TABLE OF CONTENTS

4 USB Digital-Audio Converters

- DragonFlys
- JitterBug FMJ
- USB Extenders and Adaptors

6 AC Power

- PowerQuest Power Conditioners
- Niagara Power Conditioners
- AC Power Cables
 - NRG Series
 - Wind Series
 - Storm Series
- Accessories

13 Speaker Cables

- Q2 and Type Series
- Rocket Series
- Folk Heroes
 - Robin Hood
 - William Tell
- Mythical Creatures
 - ThunderBird
 - FireBird
 - Dragon
- Accessories

24 Analog-Audio Interconnect Cables

- Bridges & Falls
- Rivers & Elements
- Accessories

28 Subwoofer Cables

29 Tonearm Cables

30 LYRA Reference Phono Cartridges

31 Vinyl and Headphone Accessories

32 HDMI

- HDMI Cables
 - 8K-10K HDMI
 - 4K-8K Long-Distance
 - 8K-10K eARC-Priority
- Accessories

37 Digital-Audio Interconnect Cables

- USB Cables and Accessories
- Optical Cables and Accessories
- Digital Coax Cables and Accessories
- AES/EBU Cables
- Ethernet Cables (RJ/E)

44 Accessories

48 Tools

49 Instant Tool-less Connectors (ITC)

50 Bulk Cables

- In-Wall Rated
- Not-Rated Speaker Cables
- SureGrip® Speaker Connectors
- Spade, Pin, and Banana Connectors
- In-Wall Rated Analog-Audio Bulk Cables
- CAT6 and CAT7 Ethernet Bulk Cables

56 Installer Packs

58 POP and Promotional Items

Returns

- All returns are subject to approval by AudioQuest.
- All returns may be subject to a 20% re-stocking charge.
- Built-to-order products may not be returned.
- All sales are final for custom speaker cables produced at 5 feet or less.
- A Return Merchandise Authorization (RMA) number must be issued by AudioQuest before any product may be returned.
- The RMA number must appear on the outside of the shipping carton, near or on the address label.

AudioQuest: Doing No Harm Since 1980

William (Bill) Low
Founder / CEO

For 40 years now, AudioQuest, headquartered in Irvine, California, has been a leading developer, manufacturer, and distributor of high-performance audio/video products and custom-install solutions. Although best known for our comprehensive range of analog, digital, and AC power cables, our portfolio has expanded to a diverse assortment of products, including the multi-award-winning DragonFly DACs, LYRA phono cartridges, and Niagara and PowerQuest power products.

Our ultimate goal is the same today as it was 40 years ago: Do No Harm! By this we mean that all cables and components, to the extent that is technologically feasible, should get out of the music's way by inducing the least amount of noise and distortion.

The Evolution Continues: The Four Elements Today

While minimizing noise and damage to the audio signal remains the North-Star constant, the ways in which AudioQuest engages these challenges always evolves. While there are still Four Elements that describe our foundational materials and design philosophies, a growing number of technologies cross and even go beyond our original Four Elements. Many have become crucial enough to demand visibility. Noise-Dissipation is an umbrella Element under which many of these meaningful techniques and technologies will reside. While Geometry is no longer identified as one of The Four Elements, it remains inextricably tied to all other Elements of cable design and manufacture.

Solid Conductors: Strand interaction remains the biggest potential source of distortion in cables. Solid Conductors are the aspirational ideal and most complete solution to this problem. However, thoughtfully arranged multi-conductor geometries such as concentric windings are used to create our Semi-Solid Conductor technologies. These avoid many strand-distortion mechanisms and are in their own right ideal in a growing number of applications.

Directionality: All drawn metal conductors have a non-symmetrical, fish-scale-like grain structure. Because the highest Radio Frequencies (RF) are subject to skin effect, traveling on this deformed outer-surface layer of the conductor, there is a resulting increase in RF impedance in one direction versus the other. Since induced RF noise is parasitic (and doesn't travel with the primary signal current), it takes the path of least resistance. At AudioQuest, we test every conductor so it is used in the direction that drains the induced noise away from where it will cause the most harm, optimizing the cable and the system's performance.

