Aquarium Kit

Table of Contents

It's all about the fish®!

Developed by true aquatic hobbyists, Aqueon provides a broad array of aquarium solutions to help maintain healthy, life-sustaining aquatic environments. We pride ourselves in being able to provide high-quality products that enable everyone to easily enter, be successful and grow in the aquatic hobby. From inception, Aqueon had one goal in mind: Doing what is best for the health and well-being of fish and aquatic life. This focus on the little things will make your life easier when keeping an aquarium, and in turn, keep your wet friends happy and healthy.

Because with the Aqueon® brand, *it's all about the fish®*.

Three Simple Tips for Aquarium Success
See page 77 for more information

Cuckoo Catfish
(Synodontis multipunctatus)

5

Aquariums

With over 40 sizes of aquariums, all suitable for freshwater or marine inhabitants, there is certain to be an Aqueon® aquarium to fit your style.

Standard Aquariums

The standard aquarium is made with care to ensure that it can stand up to almost any application. Large aquariums feature one-piece center-braced frames that eliminate glass bowing. Aquariums sized 55 and over are available with clear or black silicone seals.

(See page 73 for sizing information and critical dimensions of all aquariums.)

Silicone Aquarium Sealant

100% silicone aquarium sealant is easy to apply to stop leaks. The high-strength silicone creates a permanent water-tight seal that will not crack or shrink. It's formulated to be non-toxic, making it perfect for use on all aquariums.

Reef-Ready Aquariums
with Overflow Accessory Kits

The MegaFlow and Corner Overflow systems are engineered to allow maximum water flow to the main filter system while greatly reducing cascading water sound. The Aqueon® overflow system design includes multi-level water intakes, providing more effective circulation and filtration and eliminating dead water zones in your aquarium.

Features & Benefits
• *The back wall MegaFlow design keeps unsightly plumbing hidden*
• *Sleek black silicone seals*
• *Securely bonded and sealed to the back*
• *Stack rock or decorations up against it*
• *MegaFlow single-molded overflow aquarium Overflow: 600 GPH each.*
• *Corner Overflow aquarium Overflow: 400 GPH each*
• **Overflow Accessory Kit included!**

Overflow Accessory Kit

This simple-to-install kit contains bulkhead fittings, adjustable drain pipe, return pipe with dual flexible nozzle and straight barb fittings. Fits MegaFlow and Corner Overflow aquarium systems.

How it works:
1. *Water flows in from the bottom, middle and top inlets and spills over inner wall of overflow into reservoir.*
2. *Unfiltered water passes through drain pipe and out of aquarium to main filter system.*
3. *Filtered water is pumped back into aquarium.*

③ Filtered water outlets
① Outer wall with inlets
① Inner wall
② Drainpipe

100129251	27.75 x 4.875 x 3.375	0 15905 29251 1

Overflow Accessory Kit Contents:
Adjustable Drain Pipe • Dual Nozzle • Return Pipe • 3/4" Elbow • 1" Bulkhead • 3/4" Universal Bulkhead • 3/4" Bulkhead • Air Intake Elbow • 90° Elbow • Drain Pipe Base • Strainer • Universal Bulkhead Wrench

Frameless Aquariums

Simplicity meets elegance! The minimalist design of a frameless aquarium helps accentuate the natural beauty of any flourishing aquatic ecosystem. Assembled in the USA with high quality glass construction, these tanks can be used for both freshwater or saltwater applications. Available in two styles: Rectangle or Cube in a variety of sizes.

Frameless Rectangle Size 21

Frameless Cube Size 14

Clip-On LED Lights (page 36), filters, heater, décor and fish are not included.

Frameless Rectangle

Made in USA

Want an upgrade to the standard framed aquarium - look no further. Aqueon® Frameless Rectangle Glass Aquariums are the next step to a modern aquatic environment. We have removed the bulky frame and replaced it with smooth clear silicone and polished beveled edges, creating an eye-catching environment. (Clear support brackets are sold separately for use with existing Aqueon® Hinged Glass Tops.)

