Oceanlog 2.x
VERSION 2.5.0
   1. Fixed exporting DATAMASK data
   2. Fixed ATR and Link status in Dive Details for Proplus 2/3
VERSION 2.4.9
   1. Fixed ATOM 2.0 missing dives
   2. Allow users to export manual entry dives to DL7 Standard format
VERSION 2.4.8
   1. Removed MY INFO from the sample dive log file
   2. Added dive computer model and serial number verification before upload
settings to a dive computer
VERSION 2.4.7
   1. Compatible with OCL
   2. Updated exporting to DL7
   3. Fixed setting options in Dive Computer section
VERSION 2.4.6
   1. Compatible with VTX
   2. Compatible with DAN EUROPE DL7
VERSION 2.4.5
   1. Compatible with OCEANIC F10, OCEANIC F11
VERSION 2.4.4
   1. Fixed PO2 alarm setting for OC1
   2. Fixed error when users don't enter the PDC Model
   3. Fixed the OC1 back light setting
   4. Fixed Dive Details switching from Metric to Imperial display
   5. Fixed saving settings to VT4
VERSION 2.4.3
   1. Fixed OCi firmware update
VERSION 2.4.2
   1. Compatible with OCi version 1B
   2. Replace "Bookmark" with "Earmark"
   3. Fixed firmware version display in Dive Computer section
   4. Fixed deleting photo from Dive Details
   5. Updated DL7 exporting that will be compatible with DiverLog for Mac, DiveCloud
   6. Fixed Save Settings in Metric
VERSION 2.4.1
   1. Compatible with OCi
VERSION 2.4.0
   1. Enable firmware update for Pro Plus 3
VERSION 2.3.9
   1. Fixed error that program could not recognize the old PRO PLUS 2
   2. Fixed PROPLUS3 dive data to DL7
   3. Fixed settings info displaying on the Utilities tab
VERSION 2.3.8
   1. Compatible with PROPLUS3
   2. Print memo to the A5 size format
   3. Show tips in Buddies section
   4. Add replace "---" with "NONE" in Current, Surge, Swell, Surf, Tide, Resort,
Operator, Dive Boat, GPS
   from Location section
   5. Fixed setting PO2 Alarm on ATOM 3.0
VERSION 2.3.7
   1. Added Bahamas to countries list
   2. Fixed "dives were not on the list after download"
   3. Added Dive Computer history to the Dive Computer section
   4. Fixed Units of Measurement in Manual Entry dives
   5. Fixed importing location data from .dlg files
   6. Updated translations
   7. Fixed "In queue" error when saving VT3 dives
   8. Fixed the initial location information for a new manual entry dive
   9. Proplus 2 (Metal Buttons) can be able to update firmware with Firmware Auto
Update from Dive Computer section
   10. Fixed error when moving mouse over on photo in the Dive Details section

    11. Fixed printing series of dives in A5 format
VERSION 2.3.6
    1. Compatible with new firmware version of DATAMASK
    2. Fixed updating manual entry dive
    3. Fixed updating dive information
VERSION 2.3.5
    1. Compatible with OCS
    2. Fixed printing dive data
    3. Fixed Resort, Operator, Dive Boat and GPS data in Location section
    4. Added series of dives graph for free dive
    5. Remove BUDDY settings from Dive Computer section
    6. Fixed VT4 dive data downloading
    7. Fixed "Invalid dive data file" error
    8. Fixed error when opening dive log file from network
VERSION 2.3.4
    1. Fixed VEO 2.0 max depth in Dive section
    2. Fixed VT 4.0 Prior Surface Time in the Dive section
    3. Fixed Import manual dive data from DLG file
    4. Fixed temperature in dive profile at the time of switching tank
VERSION 2.3.3
    1. Fixed the error "Dive profile is not available"
VERSION 2.3.2
    1. Fixed PROPLUS 2 (Metal Buttons) settings display in Dive section
    2. Updated Firmware Update function and database
VERSION 2.3.1
    1. VT 4.0 Compatible
    2. Added Export to Excel, CSV files in the Dive Details section
    3. Show Proplus2 End Pressure in the Dive section
VERSION 2.3.0
    1. Fixed firmware update procedure on GEO 2.0
VERSION 2.2.9
    1. ATOM 3.0 compatible
VERSION 2.2.8
    1. ATOM 3.0 compatible
    2. Fixed prior surface interval in VEOs
    3. Fixed OC1 PDC Dive No.
    4. Fixed O2BG in Details section for OC1
    5. Fixed Certification List date
    6. Added LTDN and SAC to print standard log book
    7. Fixed the temperature in Details section for PROPLUS2 Metal Buttons
    9. Fixed background and text colors when Windows background color is under high
contrast mode
    10. Fixed add single photo to Dive section
    11. Enabled the Firmware Auto Update for GEO 2.0, VEO 2.0, VEO 3.0
    12. Fixed printing Dive Details in Metric
    13. Included Japanese and Chinese language
    14. Fixed Wet Activation display in Dive Computer section
    15. Fixed Wet Activation/FO2 Default settings in Dive Computer section
    16. Fixed Dive Details when displaying the old PROPLUS/DATA PLUS O2BG
    17. Fixed Transmitter ON/OFF settings
    18. Fixed Run Time Error 94 in Dive Computer section
VERSION 2.2.7
    1. VEO 2.0, VEO 3.0, GEO 2.0, PROPLUS 2 (METAL BUTTONS) compatible
    2. Windows 7 compatible
    3. Included Turkish language
    4. Enabled user to add multiple photos at once
    5. Improved the Software/Firmware Auto Update features
    6. Fixed the free dive sample rate for VEO 2.0, VEO 3.0 and GEO 2.0
    7. Allow user to add/delete/show/hide bookmarks, photos of on dive graph in Dive
Details section
    8. Fixed run-time error "3420"
VERSION 2.2.6
    1. OC1 Metal Watch compatible

