Kangaroo™: The complete enteral feeding solution

Quality products from the leader in innovative enteral feeding pump technology

Nutritional Delivery Products

The Kangaroo™ portfolio offers a safe, innovative and complete line of enteral feeding products for use across the continuum of care. The Kangaroo™ brand has a long history of providing reliable and trusted products for clinicians and caregivers to optimize clinical efficiency. Our high-performing products are preferred by both clinicians and procurement professionals.†

Transitioning to ENFit®? Be sure to note the product description throughout the catalog for ENFit® design. Where applicable, the ENFit® version of the code is listed next to the non-ENFit® version of the code for ease of reference during a conversion.

American Society of Parenteral and Enteral Nutrition (ASPEN) 2016 Clinical Guidelines[§]

ASPEN developed standards of practice for nutrition support. The clinical guidelines include:

- Nutrition support therapy in the form of early enteral nutrition (EN) should be initiated within 24 to 48 hours in the critically ill patient who is unable to maintain volitional intake.
- Enteral feeding protocols should be designed and implemented to increase the overall percentage of goal calories provided.
- Feeding tubes should be flushed with water after each feeding and medication administration, in between medications and every four hours during a continuous infusion.
