

Environmental Services essentials

Your guide to choosing the right EVS products and solutions

You're on the frontlines of healthcare

And so are we

Cleaning protocols, hand hygiene and infection prevention

When it comes to managing Environmental Services, patient and staff safety are priority number one. So it's important to identify the right products and best practices to help you achieve your goals.

What does it take to succeed? A dedicated partner who understands healthcare and EVS needs

Discover better options

Innovations designed to help you achieve your goals—we own patents in every environmental services category

Learn best practices

Solid advice and valuable insights—our team of EVS specialists has over 135 years of combined healthcare industry experience

Consolidate orders

Everything you need in one invoice—we provide over 550,000 products to the entire continuum of care

Control costs

Low minimums for free shipping—qualifying is easy if you include your med-surg supplies

Paper supplies	4–9
Liners, hampers and trash cans	10–25

Paper supplies

Premium facial tissue

- Our softest, strongest and most absorbent tissue
- Boxes come in stylish designs for a feels-like-home environment
- Shields help repel dust particles

Item No.	Description	Pkg.
NON245278	Cube box, premium 2-ply	85 sheets/bx, 36 bx/cs
NON245277	Flat box, premium 2-ply	100 sheets/bx, 36 bx/cs
NON245276	Medium, premium 2 ply	60 sheets/bx, 48 bx/cs
NON245273	Pocket pack, 3-ply	10 sheets/pk, 100 bx/cs
NON245288	Animal pals, 2 ply, cube box	75 sheets/pk, 36 bx/cs

NON245277

NON245278

NON245288

Standard facial tissue

- Packaging is made from recycled paper
- Available in three different box sizes to suit your needs

Item No.	Description	Pkg.
NON243277	Large box, tree print, 2-ply	90 sheets/bx, 30 bx/cs
NON243276	Medium box, leaf print, 2-ply	60 sheets/bx, 72 bx/cs
NON243275	Small box, circle print, 2-ply	40 sheets/bx, 200 bx/cs

NON243277

Toilet seat cover

- Helps ensure a cleaner bathroom environment
- Dispensed easily

Item No.	Description	Pkg.
NON26899	Toilet seat covers, half fold, refill	250/pk, 20 pk/cs, 5,000/cs

NON26899

Single-fold towels

- One side of the towel is folded once
- Requires a larger dispenser than multi-fold or C-fold towels

Item No.	Description	Sheet Size	Pkg.
NONPBMSFB	White, 1-ply	9.5" x 10.62"	250/pk, 16 pk/cs, 4,000/cs
NONPBMSFK	Natural, 1-ply	9.5" x 10.62"	250/pk, 16 pk/cs, 4,000/cs

NONPBMSFK

NONPBMSFB

Green Tree® paper products

NON26835

Green Tree perforated roll towel

- Standard household roll towel
- Ready for any job

Item No.	Description	Sheet Size	Pkg.
NON26835	White, 2-ply	8.8" x 11"	85 sheets/roll, 30 rolls/cs

NON26800

Green Tree toilet tissue

- Soft, environmentally conscious and affordable to help improve patient experience and your bottom line
- Part of our Green Tree Basics portfolio of paper products

Item No.	Description	Pkg.
NON26800	Standard roll, 2-ply, renewable pulp	500 sheets/roll, 96 rolls/cs
NON26801	Standard roll, 1-ply	1,000 sheets/roll, 96 rolls/cs
NON26805	Jumbo junior, 3.8" X 1,000' roll, standard	8 rolls/cs
NON27800	Standard roll, 2-ply	500 sheets/roll, 96 rolls/cs
NON28800	Standard roll, 2-ply, deluxe	400 sheets/roll, 96 rolls/cs
NON28805	Jumbo junior, 3.8" X 650' roll, deluxe	12 rolls/cs
NON28830*	Small core, 2-ply	800 sheets/roll, 36 rolls/cs
NON28831	Small core, 2-ply	1,500 sheets/roll, 18 rolls/cs

*Fits most small core and coreless dispensers.

NON26810

Green Tree multi-fold towels

- Folded into the next towel for automatic feeding
- Deluxe option features a heavier paper

Item No.	Description	Sheet Size	Pkg.
NON26810	Standard, white	9.13" x 9.5"	250/pk, 16 pk/cs, 4,000/cs
NON26813	Deluxe, white	9.13" x 9.5"	250/pk, 16 pk/cs, 4,000/cs
NON25815	Deluxe, natural	9.13" x 9.5"	250/pk, 16 pk/cs, 4,000/cs
NON26818	Premium, TAD, white	8.75" x 9.5"	200/pk, 12/cs, 2,400/cs
NON26812	Standard, white	9.25" x 7.7"	250/pk, 16 pk/cs, 4,000/cs

NON26820

Green Tree c-fold towel

- Both sides of the towel are folded inwards
- Stacked individually

Item No.	Description	Sheet Size	Pkg.
NON26820	White, 1-ply	13" x 10"	150/pk, 16 pk/cs, 2,400/cs

Green Tree roll towels

- An economical choice
- Center-pull design to help reduce cross-contamination
- Deluxe option with thicker, fluffier paper

Item No.	Description	Color	Sheet Size	Pkg.
NON26830	Center-pull	White	600 sheets/roll, 8.25" x 12"	6 rolls/cs
NON26836	Center-pull jr.	White	330 sheets/roll, 7.6" x 11"	6 rolls/cs
NONPBM350	Standard	White	8" x 350'	12 rolls/cs
NON25825	Standard	Natural	8" x 350'	12 rolls/cs
NONPBM800B	Standard	White	8" x 800'	6 rolls/cs
NONPBM800N	Standard	Natural	8" x 800'	6 rolls/cs
NON288425	Deluxe	White	8" x 425'	6 rolls/cs
NON26872	Standard	White	10" x 800'	6 rolls/cs
NON26870	Deluxe	White	10" x 425'	6 rolls/cs

NON25825

NONPBM350

Green Tree napkins

- An economical choice for your facilities
- Ideal for high-volume applications

Item No.	Description	Pkg.
NONPLT257DN	Dinner napkin, 15" x 17", white	3,000 ea/cs
NON25803	Beverage napkin, white	4,000 ea/cs
NON25806	Dinner napkin, square, white	4,008 ea/cs
NON25807	Lunch napkin, 12" x 12", white	6,000 ea/cs

NON25807

The Green Tree collection

includes paper towels, toilet tissue and facial tissue made from renewable sources or recycled content. All Green Tree products are pleasantly soft and gentle on the environment, but strong enough to stand up to tough cleaning needs.

Dispensers

EVSDSMFB

Manual dispenser for Ultrafold® c-fold and multi-fold towels

- Low-profile design makes this plastic dispenser ideal for small places
- Compatible paper products: NON26810, NON26813, NON25815, NON26820, NON26818

Item No.	Description	Color	Pkg.
EVSDSMFB	11.5"H x 11.5"W x 6"D	Smoke Black	1 ea

EVSDSMFB2

Black multifold dispenser

- Compatible paper products: NON25815, NON26810, NON26813, NON26818, NON26820

Item No.	Description	Pkg.
EVSDSMFB2	11.5"H x 11.5"W x 6"D	1 ea
EVSDSMFW	11.5"H x 11.5"W x 6"D	1 ea

EVDSMFCOUNTER

Countertop multifold towel dispenser

- Compatible paper products: NON25815, NON26810, NON26813, NON26818, NON26820

Item No.	Description	Pkg.
EVDSMFCOUNTER	Countertop multifold towel dispenser	1 ea

EVSDSCOVER

Black toilet seat cover dispenser, 1/2 fold

- Compatible paper product: NON26899

Item No.	Description	Pkg.
EVSDSCOVER	Black toilet seat cover dispenser, 1/2 fold	1 ea

Manual dispenser for center-pull towel

- Dispenses single sheets for reliable portion control
- Touchless center-pull design to help prevent cross-contamination
- Large capacity for long intervals between refills
- Designed to reduce maintenance costs and provide a hygienic hand-drying environment
- Compatible paper products: NON26830, NON26836

Item No.	Description	Pkg.
EVSDSRCENTERP	11.63" H x 9.13" W x 9.5" D	1 ea

EVSDSRCENTERP

8" automatic roll towel dispenser

- Compatible paper products: NON25825, NON288425, NONPBM350, NONPBM800B, NONPBM800N

Item No.	Description	Pkg.
EVSDSRAUTO2	8" automatic roll towel dispenser	1 ea

EVSDSRAUTO2

8" mechanical roll towel dispenser

- Compatible paper products: NON25825, NON288425, NONPBM350, NONPBM800B, NONPBM800N

Item No.	Description	Pkg.
EVSDSRMECH2	8" mechanical roll towel dispenser	1 ea

EVSDSRMECH2

Two-roll small core dispenser

- Compatible paper products: NON28830, NON28831

Item No.	Description	Pkg.
EVSDSTPSMC	Two-roll small core dispenser	1 ea

EVSDSTPSMC

Single and double roll dispensers

- Compatible paper products: NON26805, NON28805

Item No.	Description	Pkg.
EVSDSTP91	Two-roll small core dispenser	1 ea
EVSDSTP92	Two-roll small core dispenser	1 ea

EVSDSTP91

Two-roll toilet paper dispensers

- Compatible paper products: standard size NON26800, NON27800, NON28800

Item No.	Description	Pkg.
EVSDSTPVSTD	Two-roll dispenser	1 ea
EVSDSTPHSTD	Two-roll dispenser	1 ea

EVSDSTPVSTD

**Liners,
hampers and
trash cans**

How to choose the right bag

What's the difference between a high density and low density liner?

