OBSERVATION 2

Procedures designed to prevent microbiological contamination of drug products purporting to be sterile are not established.

Specifically,

A. Your media fill process simulations are not performed under the most stressful or challenging conditions. For example, protocol #(b) (4) entitled, "(b) (4) Operator Media Fill Qualification" dated 11/16/15 describes, in part, that (b) (4). However, your firm has produced lots of Oxytocin (b) (4) (i.e. (b) (4)), lot #13472-0, Quantity: (b) (4).

OBSERVATION 3

Aseptic processing areas are deficient regarding the system for monitoring environmental conditions.

Specifically,

SOP #103-06.02 entitled, "Surface Sampling Procedure" (Effective date: 5/22/14) documents, in part, that surface sampling will be performed (b) (4). Review of monitoring records revealed that sampling was routinely performed (b) (4) and not (b) (4). Environmental monitoring is not done during production.
