

PENNDOT DRAINAGE MANUAL

<u>CHAPTER</u>	<u>SUBJECT</u>	<u>PAGE</u>
CHAPTER 1 INTRODUCTION		
1.0	INTRODUCTION.....	1 - 1
1.1	BACKGROUND.....	1 - 1
1.2	CONTENTS OF PENNDOT DRAINAGE MANUAL.....	1 - 2
CHAPTER 2 LEGAL ASPECTS		
RESERVED FOR FUTURE DEVELOPMENT		
CHAPTER 3 POLICY		
RESERVED FOR FUTURE DEVELOPMENT		
CHAPTER 4 DOCUMENTATION AND DOCUMENT RETENTION		
4.0	OVERVIEW.....	4 - 1
	A. Introduction.....	4 - 1
	B. Purpose.....	4 - 1
	C. Documentation and District Project Files.....	4 - 2
	D. Roadway Management System (RMS) and Location Reference System (LRS).....	4 - 2
	E. Phases.....	4 - 2
4.1	DOCUMENTATION TYPES.....	4 - 4
	A. Documents.....	4 - 4
	B. National Pollutant Discharge Elimination System (NPDES) Permit Application.....	4 - 5
	C. Erosion and Sediment Pollution Control (E&SPC) Plan and Narrative.....	4 - 5
	D. Roadway Drainage Report (RDR).....	4 - 5
	E. Post-Construction Stormwater Management (PCSM) Plan.....	4 - 6
	F. Preparedness, Prevention, & Contingency (PPC) Plan.....	4 - 6
	G. Water Obstruction and Encroachment Permit (Waterway Permit).....	4 - 6
	H. Hydrology and Hydraulics (H&H) Report.....	4 - 8
	I. FEMA Conditional Letter of Map Revision (CLOMR) and Letter of Map Revision (LOMR).....	4 - 8
	J. Pump Stations.....	4 - 9
4.2	PROCEDURE.....	4 - 9
	A. File Overview.....	4 - 9
	B. Practices.....	4 - 9
	C. Filing and Retention.....	4 - 10
	D. Scheduling.....	4 - 10
	E. Responsibility.....	4 - 11
APPENDIX A	Documentation Quick Reference Guide.....	4A - 1
APPENDIX B	Sample Notice of Intent (NOI) Application Form.....	4B - 1
APPENDIX C	Sample Stormwater and Floodplain Management Consistency Letters.....	4C - 1
APPENDIX D	Sample PNDI Project Environmental Review Receipt.....	4D - 1
CHAPTER 5 PLANNING AND LOCATION		
RESERVED FOR FUTURE DEVELOPMENT		

CHAPTER 6 DATA COLLECTION

6.0 OVERVIEW 6 - 1
 A. Introduction 6 - 1
 B. Data Requirements 6 - 1
 6.1 TYPES OF DATA REQUIRED AND DATA COLLECTION 6 - 1
 A. General 6 - 1
 B. Watershed Characteristics 6 - 2
 C. Geographic Information Systems (GIS) Data 6 - 4
 D. National Flood Insurance Program 6 - 5
 E. Field Investigation - Site Characteristics 6 - 5
 F. Survey Information 6 - 8
 G. Global Positioning System (GPS) 6 - 10
 H. Aerial Photogrammetry 6 - 11
 I. Channel Meander and Instability Data 6 - 11
 6.2 SOURCES OF DATA 6 - 12
 A. Objectives 6 - 12
 B. Sources 6 - 12
 6.3 DATA EVALUATION 6 - 13
 A. Objective 6 - 13
 B. Evaluation 6 - 13
 C. Sensitivity 6 - 13
 D. Accuracy of Data 6 - 13
 E. Data Merging 6 - 13
 6.4 REFERENCES 6 - 14
 APPENDIX A Sources of Data and Data Access Quick Reference Guide 6A - 1
 APPENDIX B Hydraulic Site Investigation Form 6B - 1
 APPENDIX C Hydraulic Survey Instructions 6C - 1

CHAPTER 7 HYDROLOGY

7.0 INTRODUCTION TO HYDROLOGY 7 - 1
 A. General - Hydrology 7 - 1
 B. Peak Discharge versus Frequency Relations 7 - 1
 C. Flood Hydrographs 7 - 2
 D. Unit Hydrograph 7 - 2
 E. Site Investigation 7 - 3
 F. Interagency Coordination 7 - 3
 7.1 FACTORS AFFECTING FLOODS 7 - 3
 A. Rainfall versus Runoff Quantity/Volume 7 - 3
 B. Drainage Area 7 - 4
 C. Shape Factor 7 - 5
 D. Slope 7 - 5
 E. Land Use 7 - 5
 F. Soil and Geology 7 - 6
 G. Storage Area – Volume 7 - 7
 H. Slope and Orientation of the Basin 7 - 7
 I. Influence of Channel and Floodplain Geometry 7 - 7
 J. Stream and Drainage Densities 7 - 7
 K. Site-Specific Characteristics 7 - 8
 L. Aggradation and Degradation 7 - 8
 M. Ice and Debris 7 - 8
 N. Seasonal and Progressive Changes in Vegetation 7 - 8
 O. Channel Modifications 7 - 8
 P. Future Conditions 7 - 9

