

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
 For the quarterly period ended **March 31, 2020**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
 For the transition period from ____ to ____
 Commission file number **001-00035**

GENERAL ELECTRIC COMPANY

(Exact name of registrant as specified in its charter)

New York

(State or other jurisdiction of incorporation or organization)

14-0689340

(I.R.S. Employer Identification No.)

5 Necco Street Boston MA

(Address of principal executive offices)

02210

(Zip Code)

(Registrant's telephone number, including area code) **(617) 443-3000**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock, par value \$0.06 per share	GE	New York Stock Exchange
Floating Rate Notes due 2020	GE 20E	New York Stock Exchange
0.375% Notes due 2022	GE 22A	New York Stock Exchange
1.250% Notes due 2023	GE 23E	New York Stock Exchange
0.875% Notes due 2025	GE 25	New York Stock Exchange
1.875% Notes due 2027	GE 27E	New York Stock Exchange
1.500% Notes due 2029	GE 29	New York Stock Exchange
7 1/2% Guaranteed Subordinated Notes due 2035	GE /35	New York Stock Exchange
2.125% Notes due 2037	GE 37	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

- | | | | |
|-------------------------|-------------------------------------|---------------------------|--------------------------|
| Large accelerated filer | <input checked="" type="checkbox"/> | Accelerated filer | <input type="checkbox"/> |
| Non-accelerated filer | <input type="checkbox"/> | Smaller reporting company | <input type="checkbox"/> |
| Emerging growth company | <input type="checkbox"/> | | |

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

There were 8,747,092,000 shares of common stock with a par value of \$0.06 per share outstanding at March 31, 2020.

ABOUT GENERAL ELECTRIC

General Electric Company (General Electric or the Company) is a high-tech industrial company that operates worldwide through its four industrial segments, Power, Renewable Energy, Aviation and Healthcare, and its financial services segment, Capital. The Power segment offers technologies, solutions, and services related to energy production, including gas and steam turbines, generators, and power generation services. The Renewable Energy segment provides wind turbine platforms, hardware and software, offshore wind turbines, solutions, products and services to hydropower industry, blades for onshore and offshore wind turbines, and high voltage equipment. The Aviation segment provides jet engines and turboprops for commercial airframes, maintenance, component repair, and overhaul services, as well as replacement parts, additive machines and materials, and engineering services. The Healthcare segment provides healthcare technologies in medical imaging, digital solutions, patient monitoring, and diagnostics, drug discovery, and performance enhancement solutions. The Capital segment leases and finances aircraft, aircraft engines and helicopters, provides financial and underwriting solutions, and manages our run-off insurance operations. See the Consolidated Results section of Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 2 to the consolidated financial statements for information regarding our recent business portfolio actions. Results of segments reclassified to discontinued operations have been recast for all periods presented.

GE's Internet address at www.ge.com, Investor Relations website at www.ge.com/investor-relations and our corporate blog at www.gereports.com, as well as GE's Facebook page, Twitter accounts and other social media, including @GE_Reports, contain a significant amount of information about GE, including financial and other information for investors. GE encourages investors to visit these websites from time to time, as information is updated and new information is posted.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

The consolidated financial statements of General Electric Company (the Company) combine the industrial manufacturing and services businesses of GE with the financial services businesses of GE Capital or Financial Services and are prepared in conformity with U.S. generally accepted accounting principles (GAAP). Certain columns and rows within tables may not add due to the use of rounded numbers. Percentages presented in this report are calculated from the underlying numbers in millions. Discussions throughout MD&A are based on continuing operations unless otherwise noted. The MD&A should be read in conjunction with the Financial Statements and Notes to the consolidated financial statements. For purposes of the financial statement display of sales and costs of sales in our consolidated Statement of Earnings (Loss), "goods" is required by SEC regulations to include all sales of tangible products, and "services" must include all other sales, including other services activities. Throughout MD&A we refer to sales under product services agreements and sales of both goods (such as spare parts and equipment upgrades) and related services (such as monitoring, maintenance and repairs) as sales of "services," which is an important part of our operations.

We believe investors will gain a better understanding of our company if they understand how we measure and talk about our results. Because of the diversity in our businesses, we present our financial statements in a three-column format, which allows investors to see our GE Industrial operations separately from our GE Capital operations. We believe that this provides useful information to investors. When used in this report, unless otherwise indicated by the context, we use these terms to mean the following:

Consolidated – the adding together of GE and GE Capital, giving effect to the elimination of transactions between the two. We present consolidated results in the left-side column of our consolidated Statements of Earnings (Loss), Financial Position and Cash Flows.

GE – the adding together of all affiliates except GE Capital, whose continuing operations are presented on a one-line basis, giving effect to the elimination of transactions among such affiliates. As GE presents the continuing operations of GE Capital on a one-line basis, any intercompany profits resulting from transactions between GE and GE Capital are eliminated at the GE level. We present the results of GE in the center column of our consolidated Statements of Earnings (Loss), Financial Position and Cash Flows.

GE Capital – the adding together of all affiliates of GE Capital giving effect to the elimination of transactions among such affiliates. We present the results of GE Capital in the right-side column of our consolidated Statements of Earnings (Loss), Financial Position and Cash Flows.

GE Industrial – GE excluding the continuing operations of GE Capital. We believe that this provides investors with a view as to the results of our industrial businesses and corporate items.

This document contains "forward-looking statements" - for details about the uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements, see the Risk Factors and Forward-Looking Statements sections.

In the accompanying analysis of financial information, we sometimes use information derived from consolidated financial data but not presented in our financial statements prepared in accordance with GAAP. Certain of these data are considered "non-GAAP financial measures" under SEC rules. See the Non-GAAP Financial Measures section for the reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures.

CONSOLIDATED RESULTS

SIGNIFICANT DEVELOPMENTS.

Coronavirus Disease 2019 (COVID-19) Pandemic. The COVID-19 pandemic has significantly impacted global economies, resulting in workforce and travel restrictions, supply chain and production disruptions and reduced demand and spending across many sectors. During the latter part of the first quarter of 2020, these factors began having a material adverse impact on our operations, financial performance and prices of our securities, as well as on the operations and financial performance of many of the customers and suppliers in industries that we serve.

We have adopted operational and governance rhythms across the Company to coordinate actions related to the COVID-19 pandemic, including an internal task force to protect the health and safety of our employees globally and maintain business continuity; the assessment of financial and operating impacts and mitigating actions in response; funding and liquidity management and related treasury actions; and enterprise risk management and other functional activities. Each of GE's businesses and Corporate are taking cost and liquidity actions to manage risk and aggressively mitigate financial impact as supply and demand dynamics in GE's industries continue to shift. We also continue to evaluate market conditions as they evolve and take precautionary measures to strengthen our financial position. We ended the first quarter of 2020 with \$47.3 billion of consolidated cash, cash equivalents and restricted cash, in addition to our available credit lines. See the Capital Resources and Liquidity section within MD&A for further information.

This section summarizes the most significant impacts related to the COVID-19 pandemic that we have experienced to date, and we have included additional details as applicable throughout other sections of this report. Given that many of these impacts did not begin to be felt broadly across our businesses until the latter part of the first quarter of 2020, in some instances we have identified an impact during the quarter that we would attribute primarily to COVID-19 developments rather than other business or market factors. However, in future periods, depending on the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences, we anticipate that it will become more difficult to distinguish specific aspects of our operational and financial performance that are most directly related to COVID-19 from those that are more broadly influenced by ongoing macroeconomic, market and industry dynamics that may also be, to varying degrees, related to the COVID-19 pandemic and its consequences.

While factors related directly and indirectly to the COVID-19 pandemic have begun impacting operations and financial performance at varying levels across all our businesses, the most significant financial impact to date has been at our Aviation segment and our GE Capital Aviation Services (GECAS) aircraft leasing business within our Capital segment. The COVID-19 pandemic is having a material adverse effect on the global airline industry, resulting in reduced flight schedules worldwide, an increased number of idle aircraft, lower utilization, workforce reductions and declining financial performance within the airline industry, as well as requests for government financial assistance by various industry participants. This has decreased demand for higher margin services revenues within our Aviation segment directly impacting our profitability and cash flows during the three months ended March 31, 2020. Our Healthcare segment experienced increased demand for certain types of products and services, including respiratory, computed tomography (CT), monitoring solutions, x-ray, anesthesia and point-of-care ultrasound product lines, partially offset by decreased demand in other parts of the business where hospitals and other customers have deferred services amidst the COVID-19 pandemic. Our other businesses were also adversely impacted by market developments, including delays or cancellations of new projects, new orders and related down payments. In addition, workplace, travel and supply chain disruptions have caused delays of deliveries and the achievement of other billing milestones directly impacting our profitability and cash flows for the three months ended March 31, 2020. We anticipate many of these impacts experienced in the latter part of first quarter of 2020 related to demand, profitability and cash flows will continue in future periods depending on the severity and duration of the pandemic. For additional details about impacts related to Aviation and GECAS, Healthcare and our other businesses, refer to the respective segment sections within MD&A.

In addition, financial, oil and gas and other commodity markets, including interest rates and credit spreads, have been experiencing significant volatility, which had a material adverse impact on the market values of certain assets, such as our remaining equity interest in Baker Hughes and the value of our investment portfolios supporting our long-term insurance liabilities and pension obligations. In accordance with GAAP, we remeasure the values of our investment portfolio supporting our pension liabilities, our associated pension liabilities and our long-term insurance liabilities only annually, and our financial statements at March 31, 2020 therefore do not reflect the impact of the recent market conditions on these assets and obligations.

During the three months ended March 31, 2020, COVID-19 factors described above negatively impacted GE cash from operating activities (CFOA) and Industrial free cash flows (FCF)* by approximately \$1 billion, GE Industrial profit by approximately \$0.8 billion and GE Capital earnings by approximately \$0.1 billion. Excluding restructuring of \$0.1 billion, adjusted GE Industrial profit* was negatively impacted by \$0.7 billion.

See the Consolidated Results, and Critical Accounting Estimates sections within MD&A, as well as Notes 3, 10 and 12 to the consolidated financial statements for further information.

We are taking cost and cash actions to manage risk and proactively mitigate the financial impacts from COVID-19. In 2020, we are targeting more than \$2 billion in operational cost out and more than \$3 billion in cash preservation actions across the company, including more than \$1 billion in cost out and more than \$2 billion in cash preservation actions in Aviation, to right-size its cost structure and preserve its ability to serve customers.

At this time, GE cannot forecast the full duration and magnitude of COVID-19 impacts, or the pace of recovery from the COVID-19 pandemic across our end markets, operations, and supply chains. See the Risk Factors section for further information about related risks and uncertainties.

*Non-GAAP Financial Measure

BioPharma. On March 31, 2020, we completed the sale of our BioPharma business within our Healthcare segment to Danaher Corporation for consideration of \$21.1 billion, subject to customary working capital and other post-close adjustments, and recognized a pre-tax gain of \$12.3 billion (\$11.1 billion after tax) in our consolidated Statement of Earnings (Loss). See Note 2 to the consolidated financial statements for further information.

Baker Hughes. We recognized a pre-tax unrealized loss of \$5.7 billion (\$4.6 billion after tax) for the three months ended March 31, 2020, on our investment in Baker Hughes, based on a share price of \$10.50. See Notes 2 and 3 for further information.

Debt offering and tender. On April 22, 2020, we issued \$6 billion of GE Company debt and used the proceeds to complete a tender offer to purchase \$4.2 billion of GE senior notes with maturities ranging from 2022 to 2024. We intend to use the remaining proceeds to repurchase, redeem or repay GE's outstanding debt obligations, including other notes or commercial paper. These transactions will be leverage neutral and liquidity enhancing by extending our near-term industrial debt maturities. Additionally, on April 23, 2020, GE Capital, using proceeds from the repayment of the intercompany loan by GE, completed a tender for \$5.4 billion of its 2020 maturities. See Capital Resources and Liquidity section within MD&A for further information.

FIRST QUARTER 2020 RESULTS. Consolidated revenues were \$20.5 billion, down \$1.7 billion for the quarter primarily driven by decreased GE Industrial and GE Capital revenues. GE Industrial revenues decreased \$1.5 billion (7%) driven by our Aviation and Power segments, partially offset by our Renewable Energy segment.

Continuing earnings per share was \$0.72. Excluding gains (losses) on business dispositions, unrealized gains (losses), non-operating benefit costs, restructuring and other charges and BioPharma tax benefit, Adjusted earnings per share* was \$0.05.

For the three months ended March 31, 2020, GE Industrial profit was \$6.6 billion and profit margins were 34.9%, up \$5.5 billion, driven primarily by the gain on sale of our BioPharma business of \$12.3 billion, partially offset by an unrealized loss on our investment in Baker Hughes of \$5.7 billion. Adjusted GE Industrial organic profit* decreased \$1.0 billion (47%), primarily as a result of the impacts of COVID-19, particularly at our Aviation segment, as well as decreases at Power and Renewable Energy.

GE CFOA of continuing operations was \$(1.7) billion and \$(0.6) billion for the three months ended March 31, 2020 and 2019, respectively. GE CFOA decreased primarily due to higher cash used for working capital and lower net income, primarily due to COVID-19 impacts, compared to 2019, partially offset by lower cash used for contract & other deferred assets. GE Industrial free cash flows* were \$(2.2) billion and \$(1.2) billion for the three months ended March 31, 2020 and 2019, respectively. The decrease was primarily due to the same decreases in GE CFOA as noted above. See the Capital Resources and Liquidity - Statement of Cash Flows section for further information.

Orders are contractual commitments with customers to provide specified goods or services for an agreed upon price.

GE INDUSTRIAL ORDERS

<i>(In billions)</i>	Three months ended March 31	
	2020	2019
Equipment	\$ 9.2	\$ 10.0
Services	10.3	10.6
Total orders(a)	\$ 19.5	\$ 20.6
Total organic orders	\$ 19.6	\$ 20.2

(a) Included \$1.1 billion and \$1.0 billion related to BioPharma for the three months ended March 31, 2020 and 2019, respectively.

For the three months ended March 31, 2020, orders decreased \$1.1 billion (5%) on a reported basis and decreased \$0.6 billion (3%) organically with growth at Power and Healthcare more than offset by double-digit declines at Aviation, due to the 737 MAX grounding and the impact of COVID-19, and Renewable Energy. Equipment orders were down \$0.3 billion (3%) organically and services orders were down \$0.3 billion (3%) organically. Excluding BioPharma, orders decreased \$0.8 billion (4%) organically.

Backlog is unfilled customer orders for products and product services (expected life of contract sales for product services).

GE INDUSTRIAL BACKLOG <i>(In billions)</i>	March 31, 2020	December 31, 2019	March 31, 2019
Equipment	\$ 76.9	\$ 79.0	\$ 79.0
Services	324.2	325.6	274.3
Total backlog(a)	\$ 401.1	\$ 404.6	\$ 353.3

(a) Backlog as of March 31, 2020 excludes the BioPharma business due to its disposition in the first quarter of 2020.

As of March 31, 2020, backlog decreased \$3.5 billion (1%) from December 31, 2019, driven by currency movement due to a stronger U.S. dollar of \$1.2 billion, the disposition of our BioPharma business of \$1.2 billion and reductions of backlog slightly exceeding new additions, primarily at Renewable Energy. Backlog increased \$47.8 billion (14%) from March 31, 2019, due to an increase in services backlog of \$49.9 billion (18%), primarily at Aviation, partially offset by a decrease in equipment backlog of \$2.2 billion (3%), primarily at Power. Excluding the BioPharma disposition, backlog increased \$48.9 billion (14%) from March 31, 2019.

*Non-GAAP Financial Measure

Remaining performance obligation (RPO), a defined term under GAAP, is backlog excluding any purchase order that provides the customer with the ability to cancel or terminate without incurring a substantive penalty, even if the likelihood of cancellation is remote based on historical experience. We plan to continue reporting backlog as we believe that it is a useful metric for investors, given its relevance to total orders. See Note 9 to the consolidated financial statements for further information.

March 31, 2020 (In billions)	Equipment	Services	Total
Backlog	\$ 76.9	\$ 324.2	\$ 401.1
Adjustments	(31.7)	(129.0)	(160.7)
Remaining performance obligation	\$ 45.2	\$ 195.2	\$ 240.4

Adjustments to reported backlog of \$160.7 billion as of March 31, 2020 are largely driven by adjustments of \$149.9 billion in our Aviation segment: (1) backlog includes engine contracts for which we have received purchase orders that are cancelable. We have included these in backlog as our historical experience has shown no net cancellations, as any canceled engines are typically moved by the airframer to other program customers; (2) our services backlog includes contracts that are cancelable without substantive penalty, primarily time and materials contracts; (3) backlog includes engines contracted under long-term service agreements, even if the engines have not yet been put into service. These adjustments to reported backlog are expected to be satisfied beyond one year.

REVENUES (In billions)	Three months ended March 31	
	2020	2019
Consolidated revenues	\$ 20.5	\$ 22.2
Equipment	9.2	9.6
Services	9.7	10.7
GE Industrial revenues	\$ 18.8	\$ 20.3
GE Capital revenues	\$ 1.9	\$ 2.2

For the three months ended March 31, 2020, consolidated revenues were down \$1.7 billion, primarily driven by decreased GE Industrial revenues of \$1.5 billion and decreased GE Capital revenues of \$0.3 billion. The overall foreign currency impact on consolidated revenues was a decrease of \$0.2 billion.

GE Industrial revenues decreased \$1.5 billion (7%), as decreases at Aviation and Power were partially offset by an increase at Renewable Energy. The decrease in services was driven by the impact of COVID-19, resulting in a decrease in commercial services at Aviation due to lower part shipments and decreased shop visits, as well as a decrease in Gas Power services due to declines in transactional and upgrades revenues. This decrease included the net effects of dispositions of \$0.4 billion and the effects of a stronger U.S. dollar of \$0.2 billion. Excluding the effects of acquisitions, dispositions and foreign currency translation, GE Industrial organic revenues* decreased \$1.0 billion (5%), with equipment revenues flat and a decrease in services revenues of \$1.0 billion (9%). Excluding the BioPharma disposition, GE Industrial organic revenues* decreased \$1.1 billion (6%).

GE Capital revenues decreased \$0.3 billion (14%), primarily due to volume declines, mark-to-market effects and impairments as a result of COVID-19 and related market impacts.

EARNINGS (LOSS) AND EARNINGS (LOSS) PER SHARE (In billions; per-share in dollars and diluted)	Three months ended March 31	
	2020	2019
Continuing earnings	\$ 6.3	\$ 0.9
Continuing earnings per share	\$ 0.72	\$ 0.10

For the three months ended March 31, 2020, consolidated continuing earnings increased \$5.4 billion due to an increase in GE Industrial profit of \$5.5 billion, partially offset by a decrease in GE Capital earnings of \$0.2 billion.

GE Industrial profit increased \$5.5 billion driven primarily by the gain on the sale of our BioPharma business of \$12.3 billion, partially offset by an unrealized loss on our investment in Baker Hughes of \$5.7 billion. Adjusted GE Industrial profit* was \$1.1 billion, a decrease of 47% organically*, primarily due to decreases at our Aviation, Power and Renewable Energy segments. GE Industrial profit margin was 34.9%, an increase from 5.3%, driven primarily by the gain on the sale of our BioPharma business, partially offset by an unrealized loss on our investment in Baker Hughes described above. Adjusted GE industrial profit margin* was 5.8%, a decrease of 450 basis points organically*, primarily due to declines at our Aviation, Power, and Renewable Energy segments. At Aviation, the primary drivers were lower commercial services volume and spare parts demand as a result of COVID-19. At Power, the primary drivers were supply chain constraints and cost overruns on services agreements. Additionally, at Renewable Energy, declines were largely due to project fulfillment delays and execution challenges, as well as the nonrecurrence of a \$0.1 billion non-cash gain from the termination of two Offshore Wind contracts in the first quarter of 2019.

GE Capital continuing earnings decreased \$0.2 billion primarily due volume declines, mark-to-market effects and impairments as a result of COVID-19 and related market impacts, partially offset by lower excess interest cost. Gains were \$0.2 billion in the first quarters of both 2020 and 2019, which primarily related to sales of GECAS aircraft and engines resulting in gains of \$0.1 billion in both 2020 and 2019.

*Non-GAAP Financial Measure

AVIATION AND GECAS 737 MAX. Aviation develops, produces, and sells LEAP aircraft engines through CFM International (CFM), a company jointly owned by GE and Safran Aircraft Engines, a subsidiary of the Safran Group of France. The LEAP-1B engine is the exclusive engine for the Boeing 737 MAX. In March 2019, global regulatory authorities ordered a temporary fleet grounding of the Boeing 737 MAX. During the second quarter of 2019, Boeing announced a temporary reduction in the 737 MAX production rate, and CFM reduced its production rate for the LEAP-1B to meet Boeing's revised aircraft build rate. In December 2019, Boeing announced that it would temporarily suspend production of the 737 MAX beginning in January 2020. In March 2020, CFM and Boeing reached an agreement to align production rates for 2020 and secure payment terms for engines delivered in 2019 and 2020, net of progress collections. CFM and Boeing continue to work closely to ensure a successful reentry into service, with a strong commitment to safety while navigating near term industry disruption.