High density

- Think "plastic grocery store bags"
- Measured in microns (mics)
- Features: strong and thin—less material so it's less expensive
- Waste type: soft waste (i.e. tissue paper, paper towels and heavy, not sharp waste)

Low density

- Think "trash liners at home"
- Measured in mils
- Features: superior stretch for heavier items
- Waste type: heavy waste (i.e. linens, food, infectious waste and sharp objects)

Helpful hints on selecting can liners

To convert mil to microns, multiply the mil by 25.4 to arrive at true micron thickness.

How to measure for correct can liner size

Bag width: Half the outer circumference of the container.

Bag length: For round containers, use the height of the container, plus half of the diameter of the bottom, plus 3 inches (for overhang).

For square or rectangular containers, use the diagonal of the container bottom, rather than the diameter.

Types of waste	Low density high mil	Low density med mil	Low density low mil	High density high mic	High density med mic	High density low-med mic	High density low mic
Heavy sharp objects	●						
Average weight sharps, broken glass		●					
Lightweight waste with sharp corners			●				
Rough cafeteria waste, sharp objects		●	●				
General food waste			●	●			
Heavy paper (i.e., newspaper, magazines)				●			
Terries, linens, microfiber				●	●		
General mixed restroom waste						●	
Tissue paper							●

Mil thickness	Approx. micron equivalent

i-Mop®

Extremely mobile

- Maneuvers easily to clean under tables, washroom sinks and other tight spaces
- 360-degree flexibility
- Titanium hinge never wears out
- Lightweight for easy transport
- Easily steers through curves; makes u-turns with the flip of a wrist

Easy to use

- Applies the solution, scrubs the floor and removes soil in one motion
- Cordless—runs on long-lasting, quick-charging lithium-ion batteries

Powerfully effective

- Places over 48 lbs. of brush pressure on the surface
- 350-rpm counter-rotating brushes
- Cleans 1,000 sq. ft. or more in only 4.5 minutes (vs. 35 minutes with a wet mop)
- Dries faster than other methods

EVSIMOPXXLT

i-Mop Turbo

- i-Mop XXL Turbo machine
- Two solution tanks with blue and green caps
- Recovery tank
- Turbo quick charger and set of turbo batteries
- Set of medium brushes, blue; set of heavy-duty brushes, red

Scrubbers

KNA11270300

BD 50/50 walk-behind floor scrubbers

- Three cleaning modes make it easy to operate
- Slim design with 20" cleaning path
- 13.2 gallon solution/recovery tanks
- Easy access to batteries

Item No.	Description	Battery Type	Ship Wt.	Dimensions
KNA11270300	20" with pad driver	AGM	306 lbs.	47" x 21" x 39"
KNA11270290	20" with pad driver	Wet	306 lbs.	47" x 21" x 39"

KNA98409010

Chariot 2 iScrub 20" ride-on floor scrubber

- Patented stand-on design is remarkably maneuverable
- Leading the industry with a 360° view of the cleaning area
- Ultra quiet to avoid disturbing others

Item No.	Description	Battery Type	Ship Wt.	Dimensions
KNA98409010	20" disk, pad driver	AGM	615 lbs.	44" x 27.2" x 51.75"

EVSM28SLBP1

Disk Auto Scrubbers, 11-Gal.

- Quiet, with noise levels as low as 60 dBA
- 1-2-3 step training graphics on the control panel
- Automatic brush on/off system helps eliminate kneeling and back strain
- Small and extremely maneuverable for tight spaces and aisles (EVSM24LBP1, EVSM24ABP1 and EVSM24LBSP1 only)
- BatteryShield® stops the machine when battery water is low, and HydroLink® battery watering system optimizes battery life (EVSM20LBSP1 and EVSM24LBSP1 only)

Item No.	Description	Battery Type	Ship Wt.	Dimensions
EVSM20SLBP1	20" Disk, transaxle drive	155ah lead acid	455 lbs.	31" x 50" x 55"
EVSM20ABP1	20" Disk, transaxle drive	140ah agm	455 lbs.	31" x 50" x 55"
EVSM20LBSP1	20" Disk, transaxle drive	155ah lead acid	455 lbs.	31" x 50" x 55"

Wet/dry

KNA14286230

NT 48/1 wet / dry commercial vacuum

- Good for wet and dry vacuuming of small areas
- Provides powerful suction performance
- Pick up dirt and liquid

Item No.	Description	Pkg.
KNA14286230	Nt 48/1 wet / dry vacuum, 12 gal.	1 ea

EVSM695401

Wet / dry commercial vacuum

- Wet/dry vacuum is great for use in slip and fall zones, flood recovery, stripper recovery, etc.
- Tilt-to-drain feature allows emptying when a floor drain is not available
- Cord wrap keeps the whole cord visible
- Safe, easy-to-use lever engages squeegee
- Two usable edges on squeegee, which is easy to change without tools

Item No.	Description	Pkg.
EVSM695401	Wet vac, 18 gal.	1 ea

Sweepers

12" Cordless electric EB 30/1 sweeper

- Flat design enables it to reach beneath radiators and furniture with low ground clearance, allowing for more coverage
- Picks up loose dirt within just 2 mm of its edges for a more efficient cleaning job
- Telescopic broomstick has a push handle and can be adjusted to suit the operator's height, while a universal joint enables it to move in all directions
- No additional tools needed to change batteries or remove the roller brush, resulting in low maintenance

KNA15451210

Item No.	Description	Pkg.
KNA15451210	Karcher EB 30/1 12" cordless electric sweeper	1 ea

KM 70/30 C BP sweeper

- Main roller brush and side brush are electric-powered, making sweeping corners simple
- Push handle adjusts to 3 different positions and folds for easy storage
- Main roller brush and side brush are also height adjustable for adaptability to various surfaces
- 12V battery and corresponding charger are located onboard

KNA15172180

Item No.	Description	Pkg.
KNA15172180	28" KM 70/30 C BP sweeper	1 ea

28" Radius manual walk-behind sweeper

- Compact, durable sweeper that provides a fast and efficient way to clean halls, sidewalks, warehouses, etc.
- Both wheels drive the roller brush, so it continues to sweep well during turns
- Adjustable roller height
- Ergonomic handle
- Flat design for easy storage

KNA15171040

Item No.	Description	Pkg.
KNA15171040	Radius manual walk behind sweeper with brushes	1 ea

9.5" manual sweeper

- Dual debris canisters are easy to empty and feature a handy viewing window
- Soft rubber wheels conform to a variety of floor surfaces
- Corner brushes for hard-to-reach areas
- Two rows of rubber rotors lift dirt fast
- Hand-friendly grip

BCBG21

Item No.	Description	Pkg.
BCBG21	9.5" manual sweeper	1 ea

Floor Mops

Loop mops

- Made of recycled, 4-ply yarn blend including, post-consumer and post-industrial waste
- Fantail spread covers more floor per sweep, helping to reduce time and labor cost
- Poly-mesh headband dries quickly
- Headband/tail-band color: yellow = small, green = medium, red = large
- Use with jaw mop handle (EVSTOOL111F) or quick-change mop handle (EVSTOOL121P)

Carts and containers

Custom cart covers

Keeping linens and other items clean and protected helps prevent infections. The Centers for Medicare and Medicaid Services (CMS) recommends to "handle, store, process and transport linens so as to prevent the spread of infection."¹ Providing the proper fit and coverage requires custom sizing your cart covers.

We've streamlined our ordering process to make it easier than ever to get the exact custom cart covers you need. Plus, they're built to last, with strong double-stitched reinforced vinyl and heavyweight nylon materials.

You can create custom covers for virtually any equipment in your facility, including:

- Polyvinyl bulk trucks
- Tilt trucks (covers and liners)
- Morgue carts
- Suture carts
- Housekeeping carts
- Utility carts
- Crash carts
- Computer carts
- O.R. machines
- Catheter carts
- Beds in storage
- ...and more

1 Choose your cover type

Vinyl pocket

Grommets for locking

Reject linen pouch with silk screen

Standard covers—available in nylon or antimicrobial-treated vinyl to protect the product

Standard covers have a single front flap that is fastened shut with either zippers or hook-and-loop closures. Also available without a flap.

*This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms.

Silk screening is available as a custom extra

Easy-grab covers—convenient access and permanent protection

- Keep your linens covered at all times with Clear view vinyl window strips.
- Vertical panels let you easily see what you're grabbing
- No flaps to close. Linens are never left uncovered
- Back and sides can be ordered in wipe-clean vinyl treated with an antimicrobial agent to protect the product or washable 420-denier nylon

*This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms.

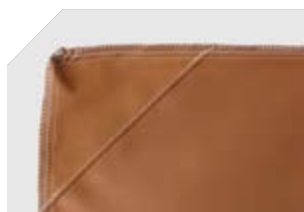

Easy access to linens

Removable window strips for trouble-free laundering. Easily replaced if damaged or lost.

