

EXCEL[®] WHEELCHAIRS

BUILT STRONG TO LAST LONG

New!
Translator
on page 6.

"We are committed to building wheelchairs and accessories that last a long time. We want patients safe and comfortable and our wheelchairs are designed with that purpose in mind."

*— Rich Derks, VP, Durable Medical Equipment
Medline Industries, Inc.*

Medline® Quality Assurance — We are committed to delivering outstanding customer value, by providing quality health care products and services which consistently meet the needs of our customers. We are committed to continuous improvement of our products, our services, our business processes and our business relationships. We will accomplish these objectives by creating and maintaining a quality-focused environment, while deploying our Total Quality approach with our valued customers, employees and community.

Guarantee — We guarantee everything we sell. Should you have an issue with a Medline product, please call us or speak to your Medline sales representative. We will take care of the problem immediately, either by promptly exchanging the product or crediting your account.

If you have any questions about our products, call us at 1-800-MEDLINE or speak with your Medline sales representative.

MEDLINE LIMITED WARRANTY: Your Medline Wheelchair has a lifetime warranty on the frame and one year on all other parts. This warranty is extended only to the original consumer who purchases this product new and unused from Medline. This warranty does not extend to any subsequent purchaser or owner. Medline warrants the frame to be free from defects in material and workmanship for the lifetime of the original consumer.

HCPCS DISCLAIMER: HCPCS codes and Home Health Consolidated Billing codes provided by Medline are intended as general guidelines only. Medline does not guarantee coverage or reimbursement of any products. You must address all coverage and reimbursement issues (including the correctness and accuracy of codes) with your individual payers. It is your responsibility to ensure the accuracy and appropriateness of each claim you submit, in accordance with all applicable payer requirements.

All Metric measurements in this catalog are rounded to the nearest whole number

Medline, a healthcare industry leader since 1966. Our full line of wheelchairs will get you rollin'!

THE **MEDLINE** DIFFERENCE

Non-Medline Chairs

Medline Chairs

PROBLEM

Inferior welds do not hold up well over time and under heavy loads.

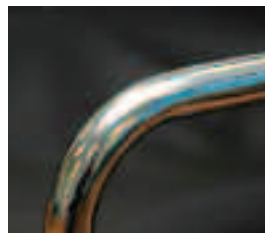

SOLUTION

Tig welding throughout the frame means our frames are stronger and will last longer. **300 lb (136 kg) capacity on most Medline chairs vs. 250 lb (113 kg) competitors.**

PROBLEM

Thin coatings of chrome plating results in greater rusting of frame and components over time.

SOLUTION

Double coating of chrome plating and powder coating on frame and components gives maximum protection against rusting.

PROBLEM

Upholstery screws strip out over time since the screws are inserted into hollow frame tubes.

SOLUTION

Brass-threaded inserts used to fasten down upholstery ensure that no stripping occurs over time.

PROBLEM

Plastic seat cradles and armlocks break easily.

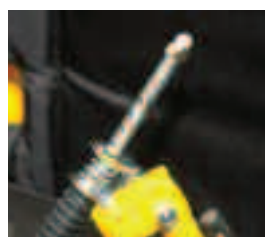

SOLUTION

Aluminum seat cradles and armlocks stay strong and sturdy, resisting any breakage.

PROBLEM

Elevated leg rest supports wear and rust, resulting in leg rests slipping out of position over time.

SOLUTION

Notched, stainless steel ratchet bars on elevated leg rests will not fall down and are resistant to rust.

VALUE-ADDED PROGRAMS

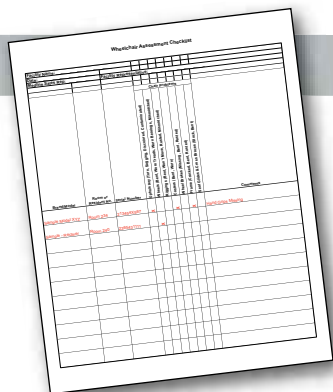

CUSTOM WHEELCHAIR LABELING

FREE! Custom Wheelchair Labeling

Stolen or lost wheelchairs is a frustrating problem for many Institutions. Medline wants to help you solve that problem. For a limited time, when you order 15 or more wheelchairs, we'll design custom, full color, laminated labels you can put on the outside of the wheelchair's side panels. These attractive labels are great for discouraging theft and advertising your business' name. All you have to do is give us your logo electronically, and our graphic artists will do the rest! Your wheelchairs will look attractive and become a new marketing tool for your business!

- Waterproof
- A theft deterrent
- Customized to your logo, fonts and colors
- Specify different departments
- Easily affixes to side panels on wheelchair

WHEELCHAIR ASSESSMENT

If your wheelchairs need replacing, ask your Medline Sales Representative for a FREE copy of our Wheelchair Assessment Checklist. You can use the checklist to review your chairs' condition, helping to make repair vs. replacement decisions. "This is a great way to promote safety for patients and caregivers."

FACTORY DIRECT

Using Factory Direct Saves You Money!

10-15% off everyday prices when you order a full or half container direct from our factory.

- Custom colors
- Some product alterations
- Product delivers directly to you

FREE Private Labeling on Available Wheelchairs when using our Factory Direct Program. Medline can put your corporate logo on some of our most popular medical equipment. We use either a professional silk-screening process or computerized embroidery process, depending on the complexity of your logo. The logo can be up to 4 colors – and is great for advertising your business or discouraging theft.

Example of our "Factory Direct" private labeling.

Translator

Flip it to
convert it!

