6 Year Follow-Up

“OrACELL provides an excellent alternative to autogenous tissue for tissue graft procedures. The pre-hydrated samples handle comparative to autogenous or even better. Over the years I have looked for an allograft with consistent quality and thickness, ease of handling, and predictable healing. I want to offer my patients the highest quality allograft on the market. I am confident I’ve got it covered with OrACELL.”

Clear Visualization In CT Image Aids In Treatment Planning

"Salvin BariOpaque® is effective for fabricating radiopaque scanning templates with barium sulphate powder. This pre-mixed powder achieves a smooth, easy to trim, odorless acrylic which offers excellent radiopaque qualities for scanning templates, alleviating the often messy and inconsistent results of a non-homogenous mixture."