	Q. Climate	7 - 9
7.2	DESIGN FREQUENCY	7 - 9
	A. The Concept of Frequency	7 - 9
	B. Design Storms	7 - 10
	C. Design by Cost Optimization Using Risk Assessment	7 - 12
	D. Check-Flood Frequencies	7 - 12
	E. Frequencies of Coincidental Occurrence	7 - 13
	F. Rainfall versus Flood Frequency	7 - 14
7.3	HYDROLOGIC METHOD SELECTION	7 - 15
	A. Overview of Hydrologic Method Selection	7 - 15
	B. Peak Flow Rates versus Hydrographs	7 - 15
	C. Hydrologic Procedures	7 - 15
	D. Site Flood History	7 - 15
	E. FEMA Studies	7 - 15
	F. 1978 Act 167 Stormwater Management Studies	7 - 16
	G. Hydrologic Methods and Models	7 - 16
	H. Analysis of Stream Gage Records	7 - 16
	I. Rational Method	7 - 17
	J. Regression Methods	7 - 17
	K. HEC-1 & HEC-HMS	7 - 23
	L. WinTR-55 and TR-55	7 - 23
	M. EFH-2	7 - 23
7.4	TIME OF CONCENTRATION	7 - 24
	A. Overview of Time of Concentration	7 - 24
	B. Overland Flow	7 - 24
	C. Segmental Method	7 - 25
	D. Conduit Flow and Open Channel Flow	7 - 26
	E. Other Methods for Estimating Travel Time	7 - 28
	F. Procedure to Estimate Time of Concentration	7 - 28
7.5	PEAK DISCHARGE USING THE RATIONAL METHOD	7 - 29
	A. Introduction to the Rational Method	7 - 29
	B. Assumptions and Applicability of the Rational Method	7 - 29
	C. The Rational Method Equation	7 - 30
	D. Rainfall Intensity	7 - 30
	E. Runoff Coefficient	7 - 30
	F. Procedure for Rational Method	7 - 32
	G. Example Problem - Rational Method	7 - 33
7.6	NRCS RUNOFF CURVE NUMBER METHODS	7 - 36
	A. Introduction to NRCS Methods	7 - 36
	B. NRCS Rainfall-Runoff Equation	7 - 36
	C. Accumulated Rainfall (P)	7 - 37
	D. Rainfall Distribution	7 - 37
	E. Soil Groups	7 - 37
	F. Runoff Curve Number (RCN)	7 - 37
	G. Procedure for NRCS Graphical Peak Discharge (TR-55)	7 - 42
	H. NRCS (SCS) Dimensionless Unit Hydrograph	7 - 43
	I. Procedure For Determining Flood Hydrographs Using the NRCS Dimensionless Unit Hydrograph	7 - 46
7.7	DESIGN RAINFALL HYETOGRAPH METHODS	7 - 48
	A. Use of the Rainfall Hyetograph	7 - 48
	B. NRCS 24-Hour Rainfall Distributions	7 - 48
	C. Example of Hyetograph Developed from NRCS 24-Hour Rainfall Distributions (Metric Units)	7 - 49
	D. Example of Hyetograph Developed from NRCS 24-Hour Rainfall Distributions (U.S. Customary Units)	7 - 52
7.8	STORAGE ROUTING OF FLOOD HYDROGRAPHS	7 - 53
	A. Flood Routing	7 - 53
	B. Hydrograph Routing Methods	7 - 53
	C. Storage-Indication Routing Method	7 - 54
	D. Procedure for Storage-Indication Method	7 - 55

E.	Example of Storage-Indication Method.....	7 - 56
7.9	CHANNEL ROUTING OF FLOOD HYDROGRAPHS.....	7 - 59
A.	Introduction to Channel Routing.....	7 - 59
B.	Hydrologic Routing.....	7 - 60
C.	Muskingum Method.....	7 - 61
D.	Example of Muskingum Method.....	7 - 62
E.	Muskingum-Cunge Method.....	7 - 64
7.10	STATISTICAL ANALYSIS OF STREAM GAGE DATA.....	7 - 66
A.	Introduction to Statistical Analysis of Stream Gage Data.....	7 - 66
B.	Sources of Stream Gage Records.....	7 - 66
C.	Applicability and Limitations.....	7 - 66
D.	Log-Pearson Type III Distribution.....	7 - 67
E.	Log-Pearson Type III Analysis Procedure.....	7 - 67
F.	Skew.....	7 - 68
G.	Accommodating Outliers in the Data.....	7 - 68
7.11	CHAPTER 7 NOMENCLATURE.....	7 - 71
7.12	REFERENCES.....	7 - 72
APPENDIX A	Field Manual for Pennsylvania Design Rainfall Intensity Charts From NOAA Atlas 14 Version 3 Data.....	7A - 1
APPENDIX B	Frequently Asked Questions for Pennsylvania Design Rainfall Intensity Charts From NOAA Atlas 14 Version 3 Data.....	7B - 1
APPENDIX C	Implementation Guide for Pennsylvania Design Rainfall Intensity Charts From NOAA Atlas 14 Version 3 Data.....	7C - 1

CHAPTER 8 OPEN CHANNELS

8.0	INTRODUCTION TO OPEN CHANNELS.....	8 - 1
A.	Open Channels.....	8 - 1
B.	Design Process.....	8 - 1
8.1	CHANNEL DESIGN CRITERIA.....	8 - 2
A.	Stream Channel Criteria.....	8 - 2
B.	Roadside Channel Criteria.....	8 - 2
8.2	OPEN CHANNEL HYDRAULIC PRINCIPLES.....	8 - 2
A.	Continuity Equation.....	8 - 2
B.	Channel Capacity.....	8 - 2
C.	Conveyance.....	8 - 3
D.	Total Energy.....	8 - 3
E.	Specific Energy.....	8 - 4
F.	Kinetic Energy Coefficient (α).....	8 - 4
G.	Energy Balance and the Energy Grade Line.....	8 - 5
H.	Uniform Depth.....	8 - 5
I.	Critical Depth.....	8 - 5
J.	Froude Number.....	8 - 6
K.	Flow Types.....	8 - 6
L.	Steady, Uniform Flow.....	8 - 7
M.	Gradually Varied Flow.....	8 - 7
N.	Subcritical/Supercritical Flow.....	8 - 7
O.	Cross Sections.....	8 - 7
P.	Roughness Coefficients.....	8 - 8
Q.	Wetted Perimeter Weighted Manning's n-Value.....	8 - 10
R.	Cross Section Subdivision for Conveyance Calculations.....	8 - 11
8.3	CHANNEL ANALYSIS.....	8 - 13
A.	Overview of Channel Analysis Methods.....	8 - 13
B.	Stage-Discharge Relationship.....	8 - 13
8.4	SLOPE CONVEYANCE METHOD.....	8 - 15

