

Solution Brief

Extend your business critical processes to your mobile workforce

Field-based staff work outside of the office environment delivering, repairing or maintaining a service. Supporting them with the right technology, enables a better, more effective working day for field-based teams or staff on the go. By extending the reach of your business processes to mobile workers you can streamline the time it takes to get business critical data into revenue generating processes.

Consider just some of the different mobile workers that are collecting data in their day to day routines:

Mobile workers don't have to come back to the office to update data

CONSTRUCTION

- Survey Forms
- Proof of Delivery
- Contracts

FINANCE

- Life Insurance Forms
- New Customer Onboarding
- Contracts
- Insurance Assessment
- Customer Instructions

GOVERNMENT

- Housing Application
- Benefits Claims Forms
- Contracts

HEALTHCARE

- Social Care Forms
- Home Visit Medical Record Updates

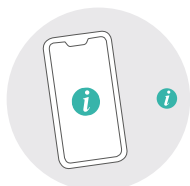

HORIZONTAL

- Contracts
- Customer Onboarding Forms
- Service Completion Forms

Kodak Alaris are specialists in data capture, and we are empowering mobile workers around the world with our mobile capture platform, Info Input. By giving your staff the freedom to complete work at the point of service delivery or on the move, we help you to increase productivity and drive efficiency into your business-critical processes.

Enter documents into the same workflow as if scanned back in the office

Collect the data on your smart phone using the App and your camera.

Push this data into the already created automation process.

And the data arrives where it is needed, in the format it is needed, in almost real time.

The Kodak Alaris solution enables your mobile workforce to capture intelligent data where they are and route that into your business processes where it is needed.

Please contact your provider for more information on how Kodak Alaris can help support your mobile workforce.
