Miniature Solenoid Valves

Precision Fluidics

ENGINEERING YOUR SUCCESS.

Innovative solutions for health care success

ENGINEERING **YOUR** SUCCESS.

When you partner with the global leader in motion and control technologies, expect to move your business and the world forward. From miniature solenoid valves to highly integrated automation systems, our innovations are critical to life-saving medical devices and scientific instruments used for drug discovery and pathogen detection. Not to mention, critical to decreasing time to market and lowering your overall cost of ownership. So partner with Parker, and get ready to move, well, anything.

X-Valve[®] Miniature Pneumatic Solenoid Valve

8 mm Solenoid Valve

Applications

- Portable Equipment
- Blood Pressure Monitoring
- Wound Therapy
- Air and Oxygen Delivery
- Sensor Zeroing

Product Specifications

Mechanical

Valve Type:
3-Way, Solenoid-actuated poppet style - Universal (6 psig & 30 psig models) - Normally Closed (100 psig model) 2-Way Solenoid-actuated poppet style - Normally Closed, Bidirectional Flow (6 & 30 psig models) - Normally Closed, Directional Flow (100 psig model)
Media: Non-Reactive gases
Operating Environment: 32 to 122°F (0 to 50°C)
Storage Temperature: -40 to 158°F (-40 to 70°C)
Dimensions: - Length: 0.92 in (23.4 mm) - Width: 0.31 in (7.9 mm) - Height: 0.48 in (12.2 mm) to Barb End / 0.35 in (8.9 mm) to Manifold Face
Spacing: 0.315 in (8 mm) center
Porting: - Barbs for 1/16 in (1.5 mm) I. D. Tubing, (1/32 in Wall Max.) - Manifold Mount (Gasket accessory required, see ordering info)
Weight: 0.16 oz (4.5 g)
Internal Volume: 0.0056 in ³ (0.092 cm ³)

The X-Valve[®] is a miniature pneumatic solenoid valve measuring only 8 mm in width. The compact size, light weight and low power consumption of the X-Valve[®] is the ideal solution for portable applications and those applications with limited space and available power. The body construction of the X-Valve[®] is suited for manifold or barbed-tube pneumatic connections and is available in 2-way normally closed and 3-way universal configurations.

Features

- Direct PC and side-to-side mounting enables compact and efficient system design
- Large range of pressure options (6, 30 and 100 psi) to meet various application requirements
- Light weight valve construction is ideal for portable applications
- Available low power model (0.5 Watt) for continuous duty applications
- RoHS compliant 

Electrical

Power Options: 0.5 Watt (6 psig model) 1.0 Watt (30, 100 psig model)
Voltage Options: 3, 5, 12 or 24 VDC Further power reduction may be achieved through the use of spike and hold or PWM electrical control.
Electrical Connections: PC Pins, 4 mm centers (all models) Lead Wire/Connector Assembly (Accessory, see ordering info)

Wetted Materials

Bobbin/Body: PBT (Polybutylene terephthalate)
Pole & Plunger: 430 FR Series Stainless Steel
Seal (Options): FKM, EPDM, Silicone
Other: 302 Series Stainless Steel

Performance Characteristics

Leak Rate: Tested with Air <0.016 sccm (6 psig Silicone) <0.016 sccm (30 psig FKM) <0.16 sccm (6 psig EPDM & FKM) <0.2 sccm (100 psig only)
Response: < 20 ms maximum cycling (FKM, Silicone) < 50 ms maximum cycling (EPDM)
Pressure/Vacuum: 0 to 6 psid (0.4 bar differential) 0 to 30 psid (2.0 bar differential) 0 to 100 psid (6.9 bar differential)
Proof Pressure: 200 psig (13.7 bar)
Minimum Flow: 4 slpm @ 6 psid (0.4 bar differential) 6 slpm @ 30 psid (2.0 bar differential) 9 slpm @ 100 psid (6.9 bar differential)
Orifice Sizes/Equivalent Cv: 0.045" (1.14 mm) / 0.018 0.030" (0.75 mm) / 0.010 0.020" (0.5 mm) / 0.005
Reliability: Life Cycle rating of 25 million (worst case tested, no performance degradation)

X-Valve is a registered trademark of Parker Hannifin Corporation.

Series LX-Valve Miniature Latching Pneumatic Solenoid Valve

8 mm Latching Solenoid Valve

The Series LX-Valve is a miniature latching pneumatic solenoid valve measuring only 8 mm in width. The compact size, light weight, and power saving latching feature of the Series LX-Valve is the ideal solution for portable/battery powered applications. The body construction of the Series LX-Valve is suited for manifold or barbed-tube pneumatic connections and is available in a 2 way configuration.