Half cart covers—for poly bulk trucks

- Only a 12" cover on the sides and back is needed to hold this durable cover in place—plus a full front flap to cover the opening. Options include:
- Hook & loop to secure the front flap to the cart
- Elastic corners for a more snug fit
- Silk screen your logo on the flap to market your business

Reinforced corners

Elastic corners available for a more snug fit

2 Select your material and cover

200 denier nylon color options—standard covers

200 denier nylon (Red)

420 denier nylon color options—standard, easy-grab covers

420 denier nylon (Khaki)

600 denier nylon color options—standard covers

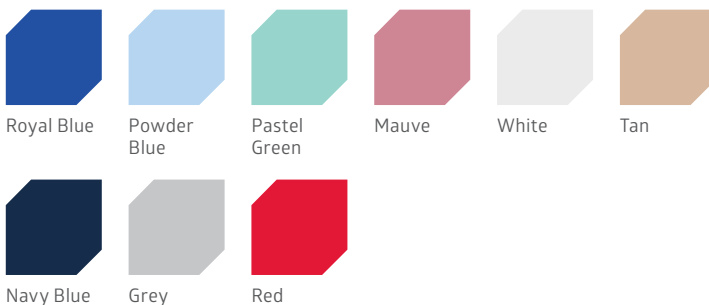

600 denier nylon (Royal Blue)

1,000 denier nylon color options—standard covers

1000 denier nylon (Green)

11-oz. antimicrobial vinyl* to protect the product—standard, easy-grab covers

11-oz. antimicrobial vinyl (Pastel Green)

*This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms.

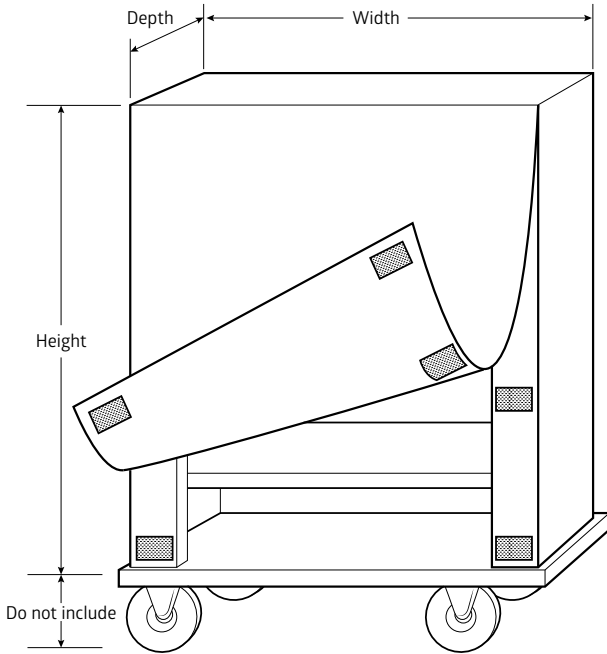

11-oz. vinyl—standard, easy-grab covers

Colors are reproduced as faithfully as the printing process allows. Please contact your Medline representative for fabric samples to ensure satisfaction.

3 Measure your cart

Do not include casters when measuring height

4 Indicate your closure type

For standard covers only

None

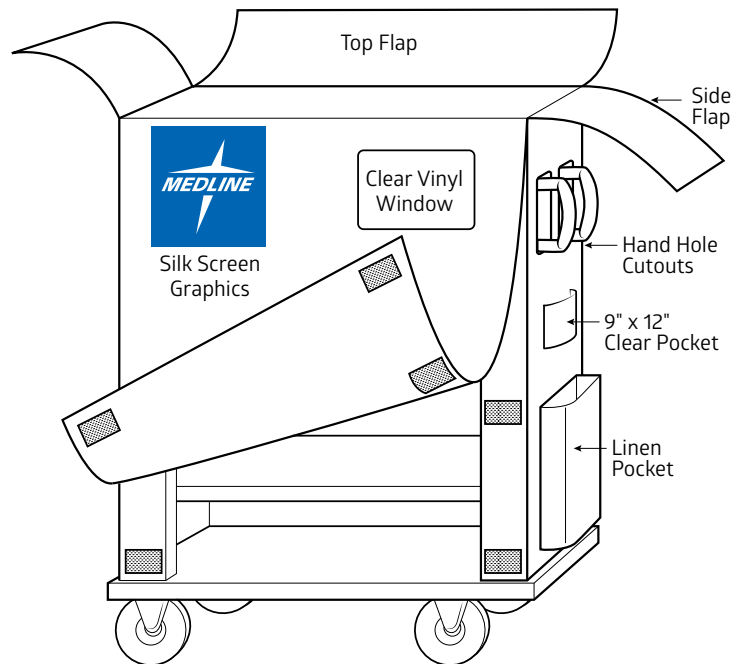

Zipper closure

Hook-and loop closure

5 Add your extra options

Cutouts, pockets, graphics or windows can be located just about anywhere.

Medline MIYO healthcare housekeeping workstations

Medline Micro-Kill

Quat

Overall
kill time of
10 min

Bleach-free and alcohol-free

Micro-Kill is an effective bleach-free and alcohol-free disinfectant cleaner wipe.

Effective against TB*

Even without bleach or alcohol, Micro-Kill can achieve disinfection of Tuberculosis and other micro-organisms—see table.

Common uses

Wipes are intended for use on hard, non-porous surfaces. Alcohol free formula to use on non-polycarbonate plastic surfaces. Spot test on inconspicuous area before use.

Micro-Kill kill times

Kill (i.e., contact) time for a disinfectant is the amount of time a surface must remain wet with the product to achieve disinfection.

Cleaning chemical systems

Ten ways that Medline cleaning chemicals help you improve safety and efficiency

- Improved safety with the right dilution
- Less waste from using only the chemicals you need
- A time-saving bottle-fill
- Green seal products are environmentally friendly
- Virtually maintenance-free
- Easy training and product selection
- Easy operation
- SKU consolidation
- Streamlined chemical purchasing
- Strong, effective cleaning products

Dispensed chemicals

Concentrated chemicals designed for use in any dispenser in this section. All dispensed chemicals come with four 64-oz. containers per case.

Disinfectants

Micro-Kill Q3 Concentrated Disinfectant, Cleaner & Deodorizer

- Concentrated disinfectant, cleaner and deodorizer with 40 efficacy claims
- 3 minute contact time -see product label for the specific micro-organism list
- EPA-registered disinfectant, cleaner and deodorizer for hard, non-porous, non-food contact surfaces
- Fragrance-free
- For Medline chemical dispensing systems (1:256 dilution)

Floor care

Low-odor floor finish

- High performance with low odor
- High-gloss with excellent resistance to marks and scuffs
- Superb response to burnishing with 18% solids
- Quick dry time

Item No.	Description	Pkg
EVSCHEM500	Low-odor floor finish, 2.5 gal.	2/cs

EVSCHEM500

Multi-speed floor finish

- Premium blend of 22% solids provides great durability and shine, regardless of maintenance program used
- Shows excellent resistance to alcohol-based sanitizers
- Multi-speed—can be used with low/high speed machines
- Multi-surface—can be used on VCT and stone

Item No.	Description	Pkg
EVSCHEM510	Multi-speed floor finish, 2.5-gal.	2/cs

EVSCHEM510

DuraPro 25 floor finish

- Fast shine and superb gloss with 25% solids
- Consistent spreading and easy leveling
- Excellent mark and scuff resistance to stand up to heavy traffic
- The durability to extend your scrub, recoat and strip cycle
- Can be maintained with any program, frequency or equipment

Heavy-duty floor stripper

- Removes finish down to bare floors; innovative "dosing" quart bottle ensures 1:20 dilution.

Item No.	Description	Pkg.
EVSCHM550	Heavy-duty floor stripper, 32-oz.	6/cs

Low-odor floor stripper

- Designed for areas with high traffic or patient/resident rooms; dilute to a 1:32 ratio.

Item No.	Description	Pkg.
EVSCHM560	Low-odor floor stripper, 32-oz.	6/cs

Baseboard stripper

- Protect your baseboards by using an aerosol instead of a traditional floor stripper.

Item No.	Description	Pkg.
EVSCHM750	Baseboard stripper, 19-oz.	6/cs

Foam control agent

- Works as a defoamer and an antifoam agent
- Provides effective control in auto scrubbers, extraction machines, and wet vacs
- Dilutes 1:640

Item No.	Description	Pkg.
EVSCHM490	Chemical defoamer, 32-oz.	6/cs

Ultra shine floor finish restorer

- Designed to reduce mop and machine drag and enhance burnishing results
- Brilliant floor finish restorer
- Provides a brilliant reflective shine
- Dilute to a 1:64 ratio

Item No.	Description	Pkg.
EVSCHM590	Ultra shine floor finish restorer, 32-oz.	4/cs

Bathroom cleaners

Heavy-duty toilet bowl cleaner

- For heavy rust and scale buildup
- Contains hydrochloric acid to remove rust and scale from toilet bowls
- Floral fragrance

Item No.	Description	Pkg.
EVSCHM440	9.5% heavy-duty toilet bowl cleaner, 32-oz.	12/cs

EVSCHM440

Non-acid bowl cleaner

- Budget friendly, for daily-use
- Blue color so you know the toilet is clean
- Fresh fragrance

Item No.	Description	Pkg.
EVSCHM430	Non-acid toilet bowl cleaner, 32-oz.	12/cs

EVSCHM430

Crème cleanser

- For removal of heavy buildup of soap scum, scale, and rust
- Mildly-abrasive thickened cleanser
- Sassafras fragrance

Item No.	Description	Pkg.
EVSCHM410	Mild abrasive crème cleanser, 32-oz.	12/cs

EVSCHM410

Foaming acid shower cleaner

- Dissolves tough rust, scale and soap scum
- Foaming acidic shower cleaner
- Lime fragrance

Item No.	Description	Pkg.
EVSCHM450	Foaming acid shower cleaner, 32-oz.	12/cs

EVSCHM450

Drain opener

- Thickened formula sinks and clings to point of obstruction
- Highly effective against fats, oils, lint and hair
- Odorless and non-flammable

Item No.	Description	Pkg.

