Navigating the Session Page

1. **Session Details** (Title, Presenters, Date & Time, Description, Keywords)
2. **Join Session**
3. **Interact through Chat, Polls, & Uploaded Files**

The screenshot shows the PBIS Pathable Portal interface. At the top is a blue navigation bar with links: Home, Schedule, Agenda-At-A-Glance, People, Session Evals, Overall Eval, Materials, SCTG, Social Media, and Help Desk. Below this is a white header with a back arrow, the word 'AGENDA', and a 'MANAGE' button. The main content area features a session titled 'Orientation for Tech Assistants and Content Facilitators (OPTIONAL for Presenters)' with a 'DRESS REHEARSAL' tag. It lists two presenters: Jennifer Norton (Midwest PBIS Network Project Coordinator) and Brian Meyer (Midwest PBIS Network IL Co-Director). The session time is 2:00 PM - 4:00 PM CDT on Friday, September 18. A description states: 'This session is an orientation for tech assistants and content facilitators on the Pathable Portal. This Orientation is OPTIONAL for Presenters. This Orientation will be'. To the right of the session details is a 'JOIN MEETING' button and a 'SPEAKER ONLY: Join the live meeting now' link. Below this is a tabbed interface with 'Chat', 'Polls', 'People', and 'Files'. The 'Chat' tab is active, showing a message from Diane LaMaster: 'I had to open zoom to hear' (2 minutes ago).

1. **Session Details** (Title, Presenters, Date & Time, Description, Keywords)

2. **Join Session**

3. **Interact through Chat, Polls, & Uploaded Files**

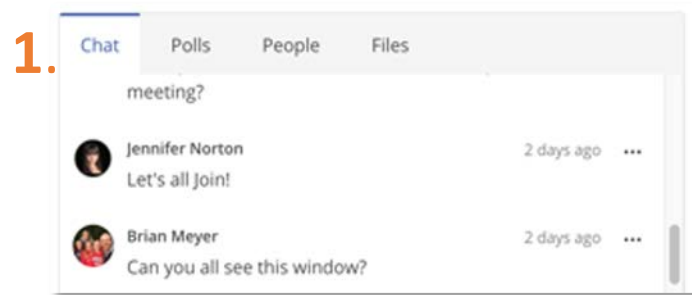

Tips for Participants

Chat, Polls, and Q&A

1. Use **Chat** for engaging with other participants around the session topic.

Presenters may use chat differently in specific sessions.

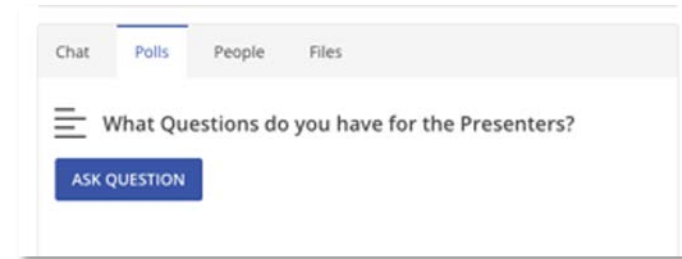

Follow overall Forum expectations for *responsible, respectful, and safe* chatting

2. Find the **Q&A** under **Polls**.
Questions for presenters go there.

3. Some sessions have other **Polls** or more **Specific Questions**.
Complete those when prompted

2.

3.

Tips for Participants

Be careful of accidentally navigating away

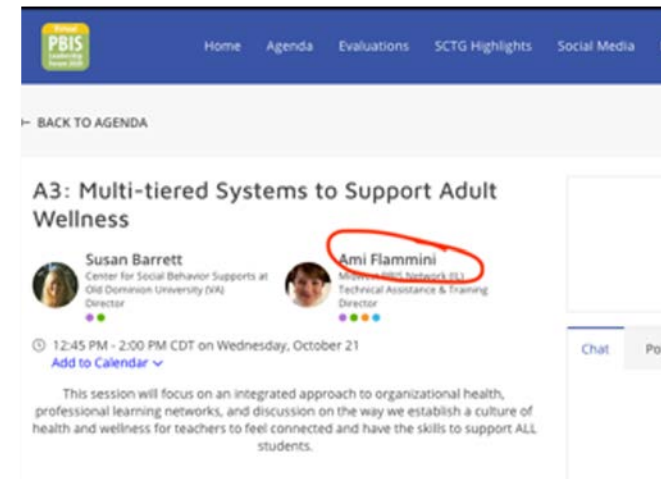

While participating in a live Session...Be Present!

- If you navigate away from the live Session you will need to press the “Join Meeting” button to get back in.
- What does **navigating away** look like? Here are some examples:
 1. Clicking on any area of the navigation menu
 2. Clicking on a Person's name

1.

