OUR CONTINUING CREED

is that of serving Tektronix customers with products and policies that are unexcelled in the electronics industry and limited only by the current state of the art.

TEKTRONIX INC.

About the Company...

Tektronix was organized in 1946 to manufacture cathode-ray oscilloscopes. To an unusual degree, Tektronix oscilloscopes have met with the approval of the ultimate user, enabling the company to grow by expanding its product lines and services.

Throughout this continuing growth period Tektronix is striving to produce instruments with the quality and utility demanded by the fast-moving electronic industry. High employee morale, fostered by an employee-management relations program that gives employees a voice in company operations, a fair share of company profits, and steady year around employment, contributes greatly to this aim.

Realizing the complexity of the modern cathode-ray oscilloscope, Tektronix continually strives to provide the best in field maintenance help, and the utmost speed in replacement parts service. Helping to keep existing Tektronix instruments in efficient operation is as much a responsibility as developing new instruments to meet the future needs of the industry. Tektronix is making every effort to continue serving its customers with the highest quality in both product and service.

Tektronix, Inc., an Oregon Corporation, Beaverton, Oregon, U.S.A.

DEFINITION OF TERMS

(Parts Price List Pages)

PART NUMBER	Tektronix Part Number. If number does not appear herein contact your Tektronix Field Engineering Office.
DESCRIPTION	Self-explanatory. NOTE: This will appear on invoice copies exactly as shown on part number line. 2nd line does not print out on invoice. NOTE: For explanation of abbreviations consult ABBREVIATIONS SECTION. NOTE: Numerical figures are ohms on electrical components unless otherwise designated.
PRICE	Selling price to our customers.
UNIT	UNIT is each unless otherwise specified and applies to price not to description of unit package contents. For convenience, bulk measurements, ft., oz., etc. are specified to indicate price per unit.
FEDERAL STOCK NUMBER	System that is used by U.S. Government procurement agencies. 1st group of four digits is management prefix code, 2nd group of four digits is federal supply classification, 3rd group of three digits and 4th group of four digits are federal item identification numbers, and 5th group of four digits is management suffix code. Management prefixes and suffixes very seldom appear. NOTE: No federal stock number will be listed unless officially assigned.
MFG. CODE	MANUFACTURER'S CODE is a five-digit numerical code assigned to a specific manufacturer based on Federal Manufacturer's Code system. NOTE: See cross indexes enclosed herein (or Federal Cataloging Handbook H-4) for conversion. NOTE: When asterisk and initials of manufacturer are used in this column, numerical code has not yet officially been assigned. NOTE: When more than one supplier exists, a typical manufacturer has been shown.
MANUFACTURER'S PART NUMBER	Self-explanatory. NOTE: Commercial hardware and similar items may be shown by description if there is no manufacturer's part number and the item is generally available from local sources.
WEIGHT	This is a pre-pack weight in pounds and ounces of item. Pre-pack weights are not full shipping weights as they do not include final shipping containers. NOTE: When "00" is shown in oz. column, item pre-pack weight is less than 1/2 oz.

GENERAL INFORMATION

ORDERING PROCEDURES FOR THE UNITED STATES

Orders, Terms and Shipment

Orders should be placed with your Tektronix Field Engineering Office listed on the next page.

For domestic orders, placed in accordance with the normal Tektronix marketing practices, our terms are net thirty days. Shipping delay may be prevented by establishing credit at the time of placing your order. When desirable, COD shipments can be arranged. Normally all prices and quotations are f.o.b. Beaverton, Oregon.

Unless otherwise specified on your order, shipment will be made via most economical method. If a carrier is specified, shipment will be made at full valuation unless your order instructs differently. In case air shipment and full valuation are desired, please specify whether Air Express or Air Freight. Lacking specification, Air Freight and full valuation will be chosen.

Delivery

Acceptance of purchase orders is indicated by our acknowledgement, and estimated shipment time is given from date of acknowledged acceptance. Every effort is made to meet the estimated shipment date, but there is the possibility that circumstances beyond our control might make it impossible to meet the quoted schedules.

Field Maintenance

To help assure adequate instrument-maintenance facilities for our customers, Tektronix has established Field Engineering Offices and Repair Centers at strategic points in the United States. Those offices having fully equipped instrument repair shops are identified on the next page by a dot (•). Your own Tektronix Field Office will process all orders for repair parts promptly, and provide emergency parts service when needed to restore an instrument to operating condition. Your Field Office will also arrange for fast service with necessary recalibration or repair work on your instruments at nearby Repair Center.

Tektronix repair and replacement-part service is geared directly to the field, therefore all requests for repairs and replacement parts should be directed to the Tektronix Field Office or Representative in your area. This procedure will assure you the fastest possible service. **Please include instrument Type number and Serial number with all requests for parts or service.**

It is standard practice for Tektronix to incorporate improvements in production instruments as they are developed in our laboratories. When it is feasible to add such improvements in the field, modification kits are made available to those who wish to modernize their own instruments. Ask your Field Engineer about possible modifications for your older instruments.

Warranty

All Tektronix instruments are warranted against defective materials and workmanship for one year. Tektronix transformers, manufactured in our own plant, are warranted for the life of the instrument.

Any questions with respect to the warranty mentioned above should be taken up with your Tektronix Field Engineer.
