USB operations

You can connect a USB mass storage class device (except HDD) to the unit.

This unit can play JPEG/MPEG Video/MP3/WMA/WAV tracks stored in a USB mass storage class device (such as a USB memory, Digital Audio Player, etc.).

1		Turn on the power.
2		Connect a USB device. All tracks will be played repeatedly until you change the source or disconnect a device.

Turn on the monitor to watch the playback picture if you play back an JPEG/MPEG file. You can also control playback by referring to the monitor screen. (See also pages 18 – 20.)

- See pages 15 – 21 for operation using the remote controller.

If “” appears on the monitor when pressing a button, the unit cannot accept the operation you have tried to do.

- In some cases, without showing “,” operations will not be accepted.

You can operate the USB device in the same way you operate the files on a disc. (See pages 12 – 21.)

If a USB device has been attached...

Playback starts from where it has been stopped previously.

- If a different USB device is currently attached, playback starts from the beginning.

Stop playing and detaching the USB device

Straightly pull it out from the USB input terminal.

- “NO USB” appears. Press /SOURCE to listen to another playback source.

Cautions:

- Avoid using the USB device if it might hinder your safety driving.
- While “READING” is shown on the display:
 - Do not pull out and attach the USB device repeatedly.
 - Do not pull out or attach another USB device.
- Do not start the car engine if a USB device is connected.
- This unit may not be able to play the files depending on the type of USB device.
- Operation and power supply may not work as intended for some USB devices.
- You cannot connect a computer to the USB input terminal of the unit.
- Make sure all important data has been backed up to avoid losing the data.
- Do not leave a USB device in the car, expose to direct sunlight, or high temperature to avoid deformation or cause damages to the device.

- Some USB devices may not work immediately after you turn on the power.
- The detect time and response time may be very long for some USB devices (such as Digital Audio Player, etc.).
- For more details about USB operations, see pages 29 and 30.

Listening to the other external components

You can connect an external component to the AUX (auxiliary) input jack on the control panel.

- For details, refer also to the instructions supplied with the adapter or external components.

Preparation: Make sure <AUX ON> is selected for the <SRC SELECT> → <AUX IN> setting, see page 27.

1		Select "AUX IN."
2	—	Turn on the connected component and start playing the source.

More about this unit

■ General

- If you turn off the power while listening to a disc, disc play will start automatically, next time you turn on the power.
- If you change the source, playback also stops (without ejecting the disc).
Next time you select **"DISC"** for the playback source, disc play starts from where it has been stopped previously.
- When a disc is inserted upside down, **"PLEASE"** and **"EJECT"** appear alternately on the display. Press **▲** to eject the disc.
- If the ejected disc is not removed within 15 seconds, the disc is automatically inserted again into the loading slot to protect it from dust. Playback starts automatically.
- After ejecting a disc or disconnect a USB device, **"NO DISC"** or **"NO USB"** appears and you cannot operate some of the buttons. Insert another disc, reconnect a USB device, or press **⏻**/**SOURCE** to select another playback source.
- If no operation is done for about 60 seconds after pressing **MENU** button or control dial, the operation will be canceled.

■ Tuner operations

Storing stations in memory

- During SSM search...
 - All previously stored stations are erased and the stations are stored anew.
 - When SSM is over, the station stored in the lowest preset number will be automatically tuned in.

Maintenance

How to clean the connectors

Frequent detachment will deteriorate the connectors. To minimize this possibility, periodically wipe the connectors with a cotton swab or cloth moistened with alcohol, being careful not to damage the connectors.

Connectors

Moisture condensation

Moisture may condense on the lens inside the unit in the following cases:

- After starting the heater in the car.
- If it becomes very humid inside the car.

Should this occur, the unit may malfunction. In this case, eject the disc and leave the unit turned on for a few hours until the moisture has evaporated.

How to handle discs

When removing a disc from its case, press down the center holder of the case and lift the disc out, holding it by the edges.

- Always hold the disc by the edges. Do not touch its recording surface.

When storing a disc in its case, gently insert the disc around the center holder (with the printed surface facing up).

- Make sure to store discs in cases after use.

To keep discs clean

A dirty disc may not play correctly. If a disc does become dirty, wipe it with a soft cloth in a straight line from center to edge.

- Do not use any solvents (for example, conventional record cleaner, spray, thinner, benzene, etc.) to clean discs.

To play new discs

New discs may have some rough spots around the inner and outer edges. If such a disc is used, this unit may reject the disc.

To remove these rough spots, rub the edges with a pencil or ball-point pen, etc.

Do not use the following discs:

Single CD (8 cm disc)

Warped disc

Sticker and sticker residue

Stick-on label

Unusual shape

C-thru Disc (semi-transparent disc)

Transparent or semi-transparent parts on its recording area

Troubleshooting

What appears to be trouble is not always serious. Check the following points before calling a service center.

	Symptom	Remedy/Cause
General	Sound cannot be heard from the speakers.	<ul style="list-style-type: none"> Adjust the volume to the optimum level. Make sure the unit is not muted/paused (see page 6). Check the cords and connections.
	The unit does not work at all.	Reset the unit (see page 3).
	"AUX IN" cannot be selected.	Check the <SRC SELECT> → <AUX IN> setting (see page 27).
FM/AM	SSM automatic presetting does not work.	Store stations manually.
	Static noise while listening to the radio.	Connect the antenna firmly.
	"AM" cannot be selected.	Check the <SRC SELECT> → <AM> setting (see page 27).
Discs in general	Disc cannot be played back.	Insert the disc correctly.
	Disc can be neither played back nor ejected.	<ul style="list-style-type: none"> Unlock the disc (see page 12). Eject the disc forcibly (see page 3).
	<ul style="list-style-type: none"> Recordable/Rewritable discs cannot be played back. Tracks on the Recordable/Rewritable discs cannot be skipped. 	<ul style="list-style-type: none"> Insert a finalized disc. Finalize the discs with the component which you have used for recording.
	Disc cannot be recognized.	Eject the disc forcibly (see page 3).
	Sound and pictures are sometimes interrupted or distorted.	<ul style="list-style-type: none"> Stop playback while driving on rough roads. Change the disc. Check the cords and connections.
	No playback picture (DVD-Video/DVD-VR/JPEG/MPEG/VCD) appears on the monitor.	Parking brake wire is not connected properly. (See Installation/Connection Manual.)

	Symptom	Remedy/Cause
Discs in general	No picture appears on the monitor at all.	<ul style="list-style-type: none"> • Connect the video cord correctly. • Select a correct input on the monitor.
	The monitor shows black and white wavy pictures (DVD-Video/DVD-VR/JPEG/MPEG/VCD).	Select an appropriate video format (PAL/NTSC) for your monitor (see page 26).
	The left and right edges of the picture are missing on the monitor.	Select "4:3 LETTERBOX" (see page 21).

	Tracks cannot play back as you have intended them to play.	Playback order is determined when files are recorded.
	Longer readout time is required.	Readout time varies due to the complexity of the folder/file configuration. Do not use too many hierarchies and folders.
	No sound can be heard when picture is displayed while playing a MPEG Video file.	Record the audio track using MPEG1 Audio Layer 2 as the audio stream for MPEG Video files.
	Elapsed playing time is not correct.	This sometimes occurs during playback. This is caused by how the tracks are recorded.