A.	Introduction to the Slope-Conveyance Method.....	8 - 15
B.	Application and Limitations of the Slope-Conveyance Method.....	8 - 15
C.	Data Requirements	8 - 15
D.	Slope-Conveyance Procedure.....	8 - 16
8.5	STANDARD STEP-BACKWATER METHOD	8 - 22
A.	Introduction to the Step-Backwater Method.....	8 - 22
B.	Application and Limitations of the Standard Step-Backwater Method	8 - 22
C.	Data Requirements for the Standard Step-Backwater Method	8 - 23
D.	Standard Step-Backwater Procedure	8 - 23
E.	Profile Convergence	8 - 25
F.	Example of the Standard Step-Backwater Method.....	8 - 26
8.6	TWO-DIMENSIONAL BACKWATER MODELS	8 - 31
A.	Introduction to Two-Dimensional Modeling.....	8 - 31
B.	Finite Element Surface Water Modeling System (FESWMS).....	8 - 31
C.	Application and Limitations of Two-Dimensional Models	8 - 31
D.	Data Requirements for FESWMS Application.....	8 - 31
E.	Surface-water Modeling System.....	8 - 32
8.7	STREAM CHANNEL DESIGN.....	8 - 32
8.8.	ROADSIDE CHANNEL DESIGN	8 - 34
A.	Channel Design Considerations.....	8 - 36
B.	Channel Linings.....	8 - 36
C.	Rigid Linings.....	8 - 36
D.	Permanent Flexible Linings.....	8 - 36
E.	Temporary Flexible Linings	8 - 37
F.	Channel-Lining Design Procedure.....	8 - 37
G.	Vegetated Lining	8 - 43
H.	Rolled Erosion Control Products (RECPs).....	8 - 44
I.	Rock (Riprap) and Concrete	8 - 46
8.9	STREAM STABILITY ISSUES.....	8 - 48
A.	Stream Geomorphology.....	8 - 48
B.	Levels of Assessment	8 - 49
C.	Factors that Affect Stream Stability.....	8 - 50
D.	Stream Classification	8 - 51
E.	Stream Modifications	8 - 55
F.	Stream Meander Considerations.....	8 - 56
8.10	THE EFFECTS OF CHANNEL ALTERATIONS.....	8 - 59
A.	Channel Realignment	8 - 60
B.	Slope Modification	8 - 61
C.	Section Modification	8 - 61
D.	Conveyance Modification.....	8 - 62
8.11	CHANNEL STABILIZATION AND BANK PROTECTION	8 - 63
A.	Stabilization Considerations	8 - 63
B.	Selection of Protective Measures.....	8 - 64
C.	Revetments	8 - 64
8.12	SUBSURFACE INVESTIGATIONS	8 - 65
A.	Reinforcement for Rigid Linings.....	8 - 65
B.	Buoyancy and Heave	8 - 66
C.	Seepage Control.....	8 - 66
8.13	CONSTRUCTION RELATED HYDRAULIC CONSIDERATIONS.....	8 - 66
8.14	MAINTENANCE RELATED HYDRAULIC CONSIDERATIONS.....	8 - 66
A.	Maintenance during Contract Period	8 - 67
B.	Hydraulic Related Maintenance Considerations.....	8 - 67
8.15	CHAPTER 8 NOMENCLATURE.....	8 - 67
8.16	REFERENCES.....	8 - 68

CHAPTER 9 CULVERTS

9.0 INTRODUCTION TO CULVERTS 9 - 1

 A. General - Culverts..... 9 - 1

 B. Concepts 9 - 2

 C. General Culvert Considerations..... 9 - 3

 D. Economics 9 - 4

9.1 DESIGN CONSIDERATIONS..... 9 - 5

 A. Design Frequency 9 - 5

 B. Headwater..... 9 - 5

 C. Site Data 9 - 6

 D. Culvert Locations 9 - 10

 E. Stream Modification 9 - 11

 F. Culvert Profile 9 - 12

 G. Temporary Diversion Channels 9 - 13

 H. Design and Allowable Outlet Velocity 9 - 13

 I. End Treatments..... 9 - 14

 J. Safety Considerations 9 - 15

 K. Culvert Type Selection 9 - 16

 L. Economics 9 - 18

 M. Hydraulic Properties 9 - 18

 N. Operation 9 - 18

 O. Fill Heights 9 - 18

9.2 HYDRAULIC ANALYSIS OF CULVERTS 9 - 18

 A. General - Hydraulic Analysis of Culverts..... 9 - 18

 B. Computations for Culvert Hydraulics..... 9 - 19

 C. Supercritical versus Subcritical Flow 9 - 19

 D. Critical Depth in Culverts..... 9 - 20

 E. Uniform Depth in Culverts 9 - 21

 F. Friction Slope 9 - 21

 G. Steep Slope versus Mild Slope 9 - 22

 H. Headwater Under Inlet Control 9 - 22

 I. Headwater Under Outlet Control..... 9 - 27

 J. Outlet Control Headwater Due to Full Flow in Culverts..... 9 - 29

 K. Outlet Control Headwater Due to Free-Surface Flow in Culverts..... 9 - 30

 L. Slug Flow..... 9 - 32

 M. Determination of Outlet Velocity 9 - 32

 N. Direct Step Backwater Method Applied to Culverts 9 - 33

 O. Hydraulic Jump in Culverts..... 9 - 34

 P. Sequent Depth for Rectangular Culvert..... 9 - 35

 Q. Sequent Depth for Circular Culvert..... 9 - 35

 R. Sequent Depth for Other Shapes..... 9 - 36

 S. Roadway Overtopping..... 9 - 36

 T. Performance Curves 9 - 39

9.3 CULVERT DESIGN/ANALYSIS PROCEDURE 9 - 41

 A. General - Culvert Design/Analysis Procedure..... 9 - 41

 B. Multiple Barrels..... 9 - 41

 C. Overview of Culvert Hydraulic Design 9 - 41

 D. Design Procedure for Culverts..... 9 - 44

9.4 IMPROVED INLETS 9 - 46

 A. Conditions for Improved Inlets..... 9 - 46

 B. Beveled Edges 9 - 47

 C. Top-Tapered Transition 9 - 48

 D. Side-Tapered Inlet 9 - 48

 E. Slope-Tapered Inlet 9 - 49

 F. Flared Entrance Design for Circular Pipe..... 9 - 49

9.5 VELOCITY PROTECTION AND CONTROL DEVICES 9 - 49

 A. General - Velocity Protection and Control Devices..... 9 - 49

B.	Velocity Protection Devices	9 - 50
C.	Velocity Control Devices	9 - 50
D.	Other Control Devices	9 - 50
9.6	SPECIAL HYDRAULIC CONSIDERATIONS.....	9 - 50
A.	Anchorage.....	9 - 50
B.	Piping.....	9 - 52
C.	Joints.....	9 - 52
D.	Anti-Seep Collars	9 - 53
E.	Weep Holes	9 - 53
F.	Junctions and Bifurcations.....	9 - 53
G.	Training Walls.....	9 - 53
H.	Sag Culverts.....	9 - 54
I.	Irregular Alignment.....	9 - 54
J.	Cavitation	9 - 54
K.	Tidal Effects and Flood Protection	9 - 55
9.7	MULTIPLE USE CULVERTS	9 - 55
A.	Utilities	9 - 55
B.	Stock and Wildlife Passage	9 - 55
C.	Land Access.....	9 - 55
D.	Fish Passage.....	9 - 55
9.8	DEBRIS CONTROL.....	9 - 57
A.	Debris Control Structure Design	9 - 57
B.	Maintenance	9 - 57
9.9	SERVICE LIFE.....	9 - 58
A.	Abrasion	9 - 58
9.10	EXAMPLE.....	9 - 59
9.11	CHAPTER 9 NOMENCLATURE.....	9 - 64
9.12	REFERENCES.....	9 - 64
APPENDIX A Joint Agency Guidance for the Analysis of Environmental Impacts and Other Issues for Short Span Structures		9A - 1