As of March 31, 2020, GECAS owned 29 of these aircraft, 26 of which are contracted for lease to various airlines that remain obligated to make contractual rental payments. In addition, GECAS has made pre-delivery payments to Boeing related to 143 of these aircraft on order and has made financing commitments to acquire a further 18 aircraft under purchase and leaseback contracts with airlines. During April 2020, GECAS agreed with Boeing to restructure its 737 MAX orderbook including previously canceled positions, resulting in the cancellation of 69 orders with 82 orders now remaining.

As of March 31, 2020, we have approximately \$2.5 billion of net assets (\$4.8 billion of assets and \$2.3 billion of liabilities) related to the 737 MAX program that primarily comprise Aviation accounts receivable offset by progress collections and GECAS pre-delivery payments and owned aircraft subject to lease. No impairment charges were incurred related to the 737 MAX aircraft and related balances, as we continue to believe these assets are fully recoverable. We continue to monitor 737 MAX return to service and return to delivery developments with our airline customers, lessees and Boeing.

LEAP continues to be a strong engine program for us, and we delivered 272 engines for Boeing and Airbus platforms in the first quarter of 2020 and 3,662 engines since inception.

SEGMENT OPERATIONS. Segment revenues include sales of products and services by segment. Industrial segment profit is determined based on performance measures used by our Chief Operating Decision Maker (CODM), who is our Chief Executive Officer (CEO), to assess the performance of each business in a given period.

Please refer to our Annual Report on Form 10-K for the year ended December 31, 2019, for further information regarding our determination of Industrial and Capital segment profit for continuing operations, and for our allocations of corporate costs to our segments.

SUMMARY OF REPORTABLE SEGMENTS <i>(In millions)</i>	Three months ended March 31		
	2020	2019	V%
Power	\$ 4,025	\$ 4,617	(13) %
Renewable Energy	3,194	2,538	26 %
Aviation	6,892	7,954	(13) %
Healthcare	4,727	4,683	1 %
Capital	1,923	2,227	(14) %
Total segment revenues	20,761	22,019	(6) %
Corporate items and eliminations	(237)	183	U
Consolidated revenues	\$ 20,524	\$ 22,202	(8) %
Power	\$ (129)	\$ 110	U
Renewable Energy	(302)	(187)	(61) %
Aviation	1,005	1,660	(39) %
Healthcare	896	781	15 %
Capital	(30)	135	U
Total segment profit (loss)	1,441	2,500	(42) %
Corporate items and eliminations	6,064	(228)	F
GE interest and other financial charges	(370)	(520)	29 %
GE non-operating benefit costs	(616)	(564)	(9) %
GE benefit (provision) for income taxes	(187)	(268)	30 %
Earnings (loss) from continuing operations attributable to GE common shareholders	6,332	920	F
Earnings (loss) from discontinued operations, net of taxes	(178)	2,663	U
Less net earnings attributable to noncontrolling interests, discontinued operations	(2)	34	U
Earnings (loss) from discontinued operations, net of tax and noncontrolling interest	(176)	2,629	U
Consolidated net earnings (loss) attributable to the GE common shareholders	\$ 6,156	\$ 3,549	73 %

POWER

We are monitoring the impacts of COVID-19 on near-term demand and the impact it is having on our operations, including the supply chain and our ability to service our installed base. Our ability to close transactions in the near term will become more challenging due to the impact of lower oil prices on certain customer budgets, the payback of investments and upgrades at lower gas prices, and access to financing for new projects. We are seeing the impact on our suppliers and within our supply chain, which has resulted in delays in parts and equipment output. In addition, the servicing of our customers' assets has been delayed due to travel and country restrictions. Although there may be obstacles in the near term, we believe the long-term outlook for the role of gas in the power market has not materially changed.

Power is continuing to right size its business to better align with market demand and driving its businesses with an operational rigor and discipline that is focused on its customers' lifecycle experience. We continue to partner with our customers, working through field service travel disruptions to effectively service their fleets to maintain operability. As a result of expected volume declines from COVID-19 in the near term, we are taking several measures to offset these pressures. During the first quarter of 2020, Power had approximately 700 headcount reductions and notified approximately 1,300 contractors. In addition, we executed on a hiring freeze, are accelerating planned employee reductions where possible, and are initiating meaningful incremental headcount reduction plans in line with the demand profile.

Looking ahead, we anticipate the power market to continue to be impacted by overcapacity in the industry, increased price pressure from competition on servicing the installed base, and the uncertain timing of deal closures due to financing and the complexities of working in emerging markets. Market factors such as increasing energy efficiency and renewable energy penetration continue to impact long-term demand.

While we navigate the near-term impacts of the COVID-19 pandemic, we will continue to invest in new product development, such as our HA-Turbines, and upgrades as these are critical to our customers and the long-term strategy of the business. Our fundamentals remain strong with approximately \$85 billion in backlog and a gas turbine installed base greater than 7,000 units.

	Three months ended March 31			
	Orders		Sales	
<i>(In units)</i>	2020	2019	2020	2019

Aeroderivatives(a)	3	4	2	2
GE Gas Turbine Gigawatts(c)	2.2	2.1		

(a) Heavy-Duty Gas Turbines and Aeroderivatives are subsets of GE Gas Turbines.

(b) HA-Turbines are a subset of Heavy-Duty Gas Turbines.

(c) Gigawatts reported associated with financial orders in the periods presented.

<i>(In billions)</i>	March 31, 2020		March 31, 2019	
Equipment	\$	18.2	\$	19.1
Services		66.9		66.8
Total backlog	\$	85.1	\$	85.9

	Three months ended March 31			
	2020		2019	
<i>(Dollars in billions)</i>				
Equipment	\$	1.5	\$	1.0
Services		2.6		2.7
Total orders	\$	4.1	\$	3.7
Gas Power	\$	2.9	\$	3.3
Power Portfolio		1.2		1.4
Total segment revenues	\$	4.0	\$	4.6
Equipment	\$	1.5	\$	1.6
Services		2.5		3.0
Total segment revenues	\$	4.0	\$	4.6
Segment profit (loss)	\$	(0.1)	\$	0.1
Segment profit margin		(3.2) %		2.4 %

For the three months ended March 31, 2020, segment orders were up \$0.4 billion (12%), segment revenues were down \$0.6 billion (13%) and segment profit was down \$0.2 billion.

Backlog as of March 31, 2020 decreased \$0.7 billion (1%) due to a decrease in equipment backlog.

Orders increased \$0.5 billion (14%) organically, primarily due to an increase in Steam equipment orders at Power Portfolio and Gas Power equipment orders due to incremental power plant scope on unit orders, partially offset by a decrease in Heavy-Duty Gas Turbine unit orders.

Revenues decreased \$0.5 billion (12%) organically*, primarily due to decreases in services revenues at Gas Power and Steam services at Power Portfolio. Services revenues at Gas Power decreased due to delays in planned outages and transactional part sales due to COVID-19 and lower revenues on upgrades, primarily in the Middle East, where low oil prices are impacting customer budgets.

Profit decreased \$0.2 billion organically* due to lower revenues, as well as supply chain constraints and cost overruns on service agreements, partially offset by improved cost productivity driven by continued efforts to right size the business.

RENEWABLE ENERGY

We are monitoring the impact of COVID-19 on the renewable energy industry, including electricity consumption forecasts and customer capital expenditure levels, supply chain, availability of financing and our ability to execute on equipment and long-term projects, including the impact of possible customer related delays. While we have observed delays in equipment output at several of our manufacturing facilities, we continue to service our customer assets absent any specific country or other restrictions. In response to expected near-term volume declines from COVID-19, we initiated additional cost reduction measures, restructuring and cash preservation actions.

The onshore wind market in the U.S. continues to see a positive impact from the Production Tax Credit (PTC) cycle and customer preference shifting to larger, more efficient units to drive down costs and compete with other power generation options. Despite the competitive nature of the market, onshore wind order pricing has stabilized due to demand caused by the progressive phase-down of PTCs in the U.S., which has recently been extended by one year to include projects meeting certain criteria by 2020 that will be completed through 2024. We expect to continue high levels of production for 2020 deliveries at Onshore Wind and are closely monitoring our execution during this period including risks of delivery delays and possible project postponements due to COVID-19 or otherwise.

The grid market continues to be challenging as we continue to experience order declines in the High Voltage Direct Current (HVDC) and High Voltage (HV) product lines. Both the Grid Solutions equipment and services (Grid) and Hydro businesses are executing their turnaround plans.

New product introductions remain important to our customers who are demonstrating the willingness to adopt the new technology of larger turbines that decrease the levelized cost of energy. We continue to focus on cost reduction initiatives of our products, in-sourcing blade production and developing larger, more efficient turbines like the Haliade-X (Offshore Wind) and Cypress (Onshore Wind). Final certification of the Haliade-X is expected in the second half of 2020.

	Three months ended March 31			
	Orders		Sales	
(In units)	2020	2019	2020	2019

*Non-GAAP Financial Measure

<i>(Dollars in billions)</i>	Three months ended March 31	
	2020	2019
Equipment	\$ 2.6	\$ 2.0
Services	0.6	0.6
Total segment revenues	\$ 3.2	\$ 2.5
Segment profit (loss)	\$ (0.3)	\$ (0.2)
Segment profit margin	(9.5) %	(7.4) %

For the three months ended March 31, 2020, segment orders were down \$0.4 billion (13%), segment revenues were up \$0.7 billion (26%) and segment profit was down \$0.1 billion (61%).

Backlog as of March 31, 2020 increased \$1.3 billion (5%) driven by higher services backlog associated with a larger Onshore Wind installed equipment base and increased equipment backlog at Onshore and Offshore Wind, partially offset by foreign currency translation and lower orders at Grid and Hydro.

Orders decreased \$0.4 billion (11%) organically, primarily due to the nonrecurrence of a large Grid Automated Control Systems (ACS) order and lower Wind orders, primarily from the impact of U.S. PTCs compared to the prior year.

Revenues increased \$0.7 billion (28%) organically*, primarily from 378 more wind turbine shipments on a unit basis, or 112% more megawatts shipped, than in the prior year, partially offset by lower Grid revenues, primarily due to COVID-19.

Profit of \$(0.3) billion decreased \$0.1 billion (66%) organically*, primarily due to the impact of higher sales volume at Onshore Wind more than offset by project execution losses, costs associated with new product introductions and lower sales volume, primarily at Grid due to supply chain and project fulfillment disruptions associated with COVID-19, as well as the nonrecurrence of a \$0.1 billion non-cash gain from the termination of two Offshore Wind contracts in the first quarter of 2019.

AVIATION

The global COVID-19 pandemic is having a material adverse effect on the global airline industry. A key underlying driver of Aviation's commercial engine and services businesses is global passenger air travel, which in turn is driven by economic activity and consumer and business propensity to travel. The COVID-19 pandemic evolved rapidly in March 2020, and resulted in government travel restrictions, public health advisories, and related declines in economic activity. These factors caused a significant drop in passenger air traffic, and as a result, airlines have grounded their fleets and, in many cases, completely ceased passenger operations. Aviation is closely monitoring government actions and economic and industry forecasts, although such forecasts continue to evolve and reflect the uncertainty about the severity and duration of the decline in passenger air traffic. For example, the International Air Transport Association (IATA) in April 2020 forecasted a 48% reduction in revenue passenger kilometers (RPK) for the full year 2020 compared to 2019, lowering a prior forecast from March 2020 of a 38% reduction based on updated assessments about the depth of the economic impact and speed of the recovery in passenger air traffic. More broadly, we are in frequent dialogue with our airline and airframe customers about the outlook for passenger air travel, new aircraft production, and after-market services. Due to the global airline industry contraction, Aviation's airline and airframe customers are taking measures to address reduced demand, which, in turn, is having a material adverse impact on Aviation's business operations and financial performance.

Aviation has and is continuing to take several business actions to respond to the current adverse environment. We continue to partner with our airline and leasing customers to respond to an increased number of requests for short-term payment deferrals and are working closely with our airframe customers to align production rates for 2020. During the first quarter of 2020, Aviation took several measures including a hiring freeze, cancellation of salaried merit increases, and a reduction of all non-safety related discretionary spending, including capital expenditures and engineering and development efforts. Aviation also announced a reduction of approximately 10% of its total United States (U.S.) workforce and a temporary furlough impacting approximately 50% of its U.S. maintenance, repair and overhaul employees for 90 days. Additionally, Aviation announced a temporary furlough impacting its U.S. assembly operations and component manufacturing shops for approximately four weeks during the second quarter of 2020. Aviation is also working with the appropriate parties to properly address its global workforce.

Looking ahead, Aviation's operational and financial performance is impacted by demand for passenger air travel, demand for freight, oil prices, fleet retirements, and demand for new aircraft. We monitor and forecast each of these factors as part of Aviation's long-term planning process, which may result in additional business restructuring actions. Given the uncertainty related to the severity and length of the global COVID-19 pandemic and the impact on these factors across the aviation sector, Aviation could be required to record additional charges, impairments, or other adverse financial impacts in future periods.

As it relates to the military environment, the U.S. Department of Defense and foreign governments have continued flight operations, and have increased budgets to upgrade and modernize their existing fleets, creating future growth opportunities for our Military business.

Total engineering, comprised of both company and customer funded spending, decreased compared to prior year. Company-funded research and development spend decreased compared to the first quarter of 2019, and we expect the reduction to continue in line with the actions outlined above. However, customer-funded engineering efforts, primarily in our Military business, continued to increase.

*Non-GAAP Financial Measure

Aviation is taking actions to protect its ability to serve its customers now and as the global airline industry recovers. While its near-term focus remains on navigating the COVID-19 pandemic, Aviation's deep history of innovation and technology leadership, commercial engine installed base of approximately 38,000 units, military engine installed base of approximately 27,000 units, and \$273 billion backlog represents strong long-term fundamentals. Aviation is actively taking actions to strengthen its business and seeks to emerge from this crisis stronger and drive long-term cash and profitable growth over time.

Refer to the Aviation and GECAS 737 MAX discussion in Consolidated Results for information regarding the Company's exposure related to the temporary fleet grounding of the Boeing 737 MAX.

	Three months ended March 31			
	Orders		Sales	
<i>(In units, except where noted)</i>	2020	2019	2020	2019
Commercial Engines	145	799	472	751
LEAP Engines(a)	6	636	272	424
Military Engines	272	26	146	161

(a) LEAP engines are subsets of commercial engines.

(b) Commercial externally shipped spare parts and spare parts used in time and material shop visits in millions of dollars per day.

<i>(In billions)</i>	March 31, 2020		March 31, 2019	
Equipment	\$	39.2	\$	38.0
Services		234.1		185.4
Total backlog	\$	273.2	\$	223.5

	Three months ended March 31			
	2020		2019	
<i>(Dollars in billions)</i>				
Equipment	\$	2.2	\$	3.2
Services		5.2		5.5
Total orders	\$	7.4	\$	8.7
Commercial Engines & Services	\$	4.8	\$	5.9
Military		1.0		1.0
Systems & Other		1.2		1.0
Total segment revenues	\$	6.9	\$	8.0
Equipment	\$	2.4	\$	3.1
Services		4.4		4.8
Total segment revenues	\$	6.9	\$	8.0
Segment profit	\$	1.0	\$	1.7
Segment profit margin		14.6 %		20.9 %

For the three months ended March 31, 2020, segment orders were down \$1.3 billion (14%), segment revenues were down \$1.1 billion (13%) and segment profit was down \$0.7 billion (39%).

Backlog as of March 31, 2020 increased \$49.8 billion (22%), primarily due to an increase in long-term service agreements. This included approximately 200 LEAP-1B unit order cancellations in the first quarter of 2020.

Orders decreased \$1.1 billion (13%) organically, primarily driven by lower commercial equipment orders due to the 737 MAX grounding and the impact of COVID-19. Military equipment and service total orders increased 60% compared to the prior year, including a significant order from the U.S. Department of Navy's Naval Air Systems Command (NAVAIR) for F414 engines.

Revenues decreased \$0.9 billion (11%) organically*. Equipment revenues decreased, primarily due to 279 fewer commercial install and spare engine units, including 152 fewer LEAP units and 98 fewer CFM56 units versus the prior year. Services revenues also decreased, primarily due to lower commercial spare part shipments and decreased shop visits in our service agreements, due to the impact of COVID-19. Military revenues decreased due to lower volume of engine and spare part shipments, partially offset by increased revenues on development contracts.

Profit decreased \$0.6 billion (39%) organically*, primarily due to Services decreased after-market volume and lower volume of commercial spare engines. During the three months ended March 31, 2020, Aviation recorded period expense of \$0.1 billion related to abnormal production volumes and initiated restructuring actions given decreases in customer demand primarily related to LEAP engines and COVID-19. Aviation also recorded pre-tax charges totaling \$0.1 billion due to expected future losses related to customer credit risk given the current environment. In addition, Aviation recorded a \$0.1 billion non-cash, pre-tax charge (reduction in revenues and profit) to reflect the cumulative impacts of changes to assumptions for certain long-term service agreements. Additional adjustments are likely to occur in future periods and could be material as conditions related to COVID-19 continue to evolve.

*Non-GAAP Financial Measure

HEALTHCARE

During the first quarter of 2020, there was an increase in demand for certain of our products that are highly correlated to the response to COVID-19, including respiratory, computed tomography (CT), monitoring solutions, x-ray, anesthesia and point-of-care ultrasound product lines. However, we also saw reduction in demand and delays in procurement in other products and services that were not critical to the COVID-19 response efforts or where procedures could be postponed (magnetic resonance, contrast agents and nuclear tracers). COVID-19 is driving uncertainty in our markets globally, as well as additional supply chain and logistics costs, and we expect this to continue. In response to expected near term volatility and cost pressures from COVID-19, we have initiated additional cost reduction, restructuring and cash preservation actions.

The global healthcare market has continued to expand, driven by macro trends relating to growing and aging populations, increasing chronic and lifestyle-related diseases, accelerating demand for healthcare in emerging markets, and increasing use of diagnostic imaging. Technological innovation that makes it possible to address an increasing number of diseases, conditions and patients in a more cost-effective manner has also driven growth across each of our global markets.

The Healthcare Systems equipment market over the long term continues to expand at low single-digit rates or better, while demand continues for services on new equipment as well as on our existing installed base. However, there is short-term variation driven by market-specific political, environmental and economic cycles. Growth in emerging markets is driven by long-term trends of expanding demand and access to healthcare. Developed markets are expected to remain steady in the near term driven by macro trends in the healthcare industry.

Dynamics related to tariffs tempered China's growth in 2019. The impact of tariffs on certain types of medical equipment and components that we import from China resulted in increased product costs. We continue to take mitigating actions including moving our sourcing and manufacturing for these parts outside of China. With softening in recent U.S.-China trade relations and continued mitigation actions there has been some moderation in tariffs in both U.S. and China.

The Life Sciences market, which encompasses Pharmaceutical Diagnostics and BioPharma, continues to be strong. The Pharmaceutical Diagnostics business is positioned in the contrast agent and nuclear tracer markets. This market is expected to grow over the long-term, driven by continued diagnostic imaging procedure growth and increasing contrast and tracer-enhanced biomarkers of these same procedures, as these products help to increase the precision of the diagnostic information provided to clinicians. However, in the short-term the reduction in procedures not related to COVID-19 has temporarily reduced demand. We disposed of the BioPharma business on March 31, 2020.

We continue focusing on creating new products and solutions as well as expanding uses of existing offerings that are tailored to the different needs of our global customers. In the first quarter of 2020, we introduced the LOGIQ™ E10 Series ultrasound that is powered by advanced algorithms and the same artificial intelligence technology behind advanced gaming. It can process 10 times more data and generate images faster than our previous ultrasound systems to help clinicians bring fast, precise answers to their patients. We continue to ramp production of critical medical equipment used to diagnose and treat COVID-19 patients, respiratory, computed tomography (CT), monitoring solutions, x-ray, anesthesia and point-of-care ultrasound product lines.

<i>(In billions)</i>	March 31, 2020		March 31, 2019	
Equipment	\$	6.0	\$	6.6
Services		11.4		11.3
Total backlog(a)	\$	17.4	\$	17.9

<i>(In billions)</i>	Three months ended March 31			
	2020		2019	
Equipment	\$	3.3	\$	2.9
Services		2.0		2.0
Total orders(a)	\$	5.3	\$	4.9
Healthcare Systems (HCS)	\$	3.4	\$	3.4
Life Sciences(b)		1.3		1.3
Total segment revenues	\$	4.7	\$	4.7

(a) Backlog as of March 31, 2020 excluded the BioPharma business due to its disposition in the first quarter of 2020. Orders included \$1.1 billion and \$1.0 billion related to BioPharma for the three months ended March 31, 2020 and 2019, respectively.

(b) Included revenues of \$0.8 billion and \$0.8 billion from BioPharma for the three months ended March 31, 2020 and 2019, respectively.

