Safety Data Sheet

Section 1: Identification of the Substance/Mixture and of the Company/Undertaking

1.1 Product identifier

Product Name

LP Engineered Wood Products with Fire-Retardant Coating

1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified use(s)

 Various engineered wood building products with fire-retardant coatings for wall, roof, or floor components; structural or nonstructural construction components; industrial applications.

This SDS applies to all of LP's products with fire retardant coatings.

1.3 Details of the supplier of the safety data sheet

Manufacturer

 Louisiana-Pacific Corporation 414 Union Street, Suite 2000 Nashville, TN 37219

United States www.lpcorp.com

Telephone (General) • 877-744-5600

1.4 Emergency telephone number

Manufacturer • 615-986-5600

Section 2: Hazards Identification

This product is not hazardous in the form in which it is shipped by the manufacturer but health and/or physical hazards may be created by downstream activities (e.g., cutting, sanding, milling) that reduce its particle size. Those downstream hazards are described below.

Page 1 of 22

EU/EEC

According to: Regulation (EC) No 1272/2008 (CLP)/REACH 1907/2006 [amended by 2015/830]

2.1 Classification of the substance or mixture

CLP

• Skin Sensitization 1 - H317

Respiratory Sensitization 1 - H334

Specific Target Organ Toxicity Single Exposure 3: Respiratory Tract Irritation - H335 Specific Target Organ Toxicity Repeated Exposure 1: Respiratory Tract - H372

Carcinogenicity 1A - H350

2.2 Label Elements

CLP

DANGER

Hazard statements • H317 - May cause an allergic skin reaction

H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled

H335 - May cause respiratory irritation

H350 - May cause cancer.

H 372 / 373: May cause damage to lungs through prolonged or repeated exposure via inhalation

Precautionary statements

Prevention • P202 - Do not handle until all safety precautions have been read and understood.

P260 - Do not breathe dust

P271 - Use (saw, sand, etc.) only outdoors or in a well-ventilated area.

P280 - Wear protective gloves/protective clothing/eye protection/face protection. P284/P285 - In case of inadequate ventilation wear respiratory protection.

Response • P304+P340 - IF INHALED: Remove person to fresh air and keep comfortable for

breathing.

P342+P311 - If experiencing respiratory symptoms: Call a POISON CENTER/doctor.

P302+P352 - IF ON SKIN: Wash with plenty of water.

P362+P364 - Take off contaminated clothing and wash it before reuse. P333+P313 - If skin irritation or rash occurs: Get medical advice/attention. P308+P313 - IF exposed or concerned: Get medical advice/attention.

Storage/Disposal • P501 - Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

2.3 Other Hazards

CLP

• May form combustible dust concentrations in air.

According to Regulation (EC) No. 1272/2008 (CLP) this material is considered

hazardous.

United States (US)

According to: OSHA 29 CFR 1910.1200 HCS

2.1 Classification of the substance or mixture

2.2 Label elements

OSHA HCS 2012

DANGER

Hazard statements •

May cause an allergic skin reaction

May cause allergy or asthma symptoms or breathing difficulties if inhaled

May cause respiratory irritation

May cause cancer.

May form combustible dust concentrations in air.

Preparation Date: 24/July/2017 Page 2 of 22 Format: EU CLP/REACH Language: English (US)
Revision Date: 30/November/2017 EU CLP, OSHA HCS 2012, WHMIS 2015

Precautionary statements

Prevention • Do not handle until all safety precautions have been read and understood.

Avoid breathing dust.

Use (saw, sand, etc.) only outdoors or in a well-ventilated area.

Wear protective gloves/protective clothing/eye protection/face protection.

In case of inadequate ventilation wear respiratory protection.

Response • IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a

position comfortable for breathing.

If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

If on skin: Wash with plenty of water.

Wash contaminated clothing before reuse.

If skin irritation or rash occurs: Get medical advice/attention.

IF exposed or concerned: Get medical advice/attention.

Storage/Disposal • Dispose of content and/or container in accordance with local, regional, national, and/or

international regulations.

2.3 Other hazards

OSHA HCS 2012

Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard), this product is considered hazardous.

Canada

According to: WHMIS 2015

2.1 Classification of the substance or mixture

WHMIS 2015 • Not classified

2.2 Label elements

WHMIS 2015

Hazard statements • No label element(s) required

Precautionary statements

2.3 Other hazards

WHMIS 2015

 Under Canadian regulations (Workplace Hazardous Materials Information System (WHMIS) -Hazardous Products Act (HPA), Section 11(1)), these product(s) are exempt and considered manufactured article(s) under stated normal conditions of use.

2.4 Other information

- This product is not hazardous in the form in which it is shipped by the manufacturer but health and/or physical hazards may be created by downstream activities (e.g., cutting, sanding, milling) that reduce its particle size. Those hazards are described above.
- This may be a treated engineered wood article which incorporates a biocidal product to control wood destroying organisms. Active Ingredient: Boric Acid.

When working with this product, the following is recommended:

Use (saw, sand, etc.) only outdoors in a well-ventilated area. Avoid breathing dust. In case of inadequate ventilation, wear respiratory protection. Wear appropriate PPE (gloves, eye, and face protection). Do not eat, drink or smoke when using this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Avoid prolonged and repeated contact with the skin. Store in a protected location. Dispose of waste material in accordance with local, regional and national regulations.

Preparation Date: 24/July/2017 Page **3** of **22** Revision Date: 30/November/2017 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

Section 3 - Composition/Information on Ingredients

3.1 Substances

• Material does not meet the criteria of a substance in accordance with Regulation (EC) No 1272/2008.

(1) This ingredient is a cured, inert and polymerized form of polymeric diphenylmethane diisocyanate (pMDI) adhesive. All pMDI has been reacted during the curing process to form polyurea/polyurethane solids.

Key to abbreviations

NDA = No Data Available

Section 4 - First Aid Measures

4.1 Description of first aid measures

Inhalation

• IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

Skin

• In case of contact with substance, wash with plenty of soap and water. If irritation develops and persists, get medical attention.

Eye

• In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.

Ingestion

 First aid is not expected to be necessary if material is used under ordinary conditions and as recommended.

4.2 Most important symptoms and effects, both acute and delayed

• Refer to Section 11 - Toxicological Information.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to Physician All treatments should be based on observed signs and symptoms of distress in the patient.
 Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5 - Firefighting Measures

5.1 Extinguishing media

Suitable Extinguishing

• Water, Dry Chemical, Sand and CO2.

Media

Unsuitable Extinguishing • None known.

Media

5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards • Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Hazardous Combustion

No data available

Products

5.3 Advice for firefighters

Wear positive pressure self-contained breathing apparatus (SCBA).
 Structural firefighters' protective clothing will only provide limited protection.

Section 6 - Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions

Preparation Date: 24/July/2017

Revision Date: 30/November/2017

• Use appropriate Personal Protective Equipment (PPE) Do not breathe dust. Avoid generating dust. Avoid contact with skin, eyes or clothing.

Page 5 of 22 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

Emergency Procedures

 ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid activities that cause wood dust to become airborne.

6.2 Environmental precautions

• No special environmental precautions necessary.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures

Avoid generating dust.

Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Sweep up carefully to avoid generating airborne dust or use vacuum rated for use with combustible dust.

Place recovered wood dust in a container for proper disposal.

6.4 Reference to other sections

 Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7 - Handling and Storage

7.1 Precautions for safe handling

Handling • Minimize dust generation and accumulation. Do not use in areas without adequate ventilation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Provide adequate precautions, such as electrical grounding and bonding. Keep away from heat and ignition sources - No Smoking. Do not breathe dust. Do not eat, drink or smoke when using this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Avoid prolonged and repeated contact with the skin.

7.2 Conditions for safe storage, including any incompatibilities

Storage • Store in a dry, well-ventilated place.

7.3 Specific end use(s)

Refer to Section 1.2 - Relevant identified uses.