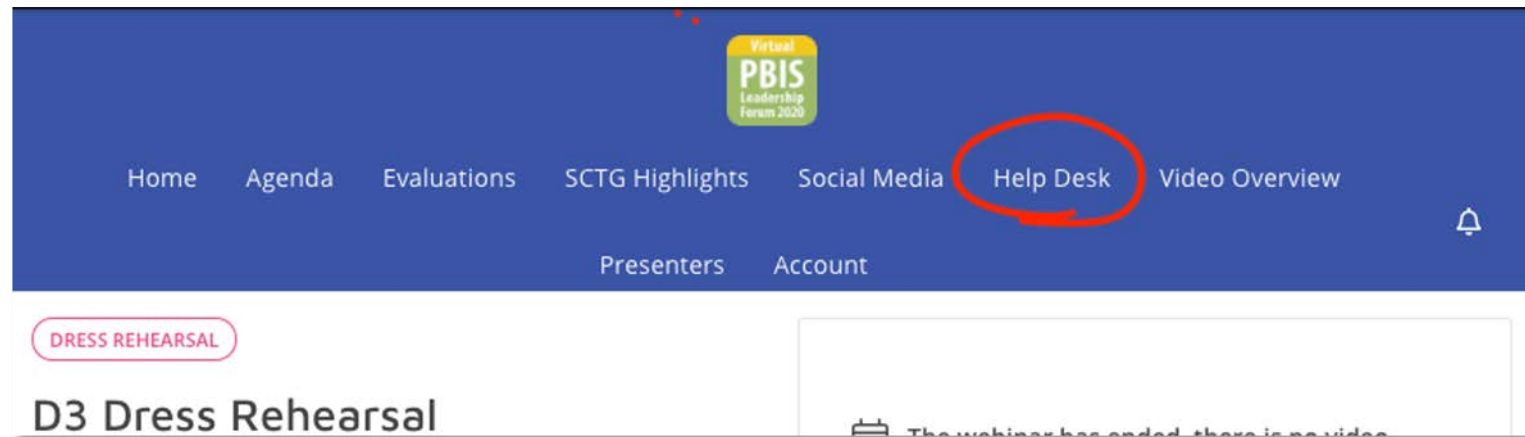

2.

Tips for Participants

Support is Available

If at any time you need support as a participant,
use the **Help Desk**:

When Working In Your Team

Consider 5 Questions

- How does this compare to our priorities?
- Who would do this work?
- Where would this work live (e.g., responsibility)?
- What should we stop doing to make room for this work?
- How will we assess whether it's (a) implemented well and (b) working?

Agenda:

1. Disaster recovery response
2. Back to basics
3. Invest in MTSS now
4. Questions and Discussion

2020-2021 Addressing Multiple National Crises:

COVID-19, Racial Injustice, Environmental Impacts

- Significant socio-economic impacts (e.g., unemployment, food insecurity, homelessness)
- COVID-19 impacting our black, brown and migrant communities and our vulnerable populations at higher rate than others.
 - Rooted in social inequalities (e.g., residential segregation, differential access to healthcare and treatment)
- Increased mental health challenges for children, youth and families across the board with particular increase in anxiety, depression, obsessive compulsive disorder and eating disorders

2020-2021 and Beyond Addressing Multiple National Crises:

COVID-19, Racial Injustice, Environmental Impacts

- Researchers suggest challenges with suicide and drug overdoses, particularly among marginalized communities who have been harmed by inequitable systems.
- Increases in mental health challenges paired with impeded access to mental health services
- Decreases in other medical care and immunizations
- Disparities in access to education

American Academy of Pediatrics
American Academy of Child and Adolescent Psychiatry
Children's Hospital Association have declared a [national emergency in children's mental health](#), citing the serious toll of the COVID-19 pandemic on top of existing challenges

The pandemic then brought on physical isolation, ongoing uncertainty, fear and grief. Centers for Disease Control and Prevention researchers quantified that toll in several reports.

They found between March and October 2020, [emergency department visits](#) for mental health emergencies rose by 24% for children ages 5-11 years and 31% for children ages 12-17 years.

In addition, emergency department visits for suspected suicide attempts increased [nearly 51%](#) among girls ages 12-17 years in early 2021 compared to the same period in 2019.

A large orange circle is positioned on the left side of the slide, partially cut off by the edge.

Secretary
Cardona

“We cannot look at mental wellbeing as something to do, if there’s time. We need to make it the foundation on which we are building academic support & recovery. We have to address where students are emotionally before we access bandwidth for learning.”

Four yellow curved lines are located in the bottom right corner of the slide, arranged in a slightly curved pattern.

1. Disaster recovery response

Consider what we know about disaster recovery to inform our next steps

Reactions and Behavioral Health Symptoms in Disasters

Emotional Response – Lows to Highs

Common Responses to Disaster for Children & Youth

Emotional: clinginess, separation anxiety, preoccupation with death, terror, sadness, guilt, concern about re-occurrence of the event

Cognitive: difficulty concentrating, difficulty learning new information, intrusive thoughts and memories, regression in developmental stages

Physical: sleep disturbance and nightmares, hyperactivity, physical complaints e.g. tummy aches, enuresis, encopresis

Behavioral: crying spells, aggressive behavior, tantrums, school impairment, substance abuse, re-living events through play, increased questions and story telling about the event, increased deviance and delinquency, sleep impairment

Next Level Teacher Exhaustion

"But honey ... you're the teacher."

