

S30 Daily Operational Checklist

Before cleaning with your machine there are a few pre-operational checks that need to be done to confirm your machine is ready to be used.

- Check the fuel level.
- Check the condition of the main brushes.
Remove any string, banding, plastic wrap, or other debris wrapped around the brushes.
- Check the main brush compartment right hand skirt for damage and wear.
- Check the side brush.
Remove any string, banding, plastic wrap, or other debris wrapped around the brush.
- Check the condition of the side brush skirt
- Check the hydraulic fluid level.
- Check the main brush compartment left hand skirt for damage and wear.
- Check the engine coolant level.
- Check the engine oil level.
- Confirm the radiator and hydraulic cooler fins are clean.
- Check the headlights, taillights and safety lights.
- Check the steering and brakes for proper operation.
- Check the service records to determine maintenance requirements.

List below any problems that occurred during operation.
