

blueLink

Your connected friend on the go

HYUNDAI

A connection like no other

Blue Link is an IoT-based (Internet of Things) technology supported by Artificial Intelligence (AI) with an inbuilt SIM card and 24X7 the Blue Link Connect Centre. It is a platform that enables easy flow of information between you and your car, opening up a world of possibilities. Simply put, with Blue Link, your Hyundai car becomes more than just a vehicle. It becomes a partner that is well-informed, well-connected, and well-equipped to keep you safe and make your life, convenient.

Safety

RSA (Roadside Assistance)

If your car breaks down in a deserted place, just press the RSA button (middle button) on the inside rearview mirror. It will connect you with the Blue Link connect centre, and our team will provide you with immediate assistance.

Auto crash notification

In case of a mishap, airbags get deployed. Also, Blue Link automatically notifies the Blue Link connect centre. Your five pre-saved emergency contacts get SMS notification and your GPS location.

SOS/Emergency assistance

If in a difficult situation, just press the SOS button (1st from the left) on the inside rearview mirror. The Blue Link connect centre will immediately assist you.

Panic notification

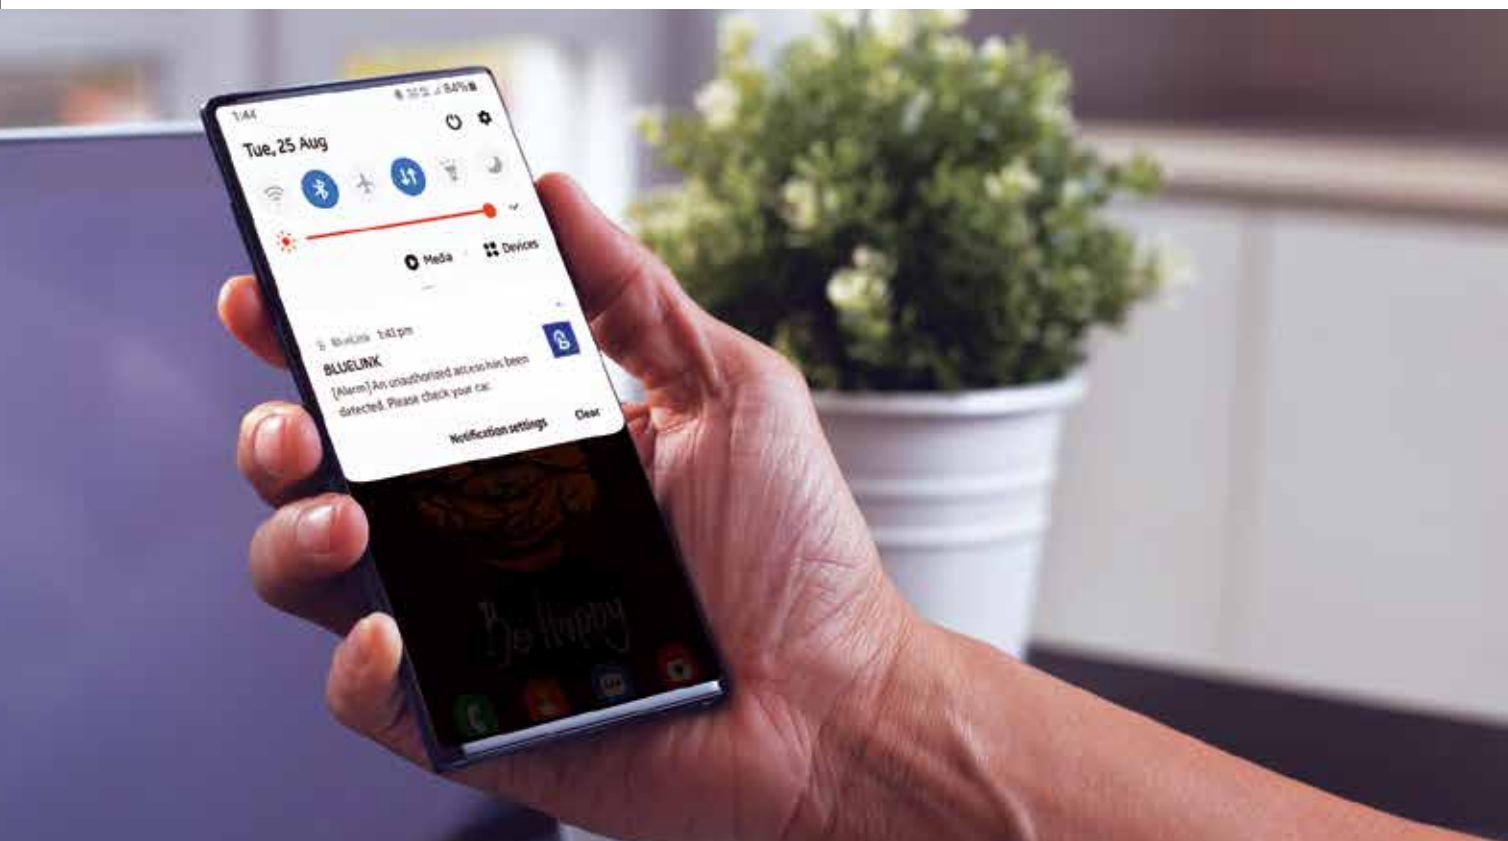

If in trouble, long press the Panic notification button (4th button) on the FOB key. Your five pre-saved emergency contacts will be immediately notified. Honking and blinking of car lights will begin to raise an alarm.

Blue Link support

Whether it is POI map-related questions or queries regarding Blue Link services, the Blue Link connect centre is just a button-press away.

Security

Stolen vehicle notification

If an unauthorized person enters your car, you will be immediately notified through the app.

Stolen vehicle tracking

In the unfortunate event of car theft, the Blue Link connect centre will assist the police in finding your car by tracking it

Stolen vehicle immobilization

The Blue Link connect centre will immobilize the stolen car, as soon as it makes its first stop.

Remote

Find my car location

In a busy parking lot, Blue Link helps you locate your car, thus saving time.

Remote engine start/stop (AT/DCT/MT)

Start and stop your car from anywhere, with the help of Blue Link.

Remote climate control (AT/DCT/MT)

Set the desired temperature in your car through FATC (Full automatic temperature control), the duration you want to keep it on for (max. up to 10 minutes).

Remote door lock/unlock

Now lock/unlock your car from anywhere, just by using the Blue Link app.

Remote horn & light control

Spot your Hyundai in a blink. Simply use the Blue Link app to flash the headlamps and blow the horn for 30 seconds.

