# AF-S NIKKOR 24-120mm f/4G ED VR FX ZOOM LENS

AF-S NIKKOR 24-120mm f/4G ED VR  
FX ZOOM LENS

FEATURES

- **Compact and versatile 5X standard zoom lens with f/4 maximum aperture**  
Perfect for landscapes, portraits, weddings and distant subjects offering a constant maximum aperture to maintain exposure settings throughout the entire zoom range.
- **Extended range on Nikon DX-format D-SLR cameras**  
Angle of view is equivalent to a focal length of 36-180mm in FX/35mm format.
- **Nikon VR II (Vibration Reduction) Image Stabilization**  
Vibration Reduction, engineered specifically for each VR NIKKOR lens, enables handheld shooting at up to 4 shutter speeds slower than would otherwise be possible, assuring dramatically sharper still images and video capture.
- **Nano Crystal Coat**  
Further reduces ghosting and interior flare across a wide range of wavelengths for even greater image clarity.
- **2 Extra-low Dispersion (ED) Elements**  
Offers superior sharpness and color correction by effectively minimizing chromatic aberration, even at the widest aperture setting.
- **3 Aspherical Lens Elements**  
Aspherical lens elements virtually eliminate coma and other types of aberration, even when shooting at the widest available aperture.
- **M/A Focus Mode Switch**  
Enables quick changes between manual and autofocus operation.
- **Internal Focus (IF)**  
Provides fast and quiet autofocus without changing the length of the lens, retaining working distance throughout the focus range.
- **Exclusive Nikon Silent Wave Motor (SWM)**  
Enables fast, accurate and quiet autofocus.
- **Nikon Super Integrated Coating (SIC)**  
Enhances light transmission efficiency and offers superior color consistency and reduced flare.
- **Rounded 9-Blade Diaphragm**  
Renders more natural appearance of out-of-focus image areas.