CHAPTER 10 BRIDGE HYDRAULICS

10.0	INTRODUCTION TO BRIDGES	10 - 1
A.	General - Bridges.....	10 - 1
B.	Design Requirements.....	10 - 1
10.1	PLANNING AND LOCATION CONSIDERATIONS	10 - 1
A.	Overview of Planning and Location Considerations	10 - 1
B.	Location and Orientation	10 - 1
C.	Structure Type	10 - 2
D.	Environmental Considerations.....	10 - 2
E.	Stream Characteristics	10 - 3
F.	Replacement, Repair and Rehabilitation	10 - 3
10.2	COORDINATION WITH OTHER AGENCIES.....	10 - 4
A.	General - Coordination with Other Agencies	10 - 4
B.	Water Resource Development Projects	10 - 5
C.	FEMA Designated Flood Plains	10 - 5
10.3	DATA COLLECTION.....	10 - 5
A.	Topographic Features	10 - 5
B.	Land Use and Development Resources	10 - 6
C.	Hydrologic Data	10 - 6
D.	Flood Data	10 - 6
E.	Highwater Information	10 - 7
F.	Existing Structures.....	10 - 7
G.	Channel Characteristics	10 - 8
H.	Environmental Data.....	10 - 8
I.	Site Plan.....	10 - 9

J.	Field Reviews	10 - 9
10.4	BRIDGE HYDRAULIC CONSIDERATIONS	10 - 9
A.	General - Bridge Hydraulic Considerations.....	10 - 9
B.	Design Storm.....	10 - 10
C.	Flow Near Bridges.....	10 - 10
D.	Allowable Backwater Due to Bridges	10 - 11
E.	Flow Distribution.....	10 - 12
F.	Bridge Scour and Stream Degradation	10 - 13
G.	Freeboard and Low Chord.....	10 - 13
10.5	STREAM CROSSING DESIGN	10 - 13
A.	Design Criteria for Highway-Stream Crossing System.....	10 - 14
B.	Analysis of the Stream Crossing System.....	10 - 38
C.	Protective and Preventive Measures.....	10 - 50
D.	Dolphins and Fender Systems	10 - 61
10.6	HYDRAULICS OF BRIDGE OPENINGS.....	10 - 62
A.	Hydraulic Performance of Bridges	10 - 62
B.	Methodologies	10 - 65
C.	Bridge Modeling Methods.....	10 - 66
D.	Defining Ineffective Flow Areas	10 - 71
E.	Contraction and Expansion Losses.....	10 - 73
F.	Hydraulic Computations through the Bridge.....	10 - 74
G.	Selecting a Bridge Modeling Approach.....	10 - 85
10.7	SINGLE OPENING DESIGN	10 - 86
A.	Single Opening Design Approach	10 - 86
B.	Recommended Procedure for Single Opening Design	10 - 86
10.8	MULTIPLE OPENING DESIGN	10 - 87
A.	Multiple Opening Design Approach.....	10 - 87
10.9	BRIDGE SCOUR.....	10 - 87
A.	Scour Components.....	10 - 87
B.	Rates of Scour.....	10 - 87
C.	Requirements for Scour Analysis	10 - 88
D.	Aggradation and Degradation.....	10 - 88
E.	Contraction Scour	10 - 88
F.	Pier Scour	10 - 89
G.	Abutment Scour.....	10 - 89
H.	Total Scour Envelope	10 - 89
I.	Pressure Flow	10 - 89
J.	Other Scour Considerations.....	10 - 89
10.10	DECK DRAINAGE.....	10 - 91
A.	Deck Inlets.....	10 - 91
B.	Bridge End Drains	10 - 92
10.11	HYDRAULIC-RELATED CONSTRUCTION CONSIDERATIONS.....	10 - 92
A.	Verification of Plans.....	10 - 92
B.	Plan Changes	10 - 93
C.	Borrow Areas.....	10 - 93
D.	Detours, Contractor Crossings and Work Areas.....	10 - 93
E.	Environmental and Ecological Aspects	10 - 94
F.	Hydrologic Information.....	10 - 94
G.	Cofferdams, Caissons, Barges, and Falsework.....	10 - 94
H.	Feedback.....	10 - 94
10.12	HYDRAULIC-RELATED MAINTENANCE CONSIDERATIONS	10 - 94
A.	Maintenance Inspections	10 - 95
B.	Flood Damages	10 - 95
10.13	APPURTENANCES	10 - 96
A.	Bridge Rail.....	10 - 96
10.14	DESIGN DOCUMENTATION	10 - 96
10.15	CHAPTER 10 NOMENCLATURE.....	10 - 97
10.16	REFERENCES.....	10 - 98

APPENDIX A Field Checklist for the Preliminary Design Permit Coordination 10A - 1

CHAPTER 11 SURFACE WATER ENVIRONMENT

11.0 INTRODUCTION 11 - 1

 A. Introduction 11 - 1

 B. Purpose 11 - 1

 C. Surface Waters 11 - 1

 D. Sensitive Surface Waters 11 - 1

 E. Functional Values 11 - 2

 F. Effect and Significance 11 - 2

 G. Reversible Effects 11 - 2

 H. Practicable 11 - 2

 I. Design Alternatives 11 - 3

11.1 POLICY 11 - 3

 A. Introduction 11 - 3

 B. Rules and Regulations 11 - 3

 C. Cost Effectiveness 11 - 4

 D. Enhancing Functional Values 11 - 4

 E. Evaluation Complexity 11 - 4

 F. Surface Water Assessment 11 - 4

 G. Surface Water Analysis 11 - 5

 H. Permit Criteria 11 - 5

11.2 DESIGN CRITERIA 11 - 5

 A. General Criteria 11 - 5

 B. Design Criteria 11 - 6

11.3 DESIGN CONSIDERATIONS 11 - 8

 A. Introduction 11 - 8

 B. Water Quality 11 - 9

 C. Channels 11 - 13

 D. Lakes or Ponds 11 - 14

 E. Wetlands 11 - 14

 F. Fish Passage Criteria 11 - 14

 G. Fish Passage Culverts 11 - 15

 H. Stream Geometry and Cover 11 - 15

11.4 DESIGN PROCEDURES 11 - 16

 A. Design Steps 11 - 16

 B. Design Data 11 - 16

 C. Water Quality Measures 11 - 18

 D. Fish Passage Analyses Type 11 - 21

11.5 GROUNDWATER 11 - 21

 A. Occurrence 11 - 21

 B. Groundwater Movement 11 - 21

 C. Loss of Groundwater 11 - 22

 D. Infiltration 11 - 23

 E. Groundwater Quality 11 - 26

11.6 WATER BUDGET 11 - 26

 A. The Water Budget Equation 11 - 26

 B. Data Requirements 11 - 28

 C. Tidal Considerations 11 - 37

 D. Water Budget Computation Procedures 11 - 37

 E. Example Pennsylvania Water Budget Problem 11 - 37

11.7 GLOSSARY 11 - 43

11.8 CHAPTER 11 NOMENCLATURE 11 - 44

11.9 REFERENCES 11 - 45

CHAPTER 12 EROSION AND SEDIMENT POLLUTION CONTROL

12.0 INTRODUCTION..... 12 - 1

12.1 REGULATORY REQUIREMENTS..... 12 - 1

 A. Overview of the Regulations..... 12 - 1

 B. Permitting Process – The NPDES Permit Application For Stormwater Discharges Associated With Construction Activities..... 12 - 3

12.2 OVERALL PROJECT COORDINATION..... 12 - 4

 A. Early Planning..... 12 - 5

 B. Agency Coordination..... 12 - 5

 C. PennDOT District E&S Coordinator Role..... 12 - 6

12.3 DESIGN..... 12 - 7

 A. Introduction..... 12 - 7

 B. Factors Influencing Erosion..... 12 - 8

 C. Erosion and Sediment Pollution Control (E&SPC) Plan..... 12 - 8

 D. Post-Construction Stormwater Management (PCSM) Plan..... 12 - 9

 E. Ongoing Coordination..... 12 - 9

 F. Hydrologic Analysis..... 12 - 10

 G. BMP Selection..... 12 - 10

 H. NPDES Permit Preparation..... 12 - 12

 I. Erosion and Sediment Pollution Control Narrative Preparation..... 12 - 12

12.4 STABILIZATION BMPS..... 12 - 13

 A. Seeding and Mulching..... 12 - 13

 B. Rolled Erosion Control Products (RECP)..... 12 - 13

 C. Spray on Mulches..... 12 - 15

 D. Geocell Slope Confinement..... 12 - 16

 E. Articulated Concrete Block Revetment System (ACBR)..... 12 - 32

 F. Gabions..... 12 - 46

12.5 GENERAL E&SPC BMPS..... 12 - 47

 A. Rock Construction Entrance..... 12 - 47

 B. Rock Filter Outlet..... 12 - 48

 C. Compost Filter Sock..... 12 - 48

 D. Compost Filter Berm..... 12 - 49

 E. Silt Barrier Fence..... 12 - 49

 F. Heavy Duty Silt Barrier Fence..... 12 - 51

 G. Vegetative Filter Strip for E&SPC..... 12 - 52

 H. Pumped Water Filter Bag..... 12 - 54

 I. Temporary Slope Pipe..... 12 - 55

 J. Storm Inlet Protection..... 12 - 55

 K. Outlet Protection: Rock..... 12 - 56

B.	Design Objective	14 - 52
14.17	WET POND	14 - 54
A.	Introduction	14 - 54
B.	Design Objective	14 - 58
14.18	PROTECTIVE TREATMENT	14 - 59
14.19	MAINTENANCE	14 - 59
14.20	FREQUENTLY ASKED QUESTIONS	14 - 60
A.	What is the difference between stormwater management that may discharge to Special Protection waters, or EV wetlands, and all other waters?.....	14 - 60
B.	Are wetlands and streams treated the same in terms of PCSM requirements?	14 - 60
C.	Do maintenance projects require an NPDES construction permit?	14 - 60
D.	A project has between 0.4 hectares (1.0 acres) and 2.0 hectares (5.0 acres) of disturbance, but all of the runoff leaves the site via sheet flow. Does the project require an NPDES construction permit?.....	14 - 60
E.	Is a PCSM analysis required when the project does not require an NPDES construction permit and it is not located in an approved Act 167 plan watershed?.....	14 - 60
F.	Is it acceptable to leave parts of the NPDES permit application blank, or can questions be addressed by simply writing "not applicable?".....	14 - 60
G.	Chapter 8 of <i>BMP Manual</i> provides for water quality calculations – when do these calculations have to be completed for PennDOT projects?	14 - 60
H.	What information should the PCSM section of an NPDES permit application submission contain?	14 - 61
I.	The Summary Data Table in the NPDES permit application requires calculations demonstrating the net change in peak discharge rate and volume of runoff. Is it necessary to complete this table for all projects that require an NPDES permit, and what design event should be indicated in the table?	14 - 61
J.	Do peak discharge rates and runoff volumes have to be mitigated at each source of disturbance and before runoff goes beyond PennDOT's right-of-way?.....	14 - 61
K.	What information should be contained in the thermal impact analysis section of the NPDES permit?	14 - 61

9.21	Training Walls	9 - 54
9.22	Culvert on Spread Footings to Retain Streambed for Fish Passage.....	9 - 56
9.23	Culvert Invert Placed Below Streambed.....	9 - 56
9.24	Vertical Riser for Relief	9 - 57
9.25	Loss of Culvert Material from Abrasion	9 - 58
9.26	Chart 17 and Performance Curve for Design Example (Metric)	9 - 63
10.1	Backwater at a Stream Crossing.....	10 - 10
10.2	Typical Flow Directions through Bridge Opening	10 - 11
10.3	Flow Distribution (1m = 3.28ft)	10 - 12
10.4	Vertical Sag Curve Profile.....	10 - 16
10.5	Crest-Vertical Curve Profile.....	10 - 16
10.6	Level Profile.....	10 - 16
10.7	Lateral Scour at a Bridge.....	10 - 17
10.8	Upstream and Downstream Water Surface Elevations at a Skewed Crossing.....	10 - 18
10.9	Roadway Cut through the Embankment Caused by Head Differentials Across the Road at a Skewed Crossing	10 - 18
10.10	Diversion and Bridge Alternatives for Tributary Stream in the Floodplain	10 - 20
10.11	Delta Formed in Principal Stream by Divided Tributary.....	10 - 21
10.12	Stream Crossing in a Bend	10 - 21
10.13	Grade Separation for another Transportation Facility in the Floodplain Will Serve as an Auxiliary Waterway Opening.....	10 - 22
10.14	Scour at a Culvert in the Floodplain.....	10 - 26
10.15	Piers on Bank Undermined by Meander Bend Migration	10 - 27
10.16	Pier Damaged by Boulders in Bed Load	10 - 28
10.17	Spread Footings	10 - 29
10.18	Drilled Shaft Foundation	10 - 29
10.19	Typical Pile Foundation	10 - 29
10.20	Protected Pile Foundation.....	10 - 30
10.21	A Changing Channel can Undermine Foundation.....	10 - 30
10.22	Girder Spans Displaced by Buoyant and Drag Forces.....	10 - 32
10.23	Span Displaced by Force of Ice	10 - 33
10.24	Girder Twisted by Force of Ice.....	10 - 33
10.25	A Foundation Failure from Scour under an Ice Jam during a Small Flood.....	10 - 35
10.26	Channel Enlargement which Preserves the Section of the Low Flow Channel.....	10 - 36
10.27	Channel Realignment	10 - 37
10.28	Backwater at a Highway-Stream Crossing.....	10 - 39
10.29	Hydraulic Performance of a Highway-Stream Crossing	10 - 40
10.30	Schematic Representation of Scour at a Cylindrical Pier.....	10 - 42
10.31	Schematic Representation of Scour at an Embankment End.....	10 - 42
10.32	Combined Effect of General and Local Scour.....	10 - 43
10.33	Sediment Transport at a Control Section.....	10 - 44
10.34	Envelope of Worst General Scour	10 - 45
10.35	In-stream Borrow Area.....	10 - 47
10.36	Borrow Area Filled after One Moderate Rise in the Stream	10 - 47
10.37(a)	Degradation in a Stream Mined for Sand and Gravel.....	10 - 48
10.37(b)	Degradation in a Stream Mined for Sand and Gravel.....	10 - 48
10.38	Measures to Suppress Vortex and Reduce Local Scour	10 - 52
10.39	Drop Structure of Concrete Walls and Grouted Riprap.....	10 - 54
10.40	Grade Control Structure of Sheet Piling and Rock Riprap	10 - 54
10.41	Scour Abutments and Adjacent Pier.....	10 - 56
10.42	Sheet Pile Toe Wall.....	10 - 57
10.43	Cellular Concrete Revetment on Filter Cloth Revetment Toed in to Prevent Undermining	10 - 57
10.44	Rock Riprap at Abutment.....	10 - 58
10.45	Guide Bank.....	10 - 59