The Way Forward

What we know from disaster response

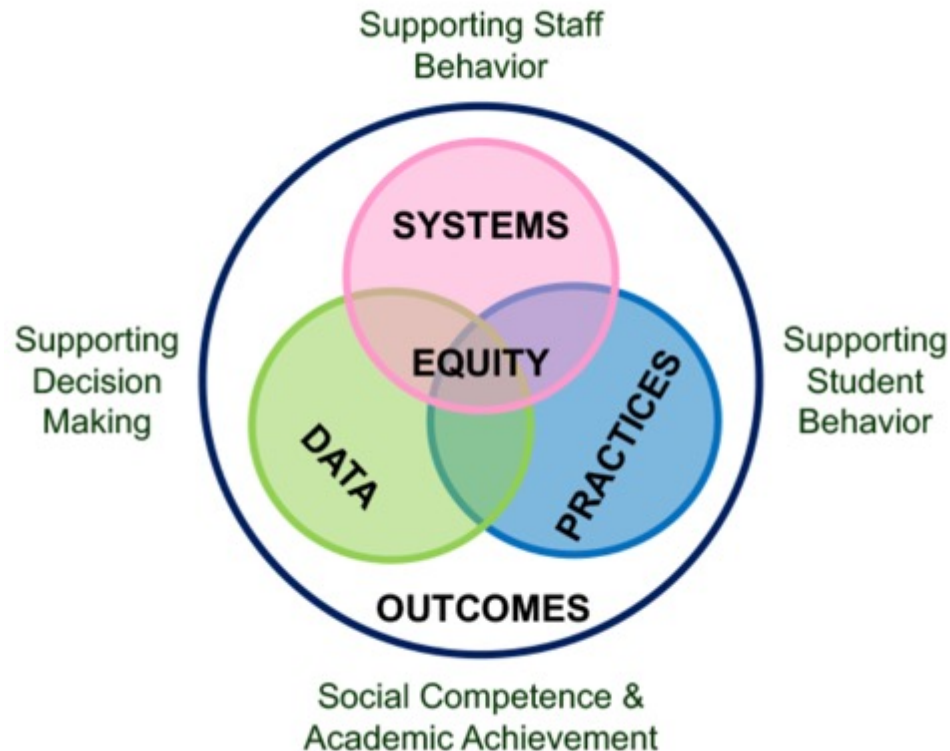

- Shared experience, there is no roadmap
- Create space to process
- Create space before we respond
- Active listening

How can our systems support these actions so it doesn't all fall on individuals to "self care" their way out of a crisis?

- Most common outcome from disasters is **resilience**
 - Purpose- What gets you up in the morning?
 - Connection-staying connected to important people
 - Adaptability-creative, adjust
 - Hope- realistic, shift from threat to challenge

PBIS/MTSS=System investment in common way of work

Continuous Improvement Framework

- We organize our resources and examine our strengths and needs
- We make sure kids help early
- We invest in what is likely to work for our students
- We invest in our staff so they can support ALL students
- We make sure we are implementing well as we review student outcomes
- We continuously adjust based on strengths and need and improve based on our stakeholder's input.

Be bold...our kids deserve more!

- Hiring, buying with additional funds without changing the system will lead to poor outcomes for most.
- Wellness is NOT a place
- We should not hire mental health professionals to be referral sources.
- Screening is NOT a diagnostic assessment
 - Screen responsibly, be prepared to respond
 - ACES is NOT a screener
- Prevention/Promotion and Upstream work will be very challenging with current crisis level of need
- Call out practices that are not in line with our values.
- Set up how we measure fidelity and outcomes beforehand.
- We can't return to status quo.

Mental Health

Mental health includes our emotional, psychological, and social well-being. It affects how we think, feel, and act. It also helps determine how we handle stress, relate to others, and make healthy choices. Mental health is important at every stage of life, from childhood and adolescence through adulthood.

In other words, mental health is....

Social

How we *connect*

Emotional

How we *feel*

Behavioral

How we *act*

SEB described by Dr. Sandy Chafouleas

<https://www.psychologytoday.com/us/blog/promoting-student-well-being/202008/4-questions-ask-now-in-preparing-your-child-school>

PBIS is a Mental Health Initiative

We need to start with designing a positive school environment where the majority of emotional needs are met.

Improved Student Outcomes

academic performance
(Horner et al., 2009)

social-emotional competence
(Bradshaw, Waasdorp, & Leaf, 2012)

social & academic outcomes for SWD
(Lewis, 2017; Tobin, Horner, Vincent, & Swain-Bradway, 2012)

reduced bullying behaviors
(Ross & Horner, 2009; Waasdorp, Bradshaw, & Leaf, 2012)

decreased rates of student-reported drug/alcohol abuse
(Bastable, Kittelman, McIntosh, & Hoselton, 2015; Bradshaw et al., 2012)

Reduced Exclusionary Discipline

office discipline referrals
(Bradshaw, Mitchell, & Leaf, 2010; Bradshaw et al., 2012; Horner et al., 2009)

suspensions
(Bradshaw, Mitchell, & Leaf, 2010)

restraint and seclusion
(Reynolds et al., 2016; Simonsen, Britton, & Young, 2010)

Improved Teacher Outcomes

perception of teacher efficacy
(Kelm & McIntosh, 2012; Ross, Romer, & Horner, 2012)

school organizational health and school climate
(Bradshaw, Koth, Bevans, Ialongo, & Leaf, 2008; Bradshaw, Koth, Thornton, & Leaf, 2009)

perception of school safety
(Horner et al., 2009)