Markets

- Portable Medical Equipment
- Environmental Monitoring

Applications

- Air & Oxygen Delivery

Features

- Internal latching mechanism enables continuous, power free, operation with minimal/momentary actuation power to change states
- High flow output capability, (11 slpm Minimum @ 15 psid)
- Direct PC mounting and 11.2 mm valve mounting centers enables compact and lightweight system design
- RoHS and Reach compliant 

Product Specifications

Mechanical

Valve Type:
- 2-Way, 2-Position, Directional Flow , Latching
Media: Non-Reactive gases
Operating Environment:
32 to 122°F (0 to 50°C)
Storage Temperature:
-40 to 158°F (-40 to 70°C)
Dimensions:
- Length: 0.92 in (23.4 mm)
- Width: 0.31 in (7.9 mm)
- Height: 0.48 in (12.2 mm) to Barb End / 0.35 in (8.9 mm) to Manifold Face
Spacing: 0.440 in (11.2 mm) center (Minimum required to ensure proper latching operation)
Porting:
- Barbs for 1/16 in (1.5 mm) I. D. Tubing, (1/32 in Wall Max.)
- Manifold Mount (Gasket accessory required, see ordering info)
Weight: 0.16 oz (4.6 g)
Internal Volume:
0.0036 in ³ (0.060 cm ³)

Electrical

Power Options (Momentary):
0.52 Watt (6 psid model)
0.82 Watt (15 psid model)
Voltage Options:
3, 5, 12 or 24 VDC*
*minimum 20 millisecond pulse
Electrical Connections:
PC Pins, 4 mm centers (all models)
Lead Wire/Connector Assembly (Accessory, see ordering info)

Wetted Materials

Bobbin/Body:
PBT (Polybutylene terephthalate)
Pole & Plunger:
430 FR Series Stainless Steel
Seal:
FKM
Other:
302 Series Stainless Steel

Performance Characteristics

Leak Rate: Tested with Air
< 0.20 sccm Internal
< 0.016 sccm External
Response:
< 20 ms
Pressure/Vacuum:
0 to 6 psid (0.4 bar differential)
0 to 15 psid (1.03 bar differential)
Proof Pressure:
200 psig (13.79 bar)
Minimum Flow:
6.0 slpm @ 6 psid (0.4 bar differential)
11.0 slpm @ 15 psid (1.03 bar differential)
Orifice Size/Nominal Cv:
0.045" (1.14 mm) / 0.028
Reliability:
Life Cycle rating of 10 million
Reliability .95 at 95% CI

Series LX-Valve Miniature Latching Pneumatic Solenoid Valve

Typical Flow Curve

Series LX-Valve Miniature Latching Pneumatic Solenoid Valve Pressure and Flow Capabilities

Model No.	Orifice Size	Nominal Cv	Maximum Operating Pressure Differential	Momentary Power (50 milliseconds)
1	0.045 in (1.14 mm)	0.028	6 psid (0.4 bar differential)	0.52 Watt
2	0.045 in (1.14 mm)	0.028	15 psid (1.03 bar differential)	0.82 Watt

* Proof pressure is 200 psig (13.79 bar)

Safety: Proof Pressure: 200 PSIG (13.79 bar). Tests conducted at this pressure demonstrate that no loss of function or permanent damage occurs when returned within the specified operating pressure range.

Caution: Shock Resistance: This valve may change states when subjected to high shock conditions. (Contact application for more details). Validation testing should be conducted to ensure proper operation in the application.

Series MX Miniature Pneumatic Solenoid Valve

10 mm Solenoid-Actuated Poppet Valve

Markets

- Respiratory
- Patient Therapy

Applications

- Oxygen Concentrators
 - Sieve bed switching/equalization
 - Oxygen delivery
- Deep Vein Thrombosis
 - Cuff Inflation/Deflation Control
- Negative Pressure Wound Therapy
 - High Volume Vacuum/Pressure Control

The Series MX is a miniature solenoid valve that delivers high flow at low pressure in a compact, 10 mm wide size. Using hit and hold control, the Series MX miniature solenoid consumes very little power helping medical device manufacturers increase battery life and reduce system weight without sacrificing performance. The universal design supports manifold or barbed-tube mounting and is available in 2-way and 3-way configurations. The Series MX solenoid valve is an ideal solution for portable medical devices with limited space and power.

Features

- Small, 10 mm size enables compact integration and reduces device size
- Highest flow to power consumption ratio increases device battery life
- Lightweight 0.3 oz (8.5 g) design helps reduce portable device weight
- Universal barbed-tube or manifold mount eases valve integration
- CE and RoHS compliant 

Product Specifications

Mechanical

Valve Type:
Solenoid-Actuated Poppet Style
- 2 and 3-Way Normally Closed (NC)
- 2 and 3-Way Normally Open (NO)
- 3-Way Distributor
Media: Non-Reactive gases
Operating Environment:
41 to 122°F (5 to 50°C)
Storage Temperature:
-40 to 158°F (-40 to 70°C)
Dimensions:
- Length: 1.50 in (38.1 mm)
- Width: 0.40 in (10.1 mm)
- Height: 0.62 in (15.7 mm)
to Barb End / 0.44 in (11.1 mm)
to Manifold Face
Valve to Valve Spacing:
0.400 in (10 mm) center
Porting:
- Barbs for 3/32 in (2 mm)
I. D. Tubing
- Manifold Mount
Weight: 0.3 oz (8.5 g)
Internal Volume:
0.01247 in ³ (0.2043 cm ³)
Filtration:
40 micron recommended

Electrical

Power Options (Hit/Hold):
6 psid model (1.0/0.25 Watt)
30 psid model (3.0/0.75 Watts)
Voltage Options:
5, 12 or 24 VDC
Series MX Model 7 is not rated for continuous duty and must employ hit and hold control.
Electrical Connections:
2-Pin PCB (for PCB solder connection)
2-Pin Up (for connector interface)
0.30 in (7.6 mm) pin centers
(Lead Wire/Connector Assembly available, see ordering information)

Wetted Materials

Body/Plunger:
PPE/PA
(Polyphenylene Ether/Polyamide)
Armature:
430 FR Series Stainless Steel
Seal (Options):
Silicone (6 PSI Only), FKM
Other:
302/304 Series Stainless Steel
EPDM (Manifold Gasket)

Performance Characteristics

Leak Rate: Tested with Air
<0.2 sccm
Response:
< 20 ms maximum cycling
Pressure/Vacuum:
0 to 6 psid (0.4 bar differential)
0 to 30 psid (2.0 bar differential)
Proof Pressure:
100 psig (6.9 bar)
Typical Flow:
17.5 slpm @ 6 psid
(0.4 bar differential)
48 slpm @ 30 psid
(2.0 bar differential)
Orifice Sizes/Equivalent Cv:
0.075 in (1.91 mm) / 0.072
Reliability:
Life Cycle rating of 25 million

Series MX Miniature Pneumatic Solenoid Valve

Installation and Use

Hit and Hold Specifications

The Series MX valve is designed for use with “Hit and Hold” control.

Hit and Hold is a common control method used to reduce component power consumption without sacrificing performance. The “Hit” or “Spike” state refers to the rated voltage required to actuate the valve. The “Hold” state is a substantial reduction in the rated voltage (normally 50% of the rated voltage) that maintains the valve in an actuated state.

Hit and Hold control can be incorporated using several different approaches, including discrete component circuits or programmable logic. The graph below illustrates the typical “Hit” and “Hold” control method.

This method greatly reduces power consumption because the valve only draws full current for a short period of time (in this case, a minimum of 50 msec), making it ideal for applications with sensitive power budgets.

Rated voltage must be applied to the Series MX valve for a minimum of 50 msec to ensure full valve actuation in all operating conditions.

Important Note:

The Series MX valve is not designed for continuous use at rated voltage. Therefore, rated voltage should not be applied for greater than 20 seconds. Exceeding rated voltage for longer than 20 seconds may adversely affect valve performance. **Contact factory for more details.**

C7 Valve Miniature Cartridge Solenoid Valve

7 mm Miniature Cartridge Valve

The Series C7 is a miniature cartridge style solenoid valve with a compact 7 mm diameter. This unique design combines small size, light weight and low power consumption with high flow repeatability and fast response time over an exceptionally long life, up to 130 million cycles. Available in 2-way and 3-way configurations, the valve is manifold mounted utilizing a simple securing system reducing assembly time.

Markets

- Respiratory and Anesthesia
- Patient Therapy
- Patient Monitoring
- Analytical Chemistry
- Clinical Diagnostics

Applications

- Portable/Transport Ventilators Gas Control
- Negative Pressure Wound Therapy
- Air Over Liquid Dispense
- Sidestream CO₂ measurement
- Portable/Hand held environmental monitoring

Features

- Variety of orifice sizes with pressures up to 145 PSI (10 bar).
- Floating frictionless plunger enables reliable and repeatable operation up to 130 Million cycles.
- Low power design reduces heat and energy consumption.
- Cartridge configuration enables compact integration saving space and weight.
- Simple mechanical fastening prevents valve being dislodged due to vibration or pressure spikes.
- RoHS & REACH compliant.

