CLP SERIES

Turn your living room into a performance venue suitable for top-flight grand pianos

Revolutionary Innovation (RGE2)

With Real Grand Expression 2, CLP-700 Series pianos produce a full range of sound as limitless as a premium concert grand.

GrandTouch™ / GrandTouch-S™ Keyboards

Enjoy genuine key resistance from the tip of the key to the end of the hammer on CLP Series keyboards with GrandTouch, and GrandTouch-S technology — the only available authentic key lengths, inside and out.

Grand Piano Touch and Tone

Grand Expression Modeling captures the complex intricacies of a concert grand piano's tonal expression. Varying dynamics and articulation greatly improve your control, technique and overall sound.

Two Grand Pianos, Two Distinct Experiences
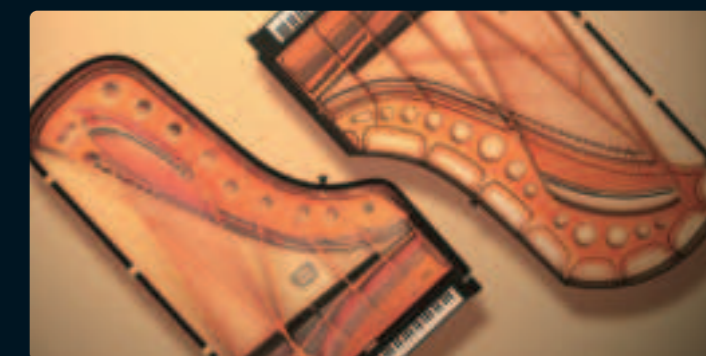

Play the music you love the way it was meant to be heard with new Voices from world-class concert grand pianos — the brilliant Yamaha CFX and the warm and resonant Bösendorfer Imperial. These highly distinctive piano samples offer a much greater dynamic range for a natural, full tone that perfectly preserves their acoustic source.

Realistic Acoustic Simulation

CLP-700 Series pianos use Grand Acoustic Imaging to replicate the full experience of playing a premium concert grand. Enjoy a deeply resonant soundboard, the unmistakable sensation of hammers striking strings and the optimal low, middle and high frequencies you expect from such an elite instrument.

Bring Home Legendary Classical Sound with Fortepiano Voices

For the first time ever, Yamaha has equipped the CLP-700 Series with the sounds of the fortepiano, the modern piano's classic predecessor. Legends like Mozart, Beethoven and Bach all composed their masterpieces on these 18th century instruments. Now, today's players can recreate this defining, historic musical period the way it was heard centuries ago right in their own homes.

CSP SERIES

Introducing an innovative new way to enjoy the piano

Intuitive. Simple. Connected.

Download the Smart Pianist app on your tablet and enjoy a simple, intuitive interface to control every aspect of your Clavinova CSP.

Learn Your Favorite Songs — Your Way

STEP 1   STEP 2   STEP 3

Mastery made easy. The exclusive *Audio to Score* feature analyzes music you want to play and automatically creates a score to play along with using Stream Lights.

- Select a song from your own music library
- Choose a score based on your playing ability
- Stream Lights will show you which notes to play
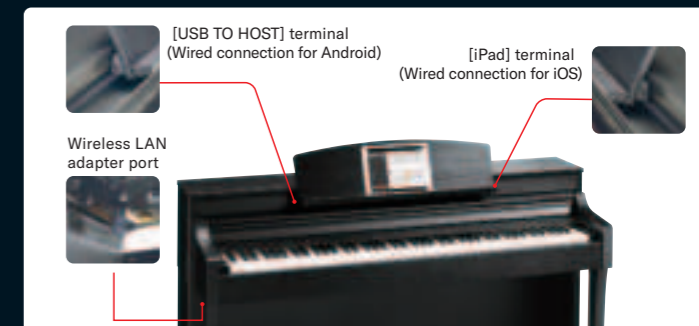

Commit to Perfecting Performance

The Smart Pianist app for CSP offers built-in songs to play instantly as well as additional titles available for purchase at YamahaMusicSoft.com. Since practice makes perfect, Stream Lights technology brings you closer to accomplishing your musical goals faster than ever.