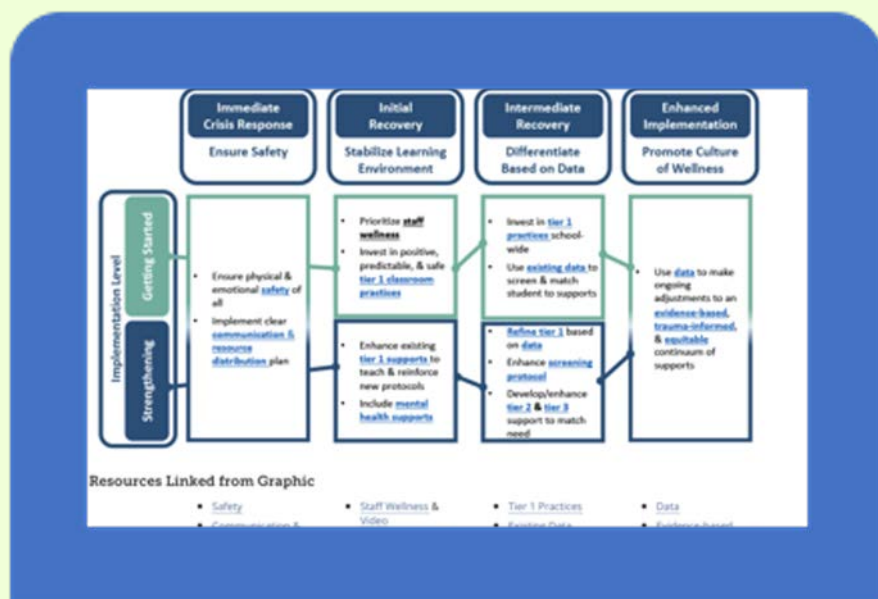

School-Wide Positive Behavior Interventions and Supports

2. Back to Basics

To support students, families, and ourselves, go back to basics!

Supporting PBIS Implementation Through Phases of Crisis Recovery

As school and district communities consider options for effectively supporting students, educators, and families during and after a crisis, it can be difficult to identify critical impactful actions. Mindsets can range from not knowing where to start to thinking we must do it all, which can result in not doing anything. The PBIS framework can serve as a road map to meeting this challenge. It is best to think in terms of implementing as small incremental steps that result in progress toward effectively meeting student, educator, and family needs.

This document provides strategies to guide implementation efforts through the various phase of crisis recovery. As Figure 1 illustrates, schools and districts choose their path based on their implementation level: getting started (green) or strengthening (blue). Then, they consider key actions based on their crisis response phase.

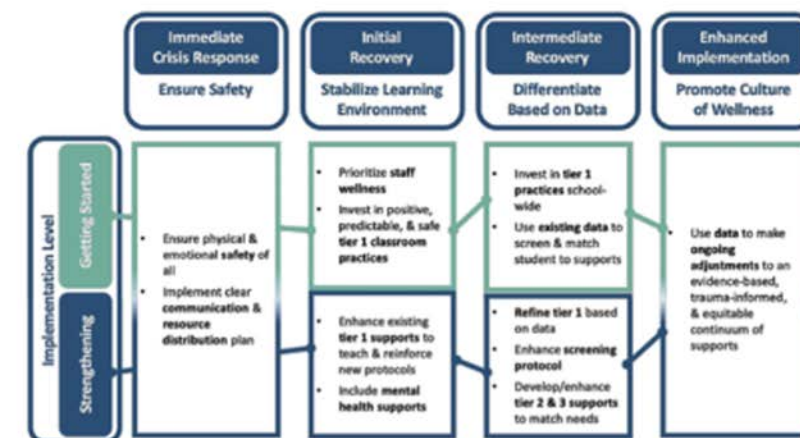

Figure 1. Key actions by implementation level and crisis response phase.

More comprehensive information can be found in the [Supporting Schools During and After Crisis](#)¹ section of the [Center on PBIS website](#)².

Immediate Crisis Response

Building a Culture of Staff Wellness Through Multi-Tiered System of Supports

Schools everywhere are facing teacher shortages due to a shrinking pool of applicants and a growing number of teachers leaving the profession. If we are going to attract and retain highly qualified effective teachers, we will need to be more intentional in designing systems that support a healthy workforce. PBIS has a long tradition of creating effective teaching and learning environments by focusing on supporting adult behavior through (a) ongoing staff input and feedback, (b) ongoing professional learning, and (c) a phased based approach to implementation. The purpose of this brief is to provide recommendations to district and school leadership teams on how the components of the Positive Behavioral Interventions and Supports (PBIS) can be used to prioritize staff health and wellbeing.

Implementation of PBIS has been shown to improve overall organizational health with the most significant impacts identified in shared commitment to student success, an increased sense of warmth for staff, positive relationships with colleagues, and improved school leader ability to advocate for necessary resources at the district level to support staff and students (Bradshaw et al., 2008). These noted impacts on organizational health and other outcomes of PBIS implementation (e.g., reducing disruptive behaviors, building social emotional skills and improving teacher self-efficacy) are significantly related to improved job satisfaction and reduction of emotional exhaustion/stress for educators (Grayson & Alvarez, 2008; Brouwers & Tomic, 2000; Skaalvik & Skaalvik, 2011). Many communities are addressing significant social issues (e.g., social inequality, drug addiction, environmental impacts, public health concerns) affecting large groups of school community members. Education systems implementing multi-tiered system of support (MTSS) frameworks, like PBIS, are positioned to respond more effectively to the increasing needs of children and educators impacted by trauma and stress (Johnson et al., 2005; Wildeman et al., 2014).

