

THE BEST PRACTICE SOLUTION

Barrier Protection & Signage All-in-One!

The Confined Space Covers provide proper signage and barrier protection, all within one easy-to-use product. These covers are designed to protect employees from the dangers associated with confined spaces and also ward against weather, debris and pests.

Available in lockable and non-lockable versions, the reusable covers are manufactured with durable materials to stand up to harsh environments and chemicals. Covers can be easily cleaned and stored when not in use.

Meet and exceed OSHA regulations for confined space. In line with European standards LOTO requirements.

FEATURES

BENEFITS

Simple Design	Innovative design is easy to use and applies in seconds
Lockable (S202CS & S203CS)	Effective Barrier prevents any unauthorized entry from personnel, environment and pests. The 3.8cm straps come with 25 grommets on each side to cover the flange and adjust the fit before locking the cover.
Ventilated (S201CS & S202CS)	Ventilated covers prevents entry, but allows for airflow. 3.8cm test port hole is great for taking routine atmospheric sampling without having to remove the cover.
Durable material	Silicone treated fabric made from fiberglass stands up to harsh environments and chemicals. Vinyl signs are printed with UV resistant ink to keep the sign looking like new for years in direct sunlight.
Reusable	Confined space cover material can be easily cleaned & stored for reuse.
Includes Signage	Meets and exceeds the OSHA 29CFR 1910.146 Permit Required Confined Space Standard.

Can be used with Field iD to create and manage confined space inspections. Learn more at masterlockfieldid.com.
