AMKOR new and additional SO8N assembly & test line for CMOSF8H+ Industrial Range EEPROM

What is the change?

The EEPROM products (industrial range) processed with CMOSF8H+ process technology at ST Rousset (France) and assembled/tested in SO8N package at ST Shenzhen (China) will be also assembled/tested on new AMKOR *extra high density lead frame* (XDLF) assembly line (also using 0.8 mil Copper bonding wire).

Why?

The strategy of STMicroelectronics Memory Division is to support our customers on a long-term basis. In line with this commitment, the qualification of the AMKOR new XDLF SO8N assembly line for the EEPROM products (industrial range) in CMOSF8H+ will increase the production capacity throughput and consequently improve the service to our customers.

When?

The production of the EEPROM (industrial range) in CMOSF8H+ on the new XDLF SO8N assembly line at AMKOR will ramp up from middle of May 2014 and shipments can start from middle of June 2014 onward (or earlier upon customer approval).

How will the change be qualified?

The EEPROM products (industrial range) in CMOSF8H+ assembled on the new XDLF SO8N assembly line at AMKOR will be qualified following the standard ST Microelectronics Corporate Procedures for Quality & Reliability.

Qualification Plan QPMMY1304 is included inside this document.

What is the impact of the change?

- **Form:** Marking change
- **Fit:** No change
- **Function:** No change

How can the change be seen?

- BOX LABEL MARKING

On the BOX LABEL MARKING, the difference is visible inside the **Finished Good Part Number** where the “**Assembly and Test & Finishing plants**” identifier is “**X**” for products assembled on XDLF line at **AMKOR**, this digit being “**H**” for current products assembled at ST Shenzhen. Also **Country of origin** will change from China to **Philippines**. In the **Trace code**, the identifiers for “**Assembly country & plant**” and “**Test & Finishing country & plant**” will change from “**GK**” to “**7B**”.

How can the change be seen?

- SO8N DEVICE MARKING

The difference is visible inside the Trace Code *PYWWT* (*) where the first digit *P* for *Assembly plant* is “**B**” for AMKOR, this digit being “**K**” for current ST Shenzhen assembly plant.

Appendix A- Product Change Information

Product family / Commercial products:	EEPROM (industrial range) in SO8N / CMOSF8H+
Customer(s):	All
Type of change:	New assembly line
Reason for the change:	Second source creation
Description of the change:	AMKOR subcontractor (Philippines) new assembly line for all EEPROM (industrial range) in SO8N / CMOSF8H+
Forecast date of the change: (Notification to customer)	Week 12 / 2014
Forecast date of <u>Qualification samples</u> availability for customer(s):	See Appendix B
<u>Qualification Report</u> availability:	Qualification Plan QPMMY1304 is included inside this document
Marking to identify the changed product:	First digit of date code is "B" when last is "T".
Description of the qualification program:	Standard ST Microelectronics Corporate Procedures for Quality and Reliability
Product Line(s) and/or Part Number(s):	See Appendix B
Estimated date of first shipment:	Week 26 / 2014

Appendix B: Concerned Commercial Part Numbers:
