

Clear Cryogenic Storage Labels for Use with Laser Printers

“THE CHOICE IS CLEAR” - Contents of vials beneath labels remain visible.

TEMPERATURE-RESISTANT - -196°C to 70°C. Cryo-Clear labels remain fully adhered down to -196°C (liquid and vapor phase nitrogen).

DURABLE - Chemically inert labels resist most organic solvents and caustic agents. Labels adhere to plastics*, glass and metals without cracking, peeling or degrading.

LASER PRINTABLE - Label sheets are specially top-coated to accept laser printing and other markings. Heat-resistant, stay-flat sheets will not jam in laser printers.

INNOVATIVE - Made with a flexible, vinyl label material and permanent acrylic adhesive. This unique combination expands and contracts together as temperatures fluctuate resulting in a strong and sustained adhesive bond.
