200W Explosion Proof Light

Summary

Explosion-proof lighting is critical in environments where volatile flammable liquids or flammable gases and vapors are present. This LED explosion-proof light is safe to use in Class 1, Div 2 locations, such as oil refineries, paint booths, fuel and chemical storage areas, and grain processing plants. The waterproof flood light has a vibration-resistant die cast aluminum housing and tempered glass lens to protect internal components and is designed to last.

Specifications

EPL-NW200	
Replacement For	400 Watt MH
Total Power Consumption	187.1 Watts
Operating Voltage Range	120~277 VAC
Beam Angle	120 degree
Operating Temperature	-22~122°F (-30~50 °C)
IP Rating	IP68
LED Lifetime	50,000 Hours
Fixture Weight	26.5lbs (12.0Kg)
Warranty	5 Year

Mounting Examples

U-Bracket Ceiling Mount

Pendant Mount

Pole Mount

Wall Mount

U-Bracket Wall Mount

Installation

Warnings

- This product should be installed by a fully certified electrician in accordance with local building and electrical codes. Electrician should be familiar with operation of the product and the hazards involved.
- Due to risk of electric shock, ensure that the main power source and circuit breakers are switched off before performing any installation or wiring procedures. All electrical connections must be in 3/4" NPT conduit or pipe.
- Failure to properly support the fixture during installation may cause damage or injury, for which the manufacturer is not responsible. Ensure the mounting method chosen will support the weight of the fixture.

Mounting

Mounting the EPL-NW200 offers several mounting options including ceiling mounting, pole mounting, pendant mounting, and wall mounting. Ceiling and wall applications are mounted using the adjustable swivel mount bracket found on the rear of the unit. Pendant and pole mounting applications are mounted from the ceiling or railing and are suspended by a rigid pipe via the 3/4" NPT hub on the back of the explosion proof fixture. Wiring is fed through rigid pipe to the junction box and tied in to the fixture's lead wires, completing the electrical connection. See examples of mounting methods to the right.