C7 Miniature Cartridge Valve

Installation and Use

During installation of the C7 valve, the maximum force allowed to press it into the manifold is: 6.74 lbf (30 N)
Lubrication is recommended (I.E. alcohol or DI water depending on compatibility constraints)

Recommended Valve Manifold Dimensions

Recommended Valve Mounting

The correct location to use when holding the valve in place in the manifold is the indent at the middle of the valve body. If the top of the valve is used to hold the valve in place, the working pressure the valve will receive, can push the valve upward and exceed the maximum insertion force for the valve. This could damage the valve.

Installation and Use

C7 Miniature Cartridge Valve

Installation and Use

Optional Reduced Power Control Method

“Hit and Hold” is an optional control method to increase power efficiency for the C7 series valves.

Hit and Hold is a common control method used to reduce component power consumption and heat generation without sacrificing performance. The “Hit” or “Spike” state refers to the rated voltage required to actuate the valve. The “Hold” state is a substantial reduction in the rated voltage (normally 50% of the rated voltage) that maintains the valve in an actuated state.

Hit and Hold control can be incorporated using several different approaches, including discrete component circuits or programmable logic. The graph below illustrates a voltage “Hit” and “Hold” control method, however pulse width modulation (PWM) is also an acceptable control method.

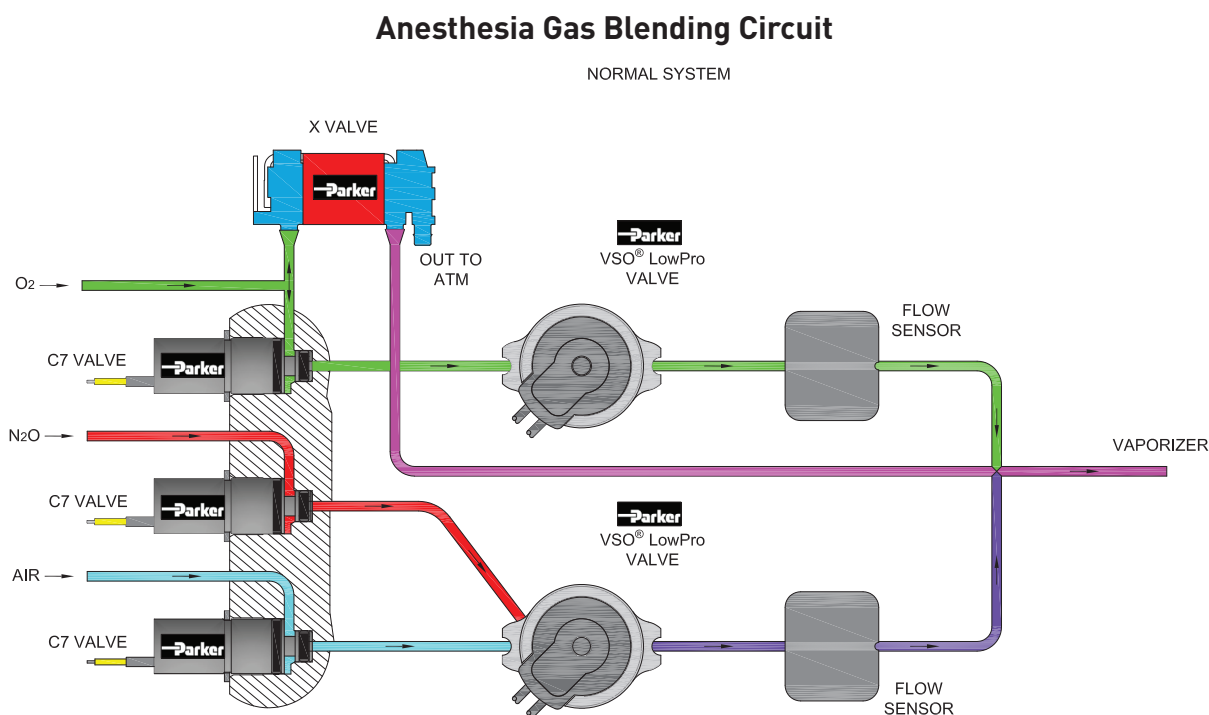

C7 Hit and Hold Specification	
Hit Voltage Level	Rated Voltage
Hold Voltage Level	50% of Rated Voltage
Minimum Hit Time	50 ms
Maximum Hit Time	N/A
PWM Frequency (Minimum)	min. 1 kHz
Hold Nominal Duty Cycle	50%

This method greatly reduces power consumption because the valve only draws full current for a short period of time making it ideal for applications with sensitive power budgets.