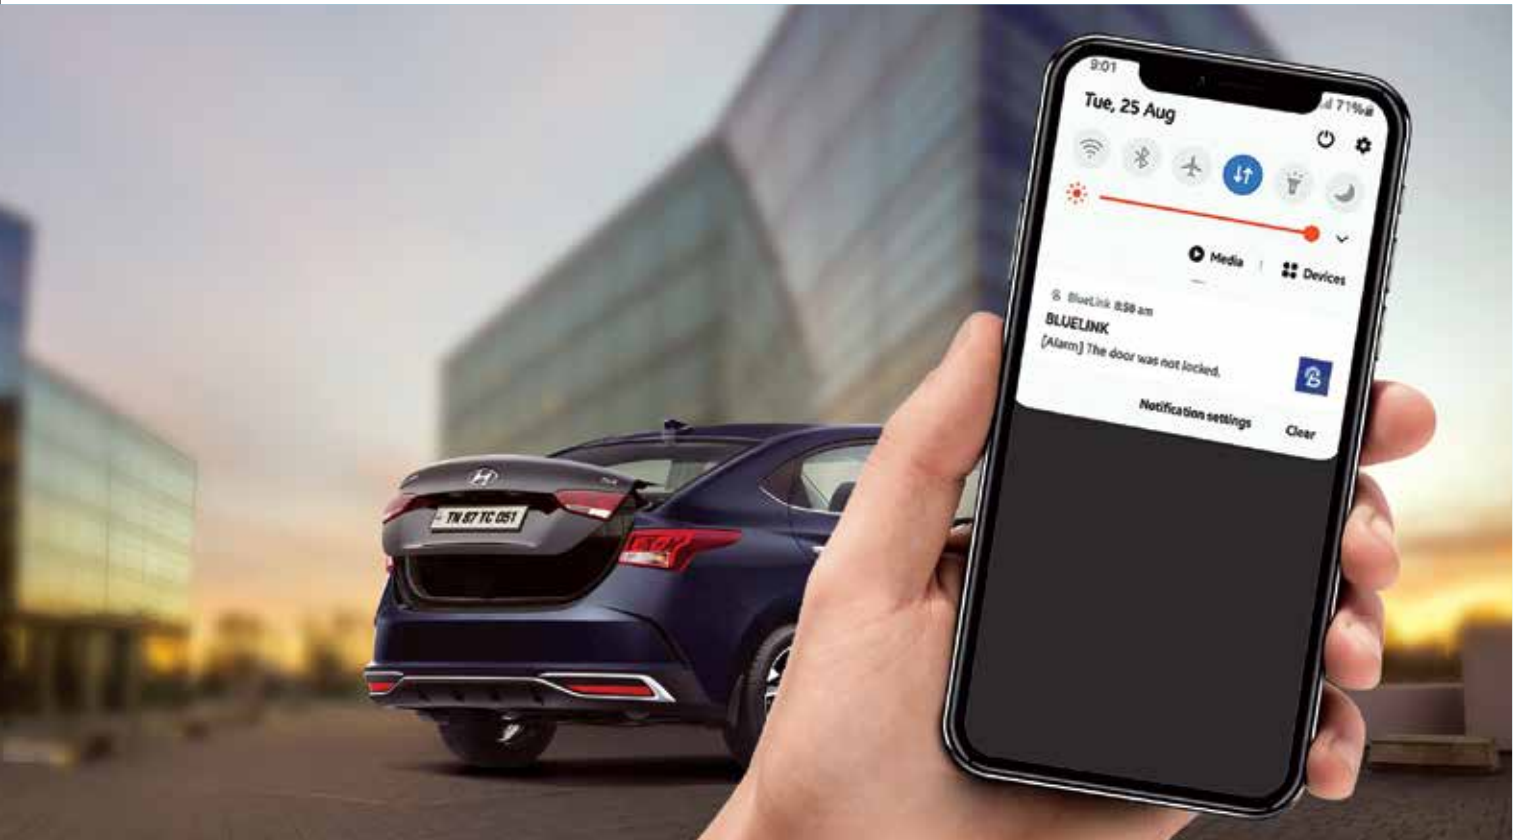

Remote seat ventilation control/status

You can turn the seat ventilation on before getting in the car. The status of seat ventilation (On/Off) can also be checked remotely.

Proactive vehicle status alert

The Blue Link app sends a smart alert in case the user forgets to lock the door or close the trunk properly.

Remote air purifier ON

You can see the air quality level on the app screen and the air purifier can be turned on remotely.

Remote vehicle status check

On and Off conditions of engine, AC, doors, trunk, hood, fuel level, low tyre pressure indication and seat ventilation status (if equipped) can be checked remotely with Blue Link.

Tyre pressure information

Get notified about the low pressure in tyres through the app. You can also see it on the vehicle AVNT screen.

Fuel level information

The app screen displays the fuel levels so you can re-fuel before hand and have a hassle-free trip.

In-vehicle air quality status

The air quality level inside the car is displayed on the app screen.

Share my car (App sharing)

Share partial Blue Link services like POI (Point of Interest), send your destination to other cars (up to five), alerts, etc.

Vehicle relationship management

Monthly health report

The monthly health report available on Blue Link helps you track the health of your car. It shows the number of engine starts, distance travelled, drive time, max./avg. speeds, system health, etc.