<i>(Dollars in billions)</i>	Three months ended March 31	
	2020	2019
Equipment	\$ 2.7	\$ 2.7
Services	2.0	2.0
Total segment revenues	\$ 4.7	\$ 4.7
Segment profit	\$ 0.9	\$ 0.8
Segment profit margin	19.0 %	16.7 %

For the three months ended March 31, 2020, segment orders were up \$0.4 billion (7%), segment revenues were up (1%) and segment profit was up \$0.1 billion (15%).

Overall, backlog as of March 31, 2020 decreased \$0.5 billion (3%). HCS backlog was up \$0.6 billion, but was more than offset by the removal of BioPharma backlog of \$1.1 billion due to the sale of the business on March 31, 2020. Excluding Biopharma, backlog increased \$0.6 billion (4%).

Orders increased \$0.4 billion (9%) organically, driven by HCS up 8% organically due to COVID-19 related increases in demand and Life Sciences up 10% organically, driven by BioPharma, partially offset by pressure in Pharmaceutical Diagnostics due to COVID-19. Excluding BioPharma, orders increased \$0.3 billion (6%) organically.

Revenues increased \$0.1 billion (2%) organically*, driven by increased demand in HCS products used directly in response to COVID-19 and Life Sciences, driven by BioPharma, partially offset by pressure in Pharmaceutical Diagnostics from a decrease in non-essential elective procedures due to COVID-19. Excluding BioPharma, revenues increased (1%) organically*.

Profit increased \$0.1 billion (10%) organically*, primarily driven by volume growth and cost productivity due to current year cost and prior year restructuring actions, design engineering and service initiatives. These increases were partially offset by inflation, logistics pressure from COVID-19, and investments in research and development, which includes digital product innovations and Healthcare Systems programs. Excluding BioPharma, profits increased (3%) organically*.

CAPITAL

We continue to evaluate strategic options to accelerate the further reduction in the size of GE Capital, some of which could have a material financial charge depending on the timing, negotiated terms and conditions of any ultimate arrangements.

GE Capital made capital contributions to its insurance subsidiaries of \$2.0 billion and \$1.9 billion in the first quarters of 2020 and 2019, respectively, and expects to provide further capital contributions of approximately \$7 billion through 2024. See the Critical Accounting Estimates section within MD&A for further information.

At GE Capital, the primary effect of COVID-19 pertains to its GECAS business. The COVID-19 outbreak has led to worldwide reduction of flight schedules and it is difficult to predict its longer-term impact. The resulting pressure on its airline customers had led to GECAS preparing for redeployments and repossessions, as well as lease modifications in some cases, while continuing to respond to customer requests for short-term rent deferrals. Continued deterioration in cash flow projections, including current rents, downtime, release rates and residual assumptions could result in further impairments in the operating lease portfolio. Additionally, the COVID-19 market-related volatility resulted in higher credit spreads on the investment securities held by our run-off insurance business, which resulted in marks and impairments taken in the first quarter.

As of March 31, 2020, GECAS owned 986 fixed-wing aircraft, of which five with a book value of \$0.1 billion were available to lease to customers (aircraft on the ground). We test recoverability of each fixed-wing aircraft in our operating lease portfolio at least annually. Additionally, we perform quarterly evaluations in circumstances such as when assets are re-leased or current lease terms have changed.

During the three months ended March 31, 2020 and 2019, GECAS recognized pre-tax impairments of \$45 million and \$3 million, respectively, in its operating lease fixed-wing aircraft. The increase in pre-tax impairments was driven by declining cash flow projections for aircraft as a result of COVID-19 and related market impacts.

As of March 31, 2020, GECAS has received deferral requests (primarily short term in nature) from approximately 75% of its airline customers operating in approximately 64 countries and expects to continue to receive requests for rent deferrals and/or lease restructures from its global airline customers as a result of COVID-19 and related market impacts. An extended disruption of regional or international travel could result in an increase in these types of requests in future periods, which could result in an increase to the trade receivable balance. As GECAS evaluates future lease restructures, there is a risk of lease modifications that could have a material adverse effect on GECAS operations, financial position and cash flows. Additionally, the portfolio utilization in our helicopter business was 86% as of March 31, 2020.

Refer to the Aviation and GECAS 737 MAX discussion in Consolidated Results for information regarding the Company's exposure related to the temporary fleet grounding of the Boeing 737 MAX.

*Non-GAAP Financial Measure

<i>(Dollars in billions)</i>	March 31, 2020	December 31, 2019
GECAS	\$ 37.3	\$ 38.0
EFS	1.8	1.8
WCS(a)	7.8	9.0
Insurance	46.8	46.3
Other continuing operations(a)	17.5	22.5
Total segment assets	\$ 111.1	\$ 117.5

GE Capital debt to equity ratio 3.6:1 3.9:1

(a) In the first quarter of 2020 the remaining Industrial Finance assets of \$0.3 billion were transferred to Other continuing operations.

<i>(In billions)</i>	Three months ended March 31	
	2020	2019
GECAS	\$ 1.1	\$ 1.2
EFS	0.1	—
WCS	0.1	0.3
Insurance	0.6	0.7
Other continuing operations	—	—
Total segment revenues	\$ 1.9	\$ 2.2
GECAS	\$ 0.2	\$ 0.3
EFS	0.1	—
WCS	—	0.1
Insurance	(0.1)	—
Other continuing operations(a)	(0.2)	(0.3)
Total segment profit	\$ —	\$ 0.1

(a) Other continuing operations primarily comprise excess interest costs from debt previously allocated to assets that have been sold as part of the GE Capital Exit Plan, preferred stock dividend costs and interest costs not allocated to GE Capital segments, which are driven by GE Capital's interest allocation process. Interest costs are allocated to GE Capital segments based on the tenor of their assets using the market rate at the time of origination, which differs from the asset profile when the debt was originated. As a result, actual interest expense is higher than interest expense allocated to the remaining GE Capital segments. Substantially all preferred stock dividend costs will become a GE obligation in January 2021. See Note 15 to the consolidated financial statements for further information. In addition, we anticipate unallocated interest costs to gradually decline as debt matures and/or is refinanced.

For the three months ended March 31, 2020, segment revenues decreased \$0.3 billion (14%) and segment earnings were down \$0.2 billion.

Capital revenues decreased \$0.3 billion (14%), primarily due to volume declines, mark-to-market effects and impairments as a result of COVID-19 and related market impacts. Capital earnings decreased \$0.2 billion, primarily due volume declines, mark-to-market effects and impairments, as a result of COVID-19 and related market impacts, and the tax benefit related to the BioPharma sale, partially offset by the nonrecurrence of a 2019 tax reform enactment adjustment and lower excess interest cost. Gains were \$0.2 billion in the first quarters of both 2020 and 2019, which primarily related to sales of GECAS aircraft and engines resulting in gains of \$0.1 billion in the first quarters of both 2020 and 2019.

CORPORATE ITEMS AND ELIMINATIONS

Corporate items and eliminations includes the results of our Lighting segment and GE Digital business for all periods presented.

<i>(In millions)</i>	Three months ended March 31	
	2020	2019
Revenues		
Corporate revenues	\$ 377	\$ 592
Eliminations and other	(615)	(408)
Total Corporate Items and Eliminations	\$ (237)	\$ 183
Operating profit (cost)		
Gains (losses) on disposals and held for sale businesses	\$ 12,439	\$ 365
Restructuring and other charges	(207)	(258)
Unrealized gains (losses)	(5,794)	13
Adjusted total corporate operating costs (Non-GAAP)	(374)	(348)
Total Corporate Items and Eliminations (GAAP)	\$ 6,064	\$ (228)
Less: gains (losses) and restructuring & other	6,438	120
Adjusted total corporate operating costs (Non-GAAP)	\$ (374)	\$ (348)

(In millions)	Three months ended March 31	
	2020	2019
Functions & operations	\$ (266)	\$ (357)
Eliminations	(98)	6
Environmental, health and safety (EHS) and other items	(10)	4
Adjusted total corporate operating costs (Non-GAAP)	\$ (374)	\$ (348)

Adjusted total corporate operating costs* excludes gains (losses) on disposals and held for sale businesses, restructuring and other charges and unrealized gains (losses). We believe that adjusting corporate costs* to exclude the effects of items that are not closely associated with ongoing corporate operations provides management and investors with a meaningful measure that increases the period-to-period comparability of our ongoing corporate costs.

Unrealized gains (losses) are primarily related to our mark-to-market impact on our Baker Hughes shares and an impairment on our Ventures portfolio for the three months ended March 31, 2020, and to our Wabtec equity investment for the three months ended March 31, 2019.

For the three months ended March 31, 2020, revenues decreased by \$0.4 billion, primarily as a result of a \$0.2 billion decrease resulting from the sale of our Current business in April 2019 and a \$0.2 billion increase in inter-segment eliminations. Corporate costs decreased by \$6.3 billion, primarily due to \$12.1 billion of higher net gains from disposed or held for sale businesses, which was primarily related to a \$12.3 billion gain from the sale of our BioPharma business in the first quarter of 2020, compared to gains in the first quarter of 2019 of \$0.2 billion from the sale of our Digital ServiceMax business and \$0.1 billion from a tax indemnity release related to our legacy NBCU business. Corporate costs also decreased by \$0.1 billion due to lower restructuring costs within Healthcare, which were partially offset by higher restructuring actions taken in Aviation in the first quarter of 2020. These decreases were partially offset by \$5.8 billion of higher net unrealized losses, primarily related to a \$5.7 billion mark-to market impact on our Baker Hughes shares and a \$0.1 billion impairment on our Ventures portfolio.

Adjusted total corporate operating costs* remained relatively flat. Intercompany profit eliminations increased \$0.1 billion, including the results of higher intercompany activity from our Aviation segment to our GECAS business. This was mostly offset by a decrease in Functions and Operations of \$0.1 billion (25%), driven by cost reductions in our Digital business.

Although there were no significant impacts in the first quarter related to COVID-19, potential future impacts at Corporate may include, but are not limited to, the increase in our long-term liabilities, primarily for pension and certain environmental obligations, or decrease in asset returns subject to interest rate changes, additional asset impairments driven by overall market conditions, and lower revenue in our Digital and Lighting operations.

RESTRUCTURING. Restructuring actions are an essential component of our cost improvement efforts to both existing operations and those recently acquired. Restructuring and other charges relate primarily to workforce reductions, facility exit costs associated with the consolidation of sales, service and manufacturing facilities, the integration of acquisitions, and certain other asset write-downs such as those associated with product line exits. We will continue to closely monitor the economic environment, including the impacts of COVID-19, and expect to undertake further restructuring actions to more closely align our cost structure with earnings and cost reduction goals.

(In billions)	Three months ended March 31	
	2020	2019
Workforce reductions	\$ 0.2	\$ 0.2
Plant closures & associated costs and other asset write-downs	—	0.1
Acquisition/disposition net charges	—	—
Total restructuring and other charges	\$ 0.2	\$ 0.3
Cost of product/services	\$ 0.1	\$ 0.1
Selling, general and administrative expenses	0.1	0.2
Other income	—	—
Total restructuring and other charges	\$ 0.2	\$ 0.3
Power	\$ —	\$ —
Renewable Energy	—	—
Aviation	0.1	—
Healthcare	—	0.1
Corporate	0.1	0.1
Total restructuring and other charges	\$ 0.2	\$ 0.3

Cash expenditures for restructuring and other charges were approximately \$0.2 billion and \$0.3 billion for the three months ended March 31, 2020 and 2019 respectively.

*Non-GAAP Financial Measure

COSTS AND GAINS NOT INCLUDED IN SEGMENT RESULTS. As discussed in the Segment Operations section within the MD&A, certain amounts are not included in industrial segment results because they are excluded from measurement of their operating performance for internal and external purposes. These costs relate primarily to restructuring and acquisition and disposition activities.

<i>(In billions)</i>	Costs		Gains (Losses)	
	Three months ended March 31		Three months ended March 31	
	2020	2019	2020	2019
Power	\$ —	\$ —	\$ —	\$ —
Renewable Energy	—	—	—	—
Aviation	0.1	—	—	—
Healthcare	—	0.1	12.3	—
Total segments	\$ 0.1	\$ 0.1	\$ 12.4	\$ —

OTHER CONSOLIDATED INFORMATION

INTEREST AND OTHER FINANCIAL CHARGES

<i>(In billions)</i>	Three months ended March 31	
	2020	2019
GE	\$ 0.4	\$ 0.5
GE Capital	0.5	0.7

The decrease in GE interest and other financial charges for the three months ended March 31, 2020, was driven primarily by lower expenses on sales of GE current and long-term receivables as well as lower interest on debt due to lower average borrowings balances. The primary components of GE interest and other financial charges are interest on short- and long-term borrowings and financing costs on sales of receivables. Total GE interest and other financial charges of \$0.2 billion and \$0.3 billion was recorded at Corporate and \$0.1 billion and \$0.2 billion was recorded by Industrial segments for the three months ended March 31, 2020 and 2019.

The decrease in GE Capital interest and other financial charges for the three months ended March 31, 2020 was primarily due to lower average borrowings balances due to maturities and lower average interest rates due to changes in market rates.

CONSOLIDATED INCOME TAXES

For the three months ended March 31, 2020, the consolidated income tax rate was 1.0% compared to 12.5% for the three months ended March 31, 2019.

The consolidated provision for income taxes was \$0.1 billion in the first quarter of 2020 and \$0.1 billion in the first quarter of 2019. The provision was essentially unchanged as the tax benefit associated with the mark-to-market loss on the remaining investment in Baker Hughes (\$1.1 billion) was offset by the tax expense associated with the disposition of the BioPharma business excluding the amount recognized on preparatory steps in 2019 (\$1.1 billion).

The consolidated tax provision (benefit) includes \$0.2 billion and \$0.3 billion for GE (excluding GE Capital) for the first quarters of 2020 and 2019, respectively.

DISCONTINUED OPERATIONS. Discontinued operations primarily include our Baker Hughes and Transportation segments, and certain businesses in our GE Capital segment (our mortgage portfolio in Poland and trailing liabilities associated with the sale of our GE Capital businesses).

The mortgage portfolio in Poland (Bank BPH) comprises floating rate residential mortgages, 86% of which are indexed to or denominated in foreign currencies (primarily Swiss francs). At March 31, 2020, the total portfolio had a carrying value of \$2.4 billion with a 1.46% 90-day delinquency rate and an average loan to value ratio of approximately 70.3%. The portfolio is recorded at fair value less cost to sell, which reflects market yields as well as our best estimate of the effects of ongoing litigation in Poland related to foreign currency-denominated mortgages. Discontinued operations income for the three months ended March 31, 2020, includes the recognition of a \$0.1 billion valuation allowance on the carrying value of the portfolio, primarily driven by a higher discount rate as a result of COVID-19 and related market impacts. Future changes in the economic impact of COVID-19, market yields or changes in estimated legal liabilities could result in further losses related to these loans in future reporting periods.

See Notes 2 and 19 to the consolidated financial statements for further financial information regarding our businesses in discontinued operations.

FINANCIAL INFORMATION FOR DISCONTINUED OPERATIONS

<i>(In billions)</i>	Three months ended March 31	
	2020	2019
Earnings (loss) of discontinued operations, net of taxes	\$ (174)	\$ 109
Gain (loss) on disposal, net of taxes	(4)	2,553
Earnings (loss) from discontinued operations, net of taxes	\$ (178)	\$ 2,663

CAPITAL RESOURCES AND LIQUIDITY

FINANCIAL POLICY. We intend to maintain a disciplined financial policy, targeting a sustainable long-term credit rating in the Single-A range with a GE Industrial net debt*-to-EBITDA ratio of less than 2.5x and a dividend in line with our peers over time, as well as a less than 4-to-1 debt-to-equity ratio for GE Capital. In addition to net debt*-to-EBITDA, we also evaluate other measures, including gross debt-to-EBITDA, and we will ultimately size our deleveraging actions across a range of measures to ensure we are operating the Company based on a strong balance sheet. We intend to continue to decrease our leverage over time as we navigate this period of uncertainty, although we now expect to achieve our prior targets over a longer period than previously announced.

LIQUIDITY POLICY. We maintain a strong focus on liquidity and define our liquidity risk tolerance based on sources and uses to maintain a sufficient liquidity position to meet our obligations under both normal and stressed conditions. At both GE and GE Capital, we manage our liquidity to provide access to sufficient funding to meet our business needs and financial obligations, as well as capital allocation and growth objectives, throughout business cycles. We believe that our consolidated liquidity and availability under our credit facilities will be sufficient to meet our liquidity needs.

CONSOLIDATED LIQUIDITY. Following is a summary of cash, cash equivalents and restricted cash at March 31, 2020.

<i>(In billions)</i>	March 31, 2020		March 31, 2020	
GE	\$	33.8	U.S.	\$ 31.7
GE Capital		13.5	Non-U.S.	15.6
Consolidated	\$	47.3	Consolidated	\$ 47.3

With net proceeds of \$20.3 billion received from the sale of our BioPharma business, we ended the first quarter of 2020 with \$47.3 billion of consolidated cash, cash equivalents and restricted cash, in addition to our available credit lines. As described below, we have taken a number of actions to further de-risk and de-lever our balance sheet and prudently manage our liquidity amid a challenging external environment.

Cash held in non-U.S. entities has generally been reinvested in active foreign business operations; however, substantially all of our unrepatriated earnings were subject to U.S. federal tax and, if there is a change in reinvestment, we would expect to be able to repatriate available cash (excluding amounts held in countries with currency controls) without additional federal tax cost. Any foreign withholding tax on a repatriation to the U.S. would potentially be partially offset by a U.S. foreign tax credit.

GE LIQUIDITY. GE's primary sources of liquidity consist of cash and cash equivalents, free cash flows from our operating businesses, monetization of receivables, proceeds from dispositions, and short-term borrowing facilities. Cash generation can be subject to variability based on many factors, including seasonality, receipt of down payments on large equipment orders, timing of billings on long-term contracts, the effects of changes in end markets and our ability to execute dispositions.

GE also has available short-term borrowing facilities to fund its operations, including a commercial paper program, revolving credit facilities and short-term intercompany loans from GE Capital, which are generally repaid within the same quarter. See the Borrowings section for details of our credit facilities and borrowing activity in our external short-term borrowing facilities.

GE cash, cash equivalents and restricted cash totaled \$33.8 billion at March 31, 2020, including \$2.3 billion of cash held in countries with currency control restrictions and \$0.5 billion of restricted use cash. Cash held in countries with currency controls represents amounts held in countries which may restrict the transfer of funds to the U.S. or limit our ability to transfer funds to the U.S. without incurring substantial costs. Restricted use cash represents amounts that are not available to fund operations, and primarily comprised collateral for receivables sold and funds restricted in connection with certain ongoing litigation matters.

In the first quarter of 2020, GE received \$20.3 billion of net proceeds from the sale of our BioPharma business within our Healthcare segment. On April 1, 2020, GE used \$6.0 billion of these proceeds to repay a portion of the intercompany loans from GE Capital. In addition, our ending commercial paper balance decreased by \$1.1 billion compared to December 31, 2019. We intend to maintain a high level of cash and maximize flexibility as we evaluate the next steps over time that are needed to execute our deleveraging priorities throughout this period of uncertainty. Additionally, we continue to evaluate the timing of an orderly sale over time of our remaining stake in Baker Hughes.

GE CAPITAL LIQUIDITY. GE Capital's primary sources of liquidity consist of cash and cash equivalents, cash generated from asset sales and cash flows from our businesses. We expect to maintain an adequate liquidity position to fund our insurance obligations and debt maturities primarily as a result of cash flows from our businesses, GE repayments of intercompany loans and capital contributions from GE. See the Segment Operations - Capital section within MD&A for further information regarding allocation of GE Capital interest expense to the GE Capital businesses.

GE Capital cash, cash equivalents and restricted cash totaled \$13.5 billion at March 31, 2020, including \$1.3 billion which was subject to regulatory restrictions, primarily in insurance entities.

*Non-GAAP Financial Measure

GE Capital provided capital contributions to its insurance subsidiaries of \$2.0 billion, \$1.9 billion and \$3.5 billion in the first quarters of 2020, 2019 and 2018, respectively, and expects to provide further capital contributions of approximately \$7 billion through 2024. These contributions are subject to ongoing monitoring by Kansas Insurance Department (KID), and the total amount to be contributed could increase or decrease, or the timing could be accelerated, based upon the results of reserve adequacy testing or a decision by KID to modify the schedule of contributions set forth in January 2018. We will continue to monitor the volatile interest rate environment, including the impact of reinvestment rates and our investment portfolio performance, and other factors in determining the related effect on our expected future capital contributions. See the Critical Accounting Estimates section of MD&A for discussion of the sensitivity of interest rate changes to our insurance liabilities. GE maintains specified capital levels at these insurance subsidiaries under capital maintenance agreements. Going forward, we anticipate funding any capital needs for insurance through a combination of GE Capital liquidity, GE Capital asset sales, GE Capital future earnings and capital contributions from GE.