Section 8 - Exposure Controls/Personal Protection

8.1 Control parameters

Exposure Control Notations

Japan

- •Wood (may include fiber, strands, or veneer) as Wood dust, all soft and hard woods: Carcinogens: (Group 1 Carcinogenic to Humans)
- •Titanium dioxide (13463-67-7): Carcinogens: (Group 2B Possibly Carcinogenic to Humans)

Mexico

•Titanium dioxide (13463-67-7): Carcinogens: (A4 - Not classifiable as a human carcinogen)

Russia

•Wood (may include fiber, strands, or veneer) as Wood dust, all soft and hard woods: **Sensitizers:** (Allergenic substance (containing <2% Silicon dioxide, listed under Animal and plant origin dust))

Chile

•Crystalline silica (14808-60-7): Carcinogens: (A1 - Confirmed Human Carcinogen)

ACGIH

- •Aluminum hydroxide (Al(OH)3) as Aluminum insoluble compounds: Carcinogens: (A4 Not Classifiable as a Human Carcinogen)
- •Crystalline silica (14808-60-7): Carcinogens: (A2 Suspected Human Carcinogen)
- •Titanium dioxide (13463-67-7): Carcinogens: (A4 Not Classifiable as a Human Carcinogen)

Exposure Limits Supplemental

OSHA

- •Wood (may include fiber, strands, or veneer) as Particulates not otherwise classified (PNOC): **Mineral Dusts:** (15 mppcf TWA (respirable fraction); 5 mg/m3 TWA (respirable fraction); 50 mppcf TWA (total dust); 15 mg/m3 TWA (total dust))
- •Boric Acid, Zinc Salt as Particulates not otherwise classified (PNOC): **Mineral Dusts:** (15 mppcf TWA (respirable fraction); 5 mg/m3 TWA (respirable fraction); 50 mppcf TWA (total dust); 15 mg/m3 TWA (total dust))
- •Crystalline silica (14808-60-7): Mineral Dusts: ((250)/(%SiO2 + 5) mppcf TWA, respirable fraction; (10)/(%SiO2 + 2) mg/m3 TWA, respirable fraction)
- •Silica, amorphous (7631-86-9): **Mineral Dusts:** (20 mppcf TWA; (80)/(% SiO2) mg/m3 TWA)

ACGIH

- •Wax (paraffin, slack, emulsion) (8002-74-2): TLV Basis Critical Effects: (nausea (fume); upper respiratory tract irritation (fume))
- •Aluminum hydroxide (Al(OH)3) as Aluminum insoluble compounds: **TLV Basis Critical Effects:** (pneumoconiosis; lower respiratory tract irritation; neurotoxicity)
- •Crystalline silica (14808-60-7): TLV Basis Critical Effects: (lung cancer; pulmonary fibrosis)
- •Titanium dioxide (13463-67-7): TLV Basis Critical Effects: (lower respiratory tract irritation)

8.2 Exposure controls

Engineering Measures/Controls

• Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is not leakage from the equipment).

Personal Protective Equipment

Respiratory

Skin/Body

For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying
respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator
regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA
or European Standard EN 149 approved respirator if exposure limits are exceeded or
symptoms are experienced.

Eye/FaceWear safety goggles.HandsWear appropriate gloves.

Wear long sleeves and/or protective coveralls.

General Industrial Hygiene Considerations

• Wash hands before eating. Ensure adequate ventilation during use.

Environmental Exposure Controls

• Follow best practice for site management and disposal of waste.

Key to abbreviations

Preparation Date: 24/July/2017

Revision Date: 30/November/2017

ACGIH = American Conference of Governmental Industrial Hygiene

MSHA = Mine Safety and Health Administration

NIOSH = National Institute of Occupational Safety and Health

STEL = Short Term Exposure Limits are based on 15-minute exposures
TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures

LMPE = Maximum permissible exposure limit (Spanish)

Page 12 of 22 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

Section 9 - Physical and Chemical Properties

9.1 Information on Basic Physical and Chemical Properties

Material Description			
Physical Form	Solid	Appearance/Description	Wood product with fiberglass and cementitious coating
Color	Data lacking	Odor	Data lacking
Odor Threshold	Data lacking		
General Properties			
Boiling Point	Not Applicable	Melting Point/Freezing Point	Not Applicable
Decomposition Temperature	Not Applicable	рН	Not Applicable
Specific Gravity/Relative Density	Data lacking	Water Solubility	Not Applicable
Viscosity	Not Applicable	Explosive Properties	Data lacking
Oxidizing Properties:	Data lacking		
Volatility			
Vapor Pressure	Not Applicable	Vapor Density	Not Applicable
Evaporation Rate	Not Applicable		
Flammability			
Flash Point	Not Applicable	UEL	Not Applicable
LEL	Not Applicable	Auto Ignition	Data lacking
Flammability (solid, gas)	Data lacking		
Environmental			
Octanol/Water Partition coefficient	Data lacking		

9.2 Other Information

• No additional physical and chemical parameters noted.

