## The mPower study, Parkinson disease mobile data collected using ResearchKit

Brian M. Bot, Christine Suver, Elias Chaibub Neto, Michael Kellen, Arno Klein, Christopher Bare, Megan Doerr, Abhishek Pratap, John Wilbanks, E. Ray Dorsey, Stephen H. Friend & Andrew D. Trister

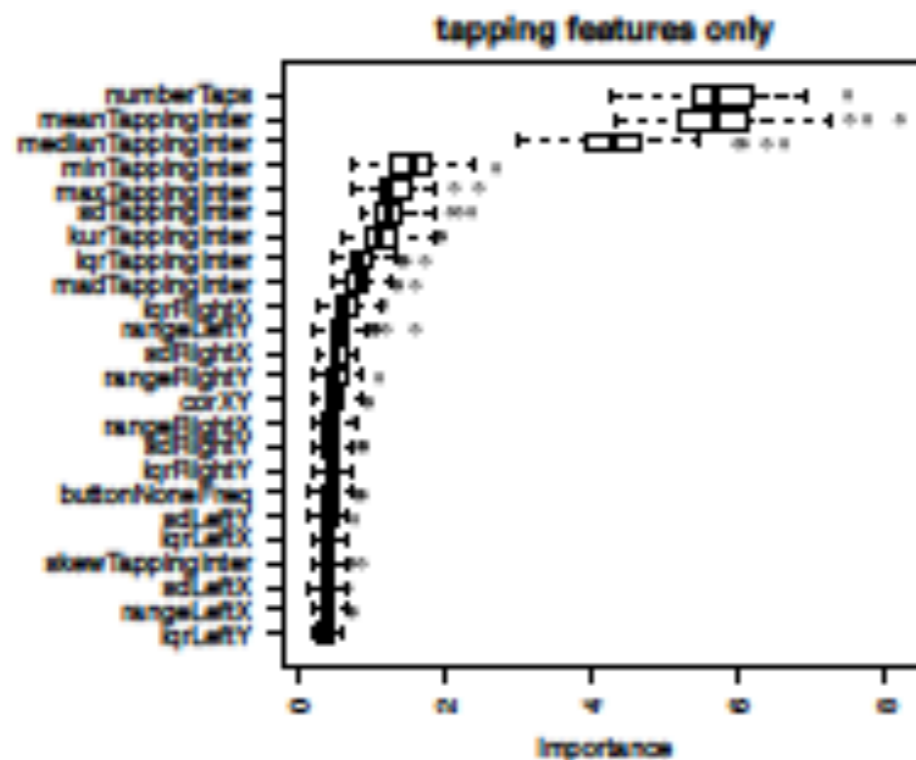

data generation

# high-dimensional data

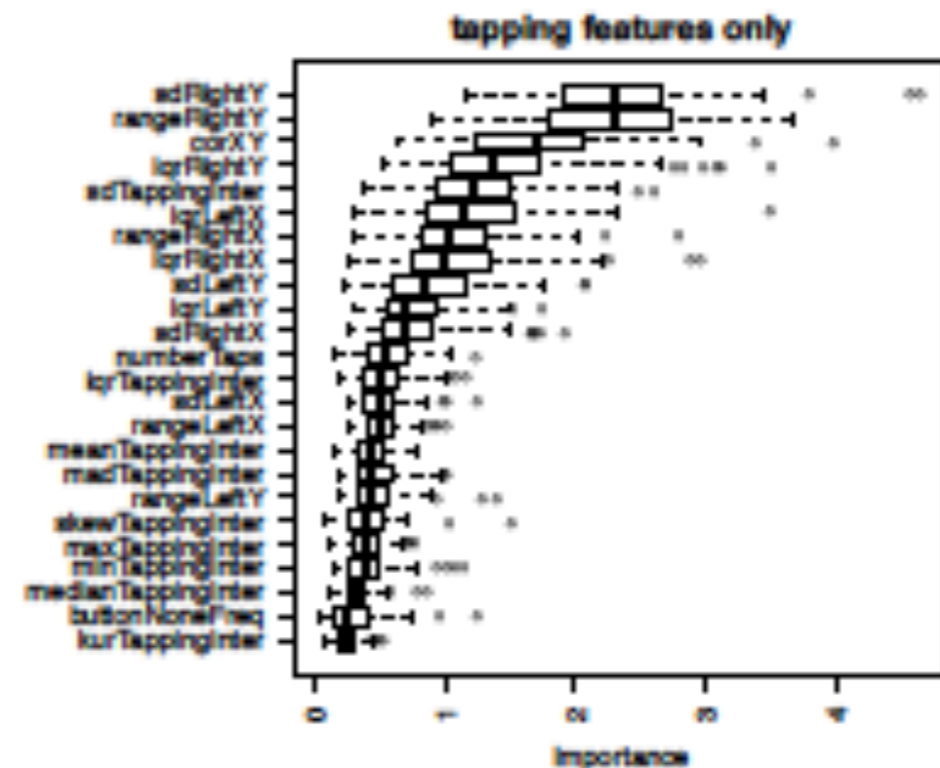

Traditional Measures	First-order Features
Number of Taps	Number of taps, Mean tapping interval, Median tapping interval, Minimum tapping interval, maximum tapping interval, Standard deviation of tapping interval, Kurtosis of tapping interval, Interquartile range of tapping interval, Interquartile range of right button X, Range right button X, Standard deviation right button X, Interquartile range of left button X, Range left button X, Standard deviation left button X, Interquartile range of right button Y, Range right button Y, Standard deviation right button Y, Interquartile range of left button Y, Range left button Y, Standard deviation left button Y, Correlation X and Y, Skew tapping interval, No-button tapping frequency