BORROWINGS. Consolidated total borrowings were \$85.2 billion and \$90.9 billion at March 31, 2020 and December 31, 2019, respectively. The reduction was driven primarily by net repayments of GE Capital debt of \$6.2 billion (including \$4.7 billion of long-term debt maturities), a reduction in GE commercial paper of \$1.1 billion, and \$0.7 billion of foreign exchange due to strengthening US dollar against most currencies, partially offset by an increase of \$2.4 billion in fair value adjustments for GE Capital debt in fair value hedge relationships as a result of lower interest rates.

GE Industrial net debt* was \$34.0 billion and \$47.9 billion at March 31, 2020 and December 31, 2019, respectively. The reduction was driven primarily by a higher ending cash balance mainly as a result of the proceeds from the sale of the BioPharma business.

In 2015, senior unsecured notes and commercial paper were assumed by GE upon its merger with GE Capital. Under the conditions of the 2015 assumed debt agreement, GE Capital agreed to continue making required principal and interest payments on behalf of GE, resulting in the establishment of an intercompany receivable and payable between GE and GE Capital. In addition, GE Capital has periodically made intercompany loans to GE with maturity terms that mirror the assumed debt. As these loans qualify for right-of-offset presentation, they reduce the assumed debt intercompany receivable and payable between GE and GE Capital, as noted in the table below.

The following table provides a reconciliation of total short- and long-term borrowings as reported on the respective GE and GE Capital Statements of Financial Position to borrowings adjusted for assumed debt and intercompany loans:

March 31, 2020 (In billions)	GE	GE Capital	Consolidated(a)
Total short- and long-term borrowings	\$ 48.1	\$ 37.6	\$ 85.2
Debt assumed by GE from GE Capital	(29.1)	29.1	—
Intercompany loans with right of offset	12.2	(12.2)	—
Total intercompany payable (receivable) between GE and GE Capital	(16.9)	16.9	—
Total borrowings adjusted for assumed debt and intercompany loans	\$ 31.2	\$ 54.5	\$ 85.2

(a) Included \$0.6 billion of eliminations of other GE borrowings from GE Capital, primarily related to timing of cash settlements associated with GE receivables monetization programs.

When measuring the individual financial positions of GE and GE Capital, assumed debt should be considered a GE Capital debt obligation, and the intercompany loans with the right of offset mentioned above should be considered a GE debt obligation and a reduction of GE Capital's total debt obligations. The following table illustrates the primary components of GE and GE Capital borrowings, adjusted for assumed debt and intercompany loans.

GE (In billions)	March 31, 2020	December 31, 2019	GE Capital (In billions)	March 31, 2020	December 31, 2019
Commercial paper	\$ 1.9	\$ 3.0	Senior and subordinated notes	\$ 35.8	\$ 36.5
GE senior notes	15.4	15.5	Senior and subordinated notes assumed by GE	29.1	31.4
Intercompany loans from GE Capital	12.2	12.2	Intercompany loans to GE	(12.2)	(12.2)
Other GE borrowings	1.6	2.2	Other GE Capital borrowings(a)	1.8	3.4
Total GE adjusted borrowings	\$ 31.2	\$ 32.9	Total GE Capital adjusted borrowings	\$ 54.5	\$ 59.0

(a) Included \$0.6 billion and \$1.7 billion at March 31, 2020 and December 31, 2019, respectively, of non-recourse borrowings of consolidated securitization entities where GE Capital has securitized financial assets as an alternative source of funding.

The intercompany loans from GE Capital to GE bear the right of offset against amounts owed by GE Capital to GE under the assumed debt agreement and can be prepaid by GE at any time, in whole or in part, without premium or penalty. These loans are priced at market terms and have a collective weighted average interest rate of 3.5% and term of approximately 11.8 years at March 31, 2020. On April 1, 2020, GE repaid \$6.0 billion of intercompany loans from GE Capital, decreasing GE borrowings with an offsetting increase to GE Capital borrowings.

*Non-GAAP Financial Measure

On April 22, 2020, GE issued \$6.0 billion of senior notes, comprised of \$1.0 billion due 2027, \$1.25 billion due 2030, \$1.5 billion due 2040, and \$2.25 billion due 2050, and used the proceeds to complete a tender offer to purchase \$4.2 billion of GE senior notes with maturities ranging from 2020 to 2024. We intend to use the remaining proceeds to repurchase, redeem or repay GE's outstanding debt obligations, including other notes or commercial paper. These transactions will be leverage neutral and liquidity enhancing by extending our near-term industrial debt maturities.

On April 23, 2020, GE Capital completed a tender offer to purchase \$5.4 billion of GE Capital senior notes with maturities during 2020 using the proceeds from the repayment of \$6.0 billion of intercompany loans from GE.

GE has in place committed revolving credit lines. The following table provides a summary of committed and available credit lines.

GE COMMITTED AND AVAILABLE REVOLVING CREDIT FACILITIES <i>(In billions)</i>	March 31, 2020		December 31, 2019	
Unused back-up revolving syndicated credit facility	\$	20.0	\$	20.0
Unused revolving syndicated credit facility		14.8		14.8
Bilateral revolving credit facilities		7.2		7.2
Total committed revolving credit facilities	\$	42.0	\$	42.0
Less offset provisions		6.7		6.7
Total net available revolving credit facilities	\$	35.3	\$	35.3

Included in our credit facilities at March 31, 2020, was an unused \$20.0 billion back-up revolving syndicated credit facility extended by 36 banks, expiring in 2021, and an unused \$14.8 billion revolving syndicated credit facility extended by six banks, expiring on December 31, 2020. The commitments under these syndicated credit facilities may be reduced by up to \$6.7 billion due to offset provisions for any bank that holds a commitment to lend under both facilities.

As part of our ordinary course refinancing processes, on April 17, 2020, we refinanced unused back-up revolving syndicated credit facility. In connection with the refinancing, we terminated the unused \$20.0 billion back-up revolving syndicated credit facility and entered into a new \$15.0 billion back-up revolving syndicated credit facility, expiring in April 2023. This facility does not contain any offset provisions. The new back-up revolving credit facility includes a customary net debt-to-EBITDA financial covenant.

The closing of the new \$15.0 billion facility also terminated the \$14.8 billion unused revolving syndicated credit facility that was scheduled to mature in December 2020, which had an aggregate revolving commitment amount of \$4.2 billion effective April 14, 2020, following the sale of the BioPharma business within our Healthcare segment.

Under the terms of an agreement between GE Capital and GE, GE Capital has the right to compel GE to borrow under all credit facilities in place at March 31, 2020 except the \$14.8 billion unused revolving syndicated credit facility expiring on December 31, 2020. Under this agreement, GE would transfer the proceeds to GE Capital as intercompany loans, which would be subject to the same terms and conditions as those between GE and the lending banks. GE Capital has not exercised this right.

The following table provides a summary of the activity in the primary external sources of short-term borrowings for GE in the first quarters of 2020 and 2019. GE uses bilateral revolving credit facilities from time to time to meet its short-term liquidity needs.

<i>(In billions)</i>	GE Commercial Paper		Bilateral Revolving Credit Facilities		Total
2020					
Average borrowings during the first quarter	\$	2.9	\$	1.2	\$ 4.1
Maximum borrowings outstanding during the first quarter		3.4		1.5	4.7
Ending balance at March 31		1.9		—	1.9
2019					
Average borrowings during the first quarter	\$	3.2	\$	1.3	\$ 4.4
Maximum borrowings outstanding during the first quarter		3.6		1.5	4.8
Ending balance at March 31		3.0		—	3.0

Total average and maximum borrowings in the table above are calculated based on the daily outstanding balance of the sum of commercial paper and revolving credit facilities.

GE's ending commercial paper balance decreased to \$1.9 billion at March 31, 2020 from \$3.0 billion at December 31, 2019, primarily as a result of market conditions and our liquidity position.

In addition to these external sources of short-term borrowings, GE and GE Capital may from time to time enter into short-term intercompany loans to utilize excess cash as an efficient source of liquidity, which are typically repaid within the same quarter.

CREDIT RATINGS AND CONDITIONS. We have relied, and may continue to rely, on the short- and long-term debt capital markets to fund, among other things, a significant portion of our operations. The cost and availability of debt financing is influenced by our credit ratings. Moody's Investors Service (Moody's), Standard and Poor's Global Ratings (S&P), and Fitch Ratings (Fitch) currently issue ratings on GE and GE Capital short- and long-term debt. The credit ratings of GE and GE Capital as of the date of this filing are set forth in the table below.

	Moody's	S&P	Fitch
GE			
Outlook	Negative	Negative	Stable
Short term	P-2	A-2	F3
Long term	Baa1	BBB+	BBB
GE Capital			
Outlook	Negative	Negative	Stable
Short term	P-2	A-2	F3
Long term	Baa1	BBB+	BBB

On April 10, 2020, S&P affirmed the ratings of GE and GE Capital short- and long-term debt and changed its outlook from Stable to Negative.

On April 12, 2020, Fitch lowered the credit ratings of GE and GE Capital short- and long-term debt from F2 to F3 and BBB+ to BBB, respectively, with a Stable outlook.

On April 13, 2020, Moody's affirmed the ratings of GE and GE Capital short- and long-term debt and changed its outlook from Stable to Negative.

We are disclosing our credit ratings and any current quarter updates to these ratings to enhance understanding of our sources of liquidity and the effects of our ratings on our costs of funds. Our ratings may be subject to a revision or withdrawal at any time by the assigning rating organization, and each rating should be evaluated independently of any other rating. For a description of some of the potential consequences of a reduction in our credit ratings, see the Financial Risks section of Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2019.

The following table provides a summary of the estimated potential liquidity impact in the event of further downgrades with regards to the most significant contractual credit ratings conditions of the Company based on their proximity to our current ratings.

<i>(In billions)</i>	Triggers Below	At March 31, 2020
Derivatives		
Terminations	BBB/Baa2 \$	(0.4)
Cash margin posting	BBB/Baa2	(0.9)
Receivables Sales Programs		
Loss of cash commingling	A-2/P-2/F2 \$	(0.6)
Alternative funding sources	A-2/P-2/F2	(0.7)
Surety bond cash collateral posting	BBB-/Baa3 \$	(0.8)

The timing within the quarter of the potential liquidity impact of these areas may differ, as described in the following sections which provide additional details regarding the significant credit rating conditions of the Company.

DEBT CONDITIONS. Substantially all debt agreements in place at March 31, 2020 do not contain material credit rating covenants. If our short-term credit ratings were to fall below A-2/P-2/F2, it is possible that we would lose all or part of our access to the tier-2 commercial paper markets, which would reduce our borrowing capacity in those markets and may result in increased utilization of our revolving credit facilities to fund our intra-quarter operations. As of the date of this filing, the Fitch downgrade has not interrupted our ability to access the tier-2 market.

DERIVATIVE CONDITIONS. Swap, forward and option contracts are executed under standard master agreements that typically contain mutual downgrade provisions that provide the ability of the counterparty to require termination if the credit ratings of the applicable GE entity were to fall below specified ratings levels agreed upon with the counterparty, primarily BBB/Baa2. Our master agreements also typically contain provisions that provide termination rights upon the occurrence of certain other events, such as a bankruptcy or events of default by one of the parties. If an agreement was terminated under any of these circumstances, the termination amount payable would be determined on a net basis and could also take into account any collateral posted. The net amount of our derivative liability subject to such termination provisions, after consideration of collateral posted by us and outstanding interest payments was \$0.4 billion at March 31, 2020. This excludes exposure related to embedded derivatives, which are not subject to these provisions.

In addition, certain of our derivatives, primarily interest rate swaps, are subject to additional cash margin posting requirements if our credit ratings were to fall below BBB/Baa2. The amount of additional margin will vary based on, among other factors, market movements and changes in our positions. At March 31, 2020, the amount of additional margin that we could be required to post if we fell below these ratings levels was approximately \$0.9 billion.

The Fitch downgrades did not result in a breach of any of our required ratings levels relating to derivatives.

See Note 17 to the consolidated financial statements for further information about our risk exposures, our use of derivatives, and the effects of this activity on our financial statements.

OTHER CONDITIONS. Where we provide servicing for third-party investors under certain of our receivable sales programs, GE is contractually permitted to commingle cash collected from customers on financing receivables sold to third-party investors with our own cash prior to payment to third-party investors, provided our short-term credit rating does not fall below A-2/P-2. In the event any of our ratings were to fall below such levels, we may be required to segregate certain of these cash collections owed to third-party investors into restricted bank accounts and would lose the short-term liquidity benefit of commingling with respect to such collections. The financial impact to our intra-quarter liquidity would vary based on collections activity for a given quarter and may result in increased utilization of our revolving credit facilities. The loss of cash commingling would have resulted in an estimated maximum reduction of approximately \$0.6 billion to GE intra-quarter liquidity during the first quarter of 2020.

We have relied, and may continue to rely, on securitization programs to provide alternative funding for sales of GE receivables to third-party investors. If any of our short-term credit ratings were to fall below A-2/P-2/F2, the timing or amount of available liquidity generated by these programs could be adversely impacted. In the first quarter of 2020, the estimated maximum reduction to our ending available liquidity had our credit ratings fallen below these levels was approximately \$0.7 billion. In the event we fall below these ratings levels, these programs contain features that permit continued timely third-party funding subject to additional restrictions, which we do not expect to have a significant impact to the Company.

In conjunction with ordinary course commercial transactions and certain regulatory requirements, the Company may periodically enter into agreements that require us to post surety bonds to counterparties. In the first quarter of 2020, we entered into amendments to our agreements with certain of our surety bond providers that may require us to post cash collateral in the event our credit ratings were to fall below BBB-/Baa3. At March 31, 2020, the maximum amount of cash collateral we could be required to post if we fell below these levels was approximately \$0.8 billion.

FOREIGN EXCHANGE. As a result of our global operations, we generate and incur a significant portion of our revenues and expenses in currencies other than the U.S. dollar. Such principal currencies include the euro, the pound sterling, the Brazilian real and the Chinese renminbi, among others. The effects of foreign currency fluctuations on earnings, excluding the earnings impact of the underlying hedged item, was less than \$0.1 billion for the three months ended March 31, 2020 and less than \$0.1 billion for the three months ended March 31, 2019. This analysis excludes any offsetting effect from the forecasted future transactions that are economically hedged.

See Note 17 to the consolidated financial statements for further information about our risk exposures, our use of derivatives, and the effects of this activity on our financial statements.

STATEMENT OF CASH FLOWS – THREE MONTHS ENDED MARCH 31, 2020 VERSUS 2019. We manage the cash flow performance of our industrial and financial services businesses separately, in order to enable us and our investors to evaluate the cash from operating activities of our industrial businesses separately from the cash flows of our financial services business.

See the Intercompany Transactions between GE and GE Capital section and Notes 4 and 20 to the consolidated financial statements for further information regarding certain transactions affecting our consolidated Statement of Cash Flows.

GE CASH FLOWS FROM CONTINUING OPERATIONS. The most significant source of cash in GE CFOA is customer-related activities, the largest of which is collecting cash resulting from product or services sales. The most significant operating use of cash is to pay our suppliers, employees, tax authorities, contribute to post retirement plans and pay others for a wide range of material, services and taxes.

GE cash used for operating activities was \$1.7 billion in 2020, an increase of \$1.1 billion compared with 2019, primarily due to: an increase in cash used for working capital of \$1.1 billion; and a general decrease in net income (after adjusting for the gain on the sale of BioPharma and the non-cash loss related to our interest in Baker Hughes), primarily due to COVID-19 impacts in our Aviation segment; partially offset by a decrease in cash used for contract & other deferred assets of \$0.7 billion, primarily due to higher billings on our long-term equipment contracts and an increased net unfavorable change in estimated profitability, partially offset by higher revenue recognition, on our long-term service agreements.

The increase in cash used for working capital was due to: an increase in cash used for accounts payable of \$1.5 billion, which was primarily as a result of lower volume in 2020 and higher disbursements related to purchases of materials in prior periods; and higher net utilizations of progress collections of \$0.3 billion. These increases in cash used for working capital were partially offset by an increase in cash generated from current receivables of \$0.5 billion, which was primarily driven by lower volume, partially offset by a higher decrease in sales of receivables; and an decrease in cash used for inventories of \$0.1 billion, which was primarily driven by lower build for anticipated volumes in the year, largely offset by lower liquidations.

As discussed in the Significant Developments section within the Consolidated Results section of MD&A, the COVID-19 pandemic negatively impacted GE CFOA and GE Industrial free cash flows* by approximately \$1 billion in the first quarter of 2020, primarily as a result of decreased net income and working capital in our Aviation segment.

GE cash from investing activities was \$20.0 billion in 2020, an increase of \$17.8 billion compared with 2019, primarily due to: net proceeds from the sale of our BioPharma business of \$20.3 billion; and lower cash used in relation to net settlements between our continuing operations and discontinued operations of \$0.4 billion; partially offset by the nonrecurrence of proceeds from the 2019 spin-off of our Transportation business of \$2.9 billion. Cash used for additions to property, plant and equipment and internal-use software, which is a component of GE Industrial free cash flows*, was \$0.6 billion in both 2020 and 2019.

GE cash used for financing activities was \$2.0 billion in 2020, an increase of \$0.7 billion compared with 2019, primarily due to higher net repayments of borrowings.

GE CASH FLOWS FROM DISCONTINUED OPERATIONS. GE cash used for operating activities of discontinued operations in 2019 primarily reflects operating outflows related to Transportation, prior to our disposition of the segment in the first quarter of 2019. GE cash used for financing activities of discontinued operations in 2019 primarily reflects payments of Baker Hughes dividends to noncontrolling interests.

GE CAPITAL CASH FLOWS FROM CONTINUING OPERATIONS. **GE Capital cash from operating activities** was \$1.3 billion in 2020, an increase of \$1.2 billion compared with 2019, primarily due to: a net increase in cash collateral received and settlements paid from counterparties on derivative contracts of \$0.9 billion and a general increase in cash generated from earnings (loss) from continuing operations.

GE Capital cash used for investing activities was \$0.1 billion in 2020, an increase of \$3.9 billion compared with 2019, primarily due to: lower collections of financing receivables of \$2.2 billion and an increase of net purchases of investment securities of \$1.7 billion.

GE Capital cash used for financing activities was \$6.4 billion in 2020, an increase of \$2.9 billion compared with 2019, primarily due to: higher net repayments of borrowings of \$2.8 billion and higher cash settlements on derivatives hedging foreign currency debt of \$0.2 billion.

INTERCOMPANY TRANSACTIONS BETWEEN GE AND GE CAPITAL. Transactions between related companies are made on arm's length terms and are reported in the GE and GE Capital columns of our financial statements, which we believe provide useful supplemental information to our consolidated financial statements. See Note 20 to the consolidated financial statements for further information.

Sales of Receivables. In order to manage short-term liquidity and credit exposure, GE may sell current customer receivables to GE Capital and other third parties. These transactions are made on arm's length terms and any discount related to time value of money, is recognized within the respective GE Industrial business in the period these receivables were sold to GE Capital or third parties. See Note 4 to the consolidated financial statements for further information.

Supply Chain Finance Programs. GE facilitates voluntary supply chain finance programs with third parties which provide participating GE suppliers the opportunity to sell their GE receivables to third parties at the sole discretion of both the suppliers and the third parties. At March 31, 2020 and December 31, 2019, included in GE's accounts payable is \$2.6 billion and \$2.4 billion, respectively, of supplier invoices that are subject to the third-party programs. Total GE supplier invoices paid through these third-party programs were \$1.1 billion and \$0.1 billion for the three months ended March 31, 2020 and 2019, respectively.

The GE liability associated with the funded participation in the GE Capital program is presented as accounts payable and amounted to \$1.3 billion and \$2.1 billion at March 31, 2020 and December 31, 2019, respectively.

GE Capital Finance Transactions. During the three months ended March 31, 2020 and 2019, GE Capital acquired from third parties five aircraft with a list price totaling \$0.6 billion and 13 aircraft with a list price totaling \$1.9 billion, respectively, that will be leased to others and are powered by engines manufactured by GE Aviation and affiliates. GE Capital also made payments to GE Aviation and affiliates related to spare engines and engine parts of \$0.1 billion and \$0.1 billion, which included \$0.1 billion and an insignificant amount to CFM International during the three months ended March 31, 2020 and 2019, respectively. Additionally, GE Capital had \$2.1 billion and \$2.0 billion of net book value of engines, originally manufactured by GE Aviation and affiliates and subsequently leased back to GE Aviation and affiliates at March 31, 2020 and December 31, 2019, respectively.

Also, during the three months ended March 31, 2020 and 2019, GE recognized equipment revenues of \$0.5 billion and \$0.2 billion, respectively, from customers within our Power and Renewable Energy segments in which GE Capital is an investee or is committed to be an investee in the underlying projects.

For certain of these investments, in order to meet its underwriting criteria, GE Capital may obtain a direct guarantee from GE related to the performance of the third party. GE guarantees include direct performance or payment guarantees, return on investment guarantees and asset value guarantees. As of March 31, 2020, GE had outstanding guarantees to GE Capital on \$1.0 billion of funded exposure and \$0.8 billion of unfunded commitments, which included guarantees issued by industrial businesses. The recorded contingent liability for these guarantees was insignificant as of March 31, 2020 and is based on individual transaction level defaults, losses and/or returns.

