been evaluated for a voltage of 250 Vac and 127 Vac, 50/60 Hz.

\*Note D12 - UL61058-1 - Dust ring is optional provided.

\*Note D13 - UL61058-1 - Brake contact path to be evaluated in end application.

\*Note D14 - UL61058-1 - The soldering terminals were tested for iron soldering only.

\*Note D15 - UL61058-1 - The switch was sitched off over the integrated coil at rate of 6 operations/min (5sec=ON, 15sec=OFF).

\*Note D16 - UL61058-1 - As the design allows the switches are operted at a rate of: 1sec ON/19sec OFF making: actuated mechanically, braking: actuated by remote function.

\*Note D2 - UL61058-1 - The soldering terminals wre tested for solder bath soldering only.

\*Note D3 - UL61058-1 - Only appear to switch rated 16A GP, 250 Vac. Heating tests after 6K cycles have been done with wire size AWG No. 12.

\*Note D4 - UL61058-1 - Switches with continuous contact.

\*Note D5 - UL61058-1 - Only appear to switch 16A resistive, 250 Vac and to 16A GP, 250 Vac. Switches may be provided by a coil to open the switch by an electrical impulse (remote off function). The functionality has not een investigated and shall be evaluated in the end use application.

\*Note D6 - UL61058-1 - the wire set was not part of this investigation and shall be investigated in the end use application.

\*Note D7 - UL61058-1 - the standard rotating reversing switch has not been investigated for "Making" or "Breaking" current. It is attached to the switch as accessory and has no impact of the switching function. The suitability of the combination must be determined in accordance with the end-product requirements.

\*Note D8 - UL61058-1 - The potentiometer has not been evaluated.

\*Note D9 - UL61058-1 - Switch is rated 2<13(13). The heating test withthe contacts in series to the SSD were tested withthe contacts short before bypass the SSd with the declared thermal current. In the end use application the heating test should be conducted under the declared cooling conditions. This is a tool switch with mechanical contacts with serial and parallel to the Solid state Switching Device (SSD).

\*Note E3 - UL61058-1 - Brak contact path to be evaluated in end application.

\*Note F1 - UL61058-1 - These are lighted switches maybe employing a lamp. The lamp life should be evaluated when required by the end-use product Standard.

\*Note G1 - UL61058-1 - IP4X for accessible parts and enclosure of the end product enclosure when mounted or installed according to the manufacturers directions. Internal parts were not evaluated for IP ratings and must be considered in the end product.

\*Note G2 - UL61058-1 - IP6X testing was completed on the complete switch without an end product enclosure. Under IP Category 1 (pressure difference). The switch gasket (seal) to the end product enclosure is evaluated in the end product testing.

\*Note G4 - UL61058-1 - IP67 for complete switch only if provided with integrated potted wires and sealing at actuator side.

\*Note G5 - UL61058-1 - IP67 for accessible parts if sealing is provided only at actuator side and switch gasket (seal) to the end product enclosure is evaluated in the end product testing. Internal parts were not evaluated for IP ratings and must be considered in the end product.

\*Note G6 - UL61058-1 - The masimum current for these switches with integrated flexible/stranded potted wires with a minimum cross section of AWG20 or 0.5mm<sup>2</sup> or 0.5mm<sup>2</sup> shall be I<sub>max</sub>. 10A and for AWG18 or 0.75mm<sup>2</sup> shall be I<sub>Max</sub> 12A.

\*Note H1 - UL61058-1 - The minimum wire temperature for the 16(16) rated switch shall be 130C.

\*Note H2 - The optional Potentiometer was not tested with the swicht, it shall be investigated in the end use application.

Note 1 - This switch has been investigated for use only as a voltage selector.

Note 10 - The switch employes quick-connect terminals. They have been evaluated for use with solid and/or solder dipped stranded conductors, No. 10 AWG.

Note 2 - For Cat. Nos. 1830 and 1835, the suitability of the steel spring as a current-carrying part in the pilot light portion of the switch, shall be determined in the end-use.

Note 3 - The reversing switch has not been evaluated and should be investigated for compliance with the end-use product standard.

Note 4 - The quick-connect terminals have been investigated with a suitable female connector attached to No. 12 AWG wire. The suitability of non-Recognized connector or other size wire shall be determined in the end-use application.

Note 5 - This switch is to be used with Marquardt switches Cat. No. 1293 (rated 6 A-125 V ac, 1/6 hp-125 V ac), Cat. No. 1297 (rated 6 A-125 V ac, 1/4 hp-125 V ac, 5 A-250 V ac, 1/2 hp-250 V ac) and Lucerne switches, Cat No. TRM256 (rated 6 A-125 V ac), Cat No. TSCR-256 (rated 6 A-125 V ac). They each employ a built-in interlock at the trigger to prevent making and breaking current.

Note 6 - The screw-down wire binding terminals have not been investigated. The suitability of these terminals shall be determined in the end-use application.

Note 7 - The supply source of the bulb circuit was not evaluated during the investigation of the switch. The suitability of this feature shall be determined in the end-use application.

Note 8 - The performance of the remote actuated version (suffix RMTE) is dependent upon the combination of (1) the length of the extension rod and (2) the distance between the Recognized Component Switch and the remote actuator button. The suitability of this combination should be determined in the end product.

Note A - The switches are not considered relampable.

Note A2 - The function of the Unidirectional or Bidirectional Transient Voltage Suppressor Diode shall be evaluated for compliance with the end-use Standard within the end product.

Note A3 - Switch is rated 2<11(11).

Note B - Type 1703.3402; Each pole has a special rating: 1st pole 5A 110-250Vac, 2nd pole 0.3A 15Vdc, 3rd pole 5A 110-250Vac, 4th pole 20A 15Vdc

Note C5 - Switch 2711.9xxx was tested with AWG14 wires. The leads (AWG26) connected to the PWB assembly and the four pin connector shall be evaluated within the end product.

Note C7 - UL61058-1 - The declared thermal current for RM 10.5(10.5) is 3A.

Note J1 - The switch shall be installed in an end-use product that provides an enclosure and/or insulating barrier over the front and rear switch enclosure surfaces, which meets the requirements for Basic, Reinforced or Double Insulation.

Note J2 - The switch provides only Basic insulation to live parts. The acceptability of user access of Basic insulation shall be considered in the end-use product. After mounting of the switches in end product, additional insulation measures is necessary to ensure the basic insulation between the switch conductors and the metal surface of end product on which the switches are intended to be mounted.

Note J3 - IP testing was completed on the complete switch without an end product enclosure. To insure IP40 the switch terminals to the end product enclosure shall be evaluated in the end-use product testing.

Note J4 - Due to the construction of the switch the on/off time deviated to the required time the endurance test at very slow speed was conducted with 14 seconds on and 14 seconds off.

Marking: Company name or trademark  MARQUARDT , catalog, model or part number, electrical ratings and the Recognized Component Mark,  on the product or on the smallest unit container in which the product is packaged.