Noise-Dissipation: Unwanted Radio-Frequency (RF) noise is and has always been picked up and induced into cable. This contamination ultimately masks and distorts critical portions of the audio/video signal. As this distortion-causing (parasitic) RF signal is more present today than at any previous time in history, we must depend on a wider arsenal of Noise-Dissipation technologies:

- ZERO Tech (No Characteristic Impedance) applies Ultra-Linear Noise-Dissipation across the widest range of frequencies possible. It also enables uncompressed transient current transfer for AC power and loudspeaker/power amplifier applications.
- GND Tech (Ground-Noise Dissipation) cancels induced RF noise via its unique phase-cancelling array.
- Tried-and-true DBS (Dielectric-Bias System) has evolved to include RF-Noise Traps that further reduce dielectric distortion and induced noise.

Metal Quality: Higher-purity conductor metals with smoother surfaces and internal crystal structures greatly reduce noise and distortion. Carefully finessed mixes of metals and conductor sizes can be effectively used to define a cable's Sonic Signature—a cost-effective technique for high-value, high-performance models.

DragonFly

Naturally Beautiful Sound at Your Fingertips—Whenever and Wherever You Want It

With today's smartphones, tablets, and computers, music and videos are far more accessible than ever before.

Unfortunately, the digital-to-analog converters (DACs) inside these devices are highly compromised, even when the sample-rate numbers (24/192, etc.) look impressive. These built-in DACs may make audible sound, but they don't make beautiful music.

A DragonFly bypasses the compromised audio circuitry within these devices to deliver naturally beautiful sound to earbuds, headphones, desktop speakers, or complete audio systems.

Whether using a free streaming service, premium High-Resolution or MQA-encoded streaming (such as Tidal Masters), or playing MP3 files or videos, all DragonFlies make these experiences much more compelling and immersive.

DragonFly Black delivers great performance and value. Red ups the game with more power, more grip, and deeper sonic immersion. Now, DragonFly Cobalt, with its more advanced processor, microcontroller, and RF noise filtering, provides even greater clarity, dynamics, and finesse than previously possible.

DragonFly DAC + Preamp + Headphone Amp

- Plays all music files: MP3 to High-Res and MQA
- Compatible with Apple® and Windows® PCs
- Compatible with iOS devices (requires Apple Lightning to USB 3 Camera Adaptor)
- Compatible with Android devices (requires DragonTail or other USB Adaptor for Android Devices)
- Bit-perfect variable output drives headphones, powered speakers, or power amp
- Fixed output feeds preamp or receiver

	DragonFly Black	DragonFly Red	DragonFly Cobalt
Output	1.2 volts	2.1 volts	
DAC Chip	ESS ES9010 with minimum-phase fast roll-off filter	ESS ES9016 with minimum-phase fast roll-off filter	ESS ES9038Q2M DAC chip with minimum-phase slow roll-off filter for more natural sound
Volume Control	Analog Volume Control	64-Bit Bit-Perfect Digital Volume Control	
Desktop Compatibility	Windows 7 and later; Apple 10.6.8 and later; Linux (no tech support provided)		
Mobile Compatibility	Apple iOS 5 and later; Android 5.0 and later

JitterBug FMJ USB 2.0 Noise Filter (Data & Power)

- Enables more spacious and compelling sound
- Dual Discrete Noise-Dissipation Circuits reduce all forms of internal noise in both the sending and receiving electronics
- Full Metal Jacket (FMJ) with hinged Carbon-Loaded Noise-Dissipation input cover protects against external noise
- Reduces jitter and packet errors
- Use one JitterBug in series with almost any USB DAC, including DragonFlies Black and Red; experiment with DragonFly Cobalt
- For an additional improvement, use a second JitterBug in parallel—always desirable with DragonFly Cobalt

Retail: 59.95

USB Extenders and Adaptors

DragonTail USB Extenders feature 5% Silver Solid Conductors and are Direction-Controlled for reduced RF noise.

DragonTail USB A 2.0 Extender

Female USB A to Male A

Retail: 29.95

DragonTail USB A to Micro Adaptor

Female USB A to Male Micro

Retail: 29.95

DragonTail A to C Adaptor

(included with DragonFly Cobalt)

Retail: 29.95

AC Power Conditioners

Niagara and PowerQuest: Low-Z Power | Noise-Dissipation Systems

Redefining the science of AC power conditioning

What is a power conditioner and why is it necessary?