AccuPoint® HC

A single AccuPoint HC reading connects many data points

- Where the sample was taken (bed rail, table, toilet seat, light switches, doorknob, etc.)
- The room number
- Housekeeper on duty
- When the sample was taken

Multiple AccuPoint HC readings are analyzed in Data Manager

- Trends and patterns are observed in real time
- Historical reviews by surface, area or housekeeper
- Audits or epidemiological studies are supported
- Actions are taken based on observations
- Superior performance can be promoted or deficiencies addressed
- Staff can be trained or reinforced on protocols
- Protocols can be changed or enhanced

Item No.	Description	Pkg.
EVSATPSYSTEM	Monitor and Software	1 ea
EVSATP9905	Samplers	100/cs

EVSATP9905

EVSATPSYSTEM

Document your cleaning protocol effectiveness and infection control measures with AccuPoint HC

- ATP (adenosine triphosphate): cellular matter found in organic substances
- Residual ATP: the industry standard for cleanliness monitoring
- The cleaner the surface, the less ATP is found
- AccuPoint HC provides unbiased, reliable and accurate test results
- Documentation provided by AccuPoint HC supports your infection control measures

UV light disinfectants

EVSSL001

Solaris eliminates pathogens from high-touch surfaces rapidly and reliably

- High pulsed UV flash rate for increased efficacy
- Engineered reflector targets high-touch areas where pathogens hide
- Simple 3 and 5-minute cycles are 15–40% faster than competitors
- IoT-enabled data collection and system diagnosis

Solaris is engineered for ease of use and built to last

- Robust outer shell designed with hospital operations in mind
- 360-degree rotation for whole room coverage
- Subscription programs provide service and maintenance for one convenient monthly fee

Textiles

Maximizing your budget while enhancing care

The ideal bed

Our recommended product mix for a standard healthcare bed that gives you the "biggest bang" for your budget dollars while enhancing patient care.

1 **MedSoft® pillows**
These fluffy pillows feature soft vinyl ticking that is antimicrobial-treated to protect the product; and hypoallergenic and fluid proof. Designed for maximum patient comfort and safety. This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms. **MDT219683** (pg. 110)

2 **Percal pillowcases**
Comfort and durability in one affordable package, this pillowcase is made from a premium 55% cotton/45% polyester blend that is soft to the touch, but long-wearing and wrinkle-resistant. **MDTPC4P34** (pg. 111)

3 **Soft-Fit® knitted contour sheets**
Super soft Soft-Fit sheets move with the patient to provide exceptional comfort. Wrinkle resistant fabric stretches to fit a wide range of bed sizes. **MDTNC4J15** (pg.113)

4 **Quick Dry reusable underpad**
Dries to the touch in minutes. Performs like a high-end disposable underpad but features the sustainability and cost benefits of a reusable. **MDTIU8SEFBLU** (pg. 115)

5 **Muslin flat sheets**
Constructed from a durable blend of 55% cotton/45% polyester, these quality sheets are designed to easily fit within any budget. **MDTFS4M04** (page 111)

6 **Herringbone blankets**
Available in a variety of colors to fit any décor, this blanket is highly durable, yet light weight at 3.0 lbs. Soft and comfortable, our Herringbone spread retains body heat effectively because of its tight weave construction. **MDTSB4B30CAP** (page 114)

7 **Suede Touch quilt**
Adds warmth
MITQSQPEAT (page 138)

Pillows

MDT219683

Medsoft pillows

- Soft, vinyl ticking is inherently flame resistant, antistatic and fluid-resistant
- This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms
- Indicated items are vacuum-packed, which results in smaller cartons for delivery and storage
- Please allow 4 hours for vacuum-packed pillows to fully expand

Mattress encasements and covers

What is the difference between covers and encasements?

Covers

- Fits like a traditional contour sheet to protect top of mattress
- Easy application and removal for cleaning
- Ideal for beds with higher patient/resident change over
- Protects mattress from wetness and staining
- Processes easily in a regular commercial-style machine or an industrial laundry

Encasements

- Envelopes entire mattress in protection with zip closure and lock
- Ideal for long-term residents
- Allergen-blocking and bed bug protection, as well as water resistant to prevent wetness and staining
- Processes easily in a regular commercial-style machine (not intended for industrial laundry)

MDT219403

Roller shades

Modern designs to manage light, privacy and energy efficiency

Easy
to clean

Smart design on a roll

Roller shades complement any décor, combining upscale design with low maintenance. They're a simple way to elevate the look of your space while delivering a major impact on comfort and energy efficiency.

Control your environment

Manage the sun's heat and light with interior solar shade fabrics. Choose from a wide selection to help protect your furnishings from UV damage and improve patient and staff experience by reducing glare.

Manage privacy

Tighter fabric weave shades keep light out and provide greater privacy for patient and exam rooms, offices and meeting rooms. Our dual shades offer a sunscreen fabric shade and blackout shade, on the same window.

Elevate energy efficiency

Roller shades help conserve energy year-round. In the winter, they keep heat from escaping, while in the summer, they help control the heat coming into your facility. They also allow for more natural light further reducing energy use.

From the finest fabrics to uniquely engineered mechanicals and comprehensive design consultation, we have you covered.

Let us manage your project from start to finish

From design consultation through implementation, our on-staff experts can manage your project every step of the way.

Sheerweave 7500 blackout fabric specifications

Openness Factor:	0% (opaque)
UV Blockage:	100%
Composition:	100% polyester with acrylic coating (PVC-free)
Mesh Weight:	11.8 oz./yd ²
Fabric Thickness:	.013 in
Breaking Strength (lb/in):	160 warp/167 fill
Fire Classification:	California U.S. Title 19 (small scale) and NFPA 701-2004 TM#1 (small scale)

Bacteria and Fungal Resistance*: ASTM-E2180 and ASTM-G21
 This product is treated with an antimicrobial agent built in to protect the product. This product does not protect users or others against bacteria, viruses, germs or other disease organisms. Colors may vary slightly from swatch samples. All variations are within industry standards.

Reference guide

Glossary of terms

Terms commonly used by environmental services professionals

A

Active Ingredient

Chemical component of a cleaner that deactivates, reduces or destroys microorganisms. Phenols and quaternary ammonium compounds (quats) are typical ingredients in disinfectants. PCMX, CHG and quats are common active ingredients in hand cleaners.

Adenovirus

A virus that causes acute respiratory infections.

AIDS

Abbreviation for Acquired Immunodeficiency Syndrome, a disease caused by the Human Immunodeficiency Virus (HIV).

Alcohol

A skin antiseptic and disinfectant for clinical surfaces and equipment. Alcohol evaporates rapidly and can dry and irritate skin. Organic materials inactivate alcohol and is often used to reduce kill times.

Antibacterial

A chemical substance that kills bacteria that can cause risks to public health.

Antibiotic

A chemical substance that is produced by microorganisms and has the ability to kill or inhibit the growth of other microorganisms.

Antimicrobial

Substances or mixtures of substances used to destroy or suppress the growth of harmful microorganisms such as bacteria, viruses, or fungi on inanimate objects and surfaces.

Antiseptic

A chemical substance that kills or inhibits growth and reproduction of microorganisms in or on humans or animals. Antiseptics are drugs applied topically to the skin to help prevent infection and cross contamination.

ATP

Abbreviation for adenosine triphosphate, a substance found in all living cells, including skin, bodily fluids and microbes.

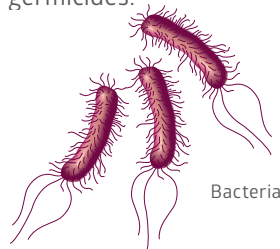

B

Bacteria

Single-cell microorganisms that are members of the plant kingdom. Pathogenic bacteria are capable of producing infections and are sometimes referred to as "germs" or "microbes." They multiply by the division of a single cell into two bacterial cells.

Bactericide/cidal

A chemical that kills or destroys bacteria, also known as germicides.

Biodegradable

A substance that decomposes from bacteria or natural environmental factors.

Biofilm

A dynamic, self-organized accumulation of microorganisms and environmental by-products immobilized on a substrate and embedded in an organic polymer mix.

Bleach

Another name for Sodium Hypochlorite (NaOCl), a low-cost oxidizer that is effective in the decontamination of blood or other potentially infectious materials. Bleach has a high level of activity against both gram-positive and gram-negative bacteria. It is corrosive to metal. Organic matter inactivates bleach, and it is relatively unstable when diluted with a very short shelf life.

Blood-Borne Pathogens (BBP)

Pathogenic organisms that are transmitted via human blood and can cause diseases in humans. They include viruses such as Hepatitis B and HIV-1.

