SOUTH DAKOTA

## MAP KEY

 Fixed Wireless Coverage

Current service locations as of August 2020. Additional service areas are planned to be added in 2020 and 2021. Service coverage requires connectivity to a Midco fixed wireless tower. A professional Midco technician will visit your home to locate the best signal with the intention of performing a full install. However, if we are unable to get a proper signal to your location, there will be no cost or obligation to you. Services may not be available in all areas, and some restrictions apply. Contact us or call 1.800.888.1300 to check serviceability.