For some, a power conditioner is merely a device that provides enough outlets for the entire audio/video system while also protecting the connected devices from electrical storms and wiring faults. Yet, for the discriminating listener, many power conditioners can make an audio/video system perform far worse.

Yes, a home or building may have dimming lights or an occasional brown-out, and the utilities' AC sine wave is always far from perfect. However, where incoming power is concerned, there are two reasons an audio/video system does not perform up to its full potential: 1) The current transients that supply the power amplifier are compressed, and 2) The ever-increasing levels of radio-frequency noise are masking (covering up) the system's low-level signal content.

When compared to or measured against either Niagara or PowerQuest, a simple power bar or a dedicated AC wall outlet can lose up to a third of the low-level audio information that contain much of a recording's harmonics, imaging, high frequencies, and bottom-end grip—and once that information is gone, it's gone forever.

AudioQuest's Niagara and PowerQuest technologies are unique amongst all power products—whether they're isolation transformers, AC regenerators, battery back-up, re-clocking devices, or other types. Niagara and PowerQuest filters and Ground-Noise Dissipation work evenly, or linearly, across a far wider range of induced noise frequencies. Additionally, Niagaras 3000, 5000, and 7000 feature Transient Power Correction, which supplies a current reservoir to greatly bolster the performance of any power amplifier.

AC Power Cables

Low-Z | Noise-Dissipation NRG, Wind, and Storm Series

The power cords that are supplied with most audio/video components have many admirable features. They're durable, flexible, small, and they will unfailingly supply the required AC voltage from the utilities' service tap for many years to come. They're also inexpensive.

Unfortunately, these "commodity" power cords were never up to the task of supplying sensitive components with the quality power they need. By this, we mean power that is unrestricted when delivering current transients to a power amplifier. The power cord must not add noise to the audio/video signal via RF (radio-frequency) noise that is induced into, or picked up by, the AV component. The ground lead is the worst offender in this regard, as it has no component power supply to help lessen the damage from the induced RF noise. Typically, the ground noise drains directly towards the component's signal path.

Even with an advanced AC power system like Niagara or PowerQuest, the AC cord is a branch of noise-dissipation system. Like plumbing, the RF noise must be drained away from the circuits upon which it could do harm. Many ask, if my wall wiring is so many yards in length, how can a 6-foot cord possibly matter? It matters for the same reason four square inches of mud and debris can back up a plumbing system or a rain gutter. The drainage or distribution of water currents and noise currents work in the exact same manner. They are one system.

With AudioQuest power cords and our unique technologies such as ZERO Tech (No Characteristic Impedance) and our patented GND (Ground-Noise Dissipation), you will experience greater dynamics, bass grip, extended high frequencies, and the blackest background you've ever heard.

AC Power Cables: NRG Series

NRG-Y and NRG-Z Series cables with the C7 connector feature a three-pronged male plug. Though there is no third ground lead, there are Radio-Frequency shield drain leads that must connect to Earth Ground. This construction is also required for our proprietary ZERO Technology.

Retail: 19.95

IEC>3US Power Strip

Retail: 39.95

Fog Lifters

Place Fog Lifters beneath audio and AC power cables to significantly reduce RF noise coupling, whether with the floor, or due to misdirected efforts to isolate cable with stands or clamps that themselves have too much contact mass and are sources of RF noise.

Set of 8

Retail: 149.95

Speaker Cables

Meticulously Designed to Minimize Noise and Distortion

Do No Harm: The Four Elements Today

AudioQuest's Four Elements are always applied in the most thoughtful, effective ways to offer the best performance for the money—at all price points. While our implementation of these techniques has evolved over the years, our guiding principle remains the same: *Do No Harm*.

Solid Conductors

Strand interaction remains the biggest potential source of distortion in cables. Solid Conductors are the aspirational ideal and most complete solution to this problem. However, thoughtfully arranged multi-conductor geometries such as concentric windings are used to create our Semi-Solid Conductor technologies. These avoid many strand-distortion mechanisms and are in their own right ideal in a growing number of applications.