  2. Added Firmware Auto Update (select model only)
  3. Added Import DAN DL7 Level 1 (*.zxu) dive data
  4. Removed the free dive temperature in Details since free dive does not record
temperature
in dive profile area (only at the end).
  5. Fixed error on retrieving dive from old PDC (using cable version 1.0) that
contains bad data
  6. Fixed VEO 180Nx Prior Surface Time
  7. Fixed PDC Settings alarm info in the Dive Computer section when PDC is set to
Metric
  8. Fixed the automated file name for exported text files
  9. Added Language option for displaying in international languages (English,
German, Italian, French and Spanish)
 10. Fixed dialogue box with 2 "No" buttons on Vista
VERSION 2.2.5
  1. Fixed Dive Details shut down the program in German Windows
  2. Fixed sample rate setting in Dive Computer section
  3. Fixed ATR graph
  4. Fixed multiple graph printing
  5. Fixed FO2 value displayed on the LCD from the Details section for some of the
Oceanic
old PDC models
  6. Refresh the dives listing after opening a different dive log file.
  7. Fixed printing "Standard Log Book (A5 size format)" with multiple dives
options
  8. Fixed export dive data to text file
  9. Fixed updating data in Dive section
VERSION 2.2.4
  1. Fixed print multiple pages
  2. Fixed "run-time error 3075: Syntax error..LOCID="
  3. Fixed error "could not open dive data file"
  4. Fixed the depth changes when switching tanks
  5. Fixed error on queries for buddy/captain/crew
  6. Fixed the issue of Location/Dive Site changed when editing dive info
  7. Fixed case sensitive in Dive Type options of the Location section
  8. Fixed incorrect year in the dive index table
  9. Fixed "details data in Details section disappear when program loose focus"
issue
 10. Fixed editing/updating data in the Gear section
 11. Added Beginning Life Time Dive Number validation when its value changed by
user
 12. Allow user to change Dive Site/Location in Dive section
 13. Disable "Delete" from the context menu if the list is empty
 14. Save state of selected tab (User Defined Settings/Photo Album/Memo) when you
are
in or out of the Dive section
 15. Added Graph options in to Details options:
      + Depth, Time
      + Depth, Pressure Reading, Time
      + Depth, Air Time Remaining, Time
      + Depth, Temperature, Time
 16. Added Multiple Graph to printing "Dive Data and Graph"
 17. Added LCD in to the Details sections
 18. Added importing dives data from Oceanlog DLG files
 19. Added printing dive data to the standard dive log A5 size format
 20. Added "Manual Entry" to the Queries for any query that related to the Manual
Entry dives only
 21. Added Software Auto Update Schedule. The Auto Update will now only start
running on selected schedule.
 22. Added "Google Maps" that will be available for user in the Location section
that he/she can locate his/her
Dive Site on the Google Maps
VERSION 2.2.3