Aquarium Starter Kits

Starter kits make it easy for customers to start out in the hobby or upgrade their current setup while providing retailers a great opportunity for add-on sales of gravel, decorations and fish. Aqueon® kits contain high-quality components that are designed for easy use and maximum performance.

Siamese Fighting Fish
(Betta splendens)

Betta Bowl Kits

Aqueon® Betta Bowl is a great introductory kit for those entering the fish keeping hobby. The guess work of what's needed to get started has been simplified making set-up quick and easy. Included are the aquarium, gravel, decorative plant, divider, Betta Food and Betta Bowl Plus water conditioner sample.

Item No.	Color / Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC

Aquarium Furniture

Aqueon® stands and canopies were designed with the hobbyist in mind. They provide an appealing look, generous space for storage, water resistant finishes and easy access to plumbing, lighting and accessories. The furniture is engineer-approved to hold the substantial weight of filled aquatic habitats safely!

Classic Pine Stands and Canopies

Pine stands and canopies are constructed entirely of real wood. Each stand and canopy is stained, then finished with a waterproofing sealer to protect from water damage. Canopies are available with full-length doors that allow easy access to the aquarium top. Fully assembled.

Trends Stands

The Aqueon® Trends line of aquarium furniture has the features needed for safely holding an aquarium: strength to hold the proper weight, a moisture-resistant finish as well as the convenience of easy assembly. This furniture is predominantly made from layered wood which is extremely durable. The finish will help protect the surface from accidental spills and moisture. Also included are adhesive clips so that unsightly cords can be routed out of view and felt pads that adhere to the feet to protect flooring from scratches.

Forge Metal Stands

Aqueon® Forge aquarium stands offer the flexibility that hobbyists desire. Reversible wood panels allow you to choose your color: black or light brown. Each aquarium stand is equipped with a bottom shelf that can be utilized for a second tank or to showcase home décor. The center wood panel flips upward for easy access to the bottom shelf. Steel construction provides great durability and features a rust-resistant powder-coated finish.

Accents Stands

Assembly Required

The Accents furniture line was designed for aquarists who value aesthetics as much as functionality. A contemporary design features attractive metal accents and adjustable shelving to add a personal touch and cohesion in any room. More adjustable shelving and cutouts inside the stand cabinet provide endless options for storage and organization. The water-resistant platform provides worry-free protection from accidental spills.

Lighting

Proper lighting is essential to the health and appearance of your aquarium. This is why Aqueon offers a wide variety of sizes and styles to fit your unique aquatic environment. A carefully designed range of replacement lamps provides additional options for general illumination, color enhancement and plant growth.

OptiBright® MAX LED Lights

50% brighter for MAXimum illumination!

The OptiBright® MAX LED is the next step up in our line of static LED fixtures. It still includes the RF remote control with timer for complete customization, but is now packed with brighter LEDs for the best view of your aquatic inhabitants.

Features:
- Bright white, blue Moon Glow and color-enhancing RBGs
- RF remote control with 24-hour timer
- 8 preset color options for quick customization
- 3-speed color scroll mode
- Dimming capability in 10% increments
- Automatic 30 min. sunrise/sunset to mimic a natural cycle
- Adjustable mounting brackets for the perfect fit

Filtration

Effective filtration and consistent water flow play an essential part in the overall success of your aquatic environment. Aqueon® QuietFlow® filtration makes it easy! There are a variety of options for any size aquarium, either fresh or saltwater. All Aqueon® filtration is simple to set up and maintain, incorporating both biological and mechanical filtration elements. All filters have Lab Certified flow ratings which lead the industry in performance and reliability.

QuietFlow® LED PRO Aquarium Power Filters

LAB CERTIFIED FLOW RATE

▶ watch the video
Aqueon.com

QuietFlow® LED PRO Power Filters have been improved for consumer ease of use by adding enhanced water cleaning features for healthy fish. The LED filter cartridge change indicator flashes when the cartridge becomes clogged. A fifth stage of filtration has been added to utilize Aqueon® QuietFlow® Specialty Filter Pads *(page 47)* for extra clean and healthy water.