Auto diagnostic trouble codes check (Diagnosis)

Blue Link is designed to pre-empt any issues with your car. If it detects one, the indicator light will be turned ON and the system will perform an auto DTC (diagnostic trouble codes) check and inform you.

Manual DTC check (Diagnosis)

Manual DTC check can also be done by selecting vehicle diagnostics on the AVNT screen.

Driving information/Behaviour

Blue Link gives you a trip analysis that allows you to see the effects of your driving on your car by showing you the total distance travelled, max./avg. speeds, hard braking, rapid acceleration, etc.

Maintenance alert

A list of parts that need to be changed periodically based on the odometer of the car is available on the app. Customers can switch the maintenance alert ON and manage the period and kilometers as per their requirement.

Geographic information system

Destination send to car

Start your travel plans by searching the route and distance before hitting the road. Travel route can be sent to the car from the app before starting the journey.

Destination send to car from call centre

Travel assistance is just a button away. Press the Blue Link assistance button, and request the call center to send the desired route to the AVN display screen.

Share the destination

Share your destination with your friends by sending an SMS with the destination link.

Real-Time vehicle tracking

Get real-time traffic updates on your AVNT screen.

Share & track vehicle location

You can share the live location of your car with family and friends.

Schedule linked destination setting

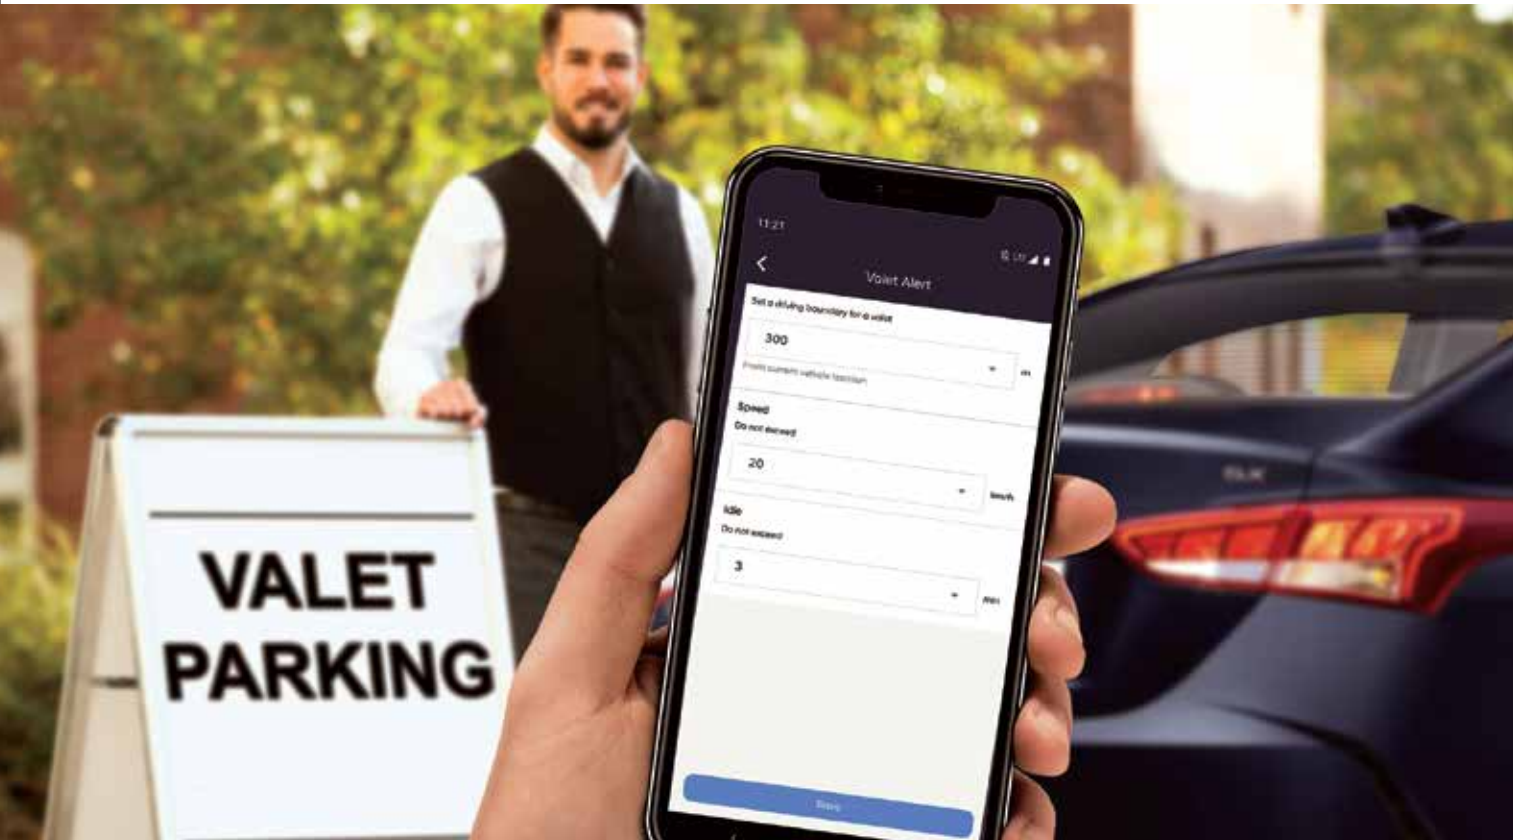

Keep track of your upcoming events and push event destinations to your car by syncing your smart phone calendar and destinations.

Over the air map updates

Experience the convenience of updated maps without visiting a service centre. The latest version of the map will get auto-updated, quite like mobile updates, thus making your life hassle-free.

Alert services

Valet alert

This feature lets you set the driving boundary, the speed and idling time limits. If any of these limits are breached, you are immediately alerted.

Geo-fence(out-of-area) alert

With Blue Link, you can set a digital perimeter for your car. If the perimeter is breached, you are immediately alerted.