1. Fixed Gear Bag
2. Fixed single quotation error in Location and Gear section
3. Fixed data dive details print out (columns shifting, Air Time Remaining, Cylinder details)
4. Added "Set As Default Cylinder" to set users desired cylinder for their future dives
5. Added Dive Site, Location to Dive section
6. Apply the last selected Gear Bag to new dives

VERSION 2.2.2
1. Fixed Export Dive Data
2. Fixed error when updating dive location information
3. Adding/Deleting info from Gear/Location section now use right mouse click

VERSION 2.2.1
1. Add Software Auto Updates in the Help section and in the Oceanlog startup.
2. Added Cylinder option in Dive section
3. Added Country Listing in Person, Buddies, Dive Site
4. Move Dive Site and Location from Dive section to Location section
5. Added City, Province, Country fields to Location section
6. Added Export Dive Data to DL7 Standard (Level 1) format
7. Added Archive Folders that will let user explores the folders that contain export dive data files
8. Change program icon with better resolution in Windows Vista
9. Updated Help file to include the latest changes: Auto Update feature, Export Dive Data to DL7,...
10. Added Certification to the Personal section
11. Fixed the Export Dive Data error (no dive profile in text file)

VERSION 2.2.0
1. Fixed default of Units of Measurement
2. Fixed Read PDC Settings for GEO Free Dive Depth Alarm in Metric

VERSION 2.1.9
1. Fixed the Units of Measurement
2. Fixed error in Queries related to decimal point "." vs ","
3. Fixed History and Queries related to SAC

VERSION 2.1.8
1. Fixed User Defined Set Points in "Print Dive Data and Graph" section
2. Dive Time in Dives Listing
3. Fixed SAC2 calculation in Dive section
4. Enable user entering the Average Depth for manual entry dive in the Dive section.

VERSION 2.1.7
1. Fixed the duplication of "Deepest" in Queries
2. Added German language
3. Fixed History/Statistic

VERSION 2.1.6
1. Added international languages: Italian, French, Spanish
2. Fixed min. temp. for ATOM 2.0 dive details
3. Fixed Turn PSI shown 625 BAR under User Defined Set Point Options when Turn PSI is OFF (in Metric)
4. Fixed beginning and ending point of dive graph
5. Fixed ending tank pressure for DataMask
6. Fixed re-indexing LTDN
7. Changed dive graph style

OCEANLOG 2.1.5
1. Compatible with both UAC condition (ON/OFF) on Vista
2. Fixed error "380" when go back and fore the Queries section
3. Added scroll bar for all sections when screen display resolution is small
4. Fixed the dive date (year) from the Download section for VEOs when unit of measurement
    is in Metric
5. Fixed History Extremes hyperlink

VERSION 2.1.4
1. Compatible with DATAMASK, Windows Vista
2. Fixed DC Utilities: Tank 2 OFF, Tank 3 should not be ON

3. Fixed DC Utilities: SELF/BUDDY settings did not change in ATOM 2.0
4. Fixed DC Alarm: Depth 2 Alarm OFF, Depth 3 Alarm should not be ON
5. Fixed Error in Accessories from the Gear section
6. Fixed DataType value
7. Fixed AvgDepth, SAC, BTIME 1,2,3 in Manual Dive
8. Fixed Dive Mode in Manual Dive (Data Type)
9. Fixed FREE Depth Alarm ON/OFF in coversion for VT3
10. Fixed Statistic data for last 6 months, 12 months in the History section
11. Fixed the accuracy of PSI/BAR conversion
12. Fixed Dive Site, Location
13. Fixed Error in Average Depth Calculation
14. Fixed Error 94 (Invalid use of Null)
15. Increase dive number of a day when Manually add dive with same date, same PDC, same serial #
16. Fixed with Numpad input
17. Removed Buddies and Location from HISTORY.
18. Keep all contents when user rename Gear Bag
19. Added "BEGINNING LIFETIME DIVE NUMBER:" to DC Configuration. Default is "1". Re-index all following dives if modified.
20. Added "Play" button on the Graph Menu Bar that will auto play back the dive graph with speed options:
    1, 1/2, 1/4, 1/8 second.
21. Show the last visited dive info
22. Fixed Tank 2 and Tank 3 FO2% range (21-100)
23. Fixed font size on second page of print out for Dive Data and Graph
24. Added Beginning Life Time Dive Number to the print out for Personal
25. In DC section, if Buddy option selected, Tank 2 and Tank 3 info will be invisibe
26. In History section, added hyper-link for the Extreme info so you can view the dive data
27. Fixed printing - No printing job for Dive Data and Graph, Dive Details
28. Fixed run-time error 384 when moving back and fore Queries and Dive sections
29. Added details of Dive mode (Normal: Air/Nitrox) in Dives List printing
30. Fixed printing Gear Bag info
31. Default value for Air and Surface Temperature will be the same as dive min temp.
32. Fixed SAC in Metric
33. Added Save button
34. Added panel to show some of dive information when you in the Details, Location, Buddies, Gear section
35. Added hyper-text in the History
36. Fixed Max Tissue Loading Bar Graph setting for Proplus2
37. Change the Help format to be compatible with Vista
38. Dives made on the same date and time will have the same LTDN
39. Fixed importing Proplus, Dataplus2 dive data