QuietFlow® Specialty Filter Pads

Aqueon® Specialty Filter Pads are designed to address common water issues. The pads are pre-cut to fit in the Aqueon® QuietFlow® LED PRO Power Filter Bio-Media Grid. There are three varieties available:

Ammonia Reducing Helps to remove excess harmful or toxic ammonia

Carbon Removes pollutants and organic debris, improving water clarity and reducing odor

Phosphate Remover Helps to remove excess phosphate that contribute to algae growth while trapping excess waste, food and other organic debris

Replacement Filter Cartridges

For Aqueon® QuietFlow® Internal Power Filters. Each cartridge acts as a two-stage filter. The dense foam outer layer removes dirt and particulates while inside the activated carbon removes odor, organics and discoloration. The rigid frame ensures that water passes through the cartridge, and not around it, for optimal water filtration.

QuietFlow® Canister Filters

Aqueon® QuietFlow® Canister Filters offer multi-stage filtration, powerful flow rates and flexible setups for optimal performance. A unique feature is the Water Polishing Unit with carbon cartridge, which serves as the final stage of filtration. This unit makes ongoing maintenance easier; the cartridge can be replaced on monthly basis rather than replacing the contents of the media baskets. Each unit includes biological, chemical and mechanical media, along with essential intake/output connections and hoses. The canister filters are designed for use with fresh and saltwater aquariums.

Water Polishing Unit

Three Water Return Options

Water Polishing Unit acts as the final filtration step and quietly returns water by breaking the water surface and enhancing oxygenation

Water Director returns water in a directed flow, under the water's surface

Spray Bar extends the water return over the length of the tube, increasing circulation

Filter Media

For use with the Aqueon® QuietFlow® Canister Filters;
appropriate for both freshwater and saltwater applications.

Carbon Media

Mechanical filtration that works to remove organic pollutants, reduce odor and water discoloration and improve overall water quality.

Item No.	Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100107315	1 lb	8	6.125 x 1.75 x 8.25	0 15905 07315 8

Bio-Ceramic Rings

Promotes beneficial biological bacteria growth on its surface area.

Item No.	Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100107316	1 lb	8	6.125 x 1.75 x 6.25	0 15905 07316 5

Bio-Balls

With its one inch diameter and large surface area, Bio-Balls are designed to promote beneficial biological bacteria growth within the aquarium. Contains 60 Bio-Balls.

Item No.	Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100107317	7" x 7"	8	6 x 2.375 x 8.25	0 15905 07317 2

Foam Pads

Designed to fit Aqueon® QuietFlow® Canister Filters, these perform both mechanical and biological filtration. This pad promotes beneficial bacteria growth as well as traps small particles found in water. Contains 2 Foam Pads.

Item No.	Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC

*Fits 200 gph Canister Filter.
**Fits 300 gph and 400 gph Canister Filters.

ProFlex Modular Sump Filtration

ProFlex Sump is manufactured using extremely durable materials. The flexibility of the unit allows for three completely different setups: Refugium, Wet/Dry and Berlin.

watch the video
Aqueon.com

Item No.	Sump	Fits Aquarium	Size (Item Dimension) (L" x W" x H")	UPC
100134501	Model 2	55, 72 Bow, 75	30.875 x 11 x 19 (30 x 9.875 x 21.25)	0 15905 34501 9

Works with Aqueon® Overflow Accessory Kit
(See page 9)

Setup Diagrams
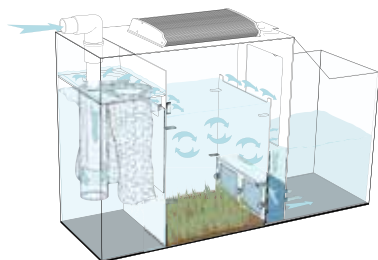

Refugium

Add a refugium light to create a thriving refugium for your reef aquarium. Live rock and certain plants/algae help control excess nutrients that may hinder the growth of corals in the main aquarium.
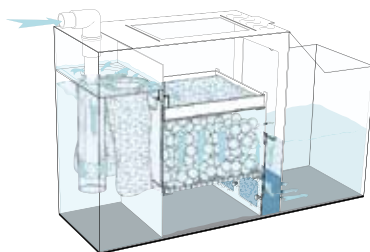