*Non-GAAP Financial Measure

CRITICAL ACCOUNTING ESTIMATES

Please refer to the Critical Accounting Estimates and Other Items sections within MD&A and Note 1 to the consolidated financial statements of our Annual Report on Form 10-K for the year ended December 31, 2019, for a further discussion of our accounting policies and critical accounting estimates. COVID-19 related market events may have an effect on our Insurance business and pension assumptions.

INSURANCE AND INVESTMENT CONTRACTS. At March 31, 2020, our insurance liabilities and annuity benefits of \$38.2 billion are primarily supported by investment securities of \$37.6 billion and commercial mortgage loans of \$1.9 billion, net of their allowance for losses, respectively.

Future policy benefit reserves. Future changes in the discount rate assumption used in our annual premium deficiency testing performed in the third quarter across our run-off insurance portfolio may be required. A lower discount rate, holding all other assumptions constant, will result in an increase in our future policy benefit reserves on a GAAP basis. Furthermore, a lower discount rate may be required under statutory asset adequacy testing that is relevant for determining the amount of capital to be contributed to our insurance subsidiaries.

Our GAAP discount rate is based upon the actual yields on our investment portfolio and our forecasted reinvestment rates, which comprise the future rates at which we expect to invest proceeds from investment maturities, net of operating cash flows, and projected future capital contributions. Although the movement in market rates impacts the reinvestment rate, it does not materially impact the actual yield on our existing investments. While credit spreads on fixed-income securities widened during the quarter, benchmark interest rates in the U.S. have been lowered which may impact other discount rate assumptions, including the period over which the reinvestment rate increases to the expected long-term average investment yield and the expected long-term average investment yield (including changes to expected default rates). Furthermore, expected returns on higher yielding asset classes may change.

For further information on our overall discount rate, reinvestment rate and mortality assumptions, refer to the GAAP Reserve Sensitivities included in Other Items within MD&A of our Annual Report on Form 10-K for the year ended December 31, 2019.

Investments. Our investment security portfolio may experience higher gross unrealized losses, downgrades in credit ratings and higher default rates and result in an increase to the allowance for losses on assets supporting our insurance liabilities. See Note 3 to the consolidated financial statements for further information about our investment securities.

PENSION ASSUMPTIONS. As discussed in Critical Accounting Estimates in our Annual Report on Form 10-K for the year ended December 31, 2019, our defined benefit pension plans are accounted for on an actuarial basis and measured annually as of December 31. Accounting for defined benefit plans requires the selection of certain assumptions and actual results in any given year will often differ from actuarial assumptions because of economic or other factors.

During the first quarter of 2020, financial markets and interest rates have experienced volatility, which could result in a change in the discount rate used to measure our pension benefit obligation or our pension assets may realize less than our expected long-term rate of return, either of which could result in a material change in the funded status of our pension plans when we measure them at December 31, 2020. Our discount rate is determined using the weighted average of market-observed yields for high-quality fixed income securities with maturities that correspond to the payments of benefits and while benchmark interest rates in the U.S. have been lowered credit spreads on high-quality fixed incomes securities have widened.

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2019, changes in key assumptions for our principal pension plans would have the following effects.

- Discount rate - A 25 basis point decrease in the discount rate would increase pension cost in the following year by about \$0.2 billion and would increase the pension benefit obligation by about \$2.3 billion.
- Expected return on assets - A 50 basis point decrease in the expected return on assets would increase pension cost in the following year by about \$0.3 billion.

OTHER ITEMS

NEW ACCOUNTING STANDARDS. The Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-12, *Financial Services - Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts* with an effective date for periods beginning after December 31, 2021, with an election to adopt early. We are evaluating the effect of the standard on our consolidated financial statements and anticipate that its adoption will significantly change the accounting for measurements of our long-duration insurance liabilities. The ASU requires cash flow assumptions used in the measurement of various insurance liabilities to be reviewed at least annually and updated if actual experience or other evidence indicates previous assumptions need to be revised with any required changes recorded in earnings. Under the current accounting guidance, the discount rate is based on expected investment yields, while under the ASU the discount rate will be equivalent to the upper-medium grade (i.e., single A) fixed-income instrument yield reflecting the duration characteristics of the liability and is required to be updated in each reporting period with changes recorded in other comprehensive income. In measuring the insurance liabilities under the new standard, contracts shall not be grouped together from different issue years. These changes result in the elimination of premium deficiency testing and shadow adjustments. While we continue to evaluate the effect of the standard on our ongoing financial reporting, we anticipate that the adoption of the ASU will materially affect our financial statements. As the ASU is only applicable to the measurements of our long-duration insurance liabilities under GAAP, it will not affect the accounting for our insurance reserves or the levels of capital and surplus under statutory accounting practices.

NON-GAAP FINANCIAL MEASURES

We believe that presenting non-GAAP financial measures provides management and investors useful measures to evaluate performance and trends of the total company and its businesses. This includes adjustments in recent periods to GAAP financial measures to increase period-to-period comparability following actions to strengthen our overall financial position and how we manage our business.

In addition, management recognizes that certain non-GAAP terms may be interpreted differently by other companies under different circumstances. In various sections of this report we have made reference to the following non-GAAP financial measures in describing our (1) revenues, specifically GE Industrial organic revenues by segment; BioPharma organic revenues, GE Industrial organic revenues, and GE Industrial equipment and services organic revenues (2) profit, specifically GE Industrial organic profit and profit margin by segment; BioPharma organic profit and profit margin, Adjusted GE Industrial profit and profit margin (excluding certain items); Adjusted GE Industrial organic profit and profit margin; Adjusted earnings (loss); and Adjusted earnings (loss) per share (EPS), (3) cash flows, specifically GE Industrial free cash flows (FCF), and (4) debt balances, specifically GE Industrial net debt.

The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures follow.

GE INDUSTRIAL ORGANIC REVENUES, PROFIT (LOSS) AND PROFIT MARGIN BY SEGMENT (NON-GAAP)

Three months ended March 31 (In millions)	Revenues			Segment profit (loss)			Profit margin		
	2020	2019	V%	2020	2019	V%	2020	2019	V pts

Less: foreign currency effect	(52)	—		(5)	—				
Healthcare organic (Non-GAAP)	\$ 4,765	\$ 4,659	2 %	\$ 901	\$ 817	10 %	18.9 %	17.5 %	1.4pts
Less: BioPharma organic (Non-GAAP)	839	762		380	311				
Healthcare excluding BioPharma organic (Non-GAAP)	\$ 3,926	\$ 3,897	1 %	\$ 521	\$ 506	3 %	13.3 %	13.0 %	0.3pts

We believe these measures provide management and investors with a more complete understanding of underlying operating results and trends of established, ongoing operations by excluding the effect of acquisitions, dispositions and foreign currency, as these activities can obscure underlying trends. We also believe presenting organic revenues* and organic profit* separately for our industrial businesses provides management and investors with useful information about the trends of our industrial businesses and enables a more direct comparison to other non-financial companies.

BIOPHARMA ORGANIC REVENUES, PROFIT (LOSS) AND PROFIT MARGIN (NON-GAAP)

Three months ended March 31 (In millions)	Revenues			Segment profit (loss)			Profit margin		
	2020	2019	V%	2020	2019	V%	2020	2019	V pts

(a) See the Corporate Items and Eliminations section for further information.

(b) See the Corporate Items and Eliminations - Restructuring section for further information.

Earnings-per-share amounts are computed independently. As a result, the sum of per-share amounts may not equal the total.

The service cost for our pension and other benefit plans are included in adjusted earnings*, which represents the ongoing cost of providing pension benefits to our employees. The components of non-operating benefit costs are mainly driven by capital allocation decisions and market performance. We believe the retained costs in Adjusted earnings* and Adjusted EPS* provides management and investors a useful measure to evaluate the performance of the total company, and increases period-to-period comparability. We also use Adjusted EPS* as a performance metric at the company level for our annual executive incentive plan for 2020. We believe presenting Adjusted Industrial earnings* and Adjusted Industrial EPS* separately for our financial services businesses also provides management and investors with useful information about the relative size of our industrial and financial services businesses in relation to the total company.

GE INDUSTRIAL FREE CASH FLOWS (FCF) (NON-GAAP)

<i>(In millions)</i>	Three months ended March 31	
	2020	2019
GE CFOA (GAAP)	\$ (1,662)	\$ (607)
Add: gross additions to property, plant and equipment	(504)	(552)
Add: gross additions to internal-use software	(58)	(66)
Less: taxes related to business sales	(17)	(8)
GE Industrial free cash flows (Non-GAAP)	\$ (2,207)	\$ (1,216)

We believe investors may find it useful to compare GE's Industrial free cash flows* performance without the effects of cash used for taxes related to business sales. We believe this measure will better allow management and investors to evaluate the capacity of our industrial operations to generate free cash flows.

GE INDUSTRIAL NET DEBT (NON-GAAP) <i>(In millions)</i>	March 31, 2020	December 31, 2019
Total GE short- and long-term borrowings (GAAP)	\$ 48,132	\$ 52,059

Total pension and principal retiree benefit plan liabilities (pre-tax)(a)	27,773	27,773
Less: taxes at 21%	5,832	5,832
Total pension and principal retiree benefit plan liabilities (net of tax)	\$ 21,941	\$ 21,941
GE operating lease liabilities	3,266	3,369
GE preferred stock	5,782	5,738
Less: 50% of GE preferred stock	2,891	2,869
50% of preferred stock	\$ 2,891	\$ 2,869
Deduction for total GE cash, cash equivalents and restricted cash	(33,810)	(17,613)
Less: 25% of GE cash, cash equivalents and restricted cash	(8,453)	(4,403)
Deduction for 75% of GE cash, cash equivalents and restricted cash	\$ (25,358)	\$ (13,210)
Total GE Industrial net debt (Non-GAAP)	\$ 33,962	\$ 47,886

(a) Represents the total net deficit status of principal pension plans, other pension plans and retiree benefit plans at December 31, 2019. The funded status of our benefit plans is updated annually in the fourth quarter.

In this document we use GE Industrial net debt*, which is calculated based on rating agency methodologies. We are including the calculation of GE industrial net debt* to provide investors more clarity regarding how the credit rating agencies measure GE Industrial leverage.

CONTROLS AND PROCEDURES

Under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated our disclosure controls and procedures and internal control over financial reporting and concluded that (i) our disclosure controls and procedures were effective as of March 31, 2020, and (ii) no change in internal control over financial reporting occurred during the quarter ended March 31, 2020, that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

RISK FACTORS

The risk factor set forth below updates the risk factors in our Annual Report on Form 10-K for the year ended December 31, 2019. These risk factors could materially affect our business, financial position and results of operations.

The global Coronavirus Disease 2019 (COVID-19) pandemic is having a material adverse impact on our operations and financial performance, as well as on the operations and financial performance of many of the customers and suppliers in industries that we serve. We are unable to predict the extent to which the pandemic and related impacts will continue to adversely impact our business operations, financial performance, results of operations, financial position and the achievement of our strategic objectives. Our operations and financial performance have been negatively impacted by the COVID-19 pandemic that has caused, and is expected to continue to cause, the global slowdown of economic activity (including the decrease in demand for a broad variety of goods and services), disruptions in global supply chains and significant volatility and disruption of financial markets. Because the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences are uncertain, rapidly changing and difficult to predict, the pandemic's impact on our operations and financial performance, as well as its impact on our ability to successfully execute our business strategies and initiatives, remains uncertain and difficult to predict. Further, the ultimate impact of the COVID-19 pandemic on our operations and financial performance depends on many factors that are not within our control, including, but not limited to: governmental, business and individuals' actions that have been and continue to be taken in response to the pandemic (including restrictions on travel and transport and workforce pressures); the impact of the pandemic and actions taken in response on global and regional economies, travel, and economic activity; the availability of federal, state, local or non-U.S. funding programs; general economic uncertainty in key global markets and financial market volatility; global economic conditions and levels of economic growth; and the pace of recovery when the COVID-19 pandemic subsides.

The COVID-19 pandemic has subjected our operations, financial performance and financial condition to a number of risks, including, but not limited to those discussed below:

Operations-related risks: Across all of our businesses, we are facing increased operational challenges from the need to protect employee health and safety, site shutdowns, workplace disruptions and restrictions on the movement of people, raw materials and goods, both at our own facilities and at customers and suppliers. We are also experiencing, and expect to continue experiencing, lower demand and volume for products and services, customer requests for potential payment deferrals or other contract modifications, supply chain under-liquidation, delays of deliveries and the achievement of other billing milestones, delays or cancellations of new projects and related down payments and other factors related directly and indirectly to the COVID-19 pandemic that adversely impact our businesses. We expect that the longer the period of economic and global supply chain and disruption continues, the more material the adverse impact will be on our business operations, financial performance and results of operations, and this could include additional charges, impairments and other adverse financial impacts in future periods.

*Non-GAAP Financial Measure

Customer-related risks: In particular, the interruption of regional and international air travel from COVID-19 has resulted in the loss of business and leisure traffic and is having a material adverse effect on our airline and airframer customers, the viability of their businesses and their demand for our services and products. Changes in passenger air travel trends arising from COVID-19 may continue to develop or persist over time and further contribute to this adverse effect. We are also observing a significant increase in the number of requests for payment deferrals, contract modifications, aircraft lease restructurings and similar actions across the aviation sector, and these trends may lead to additional charges, impairments and other adverse financial impacts at GE Aviation and GE Capital Aviation Services over time. We have depended on the strength of our Aviation business as we have been working to improve the operations and execution of other GE businesses and strengthen the company's balance sheet. As a result, disruption of the aviation industry, which could continue for an uncertain period of time, is particularly significant for GE. Across our businesses, to varying degrees, we anticipate that some existing or potential customers will continue to delay or cancel plans to purchase our products and services, or may not be able to fulfill prior obligations in a timely fashion, as a result of ongoing effects related to the COVID-19 pandemic and adverse economic conditions more broadly.

Leverage- and market-related risks: The current financial market dynamics and volatility pose heightened risks to our timelines for decreasing our leverage, and we now expect to achieve our prior targets over a longer period than previously announced as we seek to maintain appropriate liquidity to compensate for lower cash flows from operations or as variables impacting our leverage ratios fluctuate with extreme market volatility. For example, lower discount rates and lower asset valuations at the time of remeasurement can materially impact the calculation of long-term liabilities such as our pension deficit, GAAP insurance reserve and insurance statutory calculations. In addition, extreme volatility in financial and commodities markets has had and may continue to have adverse impacts on other asset valuations such as the market value of our remaining equity interest in Baker Hughes and the value of the investment portfolios supporting our pension and long-term insurance liabilities. Our long-term liabilities are sensitive to numerous factors and assumptions that can move in offsetting directions and should be considered as of the time of a relevant measurement event.

Liquidity- and funding-related risks: While we have significant sources of cash and liquidity and access to committed credit lines, a prolonged period of generating lower cash from operations could adversely affect our financial condition and the achievement of our strategic objectives. As described in the Capital Resources and Liquidity section of this report, in April 2020, Moody's and S&P changed their credit rating outlooks for GE and GE Capital from Stable to Negative, and Fitch lowered its credit ratings for GE and GE Capital. There can also be no assurance that we will not face additional credit rating downgrades as a result of weaker than anticipated performance of our businesses, slower progress in decreasing our leverage or other factors. Future downgrades could further adversely affect our cost of funds and related margins, liquidity, competitive position and access to capital markets, and a significant downgrade could have an adverse commercial impact on our industrial businesses. Conditions in the financial and credit markets may also limit the availability of funding or increase the cost of funding (including for receivables monetization or supply chain finance programs), which could adversely affect our business, financial position and results of operations. Although the U.S. federal and other governments have announced a number of funding programs to support businesses, our ability or willingness to access funding under such programs may be limited by regulations or other guidance, or by further change or uncertainty related to the terms of these programs.

As the COVID-19 pandemic continues to adversely affect our operating and financial results, it may also have the effect of heightening many of the other risks described in the risk factors in our Annual Report on Form 10-K for the year ended December 31, 2019. In particular, see the risk factors regarding "Global macro-environment," "Supply chain," "Leverage and borrowings," "Liquidity" and "Economy, customers & counterparties," as updated by the information in this risk factor. Refer also to the Critical Accounting Estimates section of this report for additional details about how COVID-19 related market events may affect our insurance business and pension assumptions. Further, the COVID-19 pandemic may also affect our operating and financial results in a manner that is not presently known to us or that we currently do not expect to present significant risks to our operations or financial results.

LEGAL PROCEEDINGS

Refer to Legal Matters and Environmental, Health and Safety Matters in Note 19 to the consolidated financial statements for information relating to legal proceedings. The information in those sections supplements and amends the discussion set forth in the corresponding sections of Note 23 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2019.

FINANCIAL STATEMENTS

Noncontrolling interests balance (Note 15)	1,575	20,485
Total equity balance at March 31(a)	\$ 36,859	\$ 55,646

(a) Total equity balance decreased by \$(18,787) million in the last twelve months from March 31, 2019, primarily due to reduction of non-controlling interest balance of \$(19,271) million attributable to Baker Hughes Class A shareholders at March 31, 2019, after-tax loss of \$(8,238) million in discontinued operations due to deconsolidation of Baker Hughes in the third quarter of 2019, after-tax change in unrealized loss on our remaining interest in Baker Hughes \$(4,631) million, partially offset by after-tax gain of \$11,145 million due to the sale of our BioPharma business within our Healthcare segment. See Notes 2 and 3 for further information.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

We present our financial statements in a three-column format, which allows investors to see our GE industrial operations separately from our financial services operations. We believe that this provides useful supplemental information to our consolidated financial statements. To the extent that we have transactions between GE and GE Capital, these transactions are made on arm's length terms, are reported in the respective columns of our financial statements and are eliminated in consolidation. See Note 20 for further information.

Our financial statements are prepared in conformity with U.S. generally accepted accounting principles (GAAP), which requires us to make estimates based on assumptions about current and, for some estimates, future economic and market conditions which affect reported amounts and related disclosures in our financial statements. Although our current estimates contemplate current and expected future conditions, as applicable, it is reasonably possible that actual conditions could differ from our expectations, which could materially affect our results of operations and financial position. In particular, a number of estimates have been and will continue to be affected by the ongoing Coronavirus Disease 2019 (COVID-19) pandemic. The severity, magnitude and duration, as well as the economic consequences of the COVID-19 pandemic, are uncertain, rapidly changing and difficult to predict. As a result, our accounting estimates and assumptions may change over time in response to COVID-19. Such changes could result in future impairments of goodwill, intangibles, long-lived assets and investment securities, revisions to estimated profitability on long-term product service agreements, incremental credit losses on receivables and debt securities, a decrease in the carrying amount of our tax assets, or an increase in our insurance liabilities and pension obligations as of the time of a relevant measurement event.

In preparing our Statement of Cash Flows, we make certain adjustments to reflect cash flows that cannot otherwise be calculated by changes in our Statement of Financial Position. These adjustments may include, but are not limited to, the effects of currency exchange, acquisitions and dispositions of businesses, businesses classified as held for sale, the timing of settlements to suppliers for property, plant and equipment, non-cash gains/losses and other balance sheet reclassifications.

We have reclassified certain prior-period amounts to conform to the current-period's presentation. Certain columns and rows may not add due to the use of rounded numbers. Percentages presented are calculated from the underlying numbers in millions. Unless otherwise indicated, information in these notes to the consolidated financial statements relates to continuing operations. Certain of our operations have been presented as discontinued. We present businesses whose disposal represents a strategic shift that has, or will have, a major effect on our operations and financial results as discontinued operations when the components meet the criteria for held for sale, are sold, or spun-off. See Note 2 for further information.

The accompanying consolidated financial statements and notes are unaudited. The results reported in these consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. These consolidated financial statements should be read in conjunction with the financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2019.

Our significant accounting policies are described in Note 1 to the consolidated financial statements of our aforementioned Annual Report. We include herein certain updates to those policies.

Allowance for credit losses. When we record customer receivables, contract assets and financing receivables arising from revenue transactions, as well as commercial mortgage loans and reinsurance recoveries in GE Capital's run-off insurance operations, financial guarantees and certain commitments, we record an allowance for credit losses for the current expected credit losses (CECL) inherent in the asset over its expected life. The allowance for credit losses is a valuation account deducted from the amortized cost basis of the assets to present their net carrying value at the amount expected to be collected. Each period the allowance for credit losses is adjusted through earnings to reflect expected credit losses over the remaining lives of the assets.

We estimate expected credit losses based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. When measuring expected credit losses, we pool assets with similar country risk and credit risk characteristics. Changes in the relevant information may significantly affect the estimates of expected credit losses.

ACCOUNTING CHANGES. On January 1, 2020, we adopted ASU No. 2016-13, *Financial Instruments - Credit Losses (ASU 2016-13)*. ASU 2016-13 requires us to prospectively record an allowance for credit losses for the current expected credit losses inherent in the asset over its expected life, replacing the incurred loss model that recognized losses only when they became probable and estimable. We recorded a \$221 million increase in our allowance for credit losses and a \$175 million decrease to retained earnings, net of tax, reflecting the cumulative effect on retained earnings.