High-Purity Metal

Higher-purity conductor metals with smoother surfaces and internal crystal structures greatly reduce noise and distortion. Carefully finessed mixes of metals and conductor sizes can be effectively used to define a cable's *Sonic Signature*—a cost-effective technique for high-value, high-performance models.

Noise-Dissipation

Unwanted Radio-Frequency (RF) noise is and has always been picked up and induced into cable. This contamination ultimately masks and distorts critical portions of the audio/video signal. As this distortion-causing (parasitic) RF signal is more present today than at any previous time in history, we must depend on a wider arsenal of Noise-Dissipation technologies:

- Directionally Controlled conductors minimize high-frequency noise by "directing" or draining it away from the most vulnerable circuits.
- ZERO Technology (No Characteristic Impedance) applies Ultra-Linear Noise-Dissipation across the widest range of frequencies possible. It also enables uncompressed transient current transfer for AC power and loudspeaker/power amplifier applications.
- Ground-Noise Dissipation (GND) cancels induced RF noise via its unique phase-cancelling array.
- Tried-and-true DBS has evolved to include RF-Noise Traps that further reduce dielectric distortion and induced noise.

Dielectric

Insulation is necessary between conductors to minimize signal interaction and electrical shorts. The ideal is virtually no dielectric interaction (such as is achieved with our ZERO Technology). However, by optimizing the dielectric material between signal conductors, this distortion is greatly minimized.

Speaker Cable Applications

Full-Range (FR) Non-BiWire, All Models

Single-BiWire (SBW) Rocket Models Only

BiWire COMBO Folk Heroes and Mythical Creatures ZERO and BASS Combination

Mythical Creature & Folk Hero Termination Options: Bananas or Spades?

Amplifier-End Connector:

Choice of 1000 Series Multi-Spade, Banana, U-Spade, or V-Spade (Silver only)

Insulated (compliant) binding posts may not allow for 2 sets of connectors.

Often, the choice between terminating speaker cables with spade lugs or banana plugs will come down to personal preference. However, today's EU-compliant isolated binding posts are being used on more power amplifiers than ever before. This sometimes makes it difficult, if not impossible, to use a banana connector. Further, given the girth and weight of our Mythical Creature Series speaker cables, a spade may be better capable of fully supporting the cable. This is particularly a concern with binding posts that do not allow a banana connector to fully seat into the post.

Further, the EU-compliant posts will neither accept our V-Spade nor allow our Multi-Spade to be fully seated. For these applications (or when you're not certain), **we highly recommend the U-Spade**, as it can accommodate any binding post. The V-Spade is a specialty spade connector that works well with large wingnut binding posts (such as the Mundorf), as it allows extra clearance.

Banana Dimensions (in.)

Multi-Spade Dimensions (in.)

U-Spade Dimensions (in.)

V-Spade Dimensions (in.)

Speaker-End Connector:

Choice of 1000-Series Spade or Banana (Silver only)

Here we typically recommend the U-Spade or banana connector. However, even though there is less weight and pressure on this side of the cable (particularly for Bi-Wire sets), it is nevertheless important to note the binding post's design. If a banana connector cannot seat all the way into the binding post, we recommend one of our spade connectors.

How to Order Prepared Speaker Cables

First please specify type of connector (banana or appropriate spade), then the finish of connector (silver*).

(*or gold where applicable)

Pair prices shown. Also available in singles (i.e. for center channel, subwoofer, or mono) at half pair price.

When ordering any factory-terminated speaker cable, please include the required elements shown in the examples below:

Qty.	Pair or Single	Length	Model	FR/BWC/SBW	Amplifier Termination	Speaker Termination	Silver or Gold
1	Pair	10 ft.	Rocket 88	FR	Spade	Banana	Silver
1	Single	6 ft.	William Tell	COMBO	U-Spade	Banana	N/A
1	Single	10 ft.	Rocket 44	SBW	Spade	Banana	Gold

Speaker Cable Accessories

PSC BiWire Jumpers

Solid PSC Copper Jumpers replace stamped jumpers supplied with BiWireable speakers.