Wet/Dry

Using the BioMedia Accessory Pack, turn the ProFlex into a traditional wet/dry trickle filter. Great for use in freshwater and fish-only saltwater applications to provide advanced biological filtration for a heavy fish load.
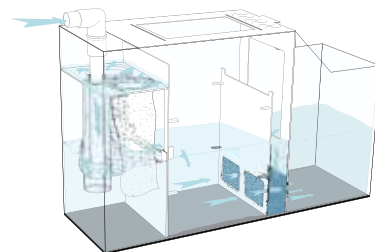

Berlin

Ideal for reef applications where utilization of a large protein skimmer is imperative. The expansive sump chambers allow for placement of a large protein skimmer and a constant water level.

Replacement Filter Bags

Replacement filter bags for all ProFlex Modular Sump Models. 2pk

Aquarium Heaters

Whether providing warmth for a small desktop or large aquarium, Aqueon's assortment of heaters provide efficient warmth needed for aquatic environments. The assortment includes preset heaters, adjustable shatter-resistant quartz heaters and adjustable Pro Heaters. All heaters are fully submersible and can be mounted in either a horizontal or vertical position.

Choose the right heater! See page 75 for a quick reference guide.

Aquatic Flat Heaters

Aqueon® Aquatic Flat Heaters are designed for small desktops up to 10 gallons. They are completely submersible, easy to install and efficiently warm water.

Item No.	Size	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100533032	5 Watt	Up to 2 Gallons	48	3.75 x 1.75 x 7 (1.125 x .875 x 3.125)	0 15905 00069 7
100101230	7.5 Watt	1 to 3 Gallons	48	4.75 x 1.75 x 8 (2 x 5 x 5.625)	0 15905 01230 0
100101231	15 Watt	5 to 10 Gallons	48	4.75 x 1.75 x 9.25 (2 x 5 x 6.75)	0 15905 01231 7

Mini Heater

Aqueon® Mini Heater provides warmth to tropical fish. Designed with a shatterproof housing and thermal safety shut-off, this compact and completely submersible mini heater is perfect for desktop aquariums.

Item No.	Watt	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100106193	10 Watt	Up to 5 Gallons	24	4.25 x 1.75 x 8.625 (1 x 1 x 3.375)	0 15905 06193 3

Preset Heaters

Aqueon® Preset Heaters require no adjusting! The preset temperature has been calibrated to 78°, appropriate for most tropical fish. The fully submersible heaters are constructed of shatter-resistant quartz glass and features an automatic safety shut-off to avoid overheating. An LED indicator light displays red when actively heating.

Item No.	Watt	Aquarium Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC

Water Care

Made in the USA with imported and domestic ingredients.

Aqueon® water care products are designed to provide effective solutions to aquarium setup and use. Simple to understand and apply, these products help maintain the healthiest environment for your aquatic pets. Use Aqueon® water care products when setting up your aquarium for the first time, while doing routine water changes and while cleaning or changing filter media to keep your fish healthy and active.

Ammonia Neutralizer

Ammonia levels will rise naturally due to the accumulation of fish waste and the breakdown of any uneaten food in water. Harmful ammonia is neutralized and tap water is conditioned for fish after a single dose of Aqueon® Ammonia Neutralizer.

Item No.	Weight	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC

Water Renewal

Water in lakes and rivers contains renewable trace minerals that are essential for fish and plants to live and grow. In an aquarium environment, these minerals are depleted over time by fish, plants and carbon filtration. Aqueon® Water Renewal replaces these biologically essential minerals, restoring water to its natural state and promoting the health, color and vigor in fish.

Item No.	Type/ Weight	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100106016	Goldfish 4.0 fl oz (118 ml)	36	1.625 x 1.625 x 5.375	0 15905 06016 5

PURE
Live Beneficial Bacteria and Enzymes

Beneficial bacteria are needed to maintain a well-balanced aquarium. These bacteria live on the surfaces of the aquarium such as rocks, plants, décor and filter media. Unlike other liquid bacteria supplements, Aqueon® PURE comes in an easy to dose ball providing a surface for nitrifying bacteria to live before being added to the aquarium.

