TRAXXAS® 1/8 SCALE NHRA® FUNNY CAR RACE REPLICA

70+ mph

WHAT'S IN THE BOX:

Traxxas Funny Car, Ready-To-Race® with Traxxas ET-3s Power System, full color Owner's Manual, quality tool set, and 4-channel TQi™ 2.4GHz radio system.

Included Radio System!

- 4-channels
- Torque Control
- Launch Control switch
- Traxxas Link™
- Steering/throttle Sensitivity
- Steering/braking Percentage
- Simple 2-button programming interface
- Servo reversing
- Endpoint adjustment
- Built in failsafe
- Internal antenna
- Direct sequence spread spectrum technology
- Uses only 4 AA batteries

2.4 GHz

Compatible with your iPhone or iPod touch and real-time telemetry with the TQi Docking Base (sold separately)

WHAT YOU'LL NEED TO RUN YOUR MODEL:

Sold separately at your hobby dealer.

POWER CELL BATTERIES

Description	Item #	Gearing	Speed	Skill Level
7-Cell Series 4 NiMH	2851	14/68	40+mph	1
2S 3300 mAh LiPo	2840	14/68	40+mph	5**
2S 4000 mAh LiPo	2841	20/68*	50+mph	5**
3S 4000 mAh LiPo	2849	14/68	60+mph	5**
3S 6400 mAh LiPo	2857	20/68*	70+mph	5**

*Optional gearing (sold separately)

**Ages 16 and under should not use LiPo batteries without adult supervision. Please follow all manufacturer's battery usage warnings and instructions.

IMPORTANT! THIS PRODUCT IS NOT DESIGNED FOR CHILDREN OR MINORS YOUNGER THAN 14 YEARS OLD. RESPONSIBLE ADULT SUPERVISION IS REQUIRED DURING OPERATION AND MAINTENANCE.

The Traxxas Funny Car is a high-performance model which is NOT intended for use on public roads or in congested areas where its operation may conflict with or disrupt pedestrian or vehicular traffic. Read all enclosed information before operating. Fully illustrated, step-by-step instructions describe adjustment, operation, and required maintenance procedures. The Traxxas Funny Car should not be operated in a crowd, indoors or without

adequate space. The vehicle is fully assembled, ready to run, and requires the following items for operation: NiMH, or LiPo Battery pack, charger, and 4 AA alkaline batteries. These are available from your hobby dealer. In an effort to continually upgrade our products, Traxxas reserves the right to make improvements and modifications to this model, which may not be reflected in the photographs and specifications printed on this box. Battery and charger style subject to change and may vary from photos.

This product is protected by the following: US patent Nos. 7,534,170; 7,374,460; 7,530,855; 7,867,038; D573,536; D576,557

TRAXXAS®

THE FASTEST NAME IN RADIO CONTROL®

COURTNEY FORCE EDITION

Courtney Force is new to professional drag racing, but for drag-racing fans, the name "Force" needs no introduction. With 17 NHRA Championships attributed to John Force Racing, and 15 of those won by John Force himself, "John Force Racing" is more than a man or a team, it's a dynasty. With drag racing as the backdrop of her childhood and an insatiable desire for speed in her DNA, daughter Courtney Force is ready to carry the Force name on to more NHRA championship victories.

Courtney earned her NHRA competitor's license in 2005 and has been on course to a fulltime racing career ever since...and she is taking The Funny Car class in NHRA by storm in her Traxxas Ford Mustang Funny Car. Courtney impressed her fans and fellow drivers (including

father John Force) with her solid debut at the 2012 NHRA Winternationals. Her performance made her only the second of eight Funny Car drivers at John Force Racing to snag a first round win during their debut event.

Courtney followed up her debut with another strong showing at the NHRA Arizona Nationals, achieving a sub 4.10 second run at over 300 mph in the process. Now a proven competitor who will only improve with experience, Courtney is well on her way toward her goal of winning the 2012 NHRA Rookie of the Year award.