Note: 50% duty cycle is a general recommendation; therefore, it is recommended that specific application testing is completed to verify the proper “hold” requirement. Factors that could impact hit and hold voltage levels include vibration, shock, pressure variation and pressure locations that are driven from specific usage. The hit and hold circuit design, combined with Parker’s valve, need to be validated for each specific application to ensure the valve will actuate under all usage conditions. **Contact Factory for more details.**

C21 Miniature Cartridge Valve

Installation and Use

During installation of the C21 valve, the maximum force allowed to press it into the manifold is: 44.96 lbf (200 N)
Lubrication is recommended (I.E. alcohol or DI water depending on compatibility constraints)

Recommended Valve Manifold Dimensions

Recommended Valve Mounting

The correct location to use when holding the valve in place in the manifold is the indent at the middle of the valve body. If the top of the valve is used to hold the valve in place, the working pressure the valve will receive, can push the valve upward and exceed the maximum insertion force for the valve. This could damage the valve.

Installation and Use

C21 Evaluation Manifold Dimensions and Design C21-MCS

C21 Miniature Cartridge Valve

Installation and Use

Optional Reduced Power Control Method

“Hit and Hold” is an optional control method to increase power efficiency for the C21 series valves.

Hit and Hold is a common control method used to reduce component power consumption and heat generation without sacrificing performance. The “Hit” or “Spike” state refers to the rated voltage required to actuate the valve. The “Hold” state is a substantial reduction in the rated voltage (normally 50% of the rated voltage) that maintains the valve in an actuated state.

Hit and Hold control can be incorporated using several different approaches, including discrete component circuits or programmable logic. The graph below illustrates a voltage “Hit” and “Hold” control method, however pulse width modulation (PWM) is also an acceptable control method.

C21 Hit and Hold Specification	
Hit Voltage Level	Rated Voltage
Hold Voltage Level	50% of Rated Voltage
Minimum Hit Time	100 ms
Maximum Hit Time	N/A
PWM Frequency (Minimum)	1 kHz
Hold Nominal Duty Cycle	50%

This method greatly reduces power consumption because the valve only draws full current for a short period of time making it ideal for applications with sensitive power budgets.

Note: 50% duty cycle is a general recommendation; therefore, it is recommended that specific application testing is completed to verify the proper “hold” requirement. Factors that could impact hit and hold voltage levels include vibration, shock, pressure variation and pressure locations that are driven from specific usage. The hit and hold circuit design, combined with Parker’s valve, need to be validated for each specific application to ensure the valve will actuate under all usage conditions. **Contact Factory for more details.**

Series 11

Miniature Pneumatic Solenoid Valve

15 mm Solenoid Valve

The Series 11 miniature pneumatic solenoid valve is a robust and proven product with a reputation for reliable and consistent performance. The Series 11 miniature solenoid valve is the preferred choice of major OEM's in the medical and analytical market. With valve bodies made from brass or stainless steel, the Series 11 miniature solenoid valve is an ideal solution for general purpose applications and those applications requiring low out-gassing and a bubble-tight seal.

Applications

- Oxygen Conservers
- Oxygen Concentrators
- Compression Therapy
- Gas Chromatography
- Insufflators
- Medical & Analytical Gas Control

Features

- Proven performance tested to 260 million life cycles
- Wide range of available electrical connections to simplify valve integration and control
- Manifold mount or barbed tube pneumatic configurations available for added system design flexibility
- Available Analytical and Oxygen Service Clean to minimize contamination
- RoHS compliant 

Product Specifications

V² Valve

Miniature Pneumatic Solenoid Valve

15 mm Pneumatic Solenoid Valve

The V² miniature pneumatic solenoid valve is a proven product with a reputation for reliable and consistent performance. Designed for medical device and system manufacturers, the V² miniature pneumatic solenoid valve is made from lightweight PBT plastic and provides flexible mounting and termination options. The V² miniature pneumatic solenoid valve also offers pneumatic and electrical design flexibility. It is available in manifold mount or 1/8" (3 mm) barbed tube configurations and is also available with either wire lead, quick connect spade or 4 pin printed circuit board electrical termination.

Applications

- Oxygen Conservers
- Flow control/shut-off valve
- Portable Medical Devices

Features

- Lightweight PBT plastic body to reduce system weight
- Manifold mount or molded barbed fittings for added system design flexibility
- Printed circuit board mount, quick connect spade or wire lead coil termination to ease integration
- Proven performance tested to 25 million life cycles
- RoHS compliant 

Product Specifications

Mechanical

Valve Type:

2/3 Port, Direct-acting poppet style
 - Normally Closed (NC)
 - Normally Open (NO)
 - Distributor (Dist)

Media:

Air, Oxygen, Helium, Nitrogen,
 Carbon Dioxide/Monoxide, & other
 non-reactive gases.