10.46	Partial Downstream Scour from Flood Redistribution	10 - 60
10.47	Dolphin and Fender System	10 - 62
10.48	Bridge Hydraulics Definition Sketch	10 - 64
10.49	Bridge Flow Types	10 - 65
10.50	Cross Section Locations at a Bridge.....	10 - 67
10.51	Cross Section Locations at a Bridge.....	10 - 69
10.52	WSPRO Cross Section Location for Stream Crossing with a Single Waterway Opening	10 - 71
10.53	Cross Sections near Bridges	10 - 72
10.54	Cross Sections Near and Inside the Bridge.....	10 - 75
10.55	Example of a Bridge under a Sluice Gate Type of Pressure Flow.....	10 - 79
10.56	Coefficient of Discharge for Sluice Gate Type Flow	10 - 81
10.57	Example of a Bridge under Fully Submerged Pressure Flow.....	10 - 81
10.58	Example Bridge with Pressure Flow and Weir Flow	10 - 83
10.59	Factor for Reducing Weir Flow for Submergence.....	10 - 84
10.60	Ineffective Bridge Deck Drainage Inlet.....	10 - 92
11.1	Subsurface Water Zones and Processes.....	11 - 22
11.2	Mechanisms for Saline Water Intrusion into Freshwater Aquifers.....	11 - 25
11.3(a)	Average Annual Precipitation of Pennsylvania (Metric).....	11 - 29
11.3(b)	Average Annual Precipitation of Pennsylvania (U.S. Customary).....	11 - 30
11.4(a)	Mean Annual Potential Evapotranspiration of Pennsylvania Landscapes (Metric).....	11 - 35
11.4(b)	Mean Annual Potential Evapotranspiration of Pennsylvania Landscapes (U.S. Customary).....	11 - 36
11.5(a)	Mean Base Flow at Example Site Using WRIR 90-4167 (Metric).....	11 - 41
11.5(a)	Mean Base Flow at Example Site Using WRIR 90-4167 (U.S. Customary).....	11 - 42
12.1	Geocell Slope Confinement System	12 - 16
12.2	Relationship Between Cell Depth, Slope Angle and Infill Material Minimum Angle of Repose	12 - 19
12.3	Allowable Interface Friction Angle with Applied FOS.....	12 - 21
12.4	Required Stake Array Resistance for Various Slopes and Interface Descriptions with 100 mm (4 in) Cell Depth	12 - 22
12.5	Maximum Downslope Stake Spacing.....	12 - 23
12.6	Required Stake Resistance for Standard 100 mm (4 in) Cell for 2 Cell Across by 3 Cell Down Staking Pattern.....	12 - 24
12.7	Required Stake Length for #4 Rebar Typical Roadway Soil Embankment.....	12 - 25
12.8	Basic Geocell Swale Protection System	12 - 26
12.9	Stability Analysis of the Geocell Slope Protection System	12 - 27
12.10	Geocell Selection for Various Slopes and Cell Depth.....	12 - 29
12.11	Basic Geocell Slope Protection System Components.....	12 - 30
12.12	Typical Geocell Anchorage System	12 - 32
12.13	Typical ACBR System	12 - 33
12.14	Termination Details for ACBR Systems	12 - 37
12.15	Amorloc System Configuration.....	12 - 39
12.16	A-Jacks	12 - 40
12.17	Armorflex Block Configuration	12 - 43
12.18	Cable Concrete Configuration	12 - 44
12.19	Vegetative Filter Strip	12 - 53
12.20	Riprap Apron Design, Minimum Tailwater Condition.....	12 - 59
12.21	Riprap Apron Design, Maximum Tailwater Condition	12 - 60
12.22	Stilling Well (Typical).....	12 - 62
12.23	Stilling Well Diameter (Metric)	12 - 63
12.24	Stilling Well Diameter (U.S. Customary).....	12 - 64
12.25	Depth of Stilling Well Above Invert	12 - 65
12.26	Sediment Trap (Embankment).....	12 - 69
12.27	Sediment Trap (Riser)	12 - 70
12.28	Example Embankment Sediment Trap Summary Table.....	12 - 70
12.29	Sediment Basin.....	12 - 71
12.30	Sediment Basin Volume	12 - 73
12.31	Anti-Seep Collar Design.....	12 - 78