Traxxas is proud to be on board with Courtney as she carries **The Fastest Name In Radio Control** along for the fastest ride in motorsports.

TQi 2.4GHz Intelligent Radio System

The World's Most Advanced Radio System

The Traxxas Funny Car is equipped with the TQi, the world's most advanced Ready-To-Race radio system. The radio system is the sole connection between the driver and machine and the all-new Traxxas TQi has been engineered to be precise, comfortable, powerful, and reliable. The TQi radio system arrives with a full complement of tuning features including steering and throttle sensitivity; steering percentage; braking strength; servo end points, and more. The unique 4-channel transmitter allows you to select Burnout, Staging, and Race Modes. When you're ready to pull the trigger and race, the Launch Control switch lets you hold full throttle and flip the switch to launch. Use the multi-function knob to dial in the ET-3S speed control's torque settings for the quickest launches. Tune for temperature and track conditions just like the pro's. TQi long-range, high-output, 2.4GHz signal combines with proven Traxxas reliability for rock-solid performance. It's so advanced, it doesn't even need an external antenna.

Features:

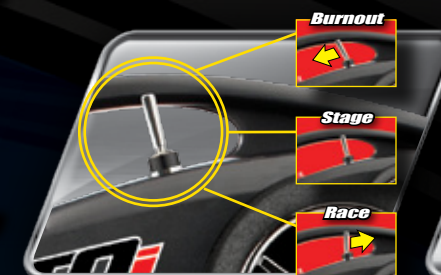

- 4-channels
- Torque Control
- Launch Control switch
- Traxxas Link™
- Simple 2-button programming interface
- Steering/throttle Sensitivity
- Steering/braking Percentage
- Servo reversing
- Endpoint adjustment
- Built in failsafe
- Internal antenna
- Direct sequence spread spectrum technology
- Uses only 4 AA batteries

1/8 SCALE NHRA® FUNNY CAR RACE REPLICAS

Experience the Speed, Power, and Adrenaline of NHRA Drag Racing in 1/8 Scale

Over The Top Brushless Horsepower

NHRA Funny Cars are famous for their fire-breathing 8000 horsepower engines that deliver massive thrust and propel them to speeds over 300mph in just 4-seconds. When the light goes green, the new ET-35 brushless power system responds in an instant and unloads a massive blast of Extreme Power that rockets the Traxxas NHRA Funny Car to the finish line. There are no brushes to wear out so you can dial in consistent times and blazing speed, pass after pass. Traxxas' exclusive staging mode (patent pending) allows the Traxxas Funny Car to creep into the stage beams of the DTS-1 Timing System (sold separately) allowing you to execute authentic starting line strategy against your opponent.

Traxxas High-Current Connector

Cubic-inch for cubic-inch, no motorsport offers as much sheer power and performance as NHRA drag racing. A single funny car produces more horsepower than the first 8 rows of cars in a stock-car race. Drivers pull more than five Gs when they launch, accelerating faster than a fighter jet. Over 300mph is achieved in about the time it takes to read this sentence.

The Traxxas NHRA Funny Car Race Replica brings it all to life the Traxxas way with outrageous horsepower, intense speed, and the unmatched realism and authenticity that only comes from being both fans and dedicated participants in NHRA drag racing. The Traxxas NHRA Funny Car accurately captures the total racing experience with realistic staging action on the start line. After your burnout, shake up your opponent by being the last one to roll into the stage beam. When the lights go green, release the launch control for a perfect reaction time. You've already set your wheelie bar and used the multi-function knob on your transmitter to fine-tune the launch for maximum traction and acceleration. From there, it's up to you to keep it full throttle down the track and across the finish line.

