**Emergency Medical Services**  
Leading Supplies and Equipment

Dear Valued Customer,

We support our everyday heroes in Emergency Medical Services. You save lives and improve the health of patients across the country in all geographies, climates and conditions. The EMS world, like the rest of healthcare, is becoming more complex with an increasingly downward pressure on costs. We're here to help you improve your ability to provide excellent, timely care—whether it's being first to an emergency or transporting patients with basic and advanced life support. We provide you with great quality products and also help you solve challenges in revenue realization, inventory management, and process and product innovation that will enable you to deliver better patient outcomes and satisfaction rates.

We've been a partner in improving healthcare for medical professionals since WWII. We're committed to bringing innovation that advances the health of healthcare. As the only medical supply distribution source that directly serves the entire continuum of care, we help you navigate change, eliminate complexities and give you tailored solutions to meet your needs. Our goal is to reduce costs and improve outcomes at all care points. Our consultative approach can help turn your challenges into opportunities for growth and success. Our mission is to create solutions that support your business and enhance the care you give. We're more than a supplier; we're an advocate for advancing the health of EMS.

On behalf of everyone at Medline, thank you for the confidence you place in us every time you order. Earning your trust is something we strive to achieve every day. We know that having the right medical supplies on hand is critical to the work you perform. That's why we do everything we can to provide you with the products and solutions you need to deliver exceptional care.

Sincerely,

## Disposable Blood Pressure Cuffs and Connectors

- » Medline's single patient use cuffs are made from a soft, comfortable woven polyester fabric
- » Each cuff has rounded corners and finished edges for optimal comfort
- » Hook-and-loop closures ensure a lasting and snug fit for every patient
- » Cuffs come in a wide range of infant to adult sizes, each color-coded for convenience. All sizes meet the American Heart Association recommendations for accuracy
- » A complete line of connectors and adapters connect cuffs to virtually every non-invasive blood pressure monitor

### Choosing the Right Size Cuff

The chart below will help you determine the correct cuff size based on the patient's upper arm circumference. Please note that if you choose a cuff that is not the appropriate size, readings may not be accurate.

DFTRCFA100EN

**defibtech**

**Lifeline ARM**

- » The Lifeline ARM is used to perform mechanical chest compressions when effective manual CPR is not possible
- » Includes chest compression module, frame, backboard, battery, carry case, interface pad (3), stabilization strap, power module
- » 30% longer battery life compared to other devices
- » Can be deployed in under 20 seconds

DFTDCFA120

**defibtech**

**Lifeline AUTO AED**

- » Designed to analyze heart rhythm and automatically deliver a shock, without intervention, if needed
- » Offers simple one-button operation; simply turn the unit on and the AUTO will do the rest
- » Features include clear voice prompts, long life battery, active status indicator, easy data transfer and life-saving technology
- » As protocols change over time, the unit can be upgraded in the field simply by inserting a data card

Item No.	Description	Pkg.
DFTDCFA120	Fully Automatic AED	1/ea

DFTDCFA1310EN

**defibtech**

**Lifeline VIEW AED**

- » Shows you what to do in an emergency with a full-motion color video
- » Video features interactive display that gives you step-by-step instructions for performing CPR, rescue breathing and external defibrillation
- » A built-in metronome counts out the beat so you know what to do and when to do it
- » Other features include real-time protocol, one-touch screen, easy data transfer, easy maintenance, upgrade ability, data card, and safe and effective life-saving technology
- » Durable and rugged with an ergonomic design

**PHILIPS**

**Heartstart Onsite Defibrillator**

- » Includes semi-automated Onsite Defibrillator, hard shell carrying case, spare battery, adult pads and CPR fast response kit

Item No.	Description	Pkg.
DEFMEMSPACK	Adult, Lifeline Semi-Auto and Auto	1/ea

## Defibrillator Pad Electrodes

- » Multi-function defibrillator pad electrodes are intuitive and provide reliable outcomes
- » Color coded packaging to eliminate product selection mistakes
- » 3 year shelf-life intended to reduce product waste
- » 60" lead wire for defibrillator placement flexibility
- » Available in radiotranslucent and radiolucent options
- » Available with leads-in and lead-out packaging

### i-STAT Test Cartridges

- » i-STAT test cartridge technology allows tests to be performed at the patient bedside while delivering the same quality results as traditional, lab-based tests
- » Each cartridge contains chemically sensitive biosensors on a silicon chip that are configured for specific analytes
- » To perform a test, 2 to 3 drops of blood are applied to a cartridge, which is then inserted into the i-STAT handheld

### ViaValve™ Safety IV Catheters

- » A unique valve inside the catheter hub impedes blood flow from the patient's vein upon initial venipuncture
- » Maintaining a clean access site helps prevent the transfer of bloodborne pathogens from patient to caregiver on soiled gloves, clothing, bedding and dressings
- » The catheter, once in the patient's vein, is activated by attaching the Luer fitting of an infusion line which opens the valve to allow unrestricted flow
- » Safety guard surrounds the retracted introducer needle and produces a "click" to indicate that the needle is contained for handling and disposal