Speed alert

To help avoid overspeeding, Blue Link lets you set a speed limit. If it is exceeded, you are alerted at regular intervals.

Time fencing alert

If your vehicle is moved in the time frame set by you, you are immediately notified.

Idle alert

If your engine is left turned on for more than the set time limit, you are immediately notified.

Voice recognition

VR – Weather

While driving, you can inquire about the weather of different locations for the present day and for nine days in the future and in the past. This feature is powered by AccuWeather.

Wake-up word

Just say “Hello Blue Link” to activate the voice-enabled services.

VR POI

Without taking your hands off the steering, you can search for the Point of Interest (POI) like malls, fuel pumps, restaurants, etc. through voice command.

VR – Time & date

While driving, you can inquire about time, date and time difference between countries using voice command.

VR – Holiday

Through voice command you can ask for dates of Indian holidays like Diwali, Holi, etc.

VR – Sports

Using voice command, you can request for the score update of an ongoing cricket match. This feature is powered by Sports Radar.

Sunroof control

Through voice command you can open and close the sunroof.

VR – Media control

Through voice commands, you can select different media sources like USB, FM radio, You can also play your favourite radio station.

Hands-free calling

Just say the name of the person or their phone number and connect with them.

Map control

Through voice command, you can request a map, cancel route, and get destination info and much more.

VR – Car control

Set the temperature, direction of air, defrost, adjust seat ventilation through voice command.

Climate control: Set the temperature and fan speed etc.

Wind direction (Floor/ Face/ Combi.)

Air intake type (Fresh/ Circulation)

Defroster (Front/ Rear)

Seat ventilation

Smart watch

You need to sync your smart watch with Blue Link to enjoy the whole gamut of features.

List of compatible smart watches:

Galaxy Watch Samsung Active 2 Apple Watch 3 Apple Watch 5 Fossil Gen 5 Misfit Vapor 2
Skagen Falster 2 Tic Watch Pro Armani Emporio Smartwatch 3 PUMA Smartwatch