Set of (4) 4-inch Jumpers.

BiWire Jumpers-G (Direct-Gold Plated)
Retail: 29.95

BiWire Jumpers-S (Direct-Silver Plated)
Retail: 29.95

BiWire Jumpers

Easy and affordable upgrades over the common gold-plated, stamped-brass jumpers included with most biwireable loudspeakers. AudioQuest BiWire Jumpers use Direction-Controlled Solid Perfect-Surface Copper+ (PSC+, Saturn) or Perfect-Surface Silver (PSS, Jupiter) conductors.

Choice of Hanging-Silver or Hanging-Gold 500 Series Banana or Multi-Spade connectors. Please specify silver or gold when ordering. Length of jumpers is 8 inches including connectors.

Saturn (PSC+)
Set of 4
Retail: 229.95

Jupiter (PSS)
Set of 4
Retail: 549.95

Using BiWire Jumpers with Full-Range Cables on BiWire-Capable Speakers

Connect BiWire Jumpers, (-) Treble to (-) Bass and (+) Treble to (+) Bass

3-Way or Panel/Hybrid: Connect Speaker Cable to (+) and (-) Treble Input

2-Way speakers: Connect (+) Speaker Cable to Treble (+) Input and (-) Speaker Cable to (-) Bass Input

Fog Lifters

Place Fog Lifters beneath audio and AC power cables to significantly reduce RF noise coupling, whether with the floor, or due to misdirected efforts to isolate cable with stands or clamps that themselves have too much contact mass and are sources of RF noise.

Set of 8
Retail: 149.95

Analog-Audio Interconnect Cables

The Higher You Climb, The Less You Hear?

Climbing the ladder of AudioQuest Analog Interconnect Cables leads to better and better performance. This makes immediate sense, but perhaps less intuitive is the fact that moving up the line means you hear less of the cable. The reason is simple: As more of the delicate audio signal is protected from damage along the way, the listener experiences more of the truth and emotional impact of the music. Greater faithfulness to the audio signal is made possible by the use of superior materials and the careful implementation of increasingly sophisticated design and construction techniques.

Music is wonderfully complex, and our ears are very sensitive to its nuances. The remarkably affordable Bridges & Falls Series is an amazing place to start the journey. Yet, every step up the ladder to the Elements Series delivers even more clarity, smoother and more natural sound, greater dynamic slam, and more nuanced expression from the music.

As you climb with your customers, you'll hear progressions in metal, from Solid Long-Grain Copper to Perfect-Surface Copper, Copper+, and Silver; in Geometry, from Double- to Triple-Balanced; in insulation, from Foamed-PE to FEP Air-Tubes; and in Noise-Dissipation techniques, from Metal- to Carbon-Based Multi-Layer Noise-Dissipation and our patented Dielectric-Bias System.

Throughout the line, the AQ performance-driven value system is always 100% evident. Climb until the incremental cost of the higher model is no longer the least expensive way to make the most improvement—but don't be surprised if your customers find themselves at the top of the line before reaching that point!

Headphone Plug Adaptor

- Stereo 3.5mm Female > Stereo 1/4" Male
- Silver Plating Directly Over Extreme-Purity Brass
- Superior Materials and Firm Contact Pressure Ensure Ideal Signal Transfer

Retail: 29.95

Perch Headphone Stand

- Easily and safely accommodates all headphones
- High-quality materials
- Heavy base provides stability

Retail: 89.95

HDMI Cables

Does AudioQuest offer the right HDMI cables for 4K TVs, 8K TVs, and beyond?

Yes! All of AudioQuest's new 48Gbps HDMI cables can transfer up to professional 10K Ultra-HD video. The impressive 48Gbps data rate is made possible by four balanced audio/video pairs capable of 12Gbps each. And, of course, the latest technology is backwards compatible with 4K displays.

Video Up to 10K

AudioQuest 48Gbps HDMI cables are completely backwards compatible with existing devices and have the bandwidth required for video with resolutions up to 10K and resolutions/refresh rates up to 8K/60 and 4K/120.