In the three months ended March 31, 2020, we increased our CECL reserves by recording a charge to earnings of \$111 million to reflect higher expected credit losses in our Aviation and GE Capital segments.

On January 1, 2020 we adopted ASU 2017-04, *Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*. The ASU eliminates Step 2 of the goodwill impairment test and the qualitative assessment for any reporting unit with a zero or negative carrying amount. The ASU also requires an entity to disclose the amount of goodwill allocated to each reporting unit with a zero or negative carrying amount. The adoption did not have an impact on our financial statements.

NOTE 2. BUSINESSES HELD FOR SALE AND DISCONTINUED OPERATIONS

ASSETS AND LIABILITIES OF BUSINESSES HELD FOR SALE. On March 31, 2020, we completed the sale of our BioPharma business within our Healthcare segment for total consideration of \$21,141 million (after certain working capital adjustments). The consideration consisted of \$20,724 million in cash and \$417 million of pension liabilities that were assumed by Danaher. We received cash of \$20,321 million on March 31st and an additional \$403 million on April 1st. In addition, we expect to incur approximately \$200 million of cash payments directly associated with the transaction in the second quarter. As a result, we recognized a pretax gain of \$12,292 million (\$11,145 million after tax) in our consolidated Statement of Earnings (Loss).

Assets and liabilities of businesses held for sale primarily comprise the remaining Lighting business within Corporate and the remaining PK AirFinance business within our Capital segment.

ASSETS AND LIABILITIES OF BUSINESSES HELD FOR SALE <i>(In millions)</i>	March 31, 2020		December 31, 2019

Assets of businesses held for sale	\$	506	\$	9,149
Accounts payable & Progress collections and deferred income	\$	135	\$	843
Non-current compensation and benefits		—		466
All other liabilities		84		349
Liabilities of businesses held for sale	\$	219	\$	1,658

DISCONTINUED OPERATIONS. Discontinued operations primarily include our Baker Hughes and Transportation segments, and certain businesses in our GE Capital segment (our mortgage portfolio in Poland and trailing liabilities associated with the sale of our GE Capital businesses). Results of operations, financial position and cash flows for these businesses are reported as discontinued operations for all periods presented.

In September 2019, we reduced our ownership interest in Baker Hughes from 50.2% to 36.8% and reclassified its results to discontinued operations for all periods presented.

We have continuing involvement with Baker Hughes primarily through our remaining interest, ongoing purchases and sales of products and services, transition services that we provide to Baker Hughes as well as an aeroderivative joint venture, which we formed with Baker Hughes and currently consolidate. In the first quarter of 2020, we had sales and purchases of products and services with Baker Hughes and affiliates of \$290 million and \$36 million, respectively. We have collected net cash of \$415 million from Baker Hughes related to these activities, including \$106 million of repayments on the promissory note. In addition, in the first quarter of 2020 we received a dividend of \$68 million from Baker Hughes.

In February 2019, we completed the spin-off and subsequent merger of our Transportation business with Wabtec. As a result, we recorded a gain of \$3,471 million (\$2,508 million after-tax) in discontinued operations.

RESULTS OF DISCONTINUED OPERATIONS*(In millions)*

	Baker Hughes		Transportation		GE Capital		Total

Accounts payable & Progress collections and deferred income	\$ 22	\$ 40
All other liabilities (a)	117	163
Liabilities of discontinued operations	\$ 139	\$ 203

(a) Included within All other liabilities of discontinued operations at March 31, 2020 and December 31, 2019 are intercompany tax receivables in the amount of \$880 million and \$839 million, respectively, primarily related to the financial services businesses that were part of the GE Capital Exit Plan, which are offset within All other liabilities of consolidated GE.

NOTE 3. INVESTMENT SECURITIES

All of our debt securities are classified as available-for-sale and substantially all are investment-grade debt securities supporting obligations to annuitants and policyholders in our run-off insurance operations. Changes in fair value of our debt securities are recorded in other comprehensive income. Equity securities with readily determinable fair values are included within this caption and changes in their fair value are recorded in earnings.

<i>(In millions)</i>	March 31, 2020				December 31, 2019			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value

Government and agencies	1,269	157	—	1,427	1,391	126	—	1,516
Equity	5,245	—	—	5,245	10,025	—	—	10,025
Total	\$ 38,223	\$ 4,792	\$ (716)	\$ 42,299	\$ 42,816	\$ 5,736	\$ (31)	\$ 48,521

The amortized cost of debt securities as of March 31, 2020 excludes accrued interest of \$432 million, which is reported in Other GE Capital receivables.

The estimated fair values of investment securities at March 31, 2020 decreased since December 31, 2019, primarily due to the mark-to-market effects on our remaining interest in Baker Hughes, as well as an increase in market interest rates as a result of a significant widening in credit spreads, a significant decline in oil prices and a challenging liquidity environment. The fair value of remaining Baker Hughes interest and promissory note receivable was \$4,083 million at March 31, 2020.

Gross unrealized losses of \$(685) million and \$(31) million are associated with debt securities with a fair value of \$6,253 million and \$173 million that have been in a loss position for less than 12 months and 12 months or more, respectively, at March 31, 2020. Gross unrealized losses of \$(11) million and \$(20) million are associated with debt securities with a fair value of \$724 million and \$274 million that have been in a loss position for less than 12 months and 12 months or more, respectively, at December 31, 2019.

At March 31, 2020, gross unrealized losses of \$(716) million included \$(493) million related to U.S. corporate securities and \$(114) million related to commercial mortgage-backed securities (CMBS). Of the U.S. corporate securities in an unrealized loss position, \$(313) million and \$(57) million related to the energy and consumer industries, respectively. Substantially all of our CMBS in an unrealized loss position have received investment-grade credit ratings from the major rating agencies and are collateralized by pools of commercial mortgage loans on real estate.

With respect to our debt securities that are in an unrealized loss position at March 31, 2020, our current intention is to hold them at least until such time as their individual fair values exceed their amortized cost and based upon the long duration of our insurance liabilities, we have the ability to hold all such debt securities until their maturities. We assessed debt securities in an unrealized loss position for credit losses and recognized an allowance for credit losses on investment securities of \$(24) million for the three months ending March 31, 2020. In addition to our qualitative and quantitative evaluation criteria, our credit loss assessment at March 31, 2020 considered the continuing market deterioration that resulted in the lack of liquidity and the historic levels of price volatility and credit spreads in the fixed income market. With respect to corporate bonds, we evaluated the credit quality of the issuers. With respect to CMBS, we evaluated the cash flows from the underlying collateral.

Net unrealized gains (losses) for equity securities with readily determinable fair values, which are recorded in Other income within continuing operations, were \$(5,772) million and an insignificant amount for the three months ended March 31, 2020 and 2019, respectively. The amount recognized in the three months ended March 31, 2020 primarily included a loss of \$(5,710) million related to our interest in Baker Hughes and \$(85) million at GE Capital, predominantly from fixed income exchange traded funds supporting our insurance liabilities and annuity benefits.

Proceeds from debt and equity securities sales, early redemptions by issuers and principal payments on the Baker Hughes promissory note totaled \$1,250 million and \$1,421 million for the three months ended March 31, 2020 and 2019, respectively. Gross realized gains on investment securities were \$46 million and \$44 million and gross realized losses and impairments were \$(17) million and \$(39) million for the three months ended March 31, 2020 and 2019, respectively.

Contractual maturities of investments in debt securities (excluding mortgage and asset-backed securities) at March 31, 2020 are as follows:

<i>(In millions)</i>	Amortized cost	Estimated fair value
Due		
Within one year	\$ 610	\$ 621
After one year through five years	2,328	2,400
After five years through ten years	6,616	7,226
After ten years	20,128	23,603

We expect actual maturities to differ from contractual maturities because issuers have the right to call or prepay certain obligations.

Substantially all our equity securities are classified within Level 1 and substantially all our debt securities are classified within Level 2 as their valuation is determined based on significant observable inputs. Investments with a fair value of \$5,046 million and \$5,210 million were classified within Level 3 as significant inputs to the valuation model are unobservable at March 31, 2020 and December 31, 2019, respectively. During the three months ended March 31, 2020 and 2019, there were no significant transfers into or out of Level 3.

In addition to the equity securities described above, we hold \$429 million and \$517 million of equity securities without readily determinable fair value at March 31, 2020 and December 31, 2019, respectively, that are classified within All other assets in our consolidated Statement of Financial Position. Fair value adjustments, including impairments, recorded in earnings were \$(93) million and an insignificant amount for the three months ended March 31, 2020 and 2019, respectively.

NOTE 4. CURRENT AND LONG-TERM RECEIVABLES

CURRENT RECEIVABLES (In millions)	Consolidated		GE	
	March 31, 2020	December 31, 2019	March 31, 2020	December 31, 2019
Customer receivables(a)	\$ 12,877	\$ 12,594	\$ 8,920	\$ 9,507
Sundry receivables(b)	4,976	5,049	5,082	5,247
Allowance for losses	(929)	(874)	(926)	(872)
Total current receivables	\$ 16,925	\$ 16,769	\$ 13,076	\$ 13,883

(a) Includes receivables from Boeing due to 737 MAX temporary fleet grounding of \$1,407 million and \$1,397 million as of March 31, 2020 and December 31, 2019, respectively.

(b) Includes supplier advances, revenue sharing programs receivables, other non-income based tax receivables, certain intercompany balances that eliminate upon consolidation and deferred purchase price. The deferred purchase price represents our retained risk with respect to current customer receivables sold to third parties through one of the receivable facilities. The balance of the deferred purchase price held by GE Capital at March 31, 2020 and December 31, 2019 was \$502 million and \$421 million, respectively.

Sales of GE current customer receivables. When GE sells customer receivables to GE Capital or third parties it accelerates the receipt of cash that would otherwise have been collected from customers. In any given period, the amount of cash received from sales of customer receivables compared to the cash GE would have otherwise collected had those customer receivables not been sold represents the cash generated or used in the period relating to this activity. GE sales of customer receivables to GE Capital or third parties are made on arm's length terms and any discount related to time value of money is recognized by GE when the customer receivables are sold. As of March 31, 2020 and 2019, GE sold approximately 49% and 65%, respectively, of its gross customer receivables to GE Capital or third parties. Activity related to customer receivables sold by GE is as follows:

<i>(In millions)</i>	2020		2019	
	GE Capital	Third Parties	GE Capital	Third Parties
Balance at January 1	\$ 3,087	\$ 6,757	\$ 4,386	\$ 7,880
GE sales to GE Capital	9,225	—	9,690	—
GE sales to third parties	—	515	—	1,376
GE Capital sales to third parties	(5,253)	5,253	(6,591)	6,591
Collections and other	(3,224)	(8,005)	(3,967)	(8,123)
Reclassification from long-term customer receivables	123	—	140	—
Balance at March 31	\$ 3,958 (a)(b)	\$ 4,519	\$ 3,657 (a)	\$ 7,724

(a) At March 31, 2020 and 2019, \$557 million and \$1,248 million, respectively, of the current receivables purchased and retained by GE Capital had been sold by GE to GE Capital with recourse (i.e., GE retains all or some risk of default). The effect on GE CFOA of claims by GE Capital on receivables sold with recourse was insignificant for the three months ended March 31, 2020 and 2019.

(b) The \$871 million increase in GE current receivables purchased and retained by GE Capital in the quarter was driven by a plan to use excess liquidity in GE Capital to purchase and retain GE current receivables. GE Aviation receivables were substantially all of the increase and approximately \$288 million of that increase can be attributed to lower third-party demand for certain GE Aviation receivables.

LONG-TERM RECEIVABLES. In certain circumstances, GE provides customers, primarily within our Power, Renewable Energy and Aviation businesses, with extended payment terms for the purchase of new equipment, purchases of upgrades and spare parts for our long-term service agreements. These long-term customer receivables are initially recorded at present value and have an average remaining duration of approximately three years and are included in All other assets in the consolidated Statement of Financial Position.

<i>(In millions)</i>	Consolidated		GE	
	March 31, 2020	December 31, 2019	March 31, 2020	December 31, 2019
Long-term customer receivables(a)	\$ 756	\$ 906	\$ 492	\$ 506
Long-term sundry receivables(b)	1,437	1,504	1,647	1,834
Allowance for losses	(131)	(128)	(131)	(128)
Total long-term receivables	\$ 2,063	\$ 2,282	\$ 2,008	\$ 2,212

(a) At March 31, 2020 and December 31, 2019, GE Capital held \$265 million and \$400 million, respectively, of GE long-term customer receivables, of which \$222 million and \$312 million had been purchased with recourse (i.e., GE retains all or some risk of default). The effect on GE cash flows from operating activities (CFOA) of claims on long-term receivables sold with recourse was insignificant for the three months ended March 31, 2020 and the year ended December 31, 2019.

(b) Includes supplier advances, revenue sharing programs receivables, other non-income based tax receivables and certain intercompany balances that eliminate upon consolidation.

Sales of GE long-term customer receivables. Similar to sales of current customer receivables, sales of long-term customer receivables can result in cash generation or use in our consolidated Statement of Cash Flows. During the three months ended March 31, 2020 and 2019, GE Capital did not purchase any GE long-term customer receivables. Reductions in GE Capital outstanding GE long-term customer receivables were attributable to collections and reclassification to short-term receivables.

UNCONSOLIDATED RECEIVABLES FACILITIES. GE Capital has two revolving receivables facilities, under which customer receivables purchased from GE are sold to third parties. In the first facility, which has a program size of \$3,100 million, upon the sale of receivables, we receive proceeds of cash and deferred purchase price and the Company's remaining risk with respect to the sold receivables is limited to the balance of the deferred purchase price. In the second facility, which has a program size of \$600 million, upon the sale of receivables, we receive proceeds of cash only and therefore the Company has no remaining risk with respect to the sold receivables. The program size of the second facility reduced from \$1,200 million to \$600 million in March 2020. Current receivables that would otherwise have been sold to third parties were retained by GE Capital to utilize available funding.

Activity related to these facilities is included in the GE Capital sales to third parties line in the sales of GE current customer receivables table above and is as follows:

Three months ended March 31 (In millions)	2020		2019	
Customer receivables sold to receivables facilities	\$	4,307	\$	5,175
Total cash purchase price for customer receivables		4,120		5,071
Cash collections re-invested to purchase customer receivables		3,723		4,253
Non-cash increases to deferred purchase price	\$	160	\$	44
Cash payments received on deferred purchase price		78		61

CONSOLIDATED SECURITIZATION ENTITIES. GE Capital consolidates three variable interest entities (VIEs) that purchased customer receivables and long-term customer receivables from GE. At March 31, 2020 and December 31, 2019 these VIEs held current customer receivables of \$1,619 million and \$2,080 million and long-term customer receivables of \$251 million and \$375 million, respectively. At March 31, 2020 and December 31, 2019, the outstanding non-recourse debt under their respective debt facilities was \$644 million and \$1,655 million, respectively.

NOTE 5. FINANCING RECEIVABLES AND ALLOWANCES

(In millions)	Consolidated		GE Capital	
	March 31, 2020	December 31, 2019	March 31, 2020	December 31, 2019
Loans, net of deferred income	\$ 1,141	\$ 1,098	\$ 5,568	\$ 4,927
Investment in financing leases, net of deferred income	1,921	2,070	1,921	2,070
	3,062	3,168	7,489	6,996
Allowance for losses	(65)	(33)	(33)	(17)
Financing receivables – net	\$ 2,998	\$ 3,134	\$ 7,457	\$ 6,979

Consolidated finance lease income was \$43 million and \$46 million in the three months ended March 31, 2020 and 2019, respectively.

We manage our GE Capital financing receivables portfolio using delinquency and nonaccrual data as key performance indicators. At March 31, 2020, 6.2%, 2.8% and 5.7% of financing receivables were over 30 days past due, over 90 days past due and on nonaccrual, respectively, with the vast majority of nonaccrual financing receivables secured by collateral. At December 31, 2019, 4.2%, 2.9% and 6.1% of financing receivables were over 30 days past due, over 90 days past due and on nonaccrual, respectively.

GE Capital financing receivables that comprise receivables purchased from GE are reclassified to either Current receivables or All other assets in the consolidated Statement of Financial Position. To the extent these receivables are purchased with full or limited recourse, they are excluded from the delinquency and nonaccrual data above. See Note 4 for further information.

NOTE 6. INVENTORIES

(In millions)	March 31, 2020		December 31, 2019	
Raw materials and work in process	\$	9,192	\$	8,771
Finished goods		6,265		5,333
Total inventories	\$	15,457	\$	14,104

NOTE 7. PROPERTY, PLANT AND EQUIPMENT

PROPERTY, PLANT AND EQUIPMENT (In millions)	March 31, 2020		December 31, 2019	
Original cost	\$	75,619	\$	75,187
Less accumulated depreciation and amortization		(32,453)		(31,897)
Property, plant and equipment – net	\$	43,166	\$	43,290

Consolidated depreciation and amortization on property, plant and equipment was \$991 million and \$995 million for the three months ended March 31, 2020 and 2019, respectively.

Operating lease income on our equipment leased to others, primarily from our GECAS business, was \$876 million and \$932 million for the three months ended March 31, 2020 and 2019, respectively, and comprises fixed lease income of \$705 million and \$764 million and variable lease income of \$171 million and \$168 million, respectively.

Operating Lease Assets and Liabilities. Our consolidated Right of use operating lease (ROU) assets, included within property, plant and equipment in our Statement of Financial Position were \$2,813 million and \$2,896 million, as of March 31, 2020 and December 31, 2019, respectively. Our consolidated operating lease liabilities, included in All other liabilities in our Statement of Financial Position, were \$3,067 million and \$3,162 million, as of March 31, 2020 and December 31, 2019, respectively, which included GE Industrial operating lease liabilities of \$3,266 million and \$3,369 million, respectively.

OPERATING LEASE EXPENSE <i>(In millions)</i>	Three months ended March 31	
	2020	2019
Long-term (fixed)	\$ 177	\$ 225
Long-term (variable)	21	44
Short-term	68	47
Total operating lease expense	\$ 266	\$ 317

NOTE 8. GOODWILL AND OTHER INTANGIBLE ASSETS

GOODWILL <i>(In millions)</i>	January 1, 2020	Dispositions and classification to held for sale	Currency exchange and other	Balance at March 31, 2020
Power	\$ 145	\$ —	\$ —	\$ 145
Renewable Energy	3,290	—	(74)	3,216
Aviation	9,859	—	(41)	9,818
Healthcare	11,728	—	(17)	11,711
Capital	839	—	—	839
Corporate	873	—	(5)	869
Total	\$ 26,734	\$ —	\$ (136)	\$ 26,598

In assessing the possibility that a reporting unit's fair value has been reduced below its carrying amount due to the occurrence of events or circumstances between annual impairment testing dates, we consider all available evidence, including (i) the results of our impairment testing from the most recent testing date (in particular, the magnitude of the excess of fair value over carrying value observed), (ii) downward revisions to internal forecasts or decreases in market multiples (and the magnitude thereof), if any, and (iii) declines in market capitalization below book value (and the magnitude and duration of those declines), if any.

In the first quarter of 2020, we performed an analysis of the impact of recent events, including business and industry specific considerations, on the fair values of our Additive reporting unit in our Aviation segment, our GECAS reporting unit in our Capital segment, and our Grid Solutions software reporting unit in our Digital business within Corporate. We did not identify any reporting units that required an interim impairment test. While the goodwill of these reporting units is not currently impaired there can be no assurances that goodwill will not be impaired in future periods. We will continue to monitor the operating results, cash flow forecasts and challenges from declines in current market conditions, as well as impacts of COVID-19 for these reporting units as their fair values are not significantly in excess of their respective carrying values. At March 31, 2020, goodwill in our Additive, GECAS, and Grid Solutions software reporting units was \$1,091 million, \$839 million and \$869 million, respectively.

OTHER INTANGIBLE ASSETS - NET <i>(In millions)</i>	March 31, 2020	December 31, 2019
Intangible assets subject to amortization	\$ 10,381	\$ 10,653

Intangible assets decreased in the first quarter of 2020, primarily as a result of amortization. Consolidated amortization expense was \$340 million and \$367 million in the three months ended March 31, 2020 and 2019, respectively.

NOTE 9. REVENUES

The equipment and services revenues classification in the table below is consistent with our segment MD&A presentation.