Off the track, the realism continues with tilt-up licensed bodies developed from the full size CAD drawings, tube style chassis, super-sticky belted slicks, and accurate detailing. The front latch eliminates body clips for fast access to the battery compartment. A full suspension was engineered to give the Traxxas Funny Car the ability to handle the ruts and bumps of real world track surfaces. Combined with the Traxxas DTS-1 drag timing system and the Traxxas Link application on your TQi Docking Base (all sold separately), Traxxas drag racing becomes a full-on simulation with timing so accurate, races are won and lost by a millisecond. Only Traxxas could bring this level of intense racing competition and all-out fun together in such a tightly engineered package.

**Goodyear
High-Performance
Belted Slick Tires**

Specially formulated rubber compound responds as expected to burnouts and heating for harder launches. The Traxxas Funny Car's slick tires are specially designed for superior traction and high-rpm durability. The unique belt material and proprietary gluing process limits tire expansion and ensure a reliable tire/rim bond, run after run.

**Direct-Drive
Transmission With
Sealed Differential**

The direct-drive transmission uses a single gear mesh to transfer power and torque from the motor to the drive axle with total efficiency. The axle incorporates a sealed-silicone filled differential tuned specifically for drag racing. Equal length axles ride on smooth efficient ball bearings.

Hex Hardware

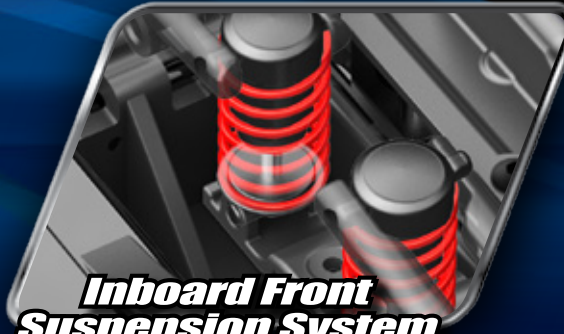

Black-Chrome Chassis

Enclosed Receiver Box

Waterproof Steering Servo

Ball Bearings

Authentic Chrome Finish Front Wheels

**Inboard Front
Suspension System**

Independent front suspension with oil-filled coilover shocks maintains precise control over real-world racing surfaces that aren't always perfectly smooth.

Full Rear Suspension

The Traxxas Funny Car utilizes a fully suspended solid rear axle to optimize the geometry for maximum traction and thrust. Pickup points, pre-load, and roll stiffness are fully adjustable for perfect trackside tuning.

Oil-Filled GTR Shocks

The Traxxas Funny Car's super-smooth oil-filled shocks damp the suspension and maintain control. They are fully tuneable and include pressure bladders for air/oil separation and threaded spring pre-load collars for quick ride height adjustments.

**Quick-Release
Battery Hold Down**

Battery changes are fast and easy with the Traxxas Funny Car's quick-release battery hold down. Out of the box, the tray holds 6-cell NiMH packs and select Traxxas Power Cell 2S and 3S LiPo packs; an optional battery clip permits 7- and 8-cell NiMH packs and extra-high capacity Power Cell 2S and 3S LiPo packs to be installed. *Batteries not included.*

* See end panel for details.

TQi DOCKING BASE

The TQi radio system is Docking Base ready so that you can use your iPhone or iPod and Traxxas Link (available on the App Store) to capture all the nuances of Pro competition.

Traxxas link also works with the DTS-1 to fill in your time slip with reaction time, elapsed time, and miles per hour. Keep a run history on each of your models. Share time slips and set up races with your friends--Traxxas Link runs the race and fills in the brackets for you. Any two cars can compete fairly, regardless of their top speeds! Race like the pros, using staging strategy to pressure your opponent. Only Traxxas makes drag racing so easy, accurate, fast, and fun!