Broad Spectrum Disinfectant

A disinfectant that is effective against both gram-positive and gram-negative bacteria (*Staphylococcus aureus* and *Salmonella enterica*) is considered to be a general or broad spectrum disinfectant.

C**Carrier**

An individual harboring a specific strain of microorganisms, capable of disseminating it throughout the environment. A carrier might not exhibit symptoms of infections but may merely be a transporter of pathogenic strains.

CFUs

Abbreviation for Colony Forming Units, a measure of the number of microbes capable of growing into its own colony.

Chain of Infection

The methods and intermediate vehicles by which microorganisms and diseases can be transferred between individuals.

CHG

Abbreviation for chlorhexidine gluconate, the ingredient commonly used in hand care products. It has a broad spectrum of activity on fungi, viruses and bacteria and is not diminished by blood or other organic material. The unique attribute of CHG is persistence, which is desirable when there is a high risk of infection and where a sustained and high-level reduction in microbial flora is desired, such as during surgery.

Chlorine

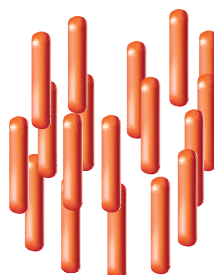

Powerful oxidizing agent often used as a germicide.

Cidal

A toxic property of some chemicals by which living matter can be destroyed. This term is usually used in combination with a specific prefix by which the cidal activity is defined, such as virucidal, bactericidal, etc.

***Clostridium difficile* (C. diff.)**

A spore forming bacterium found in the intestines causing a variety of symptoms, from diarrhea to more life-threatening intestinal disease. *C. diff* is found in feces and can be transmitted by hands to surfaces such as bedding, toilets, light switches and grab bars. People can become infected if they touch contaminated surfaces or items and then touch their mouths or mucous membranes.

Clostridium difficile
(*C. diff.*)

Communicable

Refers to a disease or infection that may be transmitted from one person to another by various means. Synonymous with transferable or contagious.

Contact Time

The published time that a disinfectant or sanitizing chemical must remain wet on the surface being treated in order to achieve label claims. These chemicals are killing germs only when wet.

Contagious

The state whereby a disease or infection may be transmitted or spread from one person to another. Also refers to a microorganism that is capable of causing a communicable disease.

Contamination

A condition of being soiled.

Cross-Contamination

The act of transmitting an infection from one infected person or surface to another. Also refers to becoming infected by a microorganism picked up through contact with a surface or air that has been contaminated with pathogenic microorganisms.

D

Daily Clean

Process of an EVS worker cleaning the room and restroom that is occupied or recently vacated to reduce risks of transmitting germs.

Decontaminate

To remove pathogenic and undesirable microorganisms or soil from surfaces by chemical or physical means. Renders medical instruments, devices or environmental surfaces safe for handling but not necessarily safe for patient reuse.

Detergent

A chemical used for cleaning surfaces. Detergents may possess surface wetting, soil emulsification, soil dispersion or soil suspending properties. These cleaning agents by themselves are not antimicrobial; however dispersing and removing soil and organic material from surfaces allows a disinfectant to reach and destroy microbes beneath the dirt.

Disease

An impairment of body health, such as an illness or sickness. An "infectious disease" is caused by pathogenic microorganisms. A "contagious disease" is transmitted by contact with an infected person.

Disinfectant

A substance or mixture of substances that destroys or irreversibly inactivates bacteria, fungi and viruses, but not necessarily bacterial spores, in the inanimate environment. A healthcare grade disinfectant should kill 99.9999+% (6-log reduction) of specific pathogens.

Disinfectant Claims

Statements made by disinfectant manufacturers, claiming the control or destruction of specific germs. These claims are tested, typically by independent laboratories, and submitted to the EPA and approved for use on the label prior to production.

Disinfecting

Process by which pathogens are destroyed permanently. In healthcare, the expectation is a 6-log (99.9999+% of specific pathogens). There is no such thing as a 100% kill rate for a disinfectant.

Doodlebug®

Rectangle scrubber pad and handle used for cleaning baseboards, corners and edges during floor stripping and general scrubbing.

Doodlebug,
see item EVSPAD116 and
item EVSPAD4 on pg. 32

Dwell Time

Maximum time it takes for any disinfectant to properly kill germs, also known as kill time.

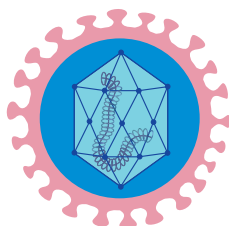

E

Efficacy

Effectiveness of the product. A list of microorganisms that are destroyed or reduced when the disinfectant is used in accordance with label directions.

Enveloped Virus

A virus with a viral envelope derived from proteins and covering the capsid (shell). Viral envelopes help viruses enter host cells. The lipid bilayer envelope of these viruses is relatively sensitive to dry environments, heat and detergents, making them easier to kill than non-enveloped viruses. They have limited survival outside host environments and typically must transfer directly from host to host.

Enveloped
Virus

EPA

Abbreviation for the Environmental Protection Agency of the US Government.

Epidemic

Outbreak of disease. Occurs quickly and involves a large number of individuals at the same time.

F

Flash point

The temperature at which a chemical will ignite in the presence of a spark or flame.

Fungicide

A substance or mixture of substances intended to destroy fungi (including yeasts) and/or fungal spores.

G

General Disinfectant

Disinfectant that is labeled for usage against both gram-positive and gram-negative bacteria. Efficacy demonstrated against both *Salmonella choleraesuis* and *Staphylococcus aureus* bacteria.

General Purpose Cleaner

More aggressive than a neutral cleaner, often used as a scrub and recoat cleaner or spot cleaner for tougher stains.

Germ

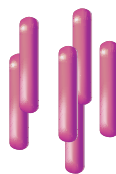

A microorganism that usually causes some type of disease.

Germicide

A germicide is a substance or mixtures of substances that kill a number of microorganisms (e.g., viruses, fungi and bacteria).

Gram-Negative Bacteria

Bacteria that respond to a dye test (cannot retain the dye). Gram-negative bacteria differ from other bacteria due to the structure of the outer membrane. The outer membrane is comprised of complex lipopolysaccharide with a liquid portion that acts as an endotoxin—the body recognizes this as a toxin and causes a rise in temperature. The outer membrane protects the bacteria from several antibiotics, dyes and detergents that would normally damage the inner membrane or cell wall. Once these bacteria enter the blood stream, they destroy tissues at a very rapid pace. This might cause depression, weakness, cold, dehydration, upset stomach, diarrhea, pneumonia, infections in the blood stream and urine passing. Gram-negative bacteria survive in moist areas.

Gram-Negative
Bacteria

Gram-Positive Bacteria

Bacteria with a thick outer cell wall and defined by response to a dye test. Gram-positive bacteria lack the outer membrane found in gram-negative bacteria. These bacteria are especially deadly. Gram-positive bacteria survive in dry areas.

Gram-Positive
Bacteria

H

HAC

Abbreviation for Hospital Acquired Conditions.

HCAHPS

Pronounced "H-Caps," this is the abbreviation for Hospital Consumer Assessment of Healthcare Providers and Systems, a patient satisfaction survey required by the Centers for Medicare and Medicaid Services (CMS) for adult inpatients.

Hepatitis A (HeAdSHAVE)

The virus that causes Hepatitis A, a highly contagious infection of the liver. HAV is found in feces and is usually contracted through poor personal hygiene or consumption of contaminated water, ice, fruits, vegetables or shellfish. Diapered children in day care centers can be at special risk. Hepatitis A can be prevented by an effective vaccine.

Hepatitis B (HBV)

The virus that causes Hepatitis B, which affects the liver and can lead to cancer and death. HBV is 100% more contagious than HIV, the virus that causes AIDS. Once contracted, there is no cure. Hepatitis B can be prevented by vaccine.

Hepatitis C (HCV)

The virus that causes Hepatitis C. This form of hepatitis is most frequently transmitted by large or repeated contact with blood or blood products, and can lead to liver cancer and death. At this time, there is no vaccine against Hepatitis C.

Herpes Simplex

The virus that causes infectious mononucleosis and cold sores.

High Density (highD)

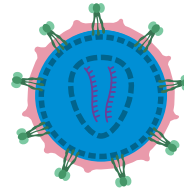

Refers to trash liners for light, non-sharp trash, such as paper, wrappers, cups and facial tissue. Measured in microns (mic).

High-Level Disinfection

The complete elimination of all microorganisms in or on a surface, except for a small number of bacterial spores. The FDA definition of a high-level disinfectant is a sterilant used for a shorter contact time to achieve a 6-log₁₀ kill of an appropriate mycobacterium species.

HIV

Abbreviation for Human Immunodeficiency Virus, a virus that causes Acquired Immunodeficiency Syndrome (AIDS).

HIV Virus

Hospital-Grade Disinfectant

A disinfectant's with demonstrated efficacy against *Salmonella choleraesuis*, *Staphylococcus aureus* and *Pseudomonas aeruginosa* bacteria. These disinfectants are labeled for use in hospitals, clinics, dental offices or any other healthcare facility.

Host

Any organism—human, animal or plant—that acts as a growth site for parasitic microorganisms.

Hydrogen Peroxide

Active Ingredient used in different bactericidal, tuberculocidal, virucidal, fungicidal disinfectants that can be used on non-critical items. Should not be used for cleaning wounds because it slows healing. Peroxide can slightly decompose brass, copper, zinc and mild steel. Some disinfectants can remove the gloss seal from toilet seats as well.