HDR (High Dynamic Range)

All AudioQuest HDMI cables support HDR (High Dynamic Range) and Dynamic HDR. HDR content expands the contrast of the image for blacker blacks and brighter whites/highlights as well as greater color saturation and brightness. In addition, 4K Ultra-HD content allows for a wider color range.

This combination of technologies results in more realistic HDR images with greater perceived depth. Dynamic HDR (HDR10+ and Dolby Vision, for example) enables frame-by-frame HDR optimization rather than HDR settings that are fixed for the entire program. The most prominent current HDR formats are HDR10, HDR10+, and Dolby Vision.

AudioQuest 18Gbps and 48Gbps HDMI cables are compatible with all varieties of HDR, which can be found on Ultra-HD Blu-ray, and all major streaming services, including Netflix, Amazon Prime, Disney+, Apple TV+, and others.

ARC (Audio Return Channel) and eARC (enhanced Audio Return Channel)

HDMI's Audio Return Channel (ARC) sends audio from a TV to a soundbar or AV receiver for greater simplicity and flexibility in system setup. Hardware's previous ARC capabilities max out at lossy (compressed) 5.1-channel surround sound.

Today's HDMI 2.1 hardware supports enhanced Audio Return Channel (eARC), which increases the digital bandwidth dramatically to support uncompressed and lossless high-resolution multichannel audio, including Dolby TrueHD and Atmos, and DTS-HD Master Audio and DTS: X.

8K-10K

48G_{bps}

Not only do all current generations of AudioQuest HDMI cables have the conductors and bandwidth required for eARC's enhanced sonic capabilities, but, in order to ensure superior audio performance, the ARC-channel conductor-pair is internally controlled for direction, running in the opposite direction from the 4 pairs that carry information to the TV.

Finally, AudioQuest's eARC-Priority models include 4 Silver-Plated Forest 48-level audio/video data pairs—but with a far superior single data pair for the TV's audio output. By upgrading the ARC data path only, audiophile quality is made possible at a fraction of the cost of upgrading all 5 data pairs.

New Packaging

AudioQuest has turbo-charged all of its HDMI packaging with easy-to-read icons and explanations of the design and material elements that define each cable and its place in the line. Comparing, contrasting and selecting the right cable is easier than ever before.

1.25% SILVER

Solid Conductors

Solid Long-Grain Copper, Silver-Plated Copper, or Perfect-Surface Silver maximize Noise-Dissipation and overall performance.

LEVEL 2 Metal Layer + Direction

Noise Dissipation

Six Levels of Noise-Dissipation (ND) combat distortion caused by RF Noise contaminating digital and analog circuitry.

eARC

1.25% Silver Level-2 ND

Because sound is where all the emotion and drama comes from, AQ's eARC channel gets 100% the same love as the four AV channels.

Limited

Lifetime Warranty

We've got your back. Performance backed by reliability.

48Gbps

4 x 12 = 48

The 48Gbps necessary for all of HDMI's new and future features is made possible by upgrading the 4 AV channels from 6 to 12Gbps.

HDMI A/V Cables

18Gbps 4K-8K and 48Gbps 8K-10K

- All models use Solid Signal and Ground-Reference Conductors.
- All 19 conductors (A/V, eARC, Ground-Reference Drains, Control, Power) are Direction-Controlled.
- AudioQuest "48" HDMI cables have the bandwidth required for video with resolutions up to 10K, resolutions/refresh rates up to 8K/60 and 4K/120.

Digital-Audio Interconnect Cables

Perfect Sound Forever?

That bold statement introduced CD players to the world back in 1983. Those claiming perfection believed ones and zeros to be so beyond reproach that traditional concerns about the integrity of the playback system had become irrelevant overnight. But the CD wasn't close to perfect. Those who listened quickly figured out that the equipment and cables in the audio system mattered every bit as much as they had in the analog era.

However, to this day, stating the truth in public that digital-audio cables can make minor to even staggering differences in an audio system's performance is like yelling, "food fight" in a crowded cafeteria—you'd better get ready to duck because there will be incoming.

Yet, the same kind of music lovers and listeners who heard the CD for what it is also know that soul-satisfying digital-audio playback requires the best digital-audio cables. And the best cables reduce the most noise and distortion.