DTS-1 TIMING SYSTEM

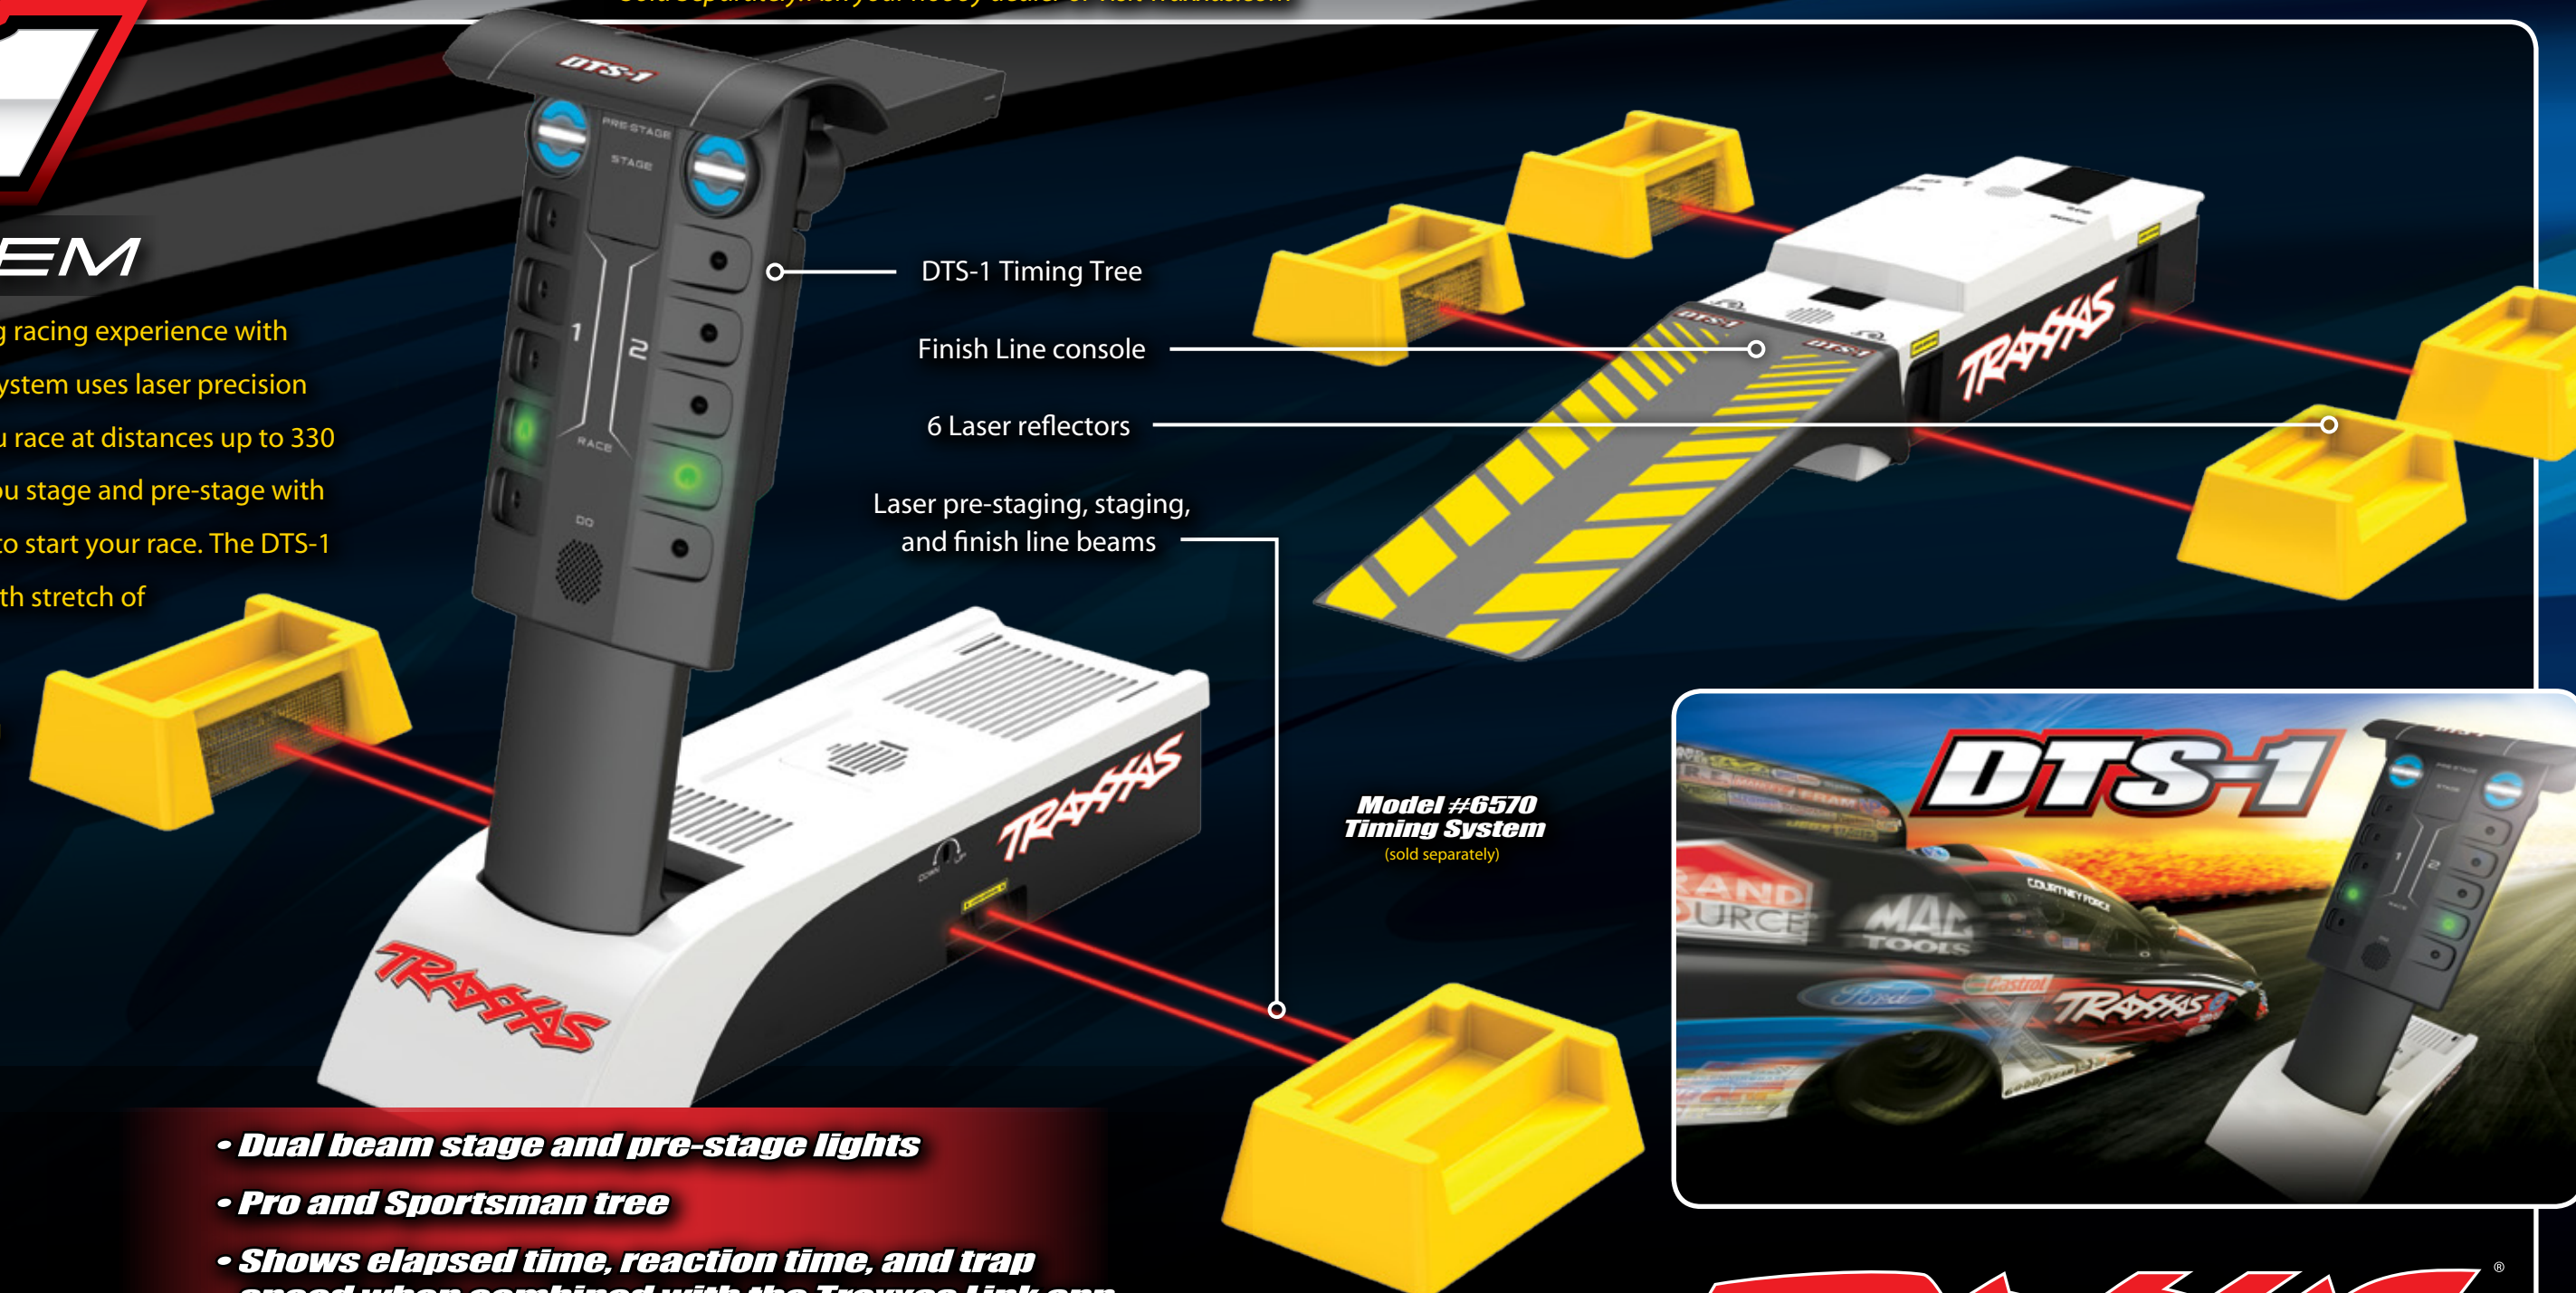

Traxxas brings intense competition and hours of fun to the drag racing experience with authentic timing and scoring. The Traxxas DTS-1 Drag Timing System uses laser precision to determine the winner with millisecond precision and lets you race at distances up to 330 feet (a quarter-mile, in 1/4 scale). Dual starting line beams let you stage and pre-stage with pinpoint accuracy. Select the Sportsman or Pro light sequence to start your race. The DTS-1 is completely portable and sets up in minutes to turn any smooth stretch of asphalt into your personal dragstrip!

When combined with the Traxxas Link app and the TQi docking base, the DTS-1 reports reaction times and elapsed times with millisecond accuracy and trap speeds in tenths of a mph.

Pro-Level Staging & Timing

- Laser precise dual-beam staging and speed trap
- Race up to 330 feet (quarter-scale 1/4 mile)
- Authentic light system
- Simple pushbutton operation
- High-intensity LEDs
- Portable, with easy and fast setup
- Compatible with the Traxxas Link app and TQi Docking Base

- **Dual beam stage and pre-stage lights**
- **Pro and Sportsman tree**
- **Shows elapsed time, reaction time, and trap speed when combined with the Traxxas Link app.**