Operating Environment:

32 to 158°F (0 to 70°C)

Storage Temperature:

-40 to 158°F (-40 to 70°C)

Dimensions:

- Length: 1.73 in (43.9 mm)
 - Width: 0.63 in (15.9 mm)
 - Height: 0.67 in (17.0 mm)

Weight:

1.2 oz (34.3 g)

Internal Volume:

0.0009 in³ (0.016 cm³)

Filtration:

40 micron (recommended)

Electrical

Power Options:

0.5, 1.0, or 2.0 Watts

Voltage Options:

5, 12 or 24 VDC

Further power reduction may be
 achieved through the use of spike and
 hold or PWM electrical control.

SRS Miniature Pneumatic Solenoid Valve

10 mm Manifold Mount Solenoid Valve

The SRS miniature solenoid valve is a compact and lightweight 10 mm manifold mount solenoid valve designed for portable instruments and medical devices requiring minimal power consumption and quiet operation. Utilizing an integrated manifold seal design in combination with a variety of electrical termination options, the SRS miniature solenoid valve simplifies pneumatic and electronic integration. With flow rates of up to 18 slpm and inlet pressures of up to 85 psig, the SRS miniature solenoid valve is an ideal solution for demanding portable instruments and medical devices.

Applications

- Medical & Analytical Gas Control
- Blood Pressure Monitoring
- Sensor Zeroing
- Patient Monitors
- Portable Medical Devices

Features

- Lightweight and compact to reduce system size and weight
- Integrated manifold seal and PC mount capability to simplify integration
- Hermetically-sealed coil protects the valve from accidental exposure to liquids
- Constructed of PBT and non-corrosive metal for use with non-reactive gases
- RoHS compliant 

Product Specifications

Mechanical

Valve Type:	3 Port, Direct-acting poppet style - Normally Closed - Normally Open - Distributor
Media:	Non-Reactive gases
Operating Environment:	32 to 131°F (0 to 55°C)

PND Series Miniature Pneumatic Solenoid Valve

10 mm Normally Open Exhaust Valve

Applications

- Non-Invasive Blood Pressure-Devices
- Normally Open Fail-Safe Exhaust

The PND Series miniature pneumatic solenoid valve is an economical 2-way normally open exhaust valve designed for rapid pressure relief. The PND Series miniature pneumatic solenoid valve is the perfect solution for safety oriented applications that require pressure relief to atmosphere upon power loss.

Features

- Compact, economical design to reduce size and cost of integration
- Normally Open configuration to ensure rapid deflation upon power loss
- Low power design reduces heat generation and power consumption
- Proven performance tested to 250,000 life cycles
- RoHS compliant 

Product Specifications

Mechanical

Valve Type:
2 Port, Direct-acting poppet style - Normally Open (NO)
Media:
Air, Nitrogen, Argon, Carbon Dioxide, & other non-reacting gasses
Operating Environment:

Pulse Valves

Ultra Low Leak Extreme Performance Valve

Applications

- Gas pulse generation for Laser Spectroscopy

Pulse Valves solenoid valves offer outstanding potential for precision control of Laser Spectroscopy Gas Analysis. Combining high speed, ultra low leak rate, high flow, and high temperature capability in a small size; this rugged valve operates with extreme repeatability and is constructed of non-corroding, passivated stainless steel. Pulse Valves coils are rated for continuous duty and are potted to exclude the environment.

Features

- Smallest footprint in its class
- High speed response times of less than 2 ms
- 100% tested to leak-tight 1×10^{-7} cc/sec/atm Helium
- 100% duty cycle in environmental temperatures of up to 221°F (105°C)
- Pressures up to 1250 PSI (86.2 bar)
- Available with a variety of orifices, seals, and voltages to match your application
- RoHS compliant

Product Specifications

Physical Properties

Valve Type:	Inert Non Isolation
Valve Configuration:	2-Way Normally Closed

Pulse Valves Ultra Low Leak Extreme Performance Valve

Hit and Hold Specifications (12-Watt coils):

Hit and Hold is a method for driving valves that can be used to reduce power consumption and heat generation while maintaining valve performance specifications. The valve is “hit” with the full rated voltage for some time period to open it (T1 in the graph) and then “held” open with substantially reduced voltage until the desired pulse length is reached (T2 in the graph). The following table shows the possible holding voltages and power consumption for most of our standard 12-watt valve solenoids.