Works great with the Aqueon® QuietFlow® Air Pump *(See page 58)*

# Information

Sizing information

Use this information to plan what size aquarium fits your needs and space. For safety reasons, and to fulfill warranty requirements, it is essential to place your aquarium on an appropriately sized, suitably designed aquarium stand, which will meet all weight and safety specifications. Also, please note that tempered-bottom aquariums are exceptionally strong but cannot be drilled. *(See page 9 for pre-drilled aquariums.)*

*How the aquarium is measured:
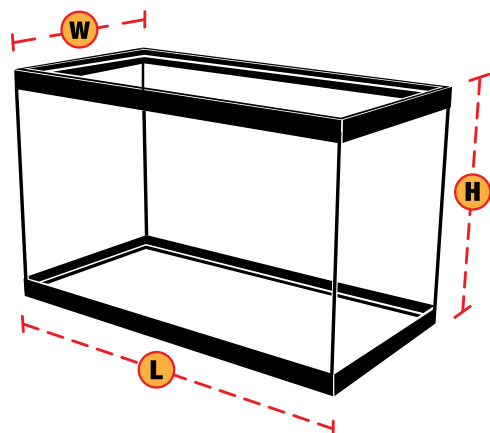

Black Moor Goldfish
(Carrasius auratus)

Aqueon® Glass Aquariums
## and Zilla® Reptile Enclosures

Tempered vs. Non Tempered

Due to glass availability, Central Aquatics may temporarily substitute regular or non-tempered glass panels with tempered glass panels. Any time a glass substitution is made, a sticker will be adhered to the aquarium/reptile enclosure bottom as a precaution to the end user.

Please Note: Any aquarium/reptile enclosure that is altered in any way (i.e. - drilled, attempted to be drilled, the center brace removed) by an individual outside of Central Aquatics, will deem the warranty null and void.

Power Cord Drip Loop

Since some of your aquarium equipment requires electricity to operate, your aquarium should be placed within close proximity to an electrical outlet.

One of the best and simplest tools that will enforce the separation of water and electricity is the "drip loop." The drip loop is formed by ensuring that the power cords leading into the outlet approach the outlet from underneath the plug socket. If water drips down a power cord, it will fall off at the upward bend in the cord, never making it to the electrical outlet.
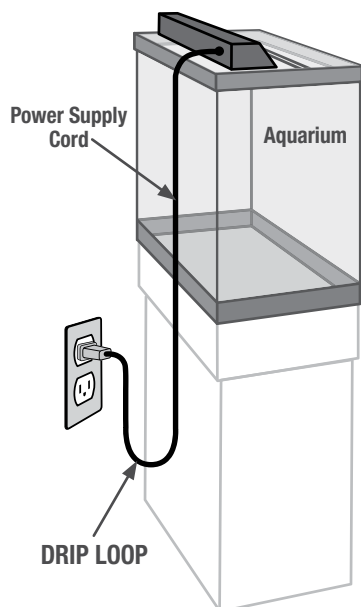

Warranty Information*

Aqueon® Product	Sizes Covered	Warranty Length

Aqueon® Heater Recommendations

Based on standard room temperature of 68°-72°.

Aquarium Size	To increase above room temperature: 5° F	10° F	15° F
5 Gallon	50 watt	50 watt	50 watt
10 Gallon	50 watt	50 watt	100 watt
20 Gallon	50 watt	100 watt	100 watt
30 Gallon	100 watt	100 watt	150 watt
55 Gallon	150 watt	150 watt	200 watt
75 Gallon	200 watt	200 watt	300 watt
100 Gallon	300 watt	300 watt	300 watt

Aquarium Setup Guide

1. Find **level** location

- Aquarium should be placed and filled on a level, suitably-designed and appropriately-sized aquarium stand.

2. Add **gravel, plants, décor**

Rinse gravel in colander

Rinse plants and décor items

- Gravel depth should measure 1"- 3" from the bottom.
- Cover base of plants and bottom of decor items with gravel to hold securely in place.