Channel Your Inner Session Musician
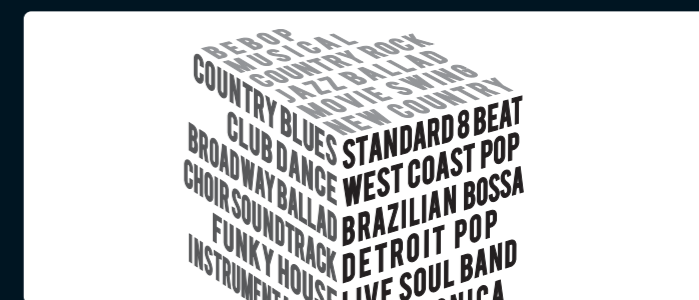

Play along to ensemble sessions with rock, jazz, bossa nova bands or even a full orchestra simply by choosing a Style. And don't forget the lyrics—plug into the CSP's mic input and sing along while you play. The CSP will even add the harmonies.

Flexible connectivity

[USB TO HOST] terminal
(Wired connection for Android)

[iPad] terminal
(Wired connection for iOS)

Wireless LAN adapter port

Clavinova CSP pianos are equipped with a terminal for direct connection* to PCs and iOS or Android devices. They also ship with a UD-WL01 LAN adapter for wireless connection to smart devices.

*For more details about connection please see p25

CVP SERIES

**Irresistible for music lovers**

Ultra-Realistic Instrument Voices

Recreated in perfect detail, the CVP-800 Series boasts drastic improvements to all areas of sound production. The CVP-809 / 809GP models in particular feature all-new, stunningly high-quality samples of electric pianos, strings, guitars, drums and more.

Sing Along with Clavinova

Connect your microphone and amplify your voice with professional vocal effects. The CVP adds natural harmonies to your voice and can even mute vocal tracks from any song in your music library. Read lyrics on screen and change both the audio's tempo and pitch to the right key for your vocal range.

More Backing Styles to Fit Yours

Polished intros, endings and everything in between, the Clavinova CVP delivers virtual bands that complement your performances across a diverse range of genres. Feel the presence of your fellow musicians with astonishing spatial acoustics and incredibly realistic riffs and rhythms. Customize the venue, the piano's size, and the number of musicians performing alongside you.

Learn to Play in a Number of Ways

Learn classic songs using Guide Lamps — key indicator lights that show the right notes and wait for you to play them. Guide Lamps correspond to the score displayed on the built-in touch screen, complete with a bouncing ball to help you follow along.

TELL YOUR STORY NOTE BY NOTE

The player plays, the piano responds, and the player continues to play. The player conveys the feelings they want to express, and the piano responds, in an ongoing exchange that forges a dialogue between the two. In order for this to be a truly rich exchange, both the player and the piano must possess excellent expressive capabilities; the piano must be easy to play and highly responsive, and it must produce beautiful sounds. A great piano satisfies these conditions, and interacting with a great piano inspires the player to explore the bounds of their expressive capabilities. Yamaha crafts pianos that will draw you into a musical dialogue that is sure to make playing more enjoyable and inspiring than ever before.

1. Playability

The dialogue with a piano begins when the player touches the keys. The player wants to know that the keys are easy to play, that they are capable of subtle, nuanced musical expression, that they can handle the player's most powerful intensity, and that they offer total control. Yamaha makes pianos that elicit smiles and flurries of the heart the moment the player puts their hands on the keys.

2. Sensitivity
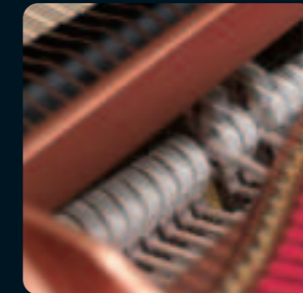

In actuality, pianos must be just as expressive as players are required to be. Yamaha views the richness of tonal variation of a piano as the indicator of the instrument's expressive capabilities. A great piano is one with tonal variation that reflects the player's individuality. The output of a highly sensitive piano matches the subtle differences in the input, encouraging the player to hone their expressive capabilities.

3. Sound Quality

A grand piano is a musical instrument composed of 8,000 parts. The complex interaction of each mechanism in the instrument produces various tonal elements that interact with each other to form a richly varied palate of beautiful sound, from clear, resplendent tones to warm resonance. The Clavinova colors any space with beautiful tone, offering the player the experience of being enveloped in sound.