EQUIPMENT & SERVICES REVENUES (In millions)	Three months ended March 31					
	2020			2019		
	Equipment	Services	Total	Equipment	Services	Total
Power	\$ 1,506	\$ 2,518	\$ 4,025	\$ 1,576	\$ 3,041	\$ 4,617
Renewable Energy	2,576	618	3,194	1,982	557	2,538
Aviation	2,444	4,449	6,892	3,113	4,841	7,954
Healthcare	2,699	2,029	4,727	2,653	2,029	4,683
Corporate items and industrial eliminations	(48)	54	6	284	248	532
Total GE Industrial revenues	\$ 9,177	\$ 9,668	\$ 18,844	\$ 9,608	\$ 10,716	\$ 20,324

REVENUES (In millions)	Three months ended March 31	
	2020	2019
Gas Power	\$ 2,859	\$ 3,263
Power Portfolio	1,165	1,355
Power	\$ 4,025	\$ 4,617
Onshore Wind	\$ 2,124	\$ 1,441
Grid Solutions equipment and services	839	917
Hydro, Offshore Wind and other	230	180
Renewable Energy	\$ 3,194	\$ 2,538
Commercial Engines & Services	\$ 4,777	\$ 5,949
Military	960	1,036
Systems & Other	1,156	969
Aviation	\$ 6,892	\$ 7,954
Healthcare Systems	\$ 3,448	\$ 3,433
Life Sciences(a)	1,280	1,251
Healthcare	\$ 4,727	\$ 4,683
Corporate items and industrial eliminations	6	532
Total GE Industrial revenues	\$ 18,844	\$ 20,324
Capital	1,923	2,227
GE Capital-GE eliminations	\$ (244)	\$ (349)
Consolidated revenues	\$ 20,524	\$ 22,202

(a) Includes revenues of \$830 million and \$765 million from BioPharma for the three months ended March 31, 2020 and 2019, respectively.

REMAINING PERFORMANCE OBLIGATION. As of March 31, 2020, the aggregate amount of the contracted revenues allocated to our unsatisfied (or partially unsatisfied) performance obligations was \$240,381 million. We expect to recognize revenue as we satisfy our remaining performance obligations as follows: 1) equipment-related remaining performance obligation of \$45,171 million, of which 61%, 81% and 96% is expected to be satisfied within 1, 2 and 5 years, respectively, and the remaining thereafter; and 2) services-related remaining performance obligation of \$195,211 million, of which 12%, 44%, 71% and 82% is expected to be recognized within 1, 5, 10 and 15 years, respectively, and the remaining thereafter. Contract modifications could affect both the timing to complete as well as the amount to be received as we fulfill the related remaining performance obligations.

NOTE 10. CONTRACT AND OTHER DEFERRED ASSETS & PROGRESS COLLECTIONS AND DEFERRED INCOME

Contract and other deferred assets decreased \$665 million in 2020. Our long-term service agreements decreased primarily due to billings of \$2,544 million and a net unfavorable change in estimated profitability of \$193 million at Aviation and \$72 million at Power, offset by revenues recognized of \$2,688 million. The change in estimated profitability at Aviation included a \$100 million non-cash pre-tax charge (reduction in revenues and profit) to reflect the cumulative impacts of changes to assumptions for certain long-term service agreements. Additional adjustments are likely to occur in future periods and could be material as conditions related to COVID-19 continue to evolve.

March 31, 2020 (In millions)	Power	Aviation	Renewable Energy	Healthcare	Other	Total
Revenues in excess of billings	\$ 5,197	\$ 4,909	\$ —	\$ —	\$ —	\$ 10,106
Billings in excess of revenues	(1,586)	(3,660)	—	—	—	(5,247)
Long-term service agreements(a)	3,611	1,248	—	—	—	4,859
Short-term and other service agreements	155	389	33	174	45	795
Equipment contract revenues(b)	2,425	60	1,185	278	133	4,081
Total contract assets	6,191	1,696	1,217	452	178	9,735
Deferred inventory costs	887	481	1,148	342	1	2,859
Nonrecurring engineering costs	49	2,306	43	33	—	2,431
Customer advances and other(c)	—	1,143	—	—	(32)	1,111
Contract and other deferred assets	\$ 7,127	\$ 5,627	\$ 2,409	\$ 827	\$ 146	\$ 16,136

December 31, 2019 (In millions)

Revenues in excess of billings	\$ 5,342	\$ 4,996	\$ —	\$ —	\$ —	\$ 10,338
Billings in excess of revenues	(1,561)	(3,719)	—	—	—	(5,280)
Long-term service agreements(a)	3,781	1,278	—	—	—	5,058
Short-term and other service agreements	190	316	43	169	—	717
Equipment contract revenues(b)	2,508	82	1,217	324	106	4,236
Total contract assets	6,478	1,675	1,260	492	106	10,011
Deferred inventory costs	943	287	1,677	359	—	3,267
Nonrecurring engineering costs	44	2,257	47	35	8	2,391
Customer advances and other(c)	—	1,165	—	—	(32)	1,133
Contract and other deferred assets	\$ 7,465	\$ 5,384	\$ 2,985	\$ 886	\$ 82	\$ 16,801

- (a) Included amounts due from customers at Aviation for the sales of engines, spare parts and services, which we will collect through higher usage-based fees from servicing equipment under long-term service agreements, totaling \$1,777 million and \$1,712 million as of March 31, 2020 and December 31, 2019, respectively. The corresponding discount is recorded within liabilities as Deferred income and amounted to \$332 million and \$308 million as of March 31, 2020 and December 31, 2019, respectively.
- (b) Included are amounts due from customers at Power for the sale of services upgrades, which we collect through incremental fixed or usage-based fees from servicing the equipment under long-term service agreements, totaling \$877 million and \$909 million as of March 31, 2020 and December 31, 2019, respectively.
- (c) Included advances to and amounts due from customers at Aviation for the sale of engines, spare parts and services, which we will collect through incremental fees for goods and services to be delivered in future periods, totaling \$961 million and \$986 million as of March 31, 2020 and December 31, 2019, respectively. The corresponding discount is recorded within liabilities as Deferred income and amounted to \$268 million and \$256 million as of March 31, 2020 and December 31, 2019, respectively.

Progress collections and deferred income decreased \$708 million in the first quarter of 2020 primarily due to the timing of revenue recognition in excess of new collections received, primarily at Power and Renewable Energy. These decreases were partially offset by milestone payments received, primarily at Aviation.

Revenues recognized for contracts included in liability position at the beginning of the year were \$3,898 million and \$4,608 million for the three months ended March 31, 2020 and 2019, respectively.

March 31, 2020 (In millions)	Power	Aviation	Renewable Energy	Healthcare	Other	Total
Progress collections on equipment contracts	\$ 5,418	\$ 144	\$ 1,146	\$ —	\$ —	\$ 6,709
Other progress collections	317	4,791	3,999	312	170	9,589
Total progress collections	5,735	4,935	5,145	312	170	16,298
Deferred income(a)	41	1,569	316	1,654	109	3,689
GE Progress collections and deferred income	\$ 5,776	\$ 6,504	\$ 5,461	\$ 1,966	\$ 279	\$ 19,986

December 31, 2019 (In millions)

Progress collections on equipment contracts	\$ 5,857	\$ 115	\$ 1,268	\$ —	\$ —	\$ 7,240
Other progress collections	413	4,748	4,193	305	189	9,849
Total progress collections	6,270	4,863	5,461	305	189	17,089
Deferred income(a)	49	1,528	284	1,647	98	3,606
GE Progress collections and deferred income	\$ 6,319	\$ 6,391	\$ 5,745	\$ 1,952	\$ 287	\$ 20,694

- (a) Included in this balance are finance discounts associated with customer advances at Aviation of \$600 million and \$564 million as of March 31, 2020 and December 31, 2019, respectively.

NOTE 11. BORROWINGS

<i>(In millions)</i>	March 31, 2020	December 31, 2019
Short-term borrowings		
Commercial paper	\$ 1,946	\$ 3,008
Current portion of long-term borrowings	764	766
Current portion of long-term borrowings assumed by GE	5,888	5,473
Other	1,288	1,832
Total GE short-term borrowings	\$ 9,887	\$ 11,079
Current portion of long-term borrowings	\$ 8,542	\$ 11,226
Intercompany payable to GE	2,519	2,104
Other	292	804
Total GE Capital short-term borrowings	\$ 11,353	\$ 14,134
Eliminations	(3,118)	(3,140)
Total short-term borrowings	\$ 18,122	\$ 22,072
Long-term borrowings		
Senior notes	\$ 14,717	\$ 14,762
Senior notes assumed by GE	21,590	23,024
Subordinated notes assumed by GE	1,658	2,871
Other	281	324
Total GE long-term borrowings	\$ 38,244	\$ 40,980
Senior notes	\$ 27,373	\$ 25,371
Subordinated notes	177	178
Intercompany payable to GE	14,390	17,038
Other	593	626
Total GE Capital long-term borrowings	\$ 42,534	\$ 43,213
Eliminations	(14,390)	(17,038)
Total long-term borrowings	\$ 66,388	\$ 67,155
Non-recourse borrowings of consolidated securitization entities	644	1,655
Total borrowings	\$ 85,154	\$ 90,882

At March 31, 2020, the outstanding GE Capital borrowings that had been assumed by GE as part of the GE Capital Exit Plan was \$29,136 million (\$5,888 million short term and \$23,247 million long term), for which GE has an offsetting Receivable from GE Capital of \$16,909 million. The difference of \$12,226 million (\$3,369 million in short-term borrowings and \$8,857 million in long-term borrowings) represents the amount of borrowings GE Capital had funded with available cash to GE via intercompany loans in lieu of GE issuing borrowings externally. During the first quarter of 2020, GE had not repaid any intercompany loans from GE Capital.

At March 31, 2020, total GE borrowings of \$31,222 million comprised of GE-issued borrowings of \$18,996 million and intercompany loans from GE Capital to GE of \$12,226 million as described above.

GE has provided a full and unconditional guarantee on the payment of the principal and interest on all tradable senior and subordinated outstanding long-term debt securities issued by GE Capital. This guarantee applies to \$33,077 million and \$34,683 million of GE Capital debt at March 31, 2020 and December 31, 2019, respectively.

Non-recourse borrowings of consolidated securitization entities included \$644 million and \$1,569 million of current portion of long-term borrowings at March 31, 2020 and December 31, 2019, respectively. See Notes 4 and 18 for further information.

On April 22, 2020, GE issued a total of \$6,000 million in aggregate principal amount of senior unsecured debt, comprised of \$1,000 million of 3.450% Notes due 2027, \$1,250 million of 3.625% Notes due 2030, \$1,500 million of 4.250% Notes due 2040, and \$2,250 million of 4.350% Notes due 2050, and used the proceeds to complete a tender offer to purchase \$4,237 million in aggregate principal amount of certain GE unsecured debt, comprising \$2,046 million of 2.700% Notes due 2022, €934 million (\$1,011 million equivalent) of 0.375% Notes due 2022, €425 million (\$460 million equivalent) of 1.250% Notes due 2023, €376 million (\$407 million equivalent) of floating-rate Notes due 2020, and \$312 million of 3.375% Notes due 2024. The total carrying amount of the purchased notes was approximately \$4,228 million. We intend to use the remaining proceeds to repurchase, redeem or repay GE's outstanding debt obligations, including other notes or commercial paper.

On April 23, 2020, GE Capital completed a tender offer to purchase \$5,443 million in aggregate principal amount of certain senior unsecured debt, comprising \$3,858 million of 2.342% Notes due 2020, €575 million (\$623 million equivalent) of 2.250% Notes due 2020, \$460 million of 4.375% Notes due 2020, and £404 million (\$503 million of 5.875% Notes due 2020). The total carrying amount of the purchased notes was approximately \$5,427 million.

See Note 17 for further information about borrowings and associated interest rate swaps.

NOTE 12. INSURANCE LIABILITIES AND ANNUITY BENEFITS

Insurance liabilities and annuity benefits comprise mainly obligations to annuitants and insureds in our run-off insurance activities.

March 31, 2020 (In millions)	Long-term care insurance contracts	Structured settlement annuities & life insurance contracts	Other contracts	Other adjustments(a)	Total

	21,023	11,095	2,459	5,655	40,232
Eliminations	—	—	(406)	—	(406)
Total	\$ 21,023	\$ 11,095	\$ 2,053	\$ 5,655	\$ 39,826

(a) To the extent that unrealized gains on specific investment securities supporting our insurance contracts would result in a premium deficiency should those gains be realized, an increase in future policy benefit reserves is recorded, with an after-tax reduction of net unrealized gains recognized through Accumulated other comprehensive income (loss) in our consolidated Statement of Earnings (Loss).

The decrease in insurance liabilities and annuity benefits of \$1,586 million from December 31, 2019 to March 31, 2020, is primarily due to an adjustment of \$1,604 million resulting from a decrease in unrealized gains on investment securities that would result in a premium deficiency should those gains be realized.

Claim reserves included incurred claims of \$507 million and \$473 million, of which insignificant amounts related to the recognition of adjustments to prior year claim reserves arising from our periodic reserve evaluation for the three months ended March 31, 2020 and 2019, respectively. Paid claims were \$405 million and \$421 million in the three months ended March 31, 2020 and 2019, respectively.

Reinsurance recoverables are recorded when we cede insurance risk to third parties but are not relieved from our primary obligation to policyholders and cedents. These amounts, net of allowances of \$1,374 million and \$1,355 million, are included in Other GE Capital receivables in our consolidated Statement of Financial Position and amounted to \$2,463 million and \$2,416 million at March 31, 2020 and December 31, 2019, respectively.

NOTE 13. POSTRETIREMENT BENEFIT PLANS

We sponsor a number of pension and retiree health and life insurance benefit plans that we present in three categories, principal pension plans, other pension plans and principal retiree benefit plans. Principal pension plans represent the GE Pension Plan and the GE Supplementary Pension Plan. Other pension plans include U.S. and non-U.S. pension plans with pension assets or obligations greater than \$50 million. Principal retiree benefit plans provide health and life insurance benefits to certain eligible participants and these participants share in the cost of the healthcare benefits. Smaller pension plans with pension assets or obligations less than \$50 million and other retiree benefit plans are not presented.

EFFECT ON OPERATIONS OF BENEFIT PLANS. The components of benefit plans costs other than the service cost are included in the caption Non-operating benefit costs in our consolidated Statement of Earnings (Loss).

<i>(In millions)</i>	Principal pension plans		Other pension plans	
	Three months ended March 31		Three months ended March 31	
	2020	2019	2020	2019
Service cost for benefits earned	\$ 153	\$ 158	\$ 65	\$ 63
Prior service cost amortization	37	33	—	—
Expected return on plan assets	(748)	(863)	(274)	(284)
Interest cost on benefit obligations	587	726	108	139
Net actuarial loss amortization	848	763	112	80
Curtailment/settlement loss (gain)	—	51 (a)	(1)	9
Benefit plans cost	\$ 877	\$ 868	\$ 10	\$ 7

(a) Curtailment loss in the three months ended March 31, 2019, resulted from the spin-off and subsequent merger of our Transportation segment with Wabtec, which is included in Earnings (loss) from discontinued operations in our consolidated Statement of Earnings (Loss).

Principal retiree benefit plans income was \$32 million and \$61 million for the three months ended March 31, 2020 and 2019, respectively, which includes a curtailment gain of \$33 million in 2019 resulting from the Transportation transaction, which is included in Earnings (loss) from discontinued operations in our consolidated Statement of Earnings (Loss).

We also have a defined contribution plan for eligible U.S. employees that provides discretionary contributions. Defined contribution plan costs were \$95 million and \$101 million for the three months ended March 31, 2020 and 2019, respectively.

NOTE 14. INCOME TAXES

Our consolidated effective income tax rate was 1.0% and 12.5% during the three months ended March 31, 2020 and 2019, respectively. The rate for 2020 is lower than the U.S. statutory rate primarily due to the lower tax rate on the sale of our BioPharma business. The low tax rate on the sale reflects gain outside the U.S. taxed at lower than 21% and because we recorded \$633 million of the tax associated with preparatory steps for the transaction in the fourth quarter of 2019. The rate for 2019 is lower than the U.S. statutory rate primarily due to favorable audit resolutions, the benefit of the lower-taxed disposition of our Digital ServiceMax business and U.S. business credits. This was partially offset by the cost of the base erosion and global intangible low tax income provisions in excess of the benefit from other global activities.

The Internal Revenue Service (IRS) is currently auditing our consolidated U.S. income tax returns for 2014-2015 and 2016-2018. It is possible the 2014-2015 audit will be completed in the next 12 months. The United Kingdom tax authorities disallowed interest deductions claimed by GE Capital for the years 2004-2015 that could result in a potential impact of approximately \$1 billion, which includes a possible assessment of tax and reduction of deferred tax assets, not including interest and penalties. We are contesting the disallowance. We comply with all applicable tax laws and judicial doctrines of the United Kingdom and believe that the entire benefit is more likely than not to be sustained on its technical merits.

NOTE 15. SHAREHOLDERS' EQUITY

ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS) <i>(In millions)</i>	Three months ended March 31	
	2020	2019

Accumulated other comprehensive income (loss) at March 31	\$ (10,819)	\$ (13,485)

(a) Included adjustments of \$1,267 million and \$(957) million for the three months ended March 31, 2020 and 2019, respectively related to insurance liabilities and annuity benefits in our run-off insurance operations to reflect the effects that would have been recognized had the related unrealized investment security gains been realized. See Note 12 for further information.

(b) Included \$836 million, including currency translation of \$688 million, net of taxes, for the three months ended March 31, 2020, related to the sale of our BioPharma business within our Healthcare segment.

In 2016, we issued \$5,694 million of GE Series D preferred stock, which are callable on January 21, 2021. In addition to Series D, \$250 million of existing GE Series A, B and C preferred stock are also outstanding. The total carrying value of GE preferred stock at March 31, 2020 was \$5,782 million and will increase to \$5,944 million by the respective call dates through periodic accretion. See our Annual Report on Form 10-K for the year ended December 31, 2019 for further information.

Noncontrolling interests in equity of consolidated affiliates amounted to \$1,575 million and \$1,545 million at March 31, 2020 and December 31, 2019, respectively. Net earnings (loss) attributable to noncontrolling interests were \$7 million and \$30 million for the three months ended March 31, 2020 and 2019, respectively. Dividends attributable to noncontrolling interests were \$(3) million and \$(106) million for the three months ended March 31, 2020 and 2019, respectively.

Redeemable noncontrolling interests presented within All other liabilities in our consolidated Statement of Financial Position include common shares issued by our affiliates that are redeemable at the option of the holder of those interests and amounted to \$470 million and \$439 million as of March 31, 2020 and December 31, 2019, respectively. Net earnings (loss) attributable to redeemable noncontrolling interests was \$27 million and \$27 million for the three months ended March 31, 2020 and 2019, respectively.

NOTE 16. EARNINGS PER SHARE INFORMATION

Three months ended March 31 (In millions; per-share amounts in dollars)	2020		2019	
	Diluted	Basic	Diluted	Basic
Earnings from continuing operations for per-share calculation	\$ 6,358	\$ 6,358	\$ 936	\$ 954
Preferred stock dividends	(43)	(43)	(40)	(40)
Earnings from continuing operations attributable to common shareholders for per-share calculation	6,315	6,315	897	915
Earnings (loss) from discontinued operations for per-share calculation	(175)	(175)	2,604	2,622
Net earnings (loss) attributable to GE common shareholders for per-share calculation	\$ 6,140	\$ 6,140	\$ 3,519	\$ 3,537
Shares of GE common stock outstanding	8,742	8,742	8,711	8,711
Employee compensation-related shares (including stock options)	7	—	15	—
Total average equivalent shares	8,749	8,742	8,726	8,711
Earnings per share from continuing operations	\$ 0.72	\$ 0.72	\$ 0.10	\$ 0.10
Earnings (loss) per share from discontinued operations	(0.02)	(0.02)	0.30	0.30
Net earnings (loss) per share	0.70	0.70	0.40	0.41
Potentially dilutive securities(a)	422		471	

(a) Outstanding stock awards not included in the computation of diluted earnings per share because their effect was antidilutive.

Our unvested restricted stock unit awards that contain non-forfeitable rights to dividends or dividend equivalents are considered participating securities, and, therefore, are included in the computation of earnings per share pursuant to the two-class method. For the three months ended March 31, 2020 and 2019, application of this treatment had an insignificant effect.

Earnings per share amounts are computed independently for earnings from continuing operations, earnings from discontinued operations and net earnings. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amounts for net earnings.

NOTE 17. FINANCIAL INSTRUMENTS

The following table provides information about assets and liabilities not carried at fair value and excludes finance leases, equity securities without readily determinable fair value and non-financial assets and liabilities. Substantially all of these assets are considered to be Level 3 and the vast majority of our liabilities' fair value are considered Level 2.

(In millions)	March 31, 2020		December 31, 2019	
	Carrying amount (net)	Estimated fair value	Carrying amount (net)	Estimated fair value
Assets				
Loans and other receivables	\$ 3,912	\$ 3,777	\$ 4,113	\$ 4,208
Liabilities				
Borrowings (Note 11)	85,154	85,033	90,882	97,754
Investment contracts (Note 12)	2,169	2,485	2,191	2,588

The lower fair value in relation to carrying value for borrowings at March 31, 2020 compared to December 31, 2019 was driven primarily by widening GE credit spreads, partially offset by a decline in market interest rates. Unlike the carrying amount, estimated fair value of borrowings included \$913 million and \$1,106 million of accrued interest at March 31, 2020 and December 31, 2019, respectively.

