

Section I – Product and Company Information

Product: Lithium ion and Lithium ion polymer batteries
Models: See Microsoft Product Battery Information Table, Section 14
Effective Date: January 10, 2020
Version: 2020A

Manufacturer:
Microsoft Corporation
One Microsoft Way
Redmond, WA 98052-6399
Tel 425 882 8080

Section II – Composition Information

Not chemically dangerous during normal use in accordance with Microsoft recommendations as stated in the user manuals or other similar documentation. Exposure to hazardous chemicals is not expected with normal handling and use. In particular, the cell or battery should not be opened or burned.

Section III – Hazards Identification

Emergency Overview: Do not open or disassemble cells or batteries or expose them to fire or open flame. Do not puncture or deform. Cells and batteries present a hazard only if mishandled in a way that causes damage to the cell or battery or compromises their integrity.

Primary Routes of Exposure: Risk of exposure to hazardous materials will only occur if the cell or battery is physically, thermally or electrically abused to the extent that the integrity of the cell or battery is compromised. In this case, exposure to the electrolyte can occur through ingestion, inhalation, eye contact and skin contact.

Potential Health Effects: If the battery or cell has been damaged or ruptured, the electrolyte solution, which is corrosive, could be released and cause burns to the eyes, skin or respiratory tract. Ingestion of the electrolyte can cause serious burns of the gastrointestinal tract.

Section IV – First Aid Measures

If you get electrolyte in your eyes, flush with water for 15 minutes without rubbing and immediately contact a physician. If you get electrolyte on your skin wash the area immediately with soap and water. If irritation continues, contact a physician. If the battery is ingested, call the National Capital Poison Center (NCPC) at 202-625-3333 (Collect) or your local poison center immediately.

Section V – Firefighting Measures

In case of fire, you can use dry chemical, alcohol resistant foam or carbon dioxide fire extinguishers. Cooling the exterior of the cells or batteries will help prevent rupturing. Burning of these cells or batteries will generate toxic fumes. Fire fighters should use self-contained breathing apparatus. Detailed information on fighting a lithium ion battery fire can be found in Guide 147 (Lithium Ion Batteries) of the US DOT Emergency Response Guide.

Section VI – Accidental Release Measures

Containment Techniques: Damaged cells or batteries that are not hot or venting should be placed in a sealed plastic bag or container. Absorb any spilled liquid with inert material.

Personal Precautions: Safety glasses and neoprene or natural rubber gloves should be worn when cleaning up damaged or leaking cells. Keep unnecessary personnel away from the immediate area.

Section VII – Handling and Storage

Handling: Use only approved charging equipment. Do not expose cell or battery to extreme heat or fire. Do not disassemble, puncture, crush or burn battery. Avoid handling in a way that would cause a short circuit.

Storage: Store batteries in a dry location. To minimize any adverse effects on battery performance it is recommended that the batteries be kept at room temperature (25°C +/- 5°C). Elevated temperatures can result in shortened cell life. Keep out of reach of children.

Section VIII – Exposure Controls / Personal Protection

No personal protection is required during normal handling and use. Exposure to the ingredients contained within the battery could be harmful under some circumstances. In case of exposure to battery contents, wash affected area for at least 15 minutes with generous amounts of water and seek medical attention.

Section IX - Physical and Chemical Properties

These batteries are solid articles. Properties such as odor, pH, vapor pressure, solubility, etc. are not applicable.

Section X - Stability and Reactivity

Reactivity: None during normal handling and use

Incompatibility: None during normal handling and use

Hazardous Decomposition Products: None during normal handling and use

Conditions to Avoid: The cells or batteries should not be opened, disassembled, crushed, burned, or exposed to high temperatures.

Section XI - Toxicological Information

There are no known toxicological properties of the batteries during normal handling and use.

Section XII - Ecological Information

There are no known ecological risks of the batteries during normal handling and use.

Section XIII – Disposal

Microsoft product batteries contain recyclable materials and should not be put into the municipal waste stream. It is recommended that cells and batteries be completely discharged prior to disposal and/or the terminals taped to prevent short circuiting. Dispose of in accordance with local, state and federal regulations. Do not dispose of in fire.

Section XIV - Transport Information

All Microsoft product cells and batteries have been successfully tested and comply with the UN Model Regulations, Manual of Test and Criteria, Part III, subsection 38.3. Product cells and batteries have been manufactured under a quality management program as specified in 2.9.4 of the UN Model Regulations.