Impact of Occupational Stress for Educators and Students

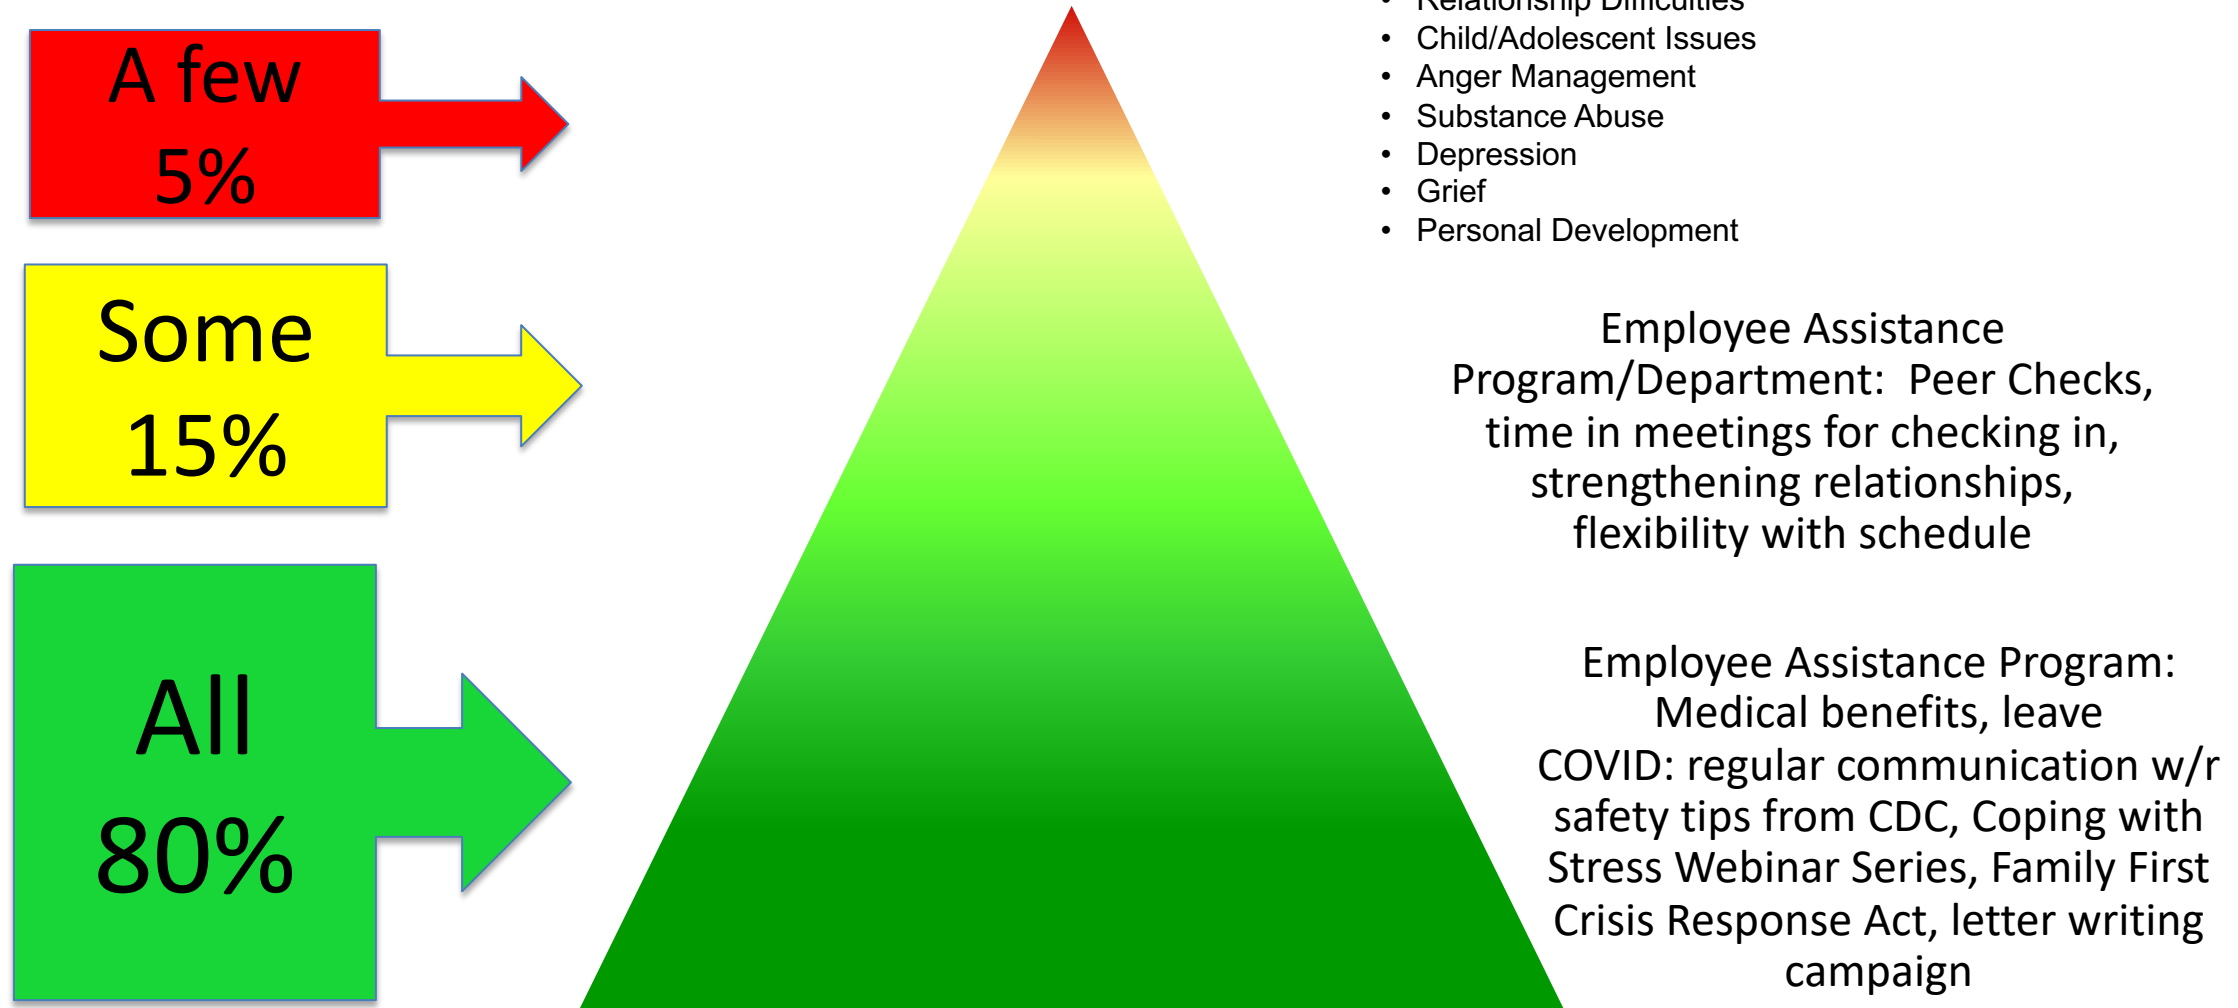

The American Institute of Stress identifies that an individual's perceived level of occupational stress is strongly impacted by (a) the intensity of the demands being placed on them paired with (b) their sense of control or decision-making in dealing with these demands (American Institute of Stress, retrieved from <https://www.stress.org>). Occupational stress adversely affects teachers and students in the following ways.

- Teachers who provide emotional support and have positive relationships with their students influence their health across the age span, thus promoting overall mental wellness and life

