

Cast Iron Receivers: for years of dependable service; warranted for 20 years from date of shipment against failure due to corrosion.

Centrifugal Pumps: provide generous running clearances. Standard 3500 RPM for best hydraulic efficiencies, optional 1750.

Float Switches: Double pole heavy duty, externally adjustable.

Maximum Condensate Temperature: 200°F (93°C)
209°F (98°C) available at certain points

OPTIONAL EQUIPMENT INCLUDES:

- Factory Mounted Control Panels
- Water Level Gauge
- Dial Thermometer
- Inlet Basket Strainers
- Suction Butterfly Valves (Available on pump with capacities to 115 gpm [435 L/M])
- 3 Types of Alternation
- Discharge Pressure Gauges
- High Level Alarm

STANDARD UNIT FEATURES:

- Cast Iron Receiver, sizes 14 gallon (53L) and larger have provision for second pump. Receiver sized for 1 minute net storage.
- Cast Iron Receivers are warranted for 20 years from date of shipment against failure due to corrosion.
- Centrifugal Pump(s) with drip-proof motors. Pump capacity sized 2 times system return rate.
- Float switch(es).

ORDERING INSTRUCTIONS:

Specify basic Model No., RPM, single or duplex, phase, operating voltage, special features. Note: TEFC motors are available. A horsepower increase is not necessary using TEFC motors.

OPTIONAL FEATURES AVAILABLE AS SPECIFIED:

- Water level gauge w/shut-off valve*
- Dial Thermometer*
- Inlet Basket Strainer
- Discharge Pressure Gauges

- NEMA 4 Float Switches
- Mechanical Alternator provides sequencing of duplex pumps and standby of second pump on high level. (NEMA 4 mechanical alternators available on receiver sizes 36 gallons [136L] and larger)
- Control Panels, see page 4. (Control Panels cannot be mounted on 6 & 9 gallon [23 & 34L] receivers, use 14 gallon [53L] minimum)
- Suction Butterfly Valve
3" (76mm) (Available for pump capacities to 75 gpm [284L/M])
- Suction Butterfly Valve
3½" (89mm) (Available for pump capacities to 76 to 115 gpm [288 to 435L/M])
- TEFC Motors
- High Level Float Switch/Standby Float Switch (Consult factory for arrangement)
- Lifting Eyes (Available on Receiver sizes 23 gallon [87L] and larger)
- Tapping/openings not drilled on 9 or 14 gallon (34 or 53L) unless option is specified.

*Not available on 6 gallon (23L) receivers.

OPTIONAL ELECTRIC CONTROLS

Description of Optional Panel Components

- Magnetic Starters must be used on all 3 phase motors and single phase motors over 2 HP.
- Disconnect Switches and Circuit Breakers. Either fuses or a circuit breaker is required ahead of the starters to protect against short circuits. A disconnect switch or circuit breaker also provides a means of shutting off power for service.
- Control Power Switching Relay – should be supplied in Duplex or Triplex units when individual pump disconnect switches are specified. This relay is recommended in order to maintain control power to the water makeup system in the event pump #1 disconnect switch is turned off or pump #1 fails. In this event the control power will be automatically supplied by pump #2.

- Selector Switches – “Auto-Off-Hand” selector switches provide a means of shutting off pumps and a means of testing in the “Hands” position. “Off-Hand-Lead-Lag” selector switches may be furnished on duplex units with 2 float switches to provide manual alteration.
- Electric Alternator may be furnished on duplex units to provide automatic sequencing of lead pump. Use only when magnetic starters are provided and only with 2 float switches.
- Transformer is required by the National Electrical Code to reduce control voltage when power supply exceeds 250 volts. A transformer is recommended when voltage exceeds 130 volts. Refer to local codes for requirements.
- Pilot Lights – Pump running pilot lights are available to indicate pump operation.
- Audible Alarm – An alarm to indicate low or high water level may be furnished. A separate tank mounted level switch should be provided with an alarm.

Specified Panel Components to be furnished with unit at extra cost.

Standard panels are supplied with NEMA 2 enclosures and are U.L. listed unless otherwise specified.