All Microsoft Lithium ion product cells are rated at 20 Watt-hours or less and lithium ion batteries are rated at 100 Watt-hours or less and meet the requirements for transportation under:

- UN Model Regulations Special Provisions 188 and 230
- International Civil Aviation Organization (ICAO) Technical Instructions and the International Air Transport Association (IATA) Dangerous Goods Regulations Packing Instructions:
 - 965 Section IB or Section II (UN3480, Lithium ion batteries)
 - These batteries will be offered for transport at a state of charge (SOC) not exceeding 30% of their rated design capacity.
 - 966 Section II (UN3481, Lithium ion batteries packed with equipment)
 - 967 Section II (UN3481, Lithium ion batteries contained in equipment)
- International Maritime Organization (IMO) Special Provisions 188 and 230
- European Agreement Concerning the International Carriage of Dangerous Goods by Road (ADR) Special Provisions 188 and 230
- Canadian Transport of Dangerous Goods Regulations (TDGR) Special Provision 34
- U.S. Department of Transportation (DOT) 49 CFR 173.185 and 173.185(c)

The following table provides Microsoft Product Battery Information:

| Model Number | Description | Cells per Battery | Batteries per Product | Battery Weight (kg) | Wh Rating | UNID & Proper Shipping Name |
|--------------|--|-------------------|-----------------------|---------------------|-----------|---|
| 1481 | Xbox 360 Wireless Headset with Bluetooth | 1 | 1 | 0.004 | 0.74 | UN3481 Lithium ion batteries contained in equipment |
| 1514 | Surface Pro | 2 | 1 | 0.22 | 42.00 | UN3481 Lithium ion batteries contained in equipment |
| 1516 | Surface RT | 2 | 1 | 0.17 | 31.50 | UN3481 Lithium ion batteries contained in equipment |
| 1556 | Xbox One Play & Charge Kit | 2 | 1 | 0.0308 | 4.66 | UN3480 Lithium ion batteries |
| 1572 | Surface 2 | 2 | 1 | 0.16 | 31.30 | UN3481 Lithium ion batteries contained in equipment |
| 1601 | Surface Pro 2 | 2 | 1 | 0.22 | 42.00 | UN3481 Lithium ion batteries contained in equipment |
| 1602 | Surface Power Cover | 4 | 1 | 0.21 | 29.94 | UN3481 Lithium ion batteries contained in equipment |
| 1619 | Microsoft Band | 1 | 1 | 0.0039 | 0.36 | UN3481 Lithium ion batteries contained in equipment |
| 1631 | Surface Pro 3 | 4 | 1 | 0.19 | 42.16 | UN3481 Lithium ion batteries contained in equipment |
| 1640 | Surface Hub Device Pen | 1 | 1 | 0.0255 | 1.18 | UN3481 Lithium ion batteries contained in equipment |
| 1645 | Surface 3 | 2 | 1 | 0.134 | 27.50 | UN3481 Lithium ion batteries contained in equipment |
| 1657 | Surface 3 with LTE | 2 | 1 | 0.134 | 27.50 | UN3481 Lithium ion batteries contained in equipment |
| 1671 | Universal Mobile Keyboard | 1 | 1 | 0.008 | 1.11 | UN3481 Lithium ion batteries contained in equipment |
| 1688 | HoloLens | 6 | 1 | 0.012 | 13.00 | UN3481 Lithium ion batteries contained in equipment |

Product Data Sheet

Section XV - Regulatory Information

If hazardous materials are present in the workplace, Material Safety Data Sheets (MSDS)/Safety Data Sheets (SDS) are required by various national and international occupational worker safety regulations. However, MSDS/SDS's are not required for articles (see 29 CFR 1910.1200 (b)(6)(v)). Exceptions also apply for consumer products as defined in 29 CFR 1910.1200 (b)(6)(ix). An article is defined as a manufactured item other than a fluid or particle; (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees.

Section XVI - Other Information

Preparation Date: January 10, 2020

Prepared by: Kayla Dieball

Revision: 2020A

Disclaimer: The batteries referenced herein are considered exempt articles and are not subject to the OSHA Hazard Communication Standard; therefore, a SDS is not required. This sheet is being provided as a service to our customers.

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. **MICROSOFT** makes no warranty, expressed or implied, regarding the accuracy of this data or the results to be obtained from the use thereto.