Immune Being

Protected against infectious organisms or allergic conditions by a system involving antibodies.

Inert Ingredients

Components—solvent, carrier, or surfactant—of an antimicrobial product that are not active in destroying target organisms.

Infection

Invasion of the body by a microorganism that can reproduce, multiply and cause disease.

Influenza

Diseases caused by a lipophilic virus. Influenza is one of the most common forms of the flu. It leads to inflammation of the respiratory tract and causes fever, chills and muscular pain.

Iodophors

Used for hand washing and as a skin antiseptic. Kills a broad spectrum of organisms with quick disinfectant and detergent action. Iodophors are inactivated by organic materials, are not sporicidal and are not suitable for hard surface disinfecting.

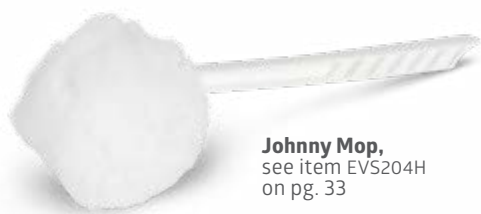

IP / ICP

Abbreviations for Infection Prevention and Infection Control and Prevention.

J

Johnny Mop

A combination toilet brush and mop.

Johnny Mop,
see item EVS204H
on pg. 33

K

Kill Time

Maximum time it takes for a disinfectant to properly kill the pathogens specified on the product label.

L

Lethal

Capable of causing death.

Log Reduction

The logarithmic count of a pathogen reduction. Simply calculated as the "number of 9s", a log reduction of 5 equals a 99.999% reduction in pathogens. A non-food contact surface sanitizer reduces bacterial contamination by 99.9% (log3 reduction within 5 minutes). Hospital disinfectant require 99.9999% reduction(log6 reduction) of *Staphylococcus aureus*, *Salmonella enterica* and *Pseudomonas aeruginosa*.

Low Density (lowD)

Refers to trash liners for heavier trash, such as food garbage, sharper objects with corners or edges. Measured in MilS.

M

Microbe

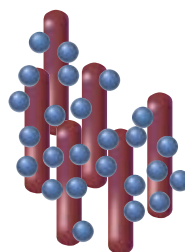

Another word for a microorganism.

Mode of Transmission

Means by which microbes travel from one site to another. Modes include direct and indirect contact, droplet, vehicle, airborne and vector transmission.

MRSA

Abbreviation for Methicillin-Resistant *Staphylococcus aureus*. The infection often begins as a painful skin boil. It is spread by skin-to-skin contact. It can spread to and effect vital organs if not treated quickly. Pronounced by spelling out the four letters M-R-S-A.

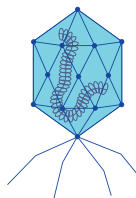

Methicillin-Resistant
Staphylococcus

N

Non-Enveloped Virus

Viruses that lack protein envelopes. The capsids are solely responsible for attachment of the virus to the to-be-infected cell. They are much harder to kill than enveloped viruses, since their cell walls are more durable.

Non-Enveloped
Virus

Non-Pathogenic

Microorganisms that do not cause disease.

Nonionic Detergent

A type of chemical that possesses surfactant properties, including surface wetting, soil dispersion, etc. Does not ionize with positive or negative charges. Is compatible in mixtures with either cationic or anionic surfactants. Is not compatible with phenolic germicides. Does not react with positive or negative charge. Is compatible in mixtures with either cationic or anionic surfactants.

P

Pathogenic

Disease producing.

Phenol

Active ingredient used in disinfectants. Provides broad spectrum of organism kill. Cannot be used on semi-critical items or on bassinets and incubators. Phenols can leave a buildup of film on surfaces and can cause severe skin irritation and discoloration.

Portal of Entry

A location or method by which a pathogen enters a new host. Typical portals include mouth, nose, eyes, mucus membranes and wounds.

Q

Quat

Abbreviation for a chemical that contains a quaternary ammonium compound.

Quaternary Ammonium Compounds (Quats)

Active ingredient used in disinfectants products. Advantages: less irritating to the skin, good cleaning properties, does not form a buildup, remains active in hard water and kills a broad spectrum of organisms.

Quick-Change Handle

Traditional loop mop handle with an arm that locks in place.

Quick-Change Handle,
see item EVST00L121P
on pg. 30

R

Recommended Use Dilution

The published rate at which antimicrobial products must be mixed with water to be effective against specific germs.

RTU

Abbreviation for Ready To Use.

S

Sanitize

Reduce of the bacterial population in the inanimate environment by significant numbers, (e.g., 3 log₁₀ reduction or more), but does not destroy or eliminate all bacteria.

Sanitizer

Products used to reduce, but not necessarily eliminate, microorganisms from the inanimate environment to levels considered safe as determined by public health codes or regulations.

Scrub and Recoat

Process of removing embedded dirt and soil from floors without stripping. Scrubbing, also known as deep scrubbing or top scrubbing, removes one to two coats of floor finish with embedded dirt, delaying the need for floor stripping. Scrubbing is recommended when the floor no longer responds to burnishing or spray buffing. Use a slow speed machine or an auto-scrubber combined with a general purpose cleaner or heavy-duty floor cleaner/degreaser.

Scrubber

Walk-behind or ride-on machines with large disc pads for maximum coverage that rotate at 175 revolutions per minute (RPMs), typically used for scrubbing and maintaining floor surfaces.

SDS

Abbreviation for Safety Data Sheet. A form required by law to describe hazardous ingredients and handling risks for chemical products. Previously known under old regulations as an MSDS, for Material Safety Data Sheet.

Semi-Critical Use

Refers to items that touch mucous membranes. Requires high-level disinfection, such as glutaraldehyde.

Shelf Life

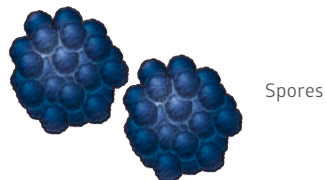

Length of time an undiluted product can remain active and effective. Light, temperature, organic matter and metals can affect chemical stability.

Soap

A natural cleaning agent produced by the reaction of a fat and an alkali.

Spore

Structure formed by certain microorganisms that enhances their resistance to heat and chemical disinfectants. Bacteria turns into a spore when conditions become unfavorable as a mechanism to survive. The most common example is a *C. Diff* spore.

Sporicide

A substance or mixture of substances intended to irreversibly inactivate bacterial spores in the inanimate environment.

Stability

The ability of an antimicrobial product to remain unchanged during storage.

Standard Precautions

Infection control techniques that healthcare workers are required to practice when exposed to blood or body fluids.

Sterile

Free of living organisms.

Sterilization

Any process or treatment that destroys or removes all microbial life, including bacteria spores. Methods commonly used are dry or wet heat and/or liquid or gaseous chemical sterilants.

Sterilant

A substance or mixture of substances intended to destroy or eliminate all forms of microbial life in the inanimate environment, including all forms of vegetative bacteria, bacterial spores, fungi, fungal spores, and viruses.

Stripping

Process of removing finish from a floor surface with a stripping chemical and swing machine.

Surfactant

Agent that reduces the surface tension of water or the tension at the interface between water and another liquid. Also called Wetting Agents, surfactants can be found in many antimicrobial products.

Susceptible Host

Any organism (human, animal or plant) with weakened body defenses that allow a pathogen to enter and produce a reaction.

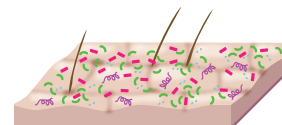

Swing Machine

Oscillating floor machine that spins at 175 revolutions per minute (RPMs), typically used for stripping or scrubbing hard floor surfaces.

T

Transient Flora

Microbes that live on the outer layer of the skin and typically can survive no more than 24 hours. Typically picked up through direct or indirect contact and usually easily removed by hand washing.

Transient Flora

Tuberculocide

A substance or mixture of substances that destroys or irreversibly inactivates tubercle bacilli (e.g. *Mycobacterium*) in the inanimate environment. Tuberculocidal claims are an indicator of product strength, because tuberculosis bacteria are more difficult to kill than most other microorganisms, although tuberculosis is not contracted from environmental surfaces, clothing, drinking glasses, eating utensils, cell phones, handshakes, toilets, etc. It is commonly spread through someone breathing in air that has TB discharged into it from someone who has TB and has coughed, spoken or sung.

V

Vaccinia Virus

Lipophilic virus, representative of the Pox viruses (i.e. Smallpox).

Vegetative State

Refers to bacteria or microorganisms that can grow and reproduce in areas with soil filled with nutrients and moisture. When nutrients and moisture are depleted, some bacteria, such as *Clostridium*, produce an endospore inside each vegetative cell. When the active bacteria no longer have nutrients or moisture, they release spores (endospores). Spores can remain viable for long periods. When the right conditions return for growth, the spore creates a vegetative cell and the bacteria becomes active again.

Virucide

A substance or mixture of substances that destroys or irreversibly inactivates viruses in the inanimate environment.

Virulence

Power of a microorganism to produce disease.