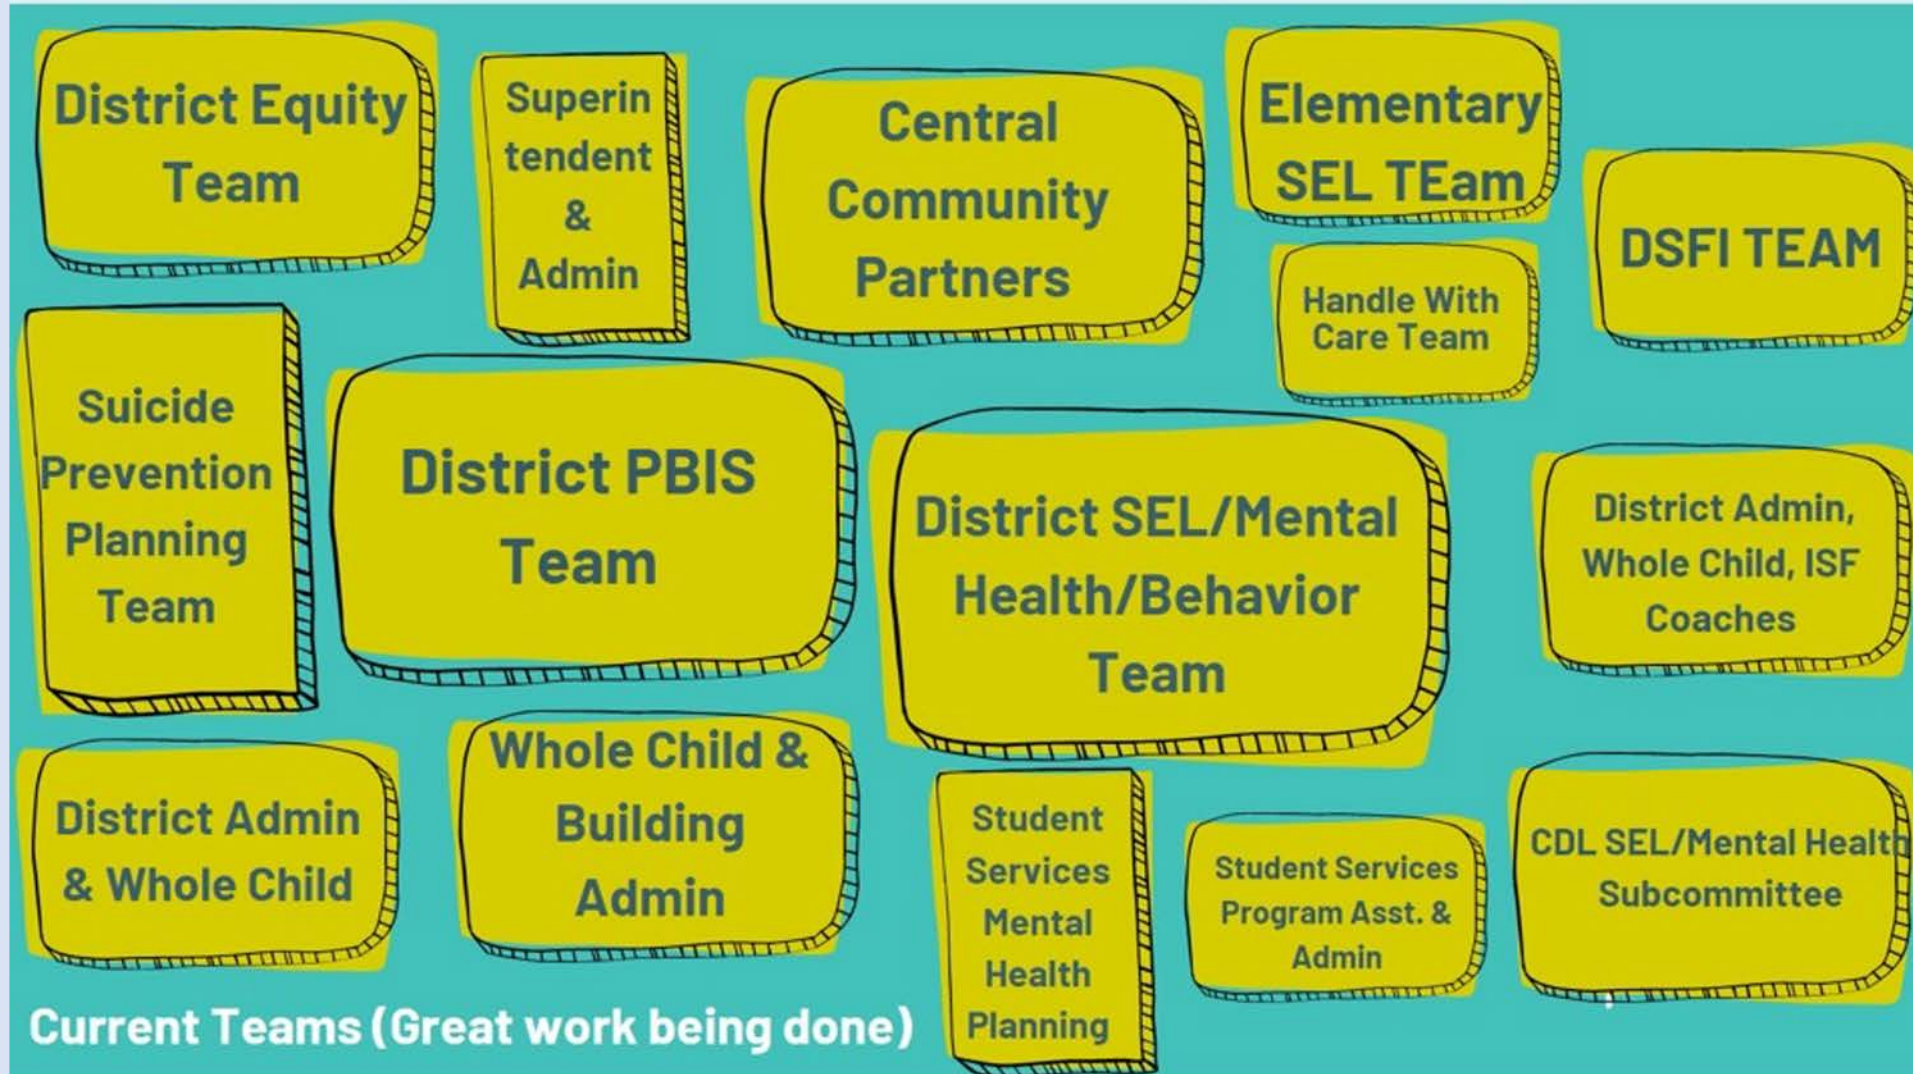

Prioritize Staff Wellness

- Focus on Universal Prevention to Promote Wellness for All
 - Provide space for self care and recovery
 - Use Human Resources/Employee Assistance/Insurance Plan
 - Build awareness, show benefits of enhancing Tier 1
 - Reduce demands – integration and de-implementation

Public Health Multi-Tiered Framework for Healthy Workforce

Check out our Practice Brief on *Habits of Effective Classroom Practice*

<https://www.pbis.org/resource/habits-of-effective-classroom-practice>

CENTER ON
PBIS Positive Behavioral
Interventions & Supports

Habits of Effective Classroom Practice

Habits are predictable and regular responses to cues in our environment. In *"The Power of Habit,"* Charles Duhigg (2012) described how we develop habits through cue-response-reward loops. For example, we say "Thank You" (response) when someone holds the door (cue), and we may hear "you're welcome" or see a smile in return (reward). We read or hear words (responses) based on unique combinations of letters or sounds (cues), and we receive information (reward). In other words, we develop habits by experiencing antecedents, behaviors, and consequences—the ABCs of behavior. Consider the following examples.

	Antecedent	Behavior	Consequence
Example 1	In public	Wear mask and maintain safe distance	Avoid germs and receive positive attention
Example 2	In line at a grocery store with candy stocked shelves	Child repeatedly asks (screams) for candy in line	Parent gives child candy
Example 3	Child repeatedly asks (screams) for candy in line	Parent gives child candy	Child stops screaming

In each example, the behavior becomes a habit through repeated practice of the ABC sequence. Habits are maintained because they work (i.e., result in occasional reinforcement). In this brief, we discuss how we (a) develop habits of effective classroom practice and (b) expand effective habits in our schools, districts, and states.

How can we develop habits of effective classroom practice?