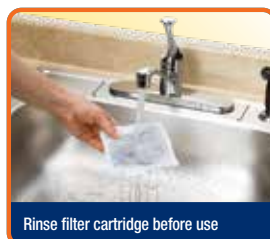

1"- 3"

## 3. Add room-temperature **water**

Add Water Conditioner as directed

- Fill aquarium with water to 1/2" from top of frame.

4. Add **filter, thermometer, heater, light hood**

Rinse filter cartridge before use

Add thermometer, heater to aquarium

Remove insert from back of light hood

- Plug in filter, light hood and heater using the "drip loop" method (see page 65).

- Allow aquarium temperature to stabilize; wait at least 24 hours before adding fish.

5. Add **fish**

Wait 24 hours before adding fish

- Turn off light, unplug and remove light hood.
- Place fish, while in bag from store, into aquarium. Let sit for 20 minutes.
- Open bag and add about 1/2 cup of aquarium water. Wait 5 minutes. Repeat once. Carefully allow fish to enter aquarium. Replace light hood and plug in.

Three Simple Tips for Aquarium Success

3 TIPS to Succeed ®

Success Tip **1**

Lighting

Only keep aquarium lights on for 8-10 hours during the day, then turn off at night.

8-10
Hours of Light
per day

Success Tip **2**

Feeding

Give your fish one small pinch of food 2 or 3 times per day.

1 Pinch
of Food
2 to 3 times per day

Success Tip **3**

Water Changes

Only change 25% of the water once per month.

Never empty all the water at once.

25%
Water Change
monthly

Practical Tips for a Healthy Aquarium

Aquarium keeping is a fun and rewarding activity that can provide years of enjoyment, education and even stress relief. When you're new at it, however, it's easy to do things that might not be good for your fish or your stress level.

Like all pets, aquarium fish rely on us for their essential needs in life, from a comfortable place to live to good food, clean water and peaceful neighbors. Fish that are well cared for live long happy lives, put on their best colors, are resistant to sickness and may even breed! Here are some important tips to help you give your fish the best possible living conditions.

Aquarium Decorations that Make the Perfect Habitat

Simply put, most aquarium fish need structure in their environment to feel safe, establish territory or seek refuge. In a well-decorated aquarium, fish tend to be less shy and live more comfortably. Territorial and semi-aggressive fish tend to quarrel less when there is ample cover. Decorating is also one of the most rewarding aspects of owning an aquarium. It allows you to personalize your aquarium, exercise your creative skills and turn that glass box into living art!

When choosing decorations for your aquarium, always take into consideration the needs of your fish. For example, schooling fish such as tetras, barbs, danios and rasboras enjoy swimming among plants (live or artificial), and choosing darker shades helps accent their bright colors. Place taller plants towards the back of the aquarium to create a backdrop and hide heaters, cords and filter tubes, with progressively shorter plants towards the front. For surface-oriented fish like gouramis, hatchetfish and livebearers, use plants that are taller than the aquarium to create overhangs. Floating plants such as duckweed, hornwort and Salvinia create the same effect and are easy to grow.

Fish that like to "den", such as redtails, rainbow sharks, certain types of cichlids, loaches, catfish, and certain types of plecostomus find refuge in hollow logs, caves, castles and sunken ships. They will often patrol the entrances to their lairs and ward off any fish that come too close. In aquariums with discus or angelfish, decorate with pieces of driftwood angled from the surface down to the bottom to simulate the fallen trees and branches in their natural environment. For Rift Lake cichlids, use plenty of rockwork to simulate the bolder fields found in their natural habitat.

When introducing new additions to an aquarium with territorial fish such as cichlids, it's a good idea to rearrange existing décor to eliminate old territorial boundaries and add new decorations to create additional habitat for the newcomers.

Artificial and Natural Aquarium Décor

Natural décor items include rocks, driftwood, and live aquatic plants. Natural decorations can be used to influence water chemistry to suit the fish in your aquarium. For instance, driftwood can be used to lower pH and alkalinity for Amazonian and Southeast Asian fish. Limestone and other calcium carbonate-based rocks have the opposite effect, raising pH and alkalinity for African Rift Lake and Central American cichlids, as well as livebearers and brackish water fish.

