

INTERNATIONAL SUPPORT GUIDE

Welcome

Thank you for choosing Verizon Wireless. You've just put the world in the palm of your hand. This International Support Guide includes general information on how to make calls and data connections while traveling outside the US, as well as how to reach Customer Service and access websites.

To get the full benefits of traveling outside the U.S. with your World Device, you must subscribe to an international plan. If you need customer support while in the U.S., please dial *611 from your Verizon Wireless device, or 1-800-922-0204 from any phone. See the section below for **International Customer Support** if you are outside the U.S.

For information on international plans, rates and capabilities and for a current list of destinations and rates, visit vzw.com/international.

Basics

Prepare and Gather Information Prior to Your Trip Outside the US

- 1. Go to Verizon Wireless Trip Planner at vzw.com/tripplanner. Find what you need to know before you travel based on pricing options, coverage, trip duration, and your device. Don't forget to print out the results to take with you!
- 2. Perform a International Ready Check On your Smartphone:
 - · Open My Verizon Mobile.
 - · Select Device Tab on the top of the screen.
 - · Select International Ready Check.
 - · Enter your destination.
 - · Select verify your device hardware.
 - Follow the on Screen prompts to confirm if your device is a World Device, whether you have an International data plan, and to check device settings.

OR

 Select an International Plan or confirm existing services through My Verizon at www.vzw.com/myverizon or calling Customer Service at *611 from your Verizon Wireless Device, or by dialing 1-800-922-0204 from any phone, while in the U.S.

Connecting to an International Network

Verizon Wireless offers services outside of the U.S. on CDMA, GSM and LTE networks* through roaming partners. The international plan you have subscribed to allows your device to access these networks while traveling outside of the U.S.

Your World Device is set to Global/International Mode by default, allowing your phone to automatically choose an international network when you are traveling outside the US. If you need to manually choose an international network to recieve service, please refer to the online Device Manual at www.verizonwireless.com/support.

Whether you are on a CDMA, GSM or LTE network, the phone number for your device remains the same.

*The wireless service you receive outside the US is dependent on device/network capabilities.

Wireless Network Coverage Indicators

Typically there are indicators on the device display showing the wireless coverage level and wireless technology for the area in which you are using your World Device. The indicators are different depending on the international network and your device and its operating system.

Making a Call

Important: Customized dialing instructions for your device and location(s) you are traveling to can be found at vzw.com/tripplanner.

While Outside of the US on a GSM or LTE Network

Press 0 or * on the keypad of your device to insert the + symbol. This will automatically insert the exit code for the country from which you are calling.

- 1. Enter the country code of the number you are calling.
- 2. Enter the 10-digit number of the person you are calling.

When calling out of your address book in GSM mode, you generally do not need to add additional digits to a contact number. The phone will automatically add the + sign and, for calls back to the U.S., the country code (1).

While Outside of the US on a CDMA Network

Enter the exit code for the country from which you are calling.

- 1. Enter the country code of the person you are calling.
- 2. Enter the area code/city code, followed by the number of the person you are calling.

North American Numbering Plan Destinations

Please note that some destinations such as Bermuda, Canada, Puerto Rico and the Dominican Republic are on the North American Numbering Plan (country code = 1) and do not require an exit code to make a call or send a text message back to the U.S. (or any other locations in the North American Numbering Plan). However, you might be required to dial 1 before the 10-digit number.

Sending a Text Message When Outside of the US

Refer to the Device Manual for information on how to send a text message.

Using the keypad, enter the contact's phone number as if you were calling it. Include + if you are on a GSM or LTE network. If you are on a CDMA network and sending a text message to a number within the North American Numbering Plan, enter the 10-digit number. If you are sending a text message to a number outside of the North American Numbering Plan, enter 011-country code-number.

International Data Information

You can calculate your data usage to figure out which plan will best meet your needs using our Data Calculator, which can be accessed at vzw.com/datacalculator.

Tip: Use Wi-Fi when available.

Wi-Fi is available in many international airports, hotels and restaurants to browse the Web or check email.

For the most recent information on rates and coverage visit: verizonwireless.com/landingpages/international-travel/

International Customer Support

Verizon Wireless offers 24/7 customer support while you are traveling abroad. If you need toll-free Customer Service assistance or Technical Support for your device:

While on a GSM or LTE Network

• Dial +1-908-559-4899.

While on a CDMA Network

- Dial the exit code for the country from which you are calling.
- Dial 1-908-559-4899.

International Support Toll Free Numbers

If your device is lost, stolen, broken, or you experience a device issue while you are traveling outside the US, please use the Toll-Free number below, for the country you are in to reach the International Support Team from a landline phone. If there is not a Toll-Free number for the country you are in, you can reach the International Support team from a landline by dialing dial 908-559-4899, toll charges will apply.

Calling from a Hotel?

Ask the hotel operator about hotel-added surcharges and how to dial from your room. Many hotels do not assess charges when you use a toll-free number.

NOTE: In some locations, public phones require coins or phone cards to get a dial tone.