THE KEYS TO PERFECTION

The Very Best Keys and Pedals

Since 1983 Yamaha has developed Clavinova digital pianos replicating the unique touch, feel and experience of a real grand piano. Nearly four decades later, the Yamaha Clavinova is continuously reimagined for better playability, response, action and tone. Every Clavinova keyboard is the result of countless refinements to ensure the best possible representation of a real concert grand. Additionally, the GP Response Damper pedal has been as meticulously crafted as the keys, providing a truly authentic pedal feel and allowing players to master the nuances and intricacies of delicate pedaling.

Design Philosophy

Clavinova pianos boast excellent playability, versatility, and a refined design that sets the standard for digital pianos. The Clavinova design concept is centered around the way a player feels when they take their seat at the keys. On select models, we remove all unnecessary elements from the player's field of vision to recreate the natural experience of sitting at an acoustic piano, allowing concert grand players to practice exactly the way they perform. As a major facet of a player's everyday life, Clavinova pianos are available in a variety of colors and finishes to enhance any interior design aesthetic or lifestyle.

Limitless Expression
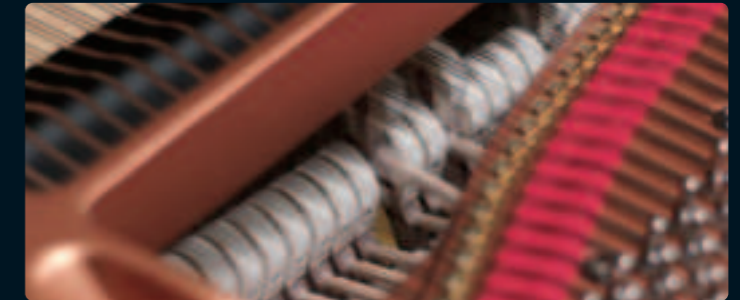

The beauty of a grand piano is that it allows players to drastically alter sound with the subtlest change in technique. However, most conventional digital pianos tend to sound much flatter than the real thing. Fortunately, the Clavinova lineup is designed with the very latest innovations to faithfully reproduce the wide-ranging expression of grand pianos. Clavinova digital pianos respond to the slightest variations of touch to sharpen the performer's skills as they play.

Pristine Concert Grand Piano Sound

The Yamaha Clavinova brings the soul and sound of the grand piano to life. Through Virtual Resonance Modeling, the rich, natural tone of the Yamaha CFX and the Bösendorfer Imperial are perfectly reproduced. VRM technology allows for full resonance of an acoustic soundboard, rim and frame within a compact cabinet. With our expert knowledge and endless experimentation, players can rest assured they're as close as possible to the real thing.

Acoustic Design Ideology

Unlike acoustic pianos, a digital piano's sound is emitted through speakers—which is why acoustic design technology is so important in sound reproduction. A key feature of Clavinova design is a focus on enveloping the player with the same satisfying resonance of a grand piano and the highest possible sound quality. The digital piano craftsmen at Yamaha combine their encyclopedic knowledge of tone and tech to indistinguishably recreate a full spectrum of the sound in every instrument.

APPS AND ONLINE SERVICES

An additional Clavinova benefit: discover new ways to enjoy music through apps and online services.
A wide selection of song and sheet music files are at your fingertips.

Smart Pianist

Smart Pianist is not compatible with CVP-701

Smart Pianist is a free application that adds different features and functionality depending on which Clavinova it's connected to. On CLP and CSP Series, it adds a color touch screen for accessing your favorite features. CSP and CVP models utilize Smart Pianist's "Audio To Score" feature which teaches you how to play songs directly from your personal audio library.

Download on the App Store | GET IT ON Google Play

See the Smart Pianist app page on the Yamaha website for information on compatible operating systems and devices.

Play Your Favorite Songs Right Away

Smart Pianist can analyze songs on your smart device to create chord progressions for you to follow. *Audio To Score* creates piano accompaniment scores automatically so you can learn by following the Guide Lamps (CVP) or Stream Lights (CSP).

CLP CSP CVP

A Variety of Piano Lesson Pieces

CLP CSP CVP

Smart Pianist can play back both preset and commercially available songs, allowing you to simply listen to them or play along. It also displays notation for hundreds of built-in MIDI songs, or you can enjoy additional songs available for purchase and download from Yamaha MusicSoft.