12.32	Graphical Determination of Anti-Seep Collar Size	12 - 80
12.33	Example Bypass Channel Used For Culvert Installation	12 - 82
12.34	Flume Through Work Area	12 - 82
12.35	Pump Around In-Channel Work Area	12 - 83
12.36	In-Stream Temporary Diversion Device	12 - 84
13.1(a)	Flow in Triangular Gutter Sections (Metric)	13 - 13
13.1(b)	Flow in Triangular Gutter Sections (U.S. Customary)	13 - 14
13.2	Ratio of Frontal Flow to Total Gutter Flow	13 - 15
13.3(a)	Flow in Composite Gutter Sections (Metric)	13 - 17
13.3(b)	Flow in Composite Gutter Sections (U.S. Customary)	13 - 18
13.4(a)	V-Type Gutter (Metric)	13 - 19
13.4(b)	V-Type Gutter (U.S. Customary)	13 - 19
13.5(a)	Manning's Formula for Full Flow in Storm Pipes (Metric)	13 - 26
13.5(b)	Manning's Formula for Full Flow in Storm Pipes (U.S. Customary)	13 - 27
13.6(a)	Nomograph for Computing Required Size of Circular Pipe for Full Flow (Metric)	13 - 28
13.6(b)	Nomograph for Computing Required Size of Circular Pipe for Full Flow (U.S. Customary)	13 - 29
13.7(a)	Concrete Pipe Flow Nomograph (Metric)	13 - 30
13.7(b)	Concrete Pipe Flow Nomograph (U.S. Customary)	13 - 31
13.8	Values of Hydraulic Elements of Circular Section for Various Depths of Flow	13 - 32
13.9	Deflection Angle	13 - 36
13.10	Relative Flow Effect	13 - 37
13.11	Schematic Representation of Benching Types	13 - 38
13.12	Use of Energy Losses in Developing a Storm Drain System	13 - 41
14.1	Bioslope Example	14 - 21
14.2	Common Structural BMP Applications	14 - 27
14.3	Sharp-Crested Weir (No End Contractions)	14 - 34
14.4	Sharp-Crested Weir (Two End Contractions)	14 - 35
14.5	Sharp-Crested Weir and Head	14 - 35
14.6	Triangular Shaped Hydrographs (For Preliminary Estimate of Required Storage Volume)	14 - 38
14.7(a)	Example Storage Characteristics Curve (Metric)	14 - 43
14.7(b)	Example Storage Characteristics Curve (U.S. Customary)	14 - 43
14.8(a)	Example Stage-Storage Curve (Metric)	14 - 44
14.8(b)	Example Stage-Storage Curve (U.S. Customary)	14 - 44
14.9(a)	Stage-Discharge Curve (Metric)	14 - 45
14.9(b)	Stage-Discharge Curve (U.S. Customary)	14 - 45
14.10(a)	Runoff Hydrographs (Metric)	14 - 49
14.10(b)	Runoff Hydrographs (U.S. Customary)	14 - 50
14.11	Concrete Riser Example	14 - 53
14.12	Example of Dry Pond Configuration	14 - 54
14.13	Example of Methods of Increasing the Length-to-Width Ratio of a Storage Facility	14 - 57
14.14	Wet Pond	14 - 58

LIST OF TABLES

<u>TABLE</u>	<u>SUBJECT</u>	<u>PAGE</u>
6.1	Pennsylvania Stream Classifications	6 - 5
6A.1	Data Access Quick Reference Guide.....	6A - 5
7.1	Return Interval Terms.....	7 - 10
7.2	Suggested Design Return Intervals (years).....	7 - 11
7.3	Frequencies for Coincidental Occurrence	7 - 14
7.4	Gages with the Highest Over- or Under-Predicted USGS SIR 08-5102 Values and Their Watershed Characteristics.....	7 - 20
7.5	Roughness Coefficients n-value for Manning's Equation (Pipes and Pavements)	7 - 27
7.6	Intercept Coefficients for Velocity versus Slope Relationship.....	7 - 28
7.7	Runoff Factors for the Rational Equation.....	7 - 31
7.7(a)	Runoff Coefficient for Rural Watersheds.....	7 - 32
7.8	Runoff Coefficient Adjustment Factors for Rational Method	7 - 32
7.9	Runoff Curve Numbers for Urban Areas.....	7 - 38
7.10	Runoff Curve Numbers for Cultivated Agricultural Land.....	7 - 39
7.11	Runoff Curve Numbers for Other Agricultural Lands.....	7 - 40
7.12	Runoff Curve Numbers for Arid and Semi-Arid Rangelands	7 - 41
7.13	Rainfall Groups for Antecedent Soil Moisture Conditions During Growing and Dormant Seasons....	7 - 41
7.14	Coefficients for Equation 7.19.....	7 - 43
7.15	Ponding Adjustment Factor	7 - 43
7.16	NRCS 24-Hour Rainfall Distributions.....	7 - 49
7.17	Example of Incremental Rainfall Tabulation (Metric)	7 - 50
7.18	Example of Incremental Rainfall Tabulation (U.S. Customary)	7 - 52
7.19	Stage-Storage-Outflow and Computed Storage-Outflow Relation.....	7 - 57
7.20	Storage Routing Calculations	7 - 58
7.21	Channel Routing Using the Muskingum Method.....	7 - 63
7A.1	Appropriate Rainfall Region Map for each Storm Duration and Frequency	7A - 1
7A.2(a)	Five (5) minute through twenty-four (24) hour storm totals for Region 1 (Metric).....	7A - 2
7A.2(b)	Five (5) minute through twenty-four (24) hour storm totals for Region 1 (U.S. Customary).....	7A - 2
7A.3(a)	Five (5) minute through twenty-four (24) hour storm totals for Region 2 (Metric).....	7A - 3
7A.3(b)	Five (5) minute through twenty-four (24) hour storm totals for Region 2 (U.S. Customary).....	7A - 3
7A.4(a)	Five (5) minute through twenty-four (24) hour storm totals for Region 3 (Metric).....	7A - 4
7A.4(b)	Five (5) minute through twenty-four (24) hour storm totals for Region 3 (U.S. Customary).....	7A - 4
7A.5(a)	Five (5) minute through twenty-four (24) hour storm totals for Region 4 (Metric).....	7A - 5
7A.5(b)	Five (5) minute through twenty-four (24) hour storm totals for Region 4 (U.S. Customary).....	7A - 5
7A.6(a)	Five (5) minute through twenty-four (24) hour storm totals for Region 5 (Metric).....	7A - 6
7A.6(b)	Five (5) minute through twenty-four (24) hour storm totals for Region 5 (U.S. Customary).....	7A - 6
7A.7(a)	Composite 10-year storm in Region 5 (Metric).....	7A - 8
7A.7(b)	Composite 10-year storm in Region 5 (U.S. Customary).....	7A - 8
7A.8(a)	Values obtained from 2007 PDT-IDF (Metric).....	7A - 29
7A.8(b)	Values obtained from 2007 PDT-IDF (U.S. Customary).....	7A - 29
7A.9(a)	Data from Time 0 to 500 Minutes (Metric).....	7A - 31
7A.9(b)	Data from Time 0 to 500 Minutes (U.S. Customary).....	7A - 31
7A.10(a)	Data from Time 500 to 1440 Minutes (Metric).....	7A - 32
7A.10(b)	Data from Time 500 to 1440 Minutes (U.S. Customary).....	7A - 32
7A.11(a)	Composite Storm Development (Metric).....	7A - 34
7A.11(b)	Composite Storm Development (U.S. Customary).....	7A - 36
7C.1	Project location map for bridge replacement over Big Sandy Creek.....	7C - 2
7C.2	Project location map for culvert replacement over Queen Anne Creek Tributary.....	7C - 3
7C.3	Project location map for culvert replacement over Sherman Creek Tributary	7C - 4