Best housekeeper habits

At all times:

Protect yourself

- **Block germs**—wear gloves, especially when cleaning toilets
- **Leave sharps alone**—if you find a needle, ask a member of the nursing staff to remove it
- **Use caution with chemicals**—don't let any near your eyes or face
- **Don't hurt your back**—ask for help when lifting any heavy object
- **Avoid falls**—Never stand on a chair or toilet

Prevent cross-contamination

- Each room should get a fresh rag
- Never use a rag that touched a toilet anywhere else

Remember your manners

- Be friendly and welcoming
- Avoid making too much noise

At the start of each day:

Fill bottles and buckets with premixed chemicals

If any are empty, ask your supervisor to mix them for you.

- All-purpose cleaners
- Window cleaners

Quick tip

Make sure your cart has everything you'll need—broom/dust pan, mop, rags, gloves, paper products, trash bags, etc.

Cleaning guide for patient rooms

1 Prepare to enter the room

- Perform proper hand hygiene.
- Put on protective apparel such as gloves. Before going into isolation rooms, put on additional personal protective equipment.
- Announce your presence before entering the room.

Product recommended: CRI4000

2 Enter the room

- Survey the room for anything that doesn't belong. If you find something, contact the nursing staff about removing it.
- Inspect the privacy curtains. If the room was just used for isolation, or if the curtain is visibly soiled, contact the manager to arrange for cubicle curtain replacement.

Product recommended: MIT6DSEREN (Snap panel curtain)

3 Dispose of waste

- Remove soiled linens.
- Keep hazardous waste separate (i.e., soiled linen, infectious waste, infectious linens).
- Dispose of liners, making sure to close, twist, and tie a knot in the liner while it's still in the trash can. (**NOTE:** Watch out for sharp objects. Never put your hand into the bag or push on it.)

Product recommended: NON022938 (soiled linen liner) and other Medline trash liners

4 Dust the room

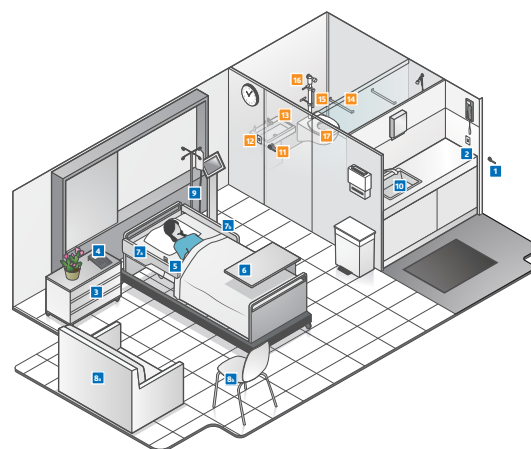

- Remove gloves, apply hand hygiene and put on new gloves.
- Start dusting near patient bed and then move outwards (do not dust in occupied ICU/CCU patient rooms).

Product recommended: MDT217750 (Microfiber overhead duster)

5 Wipe high-touch surfaces

- First remove soils and residue with a microfiber cloth or one-step germicide.
- Then apply disposable disinfectant wipes. Use a new wipe for each surface to avoid cross contamination. If a surface starts to dry before the contact time (printed on the disinfectant), apply more product until the correct amount of time has passed.
- For rooms used for isolation, ask the nursing staff if additional cleaning is needed. To kill *Clostridium difficile* (*C. diff.*), a bleach or peracetic acid disinfectant or wipe is needed.

Products recommended: MSC351300 (Micro-Kill One) and MSC351400A (Micro-Kill Bleach)

6 Begin cleaning the bathroom

- Clean the mirror.
- Disinfect the rest of the bathroom, including: toilet bowl, flushers and seat, sink and countertops, shower, hand rails, and fixtures.
- For tougher stains, use heavy-duty products, such as a more acidic toilet bowl cleaner, foaming acid shower cleaner, or a crème cleanser for soap scum, scale and rust.
- To remove stains and odors from urine, an odor digester/eliminator is recommended.
- Refill soap and lotion dispensers and wipe the outside of these containers.

Products recommended: EVSCHEM420 (toilet bowl cleaner), EVSCHEM410 (crème cleanser), EVSCHEM480 (odor digester/ Eliminator), EVSCHEM100 (disinfectant), and EVSCHEM200 (glass cleaner)

7 Sweep and mop the entire floor

- Work from the furthest corner to the entrance.
- Sweep the floor.
- Mop using a disinfectant or neutral floor cleaner.
- Change the solution every three rooms. For heavier soils, use a general purpose cleaner.

Product recommended: EVSCHEM210 (neutral floor cleaner) and MICROINSKIT1 (Microfiber starter kit)

8 At the end of the day

- Clean the cleaning tools.
- Remove mop heads and cloths to be washed.
- Wipe down spray bottles.
- Clean the mop and cart handles.
- Dispose of trash in the proper bins.
- Dispose of gloves and wash hands.

Product recommended: EVSCHEM230

High-touch surfaces

Disinfect high-touch areas

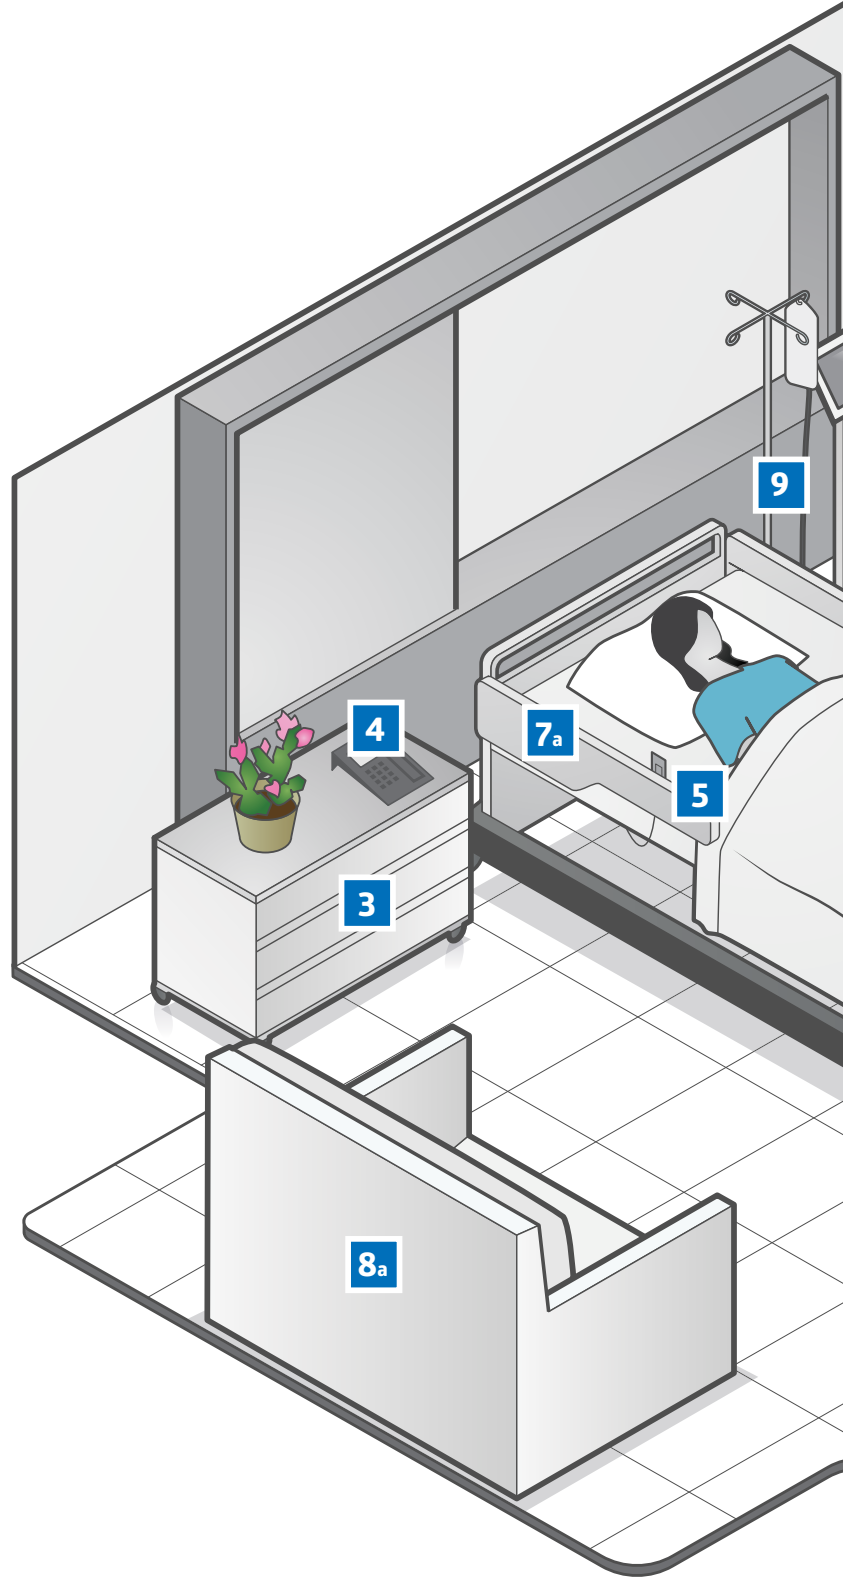

Avoid cross-contamination by disinfecting with antimicrobial wipes using the numbered order below. It is recommended that you use one wipe for one application per surface to prevent cross-contamination.

