WEST MOUNTAIN RADIO

Dual Integrated Sound Cards

- Use the Main/Sub VFO audio - peferct for SO2V
- Record wave files from radio's microphone for natural sounding voice keying
- Low noise floor ensures "the weak ones" are heard - Perfect for FT-8
- Enhanced footswitch port provides total control of voice keying. Multiple taps or keypad activated
- Optional CLRmod DSP audio daughterboard available. Listen to Clearspeech® audio when opearting remote.
- Software switched low current 12V output can be used remotely for control of other devices
- Squelch/COS input port for EchoLink and other software

Software

- Operate remotely with full confidence - Configuration software provided with the DXpro allows changes to be made without physical presence

Other Great Features!

Diagnostic LEDs
Front panel LEDs show footswitch state, sequencer ports, squelch status, transmit, CW/FSK keying and sound card status

Compatible With All Manufacturer's Radios

- ISC jumper blocks configure for the radio's mic
- Works out of the box with an "8 pin round" or "RJ-45 modular" Mic jack
- Optional cables available for others

Built-in Rig Control

- Independent serial port with DB9 connector for RS232 CAT. TTL output jack for Icom CI-V/Yaesu/Kenwood

True FSK/CW Keying

- Keyed outputs and right-channel audio detector allows FSK and CW keying from FLdigi and other software

Sequencer Loop

- Fully implmented sequencer ports to prevent damage to pre-amplifiers

Front Panel Controls

Flexible audio switching and level controls provided for transmit, receive, and VOX delay

Built-in Rig Control

Front panel LEDs show footswitch state, sequencer ports, squelch status, transmit, CW/FSK keying and sound card status
