Time Clock Updates

Occasionally, Icon Time Systems releases new updates for your employee time clock. These updates are provided for free and often includes important reliability fixes, new features and other product improvements. To see what is included in the latest update, find the version number below.

Version 4.0.10103

- This update introduces capturing of biometric consent during the enrollment process for new employees, and on the next punch for existing employees.
 - During enrollment, employees will be presented with a BIPA disclosure message that they will need to consent to in order to have their fingerprint templates enrolled
 - If they don't consent the user cannot proceed with enrolling their fingerprints
 - For existing employees (previously enrolled), if they decline or timeout on the bio consent prompt, their template will be deleted
- Admins will be able to view employees' bio consent status on the Employee List page
- Other changes include :
 - Ensuring employee slots with punches are retained whenever employee slots are removed after updating
 - Ensuring the new fingerprint reader can work with existing templates
 - The employee display name in CSV imports is limited to a max length of 16 characters. (Longer names are truncated)
 - Bug fixes for various print preview alignment issues
 - Improvements on the New Update Available pop-ups

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium

Version 4.0.9409

- TotalPass B600 and TotalPass P600 now point to updated user guides.
- Implemented QB OAuth 2.0 to support the current QuickBooks Online authentication standard
 - TotalPass clocks can successfully connect to QB Online and add employees and send punches.
 - Added new Payroll Address fields in the Edit An Employee page. QB OAuth 2.0 standard requires employees have address information before they can be added to QB Online
- Improvements include:
 - Ensuring the Set Date & Time prompt persists until the user sets the date & time, even with multiple power cycles
 - Creating a robots.txt file on our embedded web server so GoogleBots and other search engines will ignore the clock

Version 4.0.8790

- New brand look and feel:
 - New brand colors and logos that match our website
 - Updated the Proximity product name to TotalPass P600
 - Updated the Biometric product name to TotalPass B600
- A security update to resolve the ability of a standard user to potentially change the admin's password

Version 4.0.8642

- Bug fix for double notes i.e. Employee web punch notes, and admin notes, causing punches to be exported twice to QuickBooks and on CSV exports
- Updated the ADP Workforce Now export file specs: The OT header was updated to O/T

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium

Version 4.0.8454

- New payroll exports:
 - QuickBooks Online
 - ADP Workforce Now
 - Paylocity
- New payroll configuration screen
 - Users will be able to configure payroll specific pay/earning codes
- Introducing an auto-update feature. Once updated, time clocks will be able to detect subsequent available updates.
 - Clock Admins and supervisors with System Update permissions will receive a New Update Available notification on the homepage with a recommendation to backup. They will be able to update right from the clock once a local backup file has been created
- Improvements:
 - New Disclaimer — disclaimer.html
 - New Components & Licenses listing — componentslicenses.html
 - Employee Limit upgrades will reboot the time clock and provide a progress indicator
- Bug fixes:
 - Updated the way quotes are handled in Employee and Department page text fields to prevent database related issues
 - Child clocks now get employee limit capacity from their parent clock

Version 4.0.7692

- Hotfix for Multi-Clock system communication issue

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium

Version 4.0.7632

- Import mass employees into the time clock from a CSV file
- Show additional Network connection detail in the software interface
- New Payroll Menu
- Paycom export
- Report Improvements:
 - Employees using Web Punch can add custom notes to the Punch
 - Column picker added to the Timecard by Department and Individual Employee Timecard Reports.
 - Save '0' Hours of Non-work Time
- Child Clock connection stats moved from the About page to the Clock List
- Reboot clocks from the software interface
- New Support Package download file available in Supervisor Mode or sysinfo.html
- New annual product feedback survey
- Various bug fixes

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium

Version 4.0.6980

- Various bug fixes
- New look and feel:
 - Updated the navigation menus and separated the Logout, Help and About links
 - Added the name of the logged-in user to the top right corner of every page
- Added a stalker menu bar so the menu bar is static and doesn't scroll off the page when you scroll down
- Made reports' date pickers and selection links static when you scroll down the report
- Made the Employees, Departments, Supervisors, and Child Clock List's headers static when you scroll down the lists
- Added a column picker to the Employee List so the user can choose which columns to display
- Added a column picker to the Timecard report so the user can choose which report columns to display
- Enabled adjustment of the report font size depending on the number of columns on display, allowing printing of reports in easy-to-read font size.
- Enhancements:
 - Users will now get a confirmation screen when deleting a punch, before the deletion takes place
 - Punches will not be flagged with the "E" edit flag when photos are approved, unless the punches are actually edited
 - After punch edits, users will be redirected to the same punch/department position on the report page
 - Custom field values will not be case sensitive when running labor distribution reports
 - Added a link to the SMTP server settings from the Payroll report page when the server settings are not defined
 - Added the parent and child clocks' MAC Address to the sysinfo.html and the About page
 - Added the option to reset Parent and Child Clocks' biometric statistics back to 0, from the About page

Version 4.0.6856

- Bug Fixes:
 - Clocks converted to child clocks by IP over a Wide Area Network were unable to connect to the parent
 - Image Directory was missing causing photos not to be saved and previous photos to be deleted upon update
- Added a camera log that will log system errors whenever the camera fails to take a picture

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium

Version 4.0.6772

- Introduced a new report: Individual Employee Timecard Report
- Increased Department support to 99 departments

- Delete Punch Confirmation when deleting punches.
- TotalPass Biometric:
 - Auto-approval of failed biometric punches 1 week after pay period close. Includes deleting of photos associated with approved punches.
 - Approved punch photos are marked with a green camera icon as opposed to an E for punch edits
 - Ability to email Timecards in both html and CSV formats
- TotalPass Proximity with Email Alerts Upgrade:
 - Ability to email Timecards in both html and CSV formats
- Various bug fixes

Version 4.0.6476

- Multi-Clock enhancements which include; syncing of bio templates between parent and child clocks in the background so users can still use the time clocks, differential finger reader updating, and percentage progress indicator during the finger reader syncing.
- Introduced a new CSV Export with limited columns
- Added a Payroll ID field to the employee page for payroll purposes
- Added a Department Code field to the department page for payroll purposes
- Added Batch Edits—Ability to edit punches in batches before refreshing the report.
- Added SD card brand, size and usage to the System Information page accessed via the About Page
- Bug Fixes

TotalPass Small Business Premium Software Update Change Log

TotalPass Small Business Premium
