

## Speed Brew Quick Start Guide

**IMPORTANT!**  
DO NOT PLUG IN  
COFFEE MAKER  
UNTIL STEP 5!

Before brewing, hot water  
taps must be full & heated  
to correct temperature.

**1** Slide empty brew funnel  
into funnel guides as shown.

**2** Fill carafe with cold water.  
Spin to Rapid spin and pour  
water in coffee maker. Position  
carafe on base below brew  
funnel. Close lid and wait  
4 minutes while internal tank  
partially fills.

**3** Open the coffee maker lid. Remove  
the carafe and fill with cold  
water again. Pour water into  
coffee maker. Position carafe on  
base below brew funnel. Close lid.

**4** Wait until water flows from  
the brew funnel. If any water  
flows, the tank is full. Pour out  
water that has collected in carafe.  
NOTE: It takes two full carafes  
to fill the internal hot water  
tank completely.

**5** Plug in the coffee maker.

**6** To turn the coffee maker on, press  
the tank power switch located  
on the side. Wait 10 minutes for  
water in tank to heat.

Coffee maker is now ready to brew.