Artificial decorations such as castles, sunken ships, figurines, silk or plastic plants, simulated logs and rocks allow aquarium owners to create themed displays or match surrounding room décor. Do not use metal or any material that might dissolve or release toxins into the water.

Feeding Your Fish

Fish in nature spend much of their day either eating or trying to avoid being eaten. Some fish are omnivorous, meaning they eat different types of food. Others are herbivorous, feeding mostly on plant matter. Which leaves the carnivores, who feed on meaty foods such as insects, worms, crustaceans, amphibians, other fish and even small birds and mammals! Large predatory fish eat less frequently, while herbivores and omnivores graze throughout the day.

What Should You Feed Your Fish and How Often

Knowing what fish eat in nature helps the aquarist choose the proper food and gives some indication of how often they need to be fed. Most fish do best when fed once or twice daily. All food should be consumed in 2 minutes or less. Large predators do not catch food every day in nature, and do not need to be fed every day in the aquarium. Water quality will be better and filter maintenance will be required less often if these fish are fed less frequently. Herbivores and fish that forage should be fed small quantities of food two to three times daily. Aqueon offers a complete line of flake, pellet, tablet and dried whole foods to accommodate the nutritional needs of most ornamental fish.

Fish will normally find food whether it's at the surface, in mid-water or on the bottom. However, presenting it in the way they normally feed is helpful, especially for new arrivals or finicky eaters. For example, feed bottom feeders sinking foods, and flake or floating pellets to surface and mid-water feeders. Sometimes more aggressive feeders may intimidate shy fish, preventing them from getting enough to eat. A solution to this problem is to feed aggressive feeders first and once they are distracted, direct some additional food to sheltered areas where shy fish can eat in peace. Finally, many plecostomus, catfish and knifefish are nocturnal and stay hidden until the lights go out. While some fish may learn to eat during daylight hours, many will stay hidden and may not get enough to eat. Feed these fish after the aquarium light is turned off at night.

Always research the nutritional needs and feeding habits of your fish and provide for them accordingly.

Aquarium Water Changes

Regular partial water changes remove pollutants and growth inhibitors that accumulate over time and help stabilize pH and buffering capacity in your aquarium. They replenish trace elements and important minerals that are used by fish, invertebrates and plants, as well as the biological processes that maintain balance in your aquarium.

There are different philosophies regarding water changes in an aquarium, but the best practice is to do small partial water changes on a regular basis. Most hobbyists change 25% of the water in their aquarium every 2 to 4 weeks, but heavily stocked aquariums, those that house large messy fish or extremely sensitive fish, or aquariums that are fed generously will benefit from more frequent changes. Many "old school" aquarists perform a 10% to 25% water change on their aquariums every week. Changing more than 50% of the water is not recommended.

If your tap water has unusually high pH or alkalinity or is unsuitable for aquarium use due to high nitrates, phosphates or other problems, consider using a Reverse Osmosis Water Purification System. Reverse osmosis (RO) or deionized (DI) water can also be purchased from many local fish stores. When using RO/DI water in freshwater aquariums, always add a trace element supplement such as Aqueon Water Renewal to replace essential minerals and buffers that restore water to its natural state and promote optimum health, color and vigor in your fish and live plants. Bottled water can also be used provided it has acceptable chemistry.

Fish Transportation and Acclimation

Properly acclimating new fish purchases into your aquarium has a significant impact on their long-term health and well-being. Netting, bagging and transporting fish is highly stressful and water quality and chemistry can vary between your local fish store and your aquarium, precautions should be taken to ensure the transition is as stress free as possible. The greater the difference between the store water and your aquarium, and the longer your fish are in transit, the more time and care you should exercise when acclimating them. In addition, some fish are more sensitive to changes and require more gradual acclimation.

Be aware of any significant differences in pH, alkalinity, general hardness and nitrates between your aquarium water and the store where you are purchasing your fish. Go straight home after your fish or marine livestock purchase. In extremely cold or hot weather, transport fish in an insulated cooler or Styrofoam shipping container to avoid excessive temperature fluctuations. Do not place fish in the trunk of your car. Finally, be sure to research the fish you are buying in advance to ensure conditions in your aquarium are appropriate for them.