7C.4	Project location map for bridge replacement over Baker Run.....	7C - 5
8.1	Roughness Coefficients n-values for Manning's Equation (Channels, Flood Plains and Excavated Channels)	8 - 11
8.2	Cross Section Data (Section "A" - Sta. 1+36)	8 - 18
8.3	Cross Section Data at Elevation 221.83 m (727.80 ft)	8 - 20
8.4	Cross Section Data at Elevation 222.14 m (728.80 ft)	8 - 20
8.5	Cross Section Data at Elevation 222.14 m (729.81 ft)	8 - 21
8.6	Cross Section Data at Elevation 222.74 m (730.61 ft)	8 - 21
8.7	Cross Section Data at Elevation 222.74 m (730.78 ft)	8 - 22
8.8	Water-Surface Calculations ($Q = 57 \text{ m}^3/\text{s}$ (2000 cfs)).....	8 - 29
8.9	Channel Lining Application and Considerations.....	8 - 40
8.10	Adjusted Manning's n-Values for Various Channel Linings	8 - 40
8.11	Allowable Shear Stresses for Various Linings	8 - 41
8.12	Permissible Velocities for Various Linings.....	8 - 42
8.13	Retardance Class for Lining Materials	8 - 43
8.14	Manning's n Relationship for Vegetal Degree of Retardance.....	8 - 44
8.15	Temporary RECPs by FHWA Class	8 - 46
8.16	Permanent RECPs by FHWA Class	8 - 46
9.1	Alternate Pipes Selection Criteria Based on Type of Installation.....	9 - 16
9.2	Pipe Selection Criteria for Corrosion Protection Based on pH and Resistivity Values.....	9 - 17
9.3	Constants for Inlet Control Design Equations	9 - 23
9.4	Regression Coefficients for Inlet Control Equations.....	9 - 26
9.5	Entrance Loss Coefficients (C_e)	9 - 29
9.6	Quick References for Culvert Variables.....	9 - 45
10.1	Bridge or Culvert.....	10 - 25
10.2	Flow Classification According to Submergence Conditions	10 - 70
10.3	Subcritical Flow Contraction and Expansion Coefficients.....	10 - 74
10.4	Yarnell's Pier Coefficient, K, for Various Pier Shapes.....	10 - 76
10.5	Low Flow Classes	10 - 78
11.1	Fate of Pollutants by Management Measures	11 - 11
11.2	Wapwallopen Creek Near Wapwallopen, PA.....	11 - 39
11.3	Base Flows for Selected Recurrence Intervals	11 - 41
12.1	Relationship of Earth Disturbance Activities, Regulations, and Associated Permits	12 - 4
12.2	Suggested Points For Project Coordination with County Conservation Districts.....	12 - 6
12.3	BMP Selection.....	12 - 11
12.4	RECP Selection (Typical)	12 - 15
12.5	Six-Step Geocell Static Design Procedure	12 - 18
12.6	Typical Soil and Interface Characteristics.....	12 - 20
12.7	General Guidelines for Selection of Swale Infill Materials.....	12 - 26
12.8	Typical Tendons.....	12 - 31
12.9	ACBR Systems.....	12 - 33
12.10	ACBR System Design Procedures	12 - 35
12.11	Actual Test Results.....	12 - 36
12.12	Range of Articulation	12 - 36
12.13	Summary of A-Jacks Dimensions	12 - 40
12.14	ArmorFlex Block System	12 - 42
12.15	Cable Concrete Block Specifications Original Block – Closed Cell.....	12 - 45
12.16	Maximum Permissible Velocities for Mattress and Block Gabions	12 - 47
12.17	Maximum Slope Length for Compost Filter Socks.....	12 - 49
12.18	Silt Barrier Fence Slope Length	12 - 51
12.19	Silt Barrier Fence Post Spacing and Geotextile Requirements.....	12 - 51
12.20	Heavy Duty Silt Fence Slope Length	12 - 52
12.21	Maximum Flow Length For Vegetative Filter Strip Slope.....	12 - 53

12.22	Suggested Minimum Sizes	12 - 55
12A.1	Relationship of Activities, Regulations, and Permits for Stream Work	12A - 6
12D.1	Correlation between PA DEP Regions, PennDOT Engineering Districts, and Conservation Districts.....	12D - 1
13.1	Manning's <i>n</i> for Street and Pavement Gutters	13 - 11
13.2	Manhole Spacing Criteria.....	13 - 22
13.3	Correction for Benching	13 - 38
13.4	Hydraulic Grade Line Computation Form.....	13 - 40
14.1	PCSM Levels for Projects Located in Non-sensitive Areas	14 - 5
14.2	PCSM Levels for Projects Located in Sensitive Areas.....	14 - 5
14.3	BMPs by ABACT Category.....	14 - 8
14.4	Relationship of Activities, Regulations, and Permits for Stream Work	14 - 15
14.5	Level 1 BMP Toolbox Summary.....	14 - 16
14.6	Vegetated Swale Summary.....	14 - 18
14.7	Bioretention Summary.....	14 - 19
14.8	Vegetated Filter Strip Summary	14 - 19
14.9	Level 2 BMP Toolbox Summary.....	14 - 20
14.10	Bioslope Summary	14 - 21
14.11	Infiltration Trench Summary.....	14 - 22
14.12	Infiltration Basin Summary	14 - 23
14.13	Infiltration Berm Summary	14 - 23
14.14	Level 3 BMP Toolbox Summary.....	14 - 24
14.15	Constructed Wetland Summary.....	14 - 25
14.16	Wet Pond Summary.....	14 - 25
14.17	Permeable Pavement Summary	14 - 26
14.18	Level 4 BMP Toolbox Summary.....	14 - 26
14.19(a)	Broad-Crested Weir Coefficient C-Values as a Function of Weir Crest Breadth and Head (m).....	14 - 36
14.19(b)	Broad-Crested Weir Coefficient C-Values as a Function of Weir Crest Breadth and Head (ft)	14 - 36
14.20	Orifice Discharge Coefficients	14 - 37
14.21(a)	Stage-Discharge-Storage Data (Metric)	14 - 41
14.21(b)	Stage-Discharge-Storage Data (U.S. Customary).....	14 - 42
14.22(a)	Example Runoff Hydrographs (Metric).....	14 - 46
14.22(b)	Example Runoff Hydrographs (U.S. Customary).....	14 - 47
14.23(a)	Storage Routing for the 10-Year Storm (Metric).....	14 - 48
14.23(b)	Storage Routing for the 10-Year Storm (U.S. Customary).....	14 - 48
19.1	Changes that May Affect Drainage Designs and are Detectable during Field Observation	19 - 15