# same medicine, different impacts

Number of Taps  
Mean Tapping Interval  
Median Tapping Interval

62 y old Man

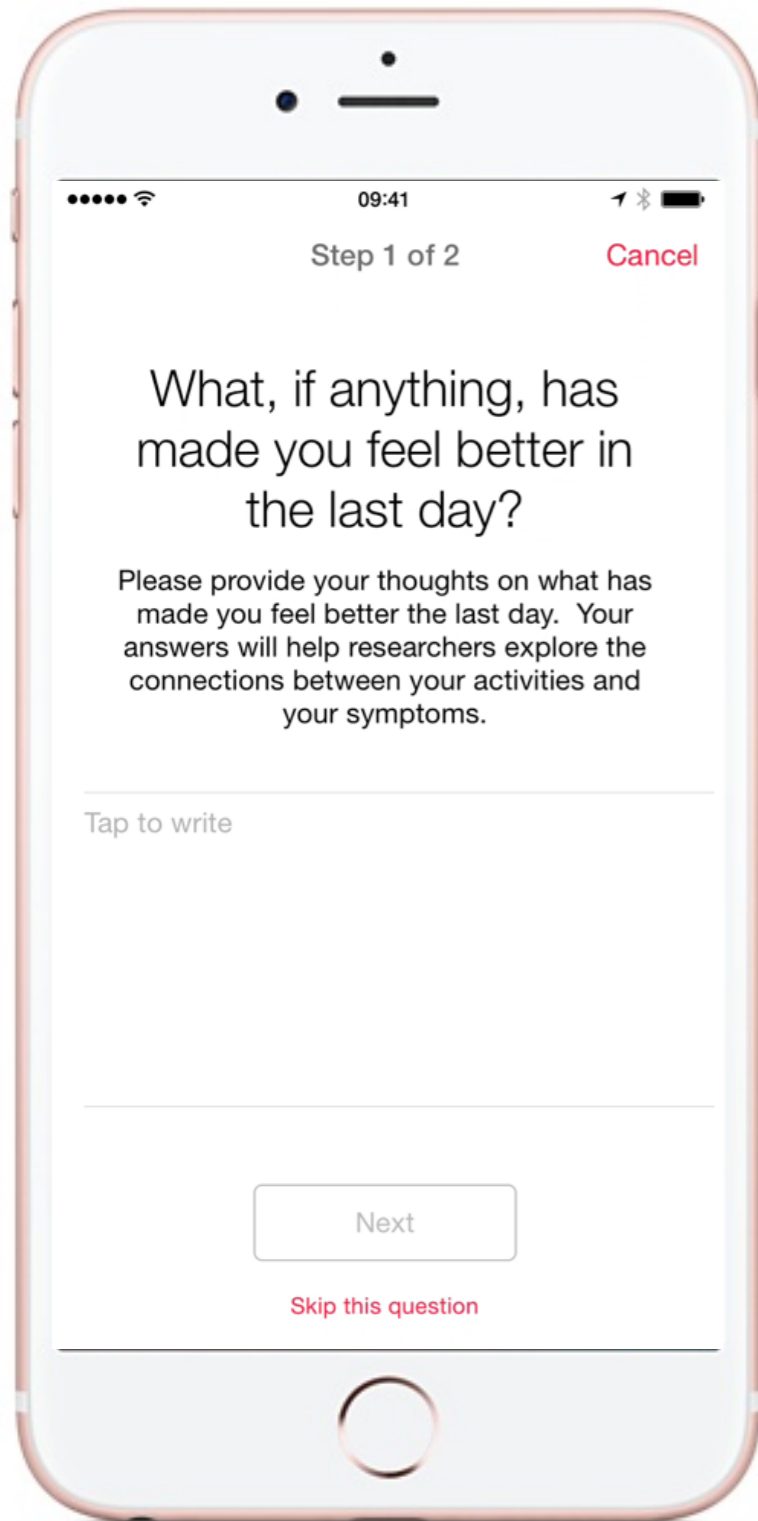

Standard Deviation R Y  
Range Right Y  
Correlation X Y

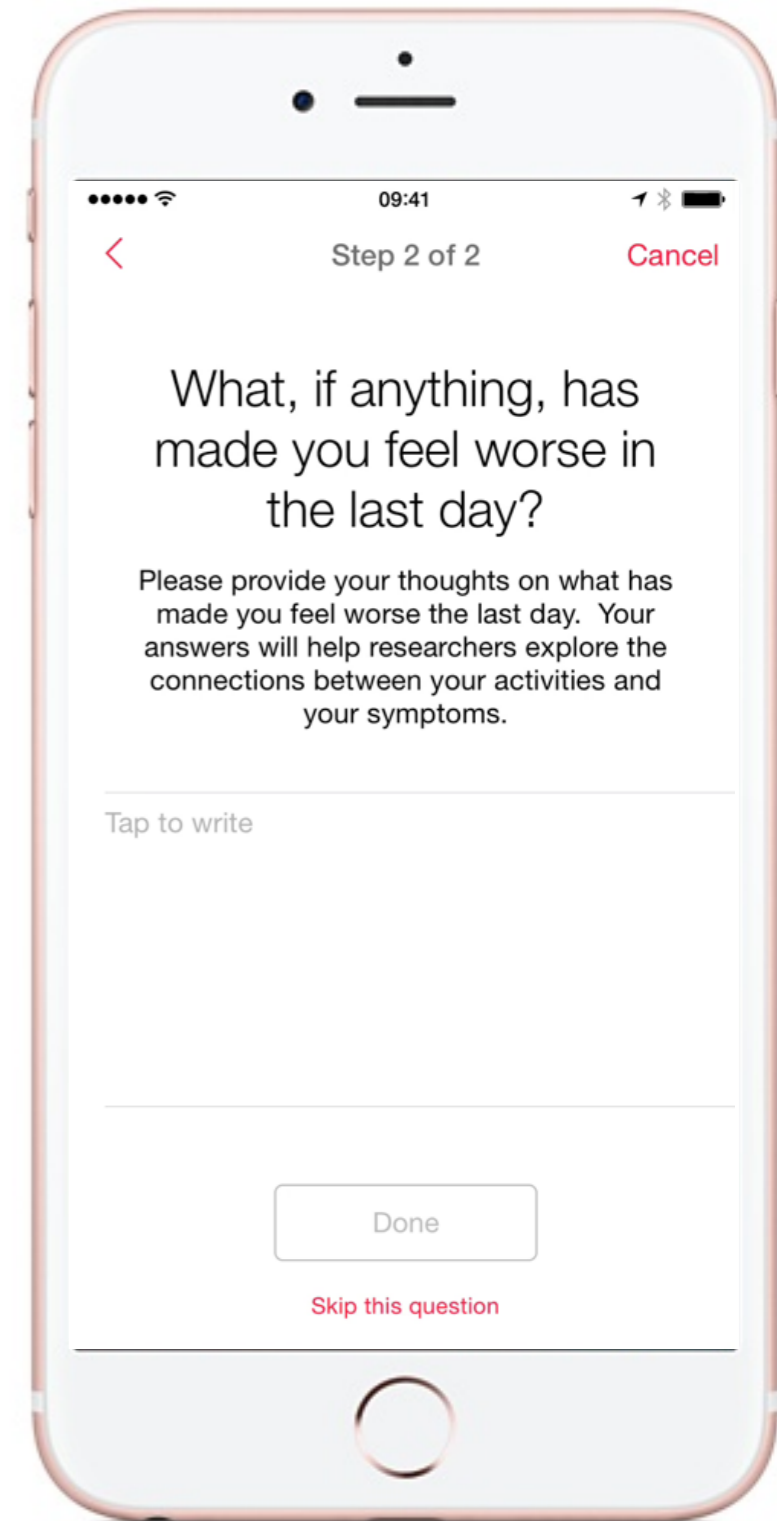

67 y old Woman

# tapping number shows effects of medication and daily variation

# sharing personal thoughts on day-to-day changes

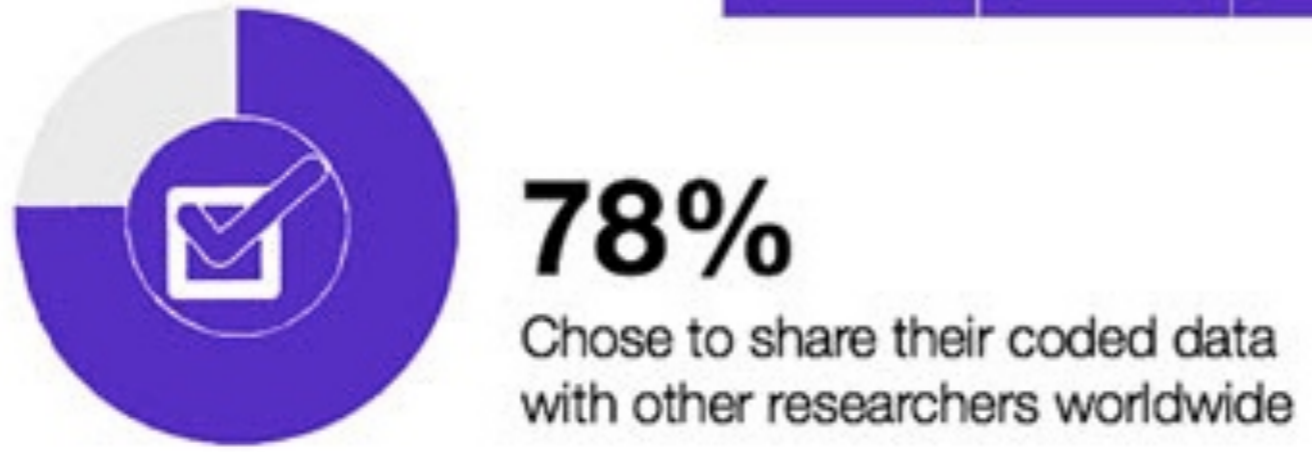

“Doing this is a lot of work. Send us an email now and then to let us know how it's going.”

“If you depend on us to partner with you in research, it would be good To give us feedback. ...Could you provide summary trend reports in plain language...”

# thank you for joining the mPower community

working together to better manage the symptoms of Parkinson Disease

---

We have **heard** your **feedback!**

## Future Independent Research

Your coded study data is valuable. In addition to this study, it could be used for other research. You get to decide whether or not to share your data for other research. These screens explain more about this option.

[Learn more](#)

Cancel

# Qualified Researchers

With your permission, we will share your coded study data with qualified researchers worldwide. We have rules to qualify researchers. However, we do not control the research that they do with the shared data.

[Learn more](#)

Cancel

# Sharable Data

Only coded study data are sharable. Coded study data do not include your name or email address. A random code is used instead.