Rated Voltage (volts)	3-way		2-way	
	Hold Voltage	Hold Power	Hold Voltage	Hold Power
28	14 volts	2.8 watts	6 volts	0.51 watts
24	12 volts	3 watts	5 volts	0.52 watts
20	10 volts	3 watts	5 volts	0.76 watts
12	6 volts	3 watts	5 volts	2.1 watts

Note: Values for 7-watt coils may be different

Hold Voltage Graph

Ultra Low Leak Extreme Performance Valve

Pulse Valves**Chemical Compatibility Chart**

Chemical	FFKM	PTFE	Stainless Steel	VespeI
DI Water	1	1	1	2
Methanol	1	1	1	1
Isopropanol	1	1	1	1
Ethanol	1	1	1	1
Acetonitrile	1	1	1	1
Tetrahydrofuran	1	1	1	2
Toluene	1	1	1	1
Organic Acids - Dilute	1	1	1	1
Non Organic Acids - Dilute	1	1	1	1
Bases - Dilute	1	1	1	1
Saline	1	1	1	1
Bleach 12%	1	1	2	4
Sodium Hydroxide 20%	1	1	1	4

COMPATIBILITY LEGEND		
1	EXCELLENT	Minimal or no effect
2	GOOD	Possible swelling and/or loss of physical properties
3	DOUBTFUL	Moderate or severe swelling and loss of physical properties
4	NOT RECOMMENDED	Severe effect and should not be considered

Pulse Valves Ultra Low Leak Extreme Performance Valve Accessories

IOTA ONE 060-0001-900 (Microfluidic Valve Driver)

Ordering Information

Orifice Size	Pressure	Valve Type	Seal Material	Voltage	Inlet Porting	Outlet Porting	Part Number
0.004" (.10 mm)	Vac-1250 psi (86.2 bar)	2-Way NC	PTFE, FFKM	28V	1/4" A-Lok®	Flange, No Cone	009-1668-900
			Vespel, FFKM	20V			009-1670-900

Pulse Valve Rebuild Kits

Pulse Valve Rebuild Kits	Part Number
With Teflon Poppets	009-PTFE-KIT
With Vespel® Poppets	009-VSPL-KIT
With Kel-F® Poppets	009-KELF-KIT
With PEEK Poppets	009-PEEK-KIT
Kit Contents	Quantity Per Kit
Poppet	10
Buffer Spring	5
Load Spring	5
Internal Viton® O - Ring	5
External Viton® O - Ring	5
Teflon Coated Armature	1
Shims (Various Thicknesses)	40

Pulse Valve Poppet Kits	Part Number
PTFE Poppets Qty. 50pcs	003-0023-050-KIT
Kel-F® Poppets Qty. 50pcs	009-0185-020-KIT
Vespel® Poppets Qty. 10pcs	009-0595-020-KIT
PEEK Poppets Qty. 50pcs	009-0424-030-KIT
Pulse Valve Coils	Part Number
12 VDC	009-0280-050-2
20 VDC	009-0279-050-2
28 VDC	009-0181-050-2
Pulse Valve Bodies (Flange with conical discharge)	Part Number
0.020" (0.5 mm) Orifice	009-0309-010-003
0.031" (0.8 mm) Orifice	009-0181-010-003

NOTE: In order to provide the best possible solution for your application, please provide the following requirements when contacting Applications Engineering:

- Media, Inlet & Outlet Pressures
- Minimum Required Flow Rate
- System Supply Voltage
- Media
- Ambient Temperature Range

Please click on the Order On-line button (or go to www.parker.com/precisionfluidics/pulse) to configure your Pulse Valve Ultra Low Leak Extreme Performance Valve. For more detailed information, visit us on the Web, or call 603-595-1500.