Today, there are more ways to consume digital audio than ever. Many gave up silver discs for the convenience of inferior-sounding compressed downloads, and now we've seemingly got the best of both convenience and performance: We are able to stream high-res files to our phones and mobile devices and into our homes.

AudioQuest's digital-audio cables employ all of our proven techniques for minimizing noise and distortion: better metals, better geometry, better dielectric, Dielectric-Bias System (DBS), Noise-Dissipation, Direction-Controlled Conductors, and other ingredients needed for optimizing each specific application.

The digital future is brighter and more beautiful sounding than ever...*if* your digital-audio cables are capable of treating fragile audio data as it deserves to be treated—that is, with the love and respect reserved for music.

AudioQuest Branded Promotional Items

Polo Shirt

Our versatile polo shirt looks great with anything. Classic black with a discreet silver AudioQuest logo, it features moisture-wicking technology and dries quickly. Look cool, stay cool. Men's sizes: S-2XL; Women's sizes: S-XL.

Retail: 60.00

T-Shirt

Our classic crewneck t-shirt is made from 100% lightweight, preshrunk cotton for a perfect fit that's as attractive as it is comfortable. Our t-shirt features a tasteful red AudioQuest logo against a solid black background. Made by Port and Company. Sizes: S-3XL

Retail: 20.00

Hooded Jacket

Our ultra-comfortable jacket features a three-panel hood with drawcords and toggles for a warm, snug fit. The zippered front, open hand pockets, and zippered sleeve pocket add convenience and style. The colorblocked gray-and-black design highlights a subtle AudioQuest logo in silver. Sizes: S-3XL

Retail: 75.00

Chino Washed Cotton Baseball Cap

Our baseball cap has a durable 8-stitch bill for a long-lasting, contoured shape. The Velcro fastener provides easy adjustments for a perfect fit. Available in black with red AudioQuest logo and trim, this cap looks and feels great. One size fits all.

Retail: 19.95

Beanie

Red, gray, and black, with our classic red AudioQuest logo, our stylish beanie is made from super-stretch, fine-gauge acrylic, for a warm, snug fit over your head and ears. The perfect accessory for those cooler days. One size fits all.

Retail: 19.95

Pen

Take note: With its discreet AQ logo, piano-black lacquered tube, and chrome accents, this ballpoint pen has the looks to match the quality of your prose. Keep it in your AudioQuest backpack and take it with you wherever you go.

Retail: 24.95

Tumbler

With its double-wall vacuum construction and copper insulation, this 14oz tumbler keeps drinks hot for 8 hours or cold for a full 24. The external design provides a comfortable gripping surface and prevents condensation from forming on the outside of the tumbler. Perfect for use while on the go, the push-on lid with thumb slider affords mess-free sipping.

Retail: 25.00

Water Bottle

Made by Specialized, this 26-ounce leak-proof water bottle has a self-sealing valve and features easy-to-squeeze BPA-free, recyclable plastic. Our distinct Wolves artwork is printed with a non-solvent based, CPSC-approved ink. Just aim and squeeze for clean, pure refreshment.

Retail: 12.95

AudioQuest Branded Promotional Items

License Plate

It's all about the journey. Take your love for AudioQuest on the road with this license-plate frame. The clean, simple design features our red AudioQuest logo and "Experience the Difference" mantra set against a black background—perfect for any ride. Vroom!

Retail: 6.00

Backpack

Available in black with our black AudioQuest and Four Elements logos. Accommodates laptops with 13" screens and tablets. Made of nylon.

Retail: 19.95

Padded Backpack

Do no harm with our padded backpack. It features a discreet front-panel zipper, multiple internal pockets, and mesh side pockets for drinks and other items. A padded laptop insert safely accommodates screens up to 15". Mesh backing and straps are durable and comfortable, making the backpack as easy to carry as it is to wear.

Retail: 29.95

Tote Bag

This super-durable tote bag is made of water-repellent polyester and has a long strap that fits easily over a shoulder. Measuring 38cm x 36.5cm (15in x 14.4in), its slim pocket is perfect for carrying AudioQuest merchandise—pens, tumblers, price books—and even an LP or two! The simple black-on-black design features a subtly stylish AQ logo.

Retail: 20.00