Although we can develop habits accidentally (e.g., give child candy to escape screaming), we can also use our knowledge to develop effective habits intentionally. For example, consider the parent in Example 3. Instead of continuing to give their child candy to avoid a tantrum in line, the parent may change the antecedent, engage in a different behavior, and experience a different consequence (see example below).

	Antecedent	Behavior	Consequence
Example 3 (revised)	Parent chooses candy-free check-out line at store	Parent engages child in "line game" while waiting	Parent avoids screaming and enjoys child's attention

Like the parent in this revised example, we can modify our own ABCs to develop habits of effective practice in our classrooms. We do that by starting with simple practices, setting ourselves up for success, building effective habits, celebrating accomplishments, and sharing with others.

Habit Development *Wellness*

Building Blocks of Behavior- Individual Level

A

Antecedent

**Schedule it- put it in
your calendar.**

**Get work out
clothes/water bottle
ready to go.**

**Identify morning
routine**

Work out w/ friend

B

Behavior

**Daily Morning
Strength
Training-
minimum of 20
minutes**

C

Consequence

**Feel great!
Track on task
behavior,
feedback
Check it off
schedule!**

Habit Development *Example*

Positive Greetings at the Door/Login

A

Antecedent

- **Redesign environment**
 - add greeting poster (or slide on screen)
 - prep in advance of class
- **Add reminder**

B

Behavior

- **Teach & practice greetings until they become a habit**
- **Track greetings to ensure each student is greeted**

C

Consequence

- **Tell yourself, “nice greeting”**
- **Celebrate with class for efficient and positive start to class**
- **If you forget, add a prompt for next time**

Shelton School District, Washington State

Promote a Climate of Belonging

- **Shelton School District in Washington State has been participating in the School Climate Transformation Grant (SCTG) project made shifts in arrival and breakfast for their elementary students that has promoted a climate of belonging.**
- **The district staggered morning bus drop off time to allow for temperature scans and COVID exposure questions.**
- **All school staff were positioned in the student arrival off zones to allow them to check in individually with students.**
- **The staff agreed to prioritize a warm welcome to try to reduce the fear or uncertainty students felt about being in school.**

Shelton School District, Washington State

Promote a Climate of Belonging

- They also incorporated morning community building during breakfast time in each classroom. Breakfast in the classroom was intended to help with contact tracing, in the event there was COVID transmission.
 - Staff found an additional, unexpected benefit to having a relaxed, welcoming environment to practice SEL skills and community building.
 - With school-wide warm greetings, and a community focused breakfast the staff and students reported that the school day began very calmly, with very few behavior issues and the teachers reported more positive connections with students.
- Next year, the district is going to maintain the staggered drop off, to allow teachers to connect with every student.
 - They have committed to not scheduling morning meetings for staff so they can be physically present to create a warm, welcoming environment for students and families.
 - They are also going to maintain the breakfast and SEL time to increase community building and help students start the day focused on a community of belonging.

3. Invest in PBIS/MTSS Now

Building and strengthening your framework now will create a more resilient system for the next crisis

Implementation Level

Getting Started

Strengthening

- Ensure physical & emotional **safety** of all
- Implement clear **communication & resource distribution** plan

- Prioritize **staff wellness**
- Invest in positive, predictable, & safe **tier 1 classroom practices**

- Enhance existing **tier 1 supports** to teach & reinforce new protocols
- Include **mental health supports**

- Invest in **tier 1 practices** school-wide
- Use **existing data** to screen & match student to supports

- **Refine tier 1** based on **data**
- Enhance **screening protocol**
- Develop/enhance **tier 2 & tier 3** support to match need

- Use **data** to make ongoing adjustments to an **evidence-based, trauma-informed, & equitable** continuum of supports

The PBIS framework supports resilience

- In statewide MA project
 - Schools implementing with at least tier 1 fidelity prior the pandemic were able to strengthen implementation fidelity throughout the disruptions
 - Schools not yet at tier 1 fidelity prior to the pandemic maintained or lost implementation during disruptions
- Southbridge Public School– Model demonstration site
 - Used PBIS framework to teach transitions between remote and in person school
 - Used existing data systems to identify kids, families, and staff needing additional support
 - Maintained focus on same 2 priority areas – climate and culture and reading even while adjusting for covid.

PBIS Pivot in Puerto Rico

Acknowledging Diversity/Integrating the Arts

- Fostering PBIS implementation after such traumatic experiences:
 - more adamant about *integrating the fine arts to make the implementation more culturally-appropriate but also trauma-sensitive*.
 - Integrating the *PBIS Tier 1 features from an expressive therapies approach*, this was an imperative aspect with burned out school personnel and students having experienced a wide-range of traumas.

Make it Fun

- We were very conscious of incorporating a fresh approach to training-the-trainers.

“PBIS was extremely helpful in offering a blueprint to navigate incredibly choppy waters and help us reclaim our path towards social emotional and behavioral problem prevention and management with a profound respect towards integration of the trauma lens and cultural sensitivity essential aspects for PBIS implementation.”

Key Recommendations

- Strengthen what you have, build upon your PBIS investments
- Reestablish commitment for the work (communicate necessity and impact)
- Prioritize leadership team for planning, doing, evaluating, and adjusting
- Leverage and reallocate existing resources to support PBIS implementation
- Use data to inform your actions

4. Questions and Discussion

What questions do you have? What examples can you share?

Please Complete this Session's Evaluation