- Convenient Side Carrying Case
- Convenient Cup Holder
- Roomy Under-Seat Basket
- Strong Carrying Handles

Patent Pending!

Combine the **functionality** of both
a rollator and transport chair into one unit!

In just seconds, our Excel Translator™ easily converts from a rollator to a transport chair and vice-versa. The Excel Translator™ allows rollator users to sit down and ride in a transport chair when their legs get tired. And, transport chair users can stand up and walk along when they want to get more exercise. Best of all, you only need to own one piece of equipment, rather than two!

The Excel Translator™ weighs only 18 lbs (8 kgs) which is no heavier than the average rollator or transport chair. It comes with a convenient cup holder, under-the-seat basket, zippered side carrying case, and easy-to-adjust push-button foot rests. You'll be delighted with the comfortable, spacious seat that is more than 75% roomier than our average rollator seat.

WHEELCHAIR CUSHIONS

Use this easy step-by-step guide to make the right choice for your patients

Step 1: Choose the Level of Pressure Redistribution (see pages 24-27)

☐ **Advanced**

Significant pressure redistribution for highest risk patients or those with pressure ulcers. Will address positioning needs. May be adjustable to meet individual patient needs.

☐ **Moderate**

Helps redistribute pressure for those at risk for pressure ulcers. May also help with positioning needs.

☐ **Basic**

Adds comfort for lower risk seated individuals.

Step 2: Choose the Type of Cushion Material

☐ **Foam Cushion:**

Most economical material. Typically used for comfort through moderate pressure redistribution. Different density foams can be used to address patient comfort, including more expensive visco elastic memory foams. Different cut patterns are often used to prevent shear and help reduce pressure.

☐ **Gel & Foam Cushion:**

Typically provide moderate to advanced pressure redistribution. Most common design is gel sacks placed between higher quality foams. Gel sacks separated into quadrants perform best by keeping gel focused under problem areas to reduce pressure. Also designed to reduce shear and heat.

☐ **Air Cell Cushion:**

Typically provide the most advanced pressure redistribution. These cushions are adjustable to meet the individual needs of each patient. Redistribute pressure very well by distributing weight evenly. Tracks patient movements and adjusts to patient's body contours reducing pressure points.

Step 3: Choose the Best Cushion Design

☐ **Flat Cushions**

Sometimes referred to as a zero elevation cushion, it has the same thickness across the entire cushion. Can be used for comfort or pressure redistribution.

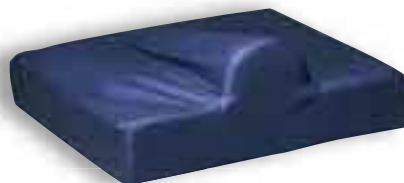

☐ **Wedge Cushions**

Thicker in the front and angling down to a thinner back, it provides support, stability and pressure redistribution for active users that tend to slide forward.

☐ **Pommel Cushions**

Abducts legs to reduce skin shear and pressure. Provides proper alignment to reduce hip rotation. Can be on a flat or wedge cushion.

☐ **Contour Cushions**

Sometimes referred to as a Saddle Cushion, it emphasizes proper positioning and leg alignment while reducing hip rotation. Provides pressure redistribution and comfort by increasing seating area.

☐ **Anti-Thrust Cushions**

Has a one inch shelf in the middle to reduce thrusting and sliding forward. Helps reduce sacral sitting. Low profile front minimizes leg elevation.

☐ **Back Cushions**

Provides comfort, support and cushioning on back and spine. Helps redistribute pressure while eliminating the hammock effect of a sling back.

WHEELCHAIR CUSHIONS

Advanced Pressure Redistribution

Medline Contour Plus — A skin protection and positioning cushion. The high resiliency foam cushion features a segmented gel insert and waterfall front that help to redistribute weight and relieve pressure. The incontinent proof PolyX cover has four way stretch for better performance and is easy to clean.

Air Cell Cushions — Offer Superb Pressure Relief.

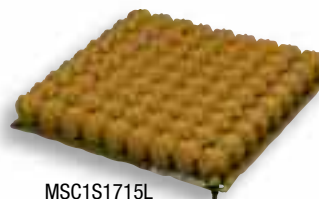

These therapeutic cushions provide ultimate care to fragile tissue. Individual cells adjust to each patient's body contours, flexing in multiple directions and decreasing body weight per unit area of the cushion. Made of flame-retardant, latex-free neoprene rubber, comes with a washable all-way stretch cover and hand pump for inflation. Two heights available.

WHEELCHAIR ACCESSORIES

Sideminder

As a fully adjustable lateral support, the SideMinder is recommended for users with moderate to severe impairment in their ability to maintain proper posture. This support is available with either standard or contoured lateral pads that adjust horizontally or vertically. For even the most difficult to correct postural asymmetries, the SideMinder is fully functional support.

Sideminder	Description
MDTSDMDR	Fits 16-24" (41-609mm) wheelchairs

The Molded Foot

The Molded Foot offers a comfortable foot support designed with high quality polyurethane foam. It includes a rigid insert molded into the base for additional support. The molded foot can be attached to the wheelchair with straps or by bolting it directly to the foot plate.

Molded Foot	Description
MSCMLDFT	Molded Foot

The Molded Arm

An ergonomically designed, cost-effective solution for users with arm issues. In addition to stabilizing the elbow, it features a convex palm area for user comfort as well as a gentle rise in elevation from elbow to fingertips help to prevent edema. Lightweight Interlock bracket system locks down to either 3/4" or 7/8" tubing using a 2-bolt connection.

Molded Arm	Description
