## How to log into IP cameras? How to upgrade IP cameras?

1) Click on the link to download the *Secure Guard IP Scanner*.

<a href="https://specotech.com/wp-content/uploads/2019/07/ipscanner\_setup\_2014.8.13.1.exe\_.zip">https://specotech.com/wp-content/uploads/2019/07/ipscanner\_setup\_2014.8.13.1.exe\_.zip</a>

2) Once downloaded open the *IP Scanner* and you will see the following. Double click on the camera that you want to login to.

 It will open up the login page in your default browser (the plugin only downloads on internet explorer) The default username is admin. The default password is 1234.

4) When you go to *login* it will ask you to change the *default password*. You can just click "*ok*" if you do not want to change the password.

5) When you log into the camera you will see the following screen. Click on *setup* menu as shown below.

6) When you get the *setup* menu you will see the following screen. Click on maintenance as shown below.

7) When you open the *maintenance* tab, click on *upgrade* as shown below.

8) When you get to the *upgrade* page, click on browse so you can *browse* for the file.

9) Click on the *upgrades* file and click *ok* as shown below.

10.) After you select the firmware click the *upgrade* tab and the following screen will display. Click *Ok*.