VERSION: 2.1.3
    1. Fixed tank pressure info when the Transmitter is OFF
    2. Fixed Average Depth display in Metric

VERSION: 2.1.2
    1. Fixed the accessories in the Gear section
    2. Fixed the Time Out in 12 hours format (AM/PM)
    3. GEO compatible
    4. Fixed the settings for free dive
    5. Fixed the maxpage for watch
    6. Fixed max depth for watch

VERSION: 2.1.1
    1. Compatible with ATOM 2.0
    2. Enable tank info for non-wireless dive computer
    3. Fixed Tank Info
    4. Elpased Time will be in seconds for free dive in the Details and Print Details

section
    5. Unlocked Average Depth and tank info for Manual Dive entry
    6. Added Dive Time for every single tank if more than 1 tank being used. This
will give the correct
    SAC calculation for every single tank being used
    7. Double click on photo thumbnails to open the photo with your desired
application, i.e.: Photoshop.
    8. Fixed min SAC, max SAC
    9. Added "Apply result to Dives Listing" function to Queries that give you to
customize your
    Dives Listing in your desired queries.
    10. Added Oceanic web site link to the OCEANIC logo in About OceanLog dialog box
    11. Added displaying icon on System Tray when software is running
    12. Fixed "NO DIVE PROFILE" message when downloading VERSA PRO, VT PRO, PROPLUS2
that have only one
    dive in the log
    13. Fixed average depth
    14. Fixed minSAC, maxSAC, Last 6 Months, Last 12 Months info in History section
    15. Fixed the DC Modified status when the modified info is not part of dive
profile
    16. Fixed Time Out in Dive section
    17. Added save the last Location, Dive Site that user selected
    18. Added save the changes of Gear info when close the program
    19. Fixed "Manual Entry dive info did not save after modifying it".
    20. Fixed "error when double click on program icon in the task bar several time".

VERSION: 2.1.0
    1. Compatible with VT3
    2. Fixed the color schemes issues
    3. Fixed the left margin for all print out
    4. Fixed print out of Dive Data and Graph
    5. Fixed the Ascent rate in detail
    6. Fixed the Queries with the Extremes option
    7. Added SAC, Best SAC, Worst SAC to Queries
    8. Added Best SAC, Worst SAC to History
    9. Added SAC Rate, Working Pressure to Dive
    10. Added PO2 % calculation to the details
    11. Added to the Queries the capable of saving the last screen when moving
    from one to another screen of OceanLog
    12. Added to the Details the capable of saving the graph's cursor position
    when zooming the graph.

Version 2.0.3
    1. Fix data conversion

Version 2.0.2
    1. Fix over wrap index table in VEOs
    2. Fix run-time error 9 in VEOs upload/download

Version 2.0.1
    1. Remove the Max Depth in History
    2. Protect the error when importing an invalid dive data (invalid date)
    3. Let user import dive data into the existing dive log
    4. Import personal info (address, phone, email,...) into dive log
    5. Data type should not be changed when changing the dive information that not
    related to dive data
    6. N1..N10, OTUD, OTUS will be in the exporting dive data
    7. Save the Buddies information
    8. Error# 380 in Buddies, Gear
    9. Click on photo album navigator bar creating an error
    10. Click on Previous Dive from the Graph Navigator bars in the Dive Details
    does not refresh the grid lines
    11. Updating Gear Bag info

12. Average Depth
13. Upload/Download Instructions
14. Fixed error #3 during importing dive data

Version 2.0.0.   New Released