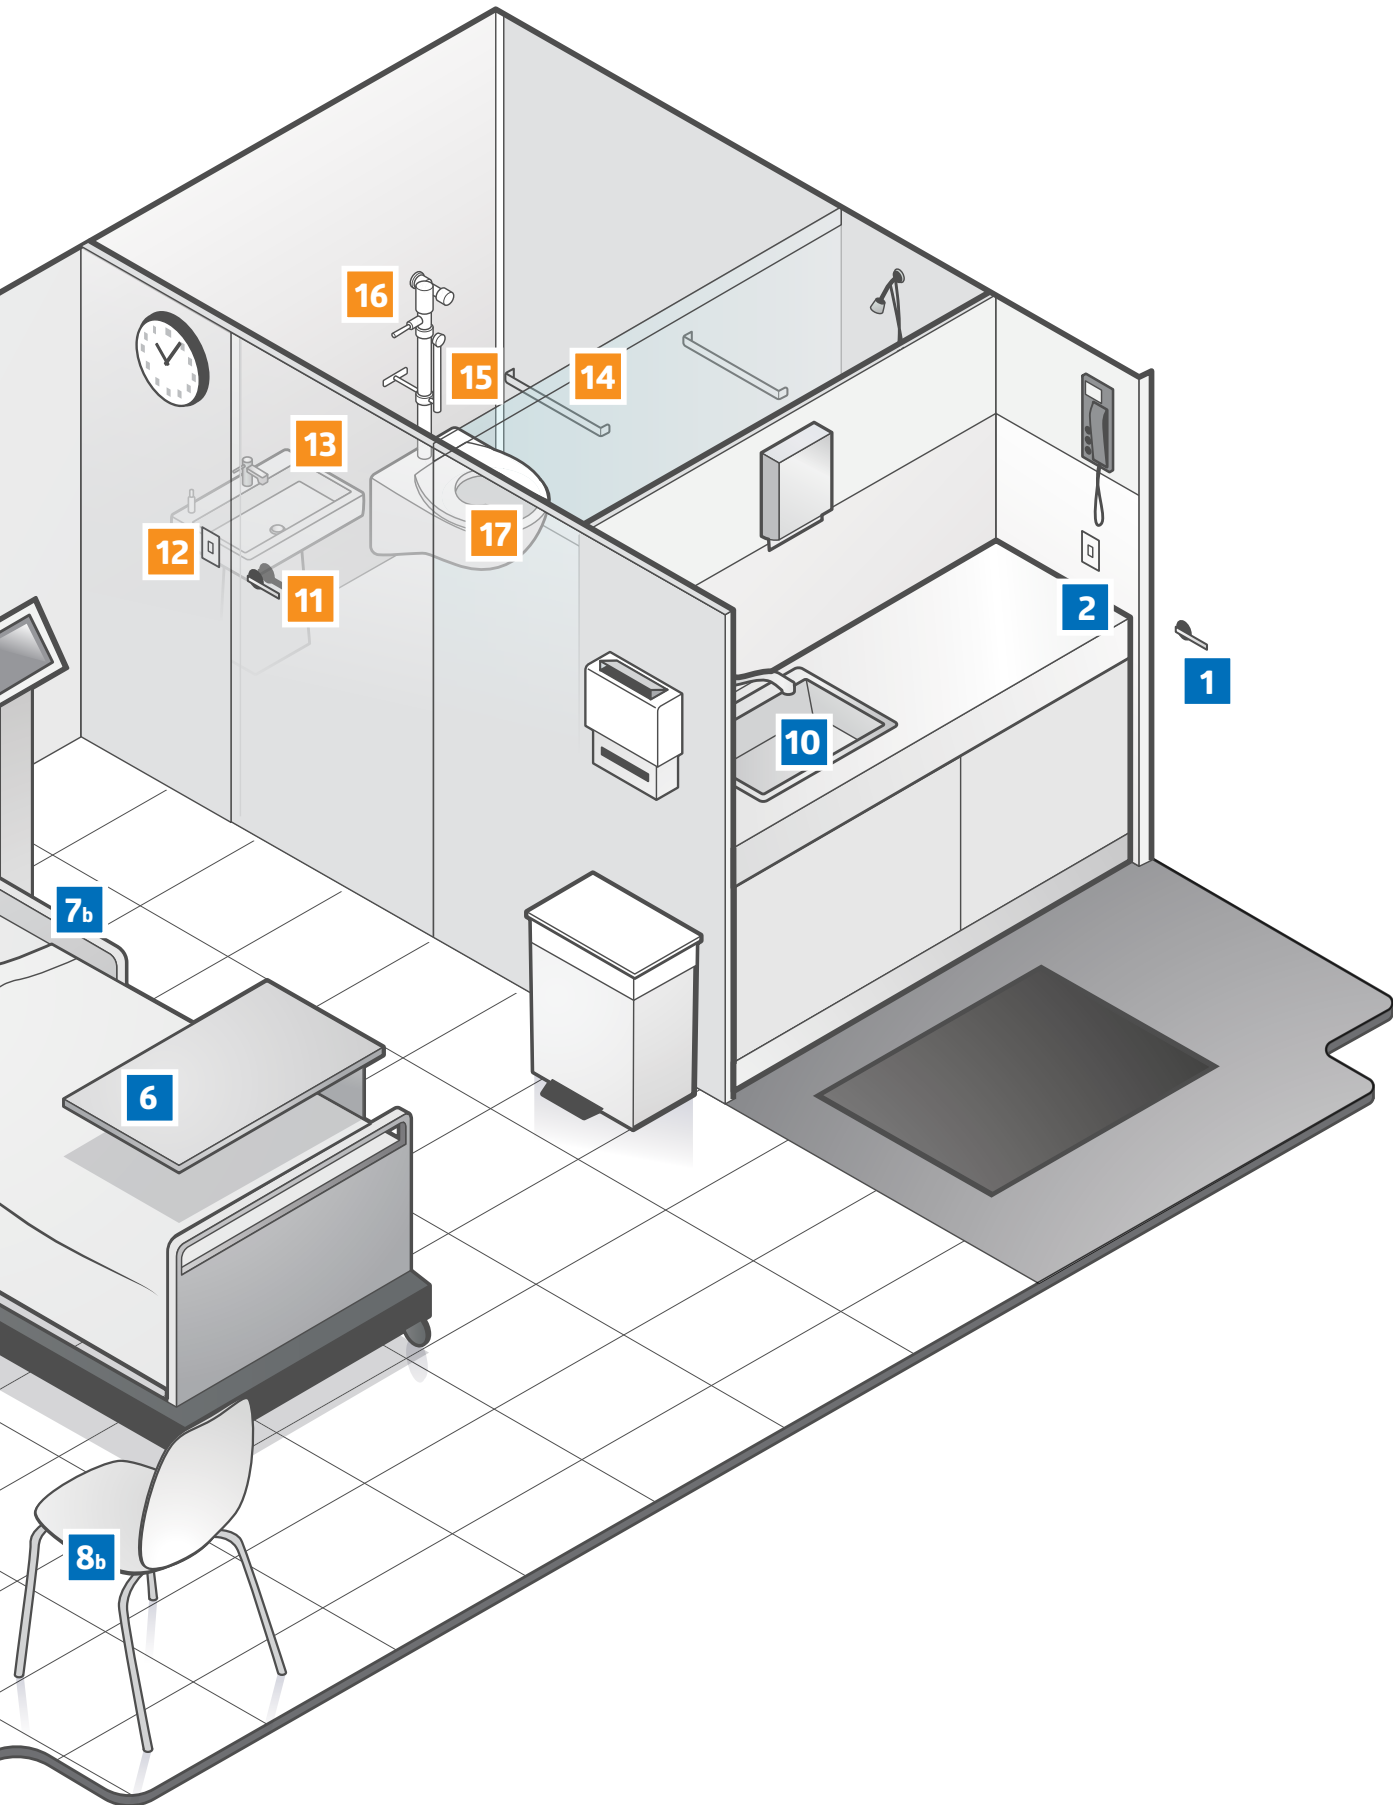

Resident room

1. Door knob
2. Light switch
3. Bedside table handles
4. Phone
5. Call button
6. Tray table
- 7a. Left bed rails
- 7b. Right bed rails
- 8a. Chair
- 8b. Chair
9. IV pole
10. Room sink

Restroom

11. Door knob
12. Light switch
13. Restroom sink
14. Handrails
15. Bedpan cleaner
16. Toilet flush handle
17. Toilet seat

Checklist for new facility

Lobby area/foyers

- Scraper mats** (Exterior) Pg. 35–38

The EVS struggle is real

Proper cleaning and disinfection are critical to keeping patients safe from infection. But Environmental Services (EVS) managers and staff deal with tough issues on a daily basis that create roadblocks to doing their job effectively. Topping the list of concerns: pressure to speed up room turns, unclear responsibility for who cleans mobile objects, high staff turnover, no standard cleaning practice, and lack of knowledge about the role the environment plays in cross contamination and transmission.

Tracking the problem

Clear-cut guidelines on how to solve surface contamination don't exist. That's why we've worked with experts nationwide to develop a comprehensive cleaning and disinfecting program. It combines process with evidence-based products and education to help prevent the spread of HAIs.

Clean like lives depend on it

Contact your Medline representative to request a free discovery assessment.

Empower EVS staff with the right tools and training to help prevent HAIs.