Pulse Valves Ultra Low Leak Extreme Performance Valve Series 9 Accessory Kits

SERIES 9 Accessory Kits			
Teflon Pulse Valve Kit - Contents			Qty
	Teflon Poppet		10
	Buffer Spring		5
	Load Spring		5
	Internal Viton Oring		5
	External Viton Oring		5
	Teflon Coated Armature		1
	Shims (Various Thicknesses)		40
Part Number	009-PTFE-KIT		1
VespeI Pulse Valve Kit - Contents			Qty
	VespeI Poppet		5
	Buffer Spring		5
	Load Spring		5
	Internal Viton Oring		5
	External Viton Oring		5
	Teflon Coated Armature		1
	Shims (Various Thicknesses)		40
Part Number	009-VSPL-KIT		1
Kel-f Pulse Valve Kit - Contents			Qty
	Kel-f Poppet		10
	Buffer Spring		5
	Load Spring		5
	Internal Viton Oring		5
	External Viton Oring		5
	Teflon Coated Armature		1
	Shims (Various Thicknesses)		40
Part Number	009-KELF-KIT		1
PEEK Pulse Valve Kit - Contents			Qty
	PEEK Poppet		10
	Buffer Spring		5
	Load Spring		5
	Internal Viton Oring		5
	External Viton Oring		5
	Teflon Coated Armature		1
	Shims (Various Thicknesses)		40
Part Number	009-PEEK-KIT		1
SERIES 9 POPPET KITS			Qty
Part Number	003-0023-050-KIT	PTFE Poppets	50
Part Number	009-0185-020-KIT	Kel-F Poppets	50
Part Number	009-0595-020-KIT	VespeI Poppets	10
Part Number	009-0424-030-KIT	PEEK Poppets	50
SERIES 9 ORINGS (Kalrez)			Qty
Part Number	009-0070-100-001	Internal Kalrez Oring	1
Part Number	001-0045-020-001	External Kalrez Oring	1
SERIES 9 COIL (1/4" A-LOK FITTING)***			Qty
Part Number	009-0280-050-2	12 VDC	1
Part Number	009-0181-050-2	28 VDC	1
Part Number	009-0279-050-2	20 VDC	1
SERIES 9 BODIES (Flange with conical discharge)			Qty
Part Number	009-0309-010-003	.020" (0.5 mm)	1
Part Number	009-0181-010-003	.031" (0.8 mm)	1
Part Number	091-0351-010-003	.004" (0.1 mm)	1

Please contact customer service for order placement, leadtime and price

***Series 9 coils shown do not ship with electrical connectors

Pulse Valves Ultra Low Leak Extreme Performance Valve

FAQs

1. Can the IOTA One trigger both 20 and 28V pulse valves?

Yes, the IOTA One can trigger 12, 20, 24, and 28V pulse valves. However, you will need to change the jumper settings in the unit, reference manual that ships with the unit. Please note current standard coil are 20 and 28V.

2. I used to purchase a pulse valve which is not listed in the chart above, is this pulse valve still available?

Currently, only the pulse valve configurations listed in the chart above are available for purchase.

3. I used to purchase spare parts for my pulse valve, are they still available?

Yes, spare parts are still available for pulse valves. Please note that only the kits and part numbers above are available for purchase. Poppets, armatures, springs, etc... are no longer available for individual purchase and will need to be purchased as part of a kit.

4. Can the IOTA One trigger multiple valves at once?

Currently, the IOTA One is designed to trigger only one valve at a time.

5. What is the fastest pulse duration, opening response time and closing response time?

Typically, the fastest achievable pulse duration is 300 microseconds, opening response time is 180-200 microseconds, and closing response time is 50-250 microseconds.

6. Which Poppet material should I choose and why?

Poppet material should first be chosen based on compatibility with the gas you are flowing through the valve. If multiple materials are compatible then for general and low temperature and pressure applications PTFE and Kel-F should be used, for higher temperature and pressure applications Vespel or PEEK should be used.

7. Is there a performance advantage between the different voltage valves?

The performance difference between voltages is negligible. However, please note that the 20V coil is capable of handling 125C temperatures.

8. What is the maximum cycle frequency for the valve?

The maximum cycle frequency for the valve is 250Hz.

Value Added Application-Specific Solutions

Gassing Control System

- Mixed gassing logic design includes VSO® proportional valves, X-Valve®, pressure switch, pressure sensors, and PCB interface

7 Position X-Valve® Pneumatic Manifold

- Integrated pressure/vacuum sensors
- Mixed pneumatic logic design
- Ultem® manifold pressure/vacuum sensors

Vacuum Gas Control Module

- Tested to 1×10^{-7} cc/sec/atm Helium
- Assembly tested on mass spectrometer

6 Position VSO® Proportional Valve Pneumatic Manifold Assembly

- Quick connect fittings
- Circuit board with mass electrical termination

5 Position SRS Model Pneumatic Manifold

- Mixed pneumatic logic assembly
- Integrated pressure sensors
- Mass termination of sensors & valves
- Pressed in barbed fittings

8 Position SRS Model Pneumatic Manifold

- Integrated circuit board mounting
- Mass electrical termination

10 Position X-Valve® Pneumatic Manifold

- Mixed pneumatic logic design
- Ultra-miniature design with PCB for mass termination

10 Position SRS Model Pneumatic Manifold

- Circuit board with transducers
- Pressed in barbed fittings

NOTES

WARNING

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY OR PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or systems in the current product catalog. Due to the variety of operating conditions and applications for these products and systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.
