Industry-leading warranties and commitment to service

Panasonic is proud to offer some of the most comprehensive scanner warranties in the industry, including Standard Warranties, Advance Exchange Warranties and Onsite Warranties. Our professional services offerings ensure you'll always receive the utmost care for your scanner and scanner accessories.

Our commitment to you before and after the sale is to provide complete satisfaction with Panasonic products and services. We are dedicated to giving you total peace of mind throughout your experience with us.

HIGH-SPEED

QUIET OPERATION

GIGABIT ETHERNET

LESS MAINTENANCE

3-YEAR WARRANTY

KV-S5078Y DOCUMENT SCANNER

Superior Image Quality.
Powerful Paper Feeding.

ToughFeed

Panasonic KV-S5078Y Document Scanner

High-speed Scanning Performance

Quiet Operation

The robust paper feed mechanism of the KV-S5078Y generates minimal noise during operation. Compared to its predecessor, the KV-S5078Y has an operating noise of 55 dB or less and provides a quieter and more comfortable operating environment.

Faster startup time*

2.6 seconds vs 5.4 Seconds
208% faster than previous model

*The time it takes for the scanner to start up after the Start button is pressed.

Superior Image Quality

The high-performance 3-line CIS (Contact Image Sensor) delivers high-quality scanned images superior to devices equipped with only a 1-Line CIS. Panasonic has incorporated its original image processing technology and fine tuned it to provide enhanced character reproduction and whiter backgrounds. The results of this fine tuning with a 3-Line CIS delivers higher OCR accuracy and barcode recognition, increasing scanning efficiency.

|--|--|------------------------------------|
| Background whitening | Faint Character Enhancement | Vertical Line Reduction |
| Improved Color Reproduction | Moire Removal | |

Powerful Paper Feeding

The KV-S5078Y features a newly designed feed roller system, which includes grooved rollers, with a thicker layer of rubber material. This new design provides higher feeding performance and reliable scanning operation, while increasing roller life of up to 700K scans between replacement. That is nearly double the life of its predecessor.

Paper feed roller module

Double feed prevention roller

Intelligent double feed detection
 The KV-S5078Y can be programmed to ignore double feeding errors on up to 8 specific areas of the scanned document. This feature is designed to allow certain documents with sticky notes, barcode labels or taped receipts to pass through the scanner without error.

Barcode

*Roller life may vary depending on the type of paper used.

Less Maintenance

The scanner glass has a conductive coating to prevent accumulation of paper dust caused by static electricity. Since paper dust does not easily adhere to the scanning glass, lines caused by paper dust is reduced significantly while reducing the length of time between cleaning.

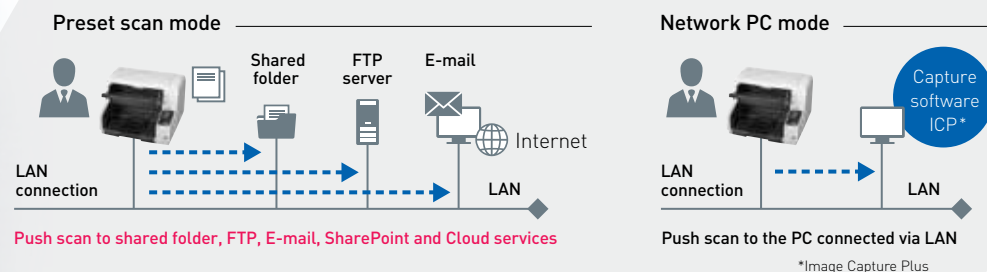

Onboard Network Scanning

Panasonic's first A3 Network Scanner with Integrated Gigabit Ethernet. Easily centralize high volume scanning applications, without the need of an external PC to operate.

Scan-to-Shared Folder/FTP/Email/PC/Cloud

- Pull scanning can be performed over a local area network using Image Capture Plus.
- Common scanning tasks can be automated via the job button on the control panel.
- Common scanning Jobs can be easily created via the built in network administration page, this allows documents to be scanned to a variety of network destinations.

• KV-SS094 may be required depending on the feature to be used.

Site Central Manager Suite

Centralized device management application for remote device administration.

- Scanners can be monitored and updated over a local area network.
- Eliminates cumbersome maintenance procedures by remotely deploying software, firmware and device setting updates to one or multiple devices.

Convenient functions

- Operating status, errors and warnings can be monitored by SCMS.
- Administrators can be notified via email when a device needs attention or consumables.
- Supports batch updating and scheduling of your entire fleet of Panasonic scanners.