Section 10: Stability and Reactivity

10.1 Reactivity

• No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

• Stable under normal temperatures and pressures.

10.3 Possibility of hazardous reactions

• Hazardous polymerization will not occur.

10.4 Conditions to avoid

• Accumulation of dusts - mixtures of wood dust and air may be explosive when ignited. Ignition sources, heat.

10.5 Incompatible materials

• No data available

10.6 Hazardous decomposition products

• No data available

Page 13 of 22 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

Section 11 - Toxicological Information

11.1 Information on toxicological effects

Other Material Information

• This product is not hazardous in the form in which it is shipped by the manufacturer but may become hazardous by downstream activities (e.g., cutting, sanding, milling) that reduce its particle size. Those hazards are described below.

GHS Properties	Classification
Acute toxicity	EU/CLP•Data lacking OSHA HCS 2012•Data lacking WHMIS 2015•Data lacking

Medical Conditions • Disorders of the lungs.

Aggravated by

Exposure

Potential Health Effects

Inhalation

Acute (Immediate)

Preparation Date: 24/July/2017

Revision Date: 30/November/2017

• Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance

> Page 14 of 22 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

dust may affect the lungs but reactions are typically reversible. Wood dust (generated from sawing, sanding or machining the product) may cause nasal dryness, irritation, coughing and sinusitis.

Chronic (Delayed)

Prolonged exposure to the dust may cause wheezing, chest tightness, productive cough, nasal
irritation and symptoms of chronic respiratory disease. Wood dust, depending on the species,
may cause respiratory sensitization with prolonged, repetitive contact or exposure to elevated
dust levels.

Skin

Acute (Immediate)

• Exposure to dust may cause mechanical irritation. May cause skin sensitization. Symptoms include redness and skin rash.

Chronic (Delayed)

• No data available.

Eye

Acute (Immediate)

• Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.

Chronic (Delayed) Ingestion

No data available.

Acute (Immediate)

 Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.

Chronic (Delayed)

No data available

Carcinogenic Effects

• According to its Twelfth Report on Carcinogens the National Toxicology Program states, "many case reports and epidemiological studies (including cohort studies and case-control studies that specifically addressed nasal cancer) have found a strong association between exposure to wood dust and cancer of the nasal cavity. Strong and consistent associations with cancer of the nasal cavity and paranasal sinuses were observed both in studies of people whose occupations were associated with wood-dust exposure and in studies that directly estimated wood dust exposure."

Carcinogenic Effects					
	CAS	IARC	NTP		
Titanium dioxide	13463-67-7	Group 2B-Possible Carcinogen	Evidence of Carcinogenicity		
Crystalline silica	14808-60-7	Group 1-Carcinogenic	Known Human Carcinogen		
Wood Dust		Group 1-Carcinogenic	Known Human Carcinogen		

Section 12 - Ecological Information

12.1 Toxicity

Material data lacking.

12.2 Persistence and degradability

· Material data lacking.

12.3 Bioaccumulative potential

· Material data lacking.

12.4 Mobility in Soil

Material data lacking.

12.5 Results of PBT and vPvB assessment

• PBT and vPvB assessment has not been carried out.

12.6 Other adverse effects

• Material data lacking.

Section 13 - Disposal Considerations

Page 15 of 22 Format: EU CLP/REACH Language: English (US) EU CLP, OSHA HCS 2012, WHMIS 2015

13.1 Waste treatment methods

Product waste

• Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Packaging waste

• Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Section 14 - Transport Information

	14.1 UN number	14.2 UN proper shipping name	14.3 Transport hazard class(es)	14.4 Packing group	14.5 Environmental hazards