Assets and liabilities that are reflected in the accompanying financial statements at fair value are not included in the above disclosures; such items include cash and equivalents, investment securities and derivative financial instruments.

DERIVATIVES AND HEDGING. Our policy requires that derivatives are used solely for managing risks and not for speculative purposes. Total gross notional was \$101,209 million (\$53,808 million in GE Capital and \$47,401 million in GE) and \$98,018 million (\$55,704 million in GE Capital and \$42,314 million in GE) at March 31, 2020 and December 31, 2019, respectively. GE Capital notional relates primarily to managing interest rate and currency risk between financial assets and liabilities, and GE notional relates primarily to managing currency risk.

FAIR VALUE OF DERIVATIVES (In millions)	March 31, 2020			December 31, 2019		
	Gross Notional	All other assets	All other liabilities	Gross Notional	All other assets	All other liabilities
Interest rate contracts	\$ 23,617	\$ 2,191	\$ 9	\$ 23,918	\$ 1,636	\$ 11
Currency exchange contracts	7,307	170	277	7,044	99	46
Derivatives accounted for as hedges	\$ 30,924	\$ 2,361	\$ 287	\$ 30,961	\$ 1,734	\$ 57
Interest rate contracts	\$ 2,447	\$ 29	\$ 7	\$ 3,185	\$ 18	\$ 12
Currency exchange contracts	66,240	1,105	1,477	62,165	697	744
Other contracts	1,598	5	103	1,706	123	40
Derivatives not accounted for as hedges	\$ 70,285	\$ 1,139	\$ 1,587	\$ 67,056	\$ 838	\$ 796
Gross derivatives	\$ 101,209	\$ 3,500	\$ 1,874	\$ 98,018	\$ 2,572	\$ 853
Netting and credit adjustments	\$	(1,145)	(1,155)	\$	(546)	(546)
Cash collateral adjustments		(1,297)	(198)		(1,286)	(105)
Net derivatives recognized in statement of financial position	\$	1,058	\$ 520	\$	740	\$ 202
Net accrued interest	\$	71	\$ 1	\$	182	\$ 1
Securities held as collateral		(693)	—		(469)	—
Net amount	\$	436	\$ 521	\$	452	\$ 203

Fair value of derivatives in our consolidated Statement of Financial Position excluded accrued interest. Cash collateral adjustments excluded excess collateral received and posted of \$198 million and \$995 million at March 31, 2020, respectively, and \$104 million and \$603 million at December 31, 2019, respectively. Securities held as collateral excluded excess collateral received of \$45 million and \$27 million at March 31, 2020 and December 31, 2019 respectively.

FAIR VALUE HEDGES. We use derivatives to hedge the effects of interest rate and currency exchange rate changes on our borrowings. At March 31, 2020, the cumulative amount of hedging adjustments of \$6,527 million (including \$2,348 million on discontinued hedging relationships) was included in the carrying amount of the hedged liability of \$53,272 million. At March 31, 2019, the cumulative amount of hedging adjustments of \$3,712 million (including \$2,685 million on discontinued hedging relationships) was included in the carrying amount of the hedged liability of \$58,885 million. The cumulative amount of hedging adjustments was primarily recorded in long-term borrowings.

CASH FLOW HEDGES. Changes in the fair value of cash flow hedges are recorded in Accumulated Other Comprehensive Income (AOCI) and recorded in earnings in the period in which the hedged transaction occurs. The gain (loss) recognized in AOCI was \$(313) million and \$47 million for the three months ended March 31, 2020 and 2019, respectively. The gain (loss) reclassified from AOCI to earnings was \$(59) million and zero for the three months ended March 31, 2020 and 2019, respectively. These amounts were primarily related to currency exchange and interest rate contracts.

The total amount in AOCI related to cash flow hedges of forecasted transactions was a \$183 million loss at March 31, 2020. We expect to reclassify \$125 million of loss to earnings in the next 12 months contemporaneously with the earnings effects of the related forecasted transactions. For the three months ended March 31, 2020 and 2019, we recognized \$18 million of loss, primarily as a result of the disposition of BioPharma, and insignificant gains and losses, respectively, related to hedged forecasted transactions and firm commitments that did not occur by the end of the originally specified period. At March 31, 2020 and 2019, the maximum term of derivative instruments that hedge forecasted transactions was 15 years and 14 years, respectively.

NET INVESTMENT HEDGES. For these hedges, the portion of the fair value changes of the derivatives or debt instruments that relates to changes in spot currency exchange rates is recorded in a separate component of AOCI. The portion of the fair value changes of the derivatives related to differences between spot and forward rates is recorded in earnings each period. The amounts recorded in AOCI affect earnings if the hedged investment is sold, substantially liquidated, or control is lost.

The total gain (loss) recognized in AOCI on hedging instruments for the three months ended March 31, 2020 and 2019 was \$158 million and \$(68) million, respectively, comprising \$109 million and \$(27) million on currency exchange contracts and \$48 million and \$(41) million on foreign currency debt, respectively. The total gain (loss) excluded from assessment and recognized in earnings was \$2 million and \$8 million for the three months ended March 31, 2020 and 2019, respectively.

The carrying value of foreign currency debt designated as net investment hedges was \$9,145 million and \$12,502 million at March 31, 2020 and 2019, respectively. The gain (loss) reclassified from AOCI into earnings was zero and \$6 million for the three months ended March 31, 2020 and 2019, respectively.

EFFECTS OF DERIVATIVES ON EARNINGS. All derivatives are marked to fair value on our balance sheet, whether they are designated in a hedging relationship for accounting purposes or are used as economic hedges. For derivatives not designated as hedging instruments, substantially all of the gain or loss recognized in earnings is offset by either the current period change in value of underlying exposures, which is recorded in earnings in the current period or a future period when the recording of the exposures occur.

The table below presents the effect of our derivative financial instruments in the consolidated Statement of Earnings:

(In millions)	Three months ended March 31, 2020					Three months ended March 31, 2019				
	Revenues	Cost of sales	Interest Expense	SG&A	Other Income	Revenues	Cost of sales	Interest Expense	SG&A	Other Income
Total amounts presented in the consolidated Statement of Earnings	\$ 20,524	\$ 15,695	\$ 794	\$ 3,065	\$ 6,869	\$ 22,202	\$ 16,208	\$ 1,065	\$ 3,402	\$ 847
Total effect of cash flow hedges	\$ (21)	\$ (25)	\$ (10)	\$ (3)	\$ —	\$ 20	\$ (9)	\$ (10)	\$ (1)	\$ —
Hedged items			\$ (2,480)					\$ (527)		
Derivatives designated as hedging instruments			2,511					515		
Total effect of fair value hedges			\$ 31					\$ (11)		
Interest rate contracts	\$ (23)	\$ —	\$ (9)	\$ —	\$ —	\$ (4)	\$ —	\$ (16)	\$ —	\$ —
Currency exchange contracts	(521)	13	—	54	11	390	9	—	(45)	3
Other	—	—	—	(160)	(22)	—	—	96	—	13
Total effect of derivatives not designated as hedges	\$ (545)	\$ 13	\$ (9)	\$ (106)	\$ (12)	\$ 386	\$ 9	\$ 80	\$ (45)	\$ 16

The amount excluded for cash flow hedges which is recognized in earnings was \$15 million and zero for the three months ended March 31, 2020 and 2019, respectively.

COUNTERPARTY CREDIT RISK. Fair values of our derivatives can change significantly from period to period based on, among other factors, market movements and changes in our positions. We manage counterparty credit risk (the risk that counterparties will default and not make payments to us according to the terms of our agreements) on an individual counterparty basis. Where we have agreed to netting of derivative exposures with a counterparty, we net our exposures with that counterparty and apply the value of collateral posted to us to determine the exposure. We actively monitor these net exposures against defined limits and take appropriate actions in response, including requiring additional collateral. Our exposures to counterparties (including accrued interest), net of collateral we held, was \$270 million and \$368 million at March 31, 2020 and December 31, 2019, respectively. Counterparties' exposures to our derivative liability (including accrued interest), net of collateral posted by us, was \$463 million and \$159 million at March 31, 2020 and December 31, 2019, respectively.

NOTE 18. VARIABLE INTEREST ENTITIES

In addition to the three VIEs detailed in Note 4, in our consolidated Statement of Financial Position, we have assets of \$2,106 million and \$2,134 million and liabilities of \$1,103 million and \$1,233 million at March 31, 2020, and December 31, 2019, respectively, from other consolidated VIEs. These entities were created to help our customers facilitate or finance the purchase of GE goods and services. These entities have no features that could expose us to losses that would significantly exceed the difference between the consolidated assets and liabilities. Substantially all the assets of our consolidated VIEs at March 31, 2020, can only be used to settle the liabilities of those VIEs.

Our investments in unconsolidated VIEs were \$1,939 million and \$1,937 million at March 31, 2020, and December 31, 2019, respectively. These investments are primarily owned by GE Capital businesses, \$506 million and \$621 million of which were owned by Energy Financial Services, comprising equity method investments, and \$1,040 million and \$896 million of which were owned by our run-off insurance operations, primarily comprising investment securities at March 31, 2020 and December 31, 2019, respectively. The increase in investments in unconsolidated VIEs in our run-off insurance operations reflects implementation of our revised reinvestment plan, which incorporates the introduction of strategic initiatives to invest in higher-yielding asset classes. Our maximum exposure to loss in respect of unconsolidated VIEs is increased by our commitments to make additional investments in these entities described in Note 19.

NOTE 19. COMMITMENTS, GUARANTEES, PRODUCT WARRANTIES AND OTHER LOSS CONTINGENCIES

COMMITMENTS. The GECAS business within the Capital segment has placed multiple-year orders for various Boeing, Airbus and other aircraft manufacturers with list prices approximating \$35,772 million (including 358 new aircraft with estimated delivery dates of 10% in 2020, 18% in 2021 and 72% in 2022 through 2026) and secondary orders with airlines for used aircraft approximating \$2,297 million (including 53 used aircraft with estimated delivery dates of 21% in 2020, 64% in 2021 and 15% in 2022) at March 31, 2020. When we purchase aircraft, it is at a contractual price, which is usually less than the aircraft manufacturer's list price and excludes any pre-delivery payments made in advance. As of March 31, 2020, we have made \$2,963 million of pre-delivery payments to aircraft manufacturers.

During April 2020, GECAS agreed with Boeing to restructure its 737 MAX orderbook including previously canceled positions, resulting in the cancellation of 69 orders with 82 orders now remaining.

GE Capital had total investment commitments of \$2,786 million at March 31, 2020. The commitments primarily comprise project financing investments in thermal and wind energy projects of \$1,149 million and investments by our run-off insurance operations in investment securities and other assets of \$1,608 million, included within these commitments are obligations to make additional investments in unconsolidated VIEs of \$260 million and \$1,090 million, respectively. See Note 18 for further information.

As of March 31, 2020, in our Aviation segment, we have committed to provide financing assistance of \$2,072 million for future customer acquisitions of aircraft equipped with our engines.

GUARANTEES. At March 31, 2020, we were committed under the following guarantee arrangements:

Credit Support. At March 31, 2020, we have provided \$1,483 million of credit support on behalf of certain customers' predominantly joint ventures and partnerships, such as standby letters of credit and performance guarantees. The liability was \$33 million at March 31, 2020.

Indemnification Agreements – Continuing Operations. At March 31, 2020, we have \$1,544 million of indemnifications, including representations and warranties in sales of businesses or assets, for which we recorded a liability of \$144 million.

Indemnification Agreements – Discontinued Operations. At March 31, 2020, we have provided specific indemnities to buyers of GE Capital's assets that, in the aggregate, represent a maximum potential claim of \$1,019 million with related reserves of \$139 million.

PRODUCT WARRANTIES. We provide for estimated product warranty expenses when we sell the related products. Because warranty estimates are forecasts that are based on the best available information, mostly historical claims experience, claims costs may differ from amounts provided. The liability for product warranties was \$2,081 million and \$2,165 million at March 31, 2020 and December 31, 2019, respectively.

LEGAL MATTERS. The following information supplements and amends the discussion of Legal Matters in Note 23 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2019; refer to that discussion for information about previously reported legal matters that are not updated below. In the normal course of our business, we are involved from time to time in various arbitrations, class actions, commercial litigation, investigations and other legal, regulatory or governmental actions, including the significant matters described below that could have a material impact on our results of operations. In many proceedings, including the specific matters described below, it is inherently difficult to determine whether any loss is probable or even reasonably possible or to estimate the size or range of the possible loss, and accruals for legal matters are not recorded until a loss for a particular matter is considered probable and reasonably estimable. Given the nature of legal matters and the complexities involved, it is often difficult to predict and determine a meaningful estimate of loss or range of loss until we know, among other factors, the particular claims involved, the likelihood of success of our defenses to those claims, the damages or other relief sought, how discovery or other procedural considerations will affect the outcome, the settlement posture of other parties and other factors that may have a material effect on the outcome. For these matters, unless otherwise specified, we do not believe it is possible to provide a meaningful estimate of loss at this time. Moreover, it is not uncommon for legal matters to be resolved over many years, during which time relevant developments and new information must be continuously evaluated.

Alstom legacy matters. In November 2015, we acquired the Thermal, Renewables and Grid businesses from Alstom. Prior to the acquisition, the seller was the subject of two significant cases involving anti-competitive activities and improper payments: (1) in January 2007, Alstom was fined €65 million by the European Commission for participating in a gas insulated switchgear cartel that operated from 1988 to 2004 (that fine was later reduced to €59 million), and (2) in December 2014, Alstom pled guilty in the United States to multiple violations of the Foreign Corrupt Practices Act and paid a criminal penalty of \$772 million. As part of GE's accounting for the acquisition, we established a reserve amounting to \$858 million for legal and compliance matters related to the legacy business practices that were the subject of these and related cases in various jurisdictions, including the previously reported legal proceedings in Israel that are described below. The reserve balance was \$846 million and \$875 million at March 31, 2020 and December 31, 2019, respectively.

Regardless of jurisdiction, the allegations relate to claimed anti-competitive conduct or improper payments in the pre-acquisition period as the source of legal violations and/or damages. Given the significant litigation and compliance activity related to these matters and our ongoing efforts to resolve them, it is difficult to assess whether the disbursements will ultimately be consistent with the reserve established. The estimation of this reserve involved significant judgment and may not reflect the full range of uncertainties and unpredictable outcomes inherent in litigation and investigations of this nature, and at this time we are unable to develop a meaningful estimate of the range of reasonably possible additional losses beyond the amount of this reserve. Damages sought may include disgorgement of profits on the underlying business transactions, fines and/or penalties, interest, or other forms of resolution. Factors that can affect the ultimate amount of losses associated with these and related matters include the way cooperation is assessed and valued, prosecutorial discretion in the determination of damages, formulas for determining fines and penalties, the duration and amount of legal and investigative resources applied, political and social influences within each jurisdiction, and tax consequences of any settlements or previous deductions, among other considerations. Actual losses arising from claims in these and related matters could exceed the amount provided.

In September 2013, the Israeli Antitrust Authority issued a decision whereby Alstom, Siemens AG and ABB Ltd. were held liable for an alleged anti-competitive arrangement in the gas-insulated switchgears market in Israel. While there was no fine in connection with that decision, claimants brought two civil actions in 2013 seeking damages of approximately \$950 million and \$600 million, respectively, related to the alleged conduct underlying the decision that are pending before the Central District Court in Israel. The court in March 2020 approved a settlement agreement reached by the parties, but the settlement remains subject to appeal to the Supreme Court of Israel.

Shareholder and related lawsuits. In December 2018, a putative class action (the Varga case) was filed in the U.S. District Court for the Northern District of New York naming GE and a former GE executive officer as defendants in connection with the oversight of the GE RSP. It alleges that the defendants breached fiduciary duties under the Employee Retirement Income Security Act of 1974 (ERISA) by failing to advise GE RSP participants that GE Capital insurance subsidiaries were allegedly under-reserved and continued to retain a GE stock fund as an investment option in the GE RSP. The plaintiffs seek unspecified damages on behalf of a class of GE RSP participants and beneficiaries from January 1, 2010 through January 19, 2018 or later. In March 2020 the court granted GE's motion to dismiss the case, and in April 2020 the plaintiffs filed an appeal with the Second Circuit.

In August 2019, a putative class action (the Tri-State case) was filed in the Delaware Court of Chancery naming as defendants GE and the former Board of Directors of Baker Hughes Incorporated (BHI). It alleges fraud, aiding and abetting breaches of fiduciary duty, and aiding and abetting breaches of duty of disclosure by GE based on allegations regarding financial statements that GE provided the former BHI board, management and shareholders in connection with BHI's merger with GE's Oil and Gas Business in July 2017. The plaintiff seeks damages on behalf of BHI shareholders during the period between October 7, 2016 and July 5, 2017. In October 2019, the City of Providence filed a complaint containing allegations substantially similar to those in the Tri-State complaint. The cases were consolidated in November 2019, and in December 2019, the plaintiffs filed an amended consolidated complaint which is similar to the prior complaints but does not include fraud claims against GE. In February 2020, GE and the other defendants filed a motion to dismiss the amended consolidated complaint.

These cases are at an early stage; we believe we have defenses to the claims and are responding accordingly.

Bank BPH. As previously reported, GE Capital's subsidiary Bank BPH, along with other Polish banks, has been subject to ongoing litigation in Poland related to its portfolio of floating rate residential mortgages, with cases brought by individual borrowers seeking relief related to their foreign currency-denominated mortgages in various courts throughout Poland. Approximately 86% of the Bank BPH portfolio is indexed to or denominated in foreign currencies (primarily Swiss francs), and the total portfolio had a carrying value of \$2.4 billion at March 31, 2020. In October 2019, the European Court of Justice (ECJ) issued a decision about the approach to remedy in a case involving another Polish bank's foreign currency loans, and in January 2020, a pending case involving a Bank BPH loan was referred to the ECJ. While there remains significant uncertainty as to how the prior ECJ decision, or a future decision on the Bank BPH case, will influence the Polish courts as they consider individual cases, we are observing an increase in the number of lawsuits brought against Bank BPH and other banks in Poland with similar portfolios that may continue in future reporting periods. We have observed more findings of liability and more severe remedies being ordered against Polish banks. We also believe there is a potential for unifying rules of decision to emerge regarding both the finding of liability and approach to remedy that could change our estimate of the potential effects of borrower litigation. Future adverse developments in the potential for legislative relief or in litigation across the Polish banking industry as a result of ECJ decisions or otherwise could result in losses related to these loans in future reporting periods.

ENVIRONMENTAL, HEALTH AND SAFETY MATTERS. Our operations, like operations of other companies engaged in similar businesses, involve the use, disposal and cleanup of substances regulated under environmental protection laws and nuclear decommissioning regulations. Additionally, like many other industrial companies, we and our subsidiaries are defendants in various lawsuits related to alleged worker exposure to asbestos or other hazardous materials. Liabilities for environmental remediation, nuclear decommissioning and worker exposure claims exclude possible insurance recoveries. It is reasonably possible that our exposure will exceed amounts accrued. However, due to uncertainties about the status of laws, regulations, technology and information related to individual sites and lawsuits, such amounts are not reasonably estimable. For further information, see our Annual Report on Form 10-K for the year ended December 31, 2019.

NOTE 20. INTERCOMPANY TRANSACTIONS

Presented below is a walk of intercompany eliminations from the combined GE and GE Capital totals to the consolidated cash flows.

<i>(In millions)</i>	Three months ended March 31	
	2020	2019
Combined GE and GE Capital cash from (used for) operating activities - continuing operations	\$ (385)	\$ (557)
GE current receivables sold to GE Capital	(997)	538
GE long-term receivables sold to GE Capital	135	174
Supply chain finance programs(a)	884	310
Other reclassifications and eliminations	216	(45)
Consolidated cash from (used for) operating activities - continuing operations	\$ (148)	\$ 420
Combined GE and GE Capital cash from (used for) investing activities - continuing operations	\$ 19,991	\$ 6,048
GE current receivables sold to GE Capital	945	(1,306)
GE long-term receivables sold to GE Capital	(135)	(174)
Supply chain finance programs(a)	(884)	(310)
Other reclassifications and eliminations	(695)	(562)
Consolidated cash from (used for) investing activities - continuing operations	\$ 19,221	\$ 3,696
Combined GE and GE Capital cash from (used for) financing activities - continuing operations	\$ (8,451)	\$ (4,837)
GE current receivables sold to GE Capital	52	768
Other reclassifications and eliminations	480	607
Consolidated cash from (used for) financing activities - continuing operations	\$ (7,919)	\$ (3,461)

(a) Represents the reduction of the GE liability associated with the funded participation in a supply chain finance program with GE Capital, primarily as a result of GE Capital's sale of the program platform to MUFG Union Bank, N.A. (MUFG) in 2019.

Cash payments received on the Receivable facility deferred purchase price are reflected as Cash from investing activities in the GE Capital and Consolidated columns of our consolidated Statement of Cash Flows. Sales of customer receivables from GE to GE Capital are classified as Cash from operating activities in the GE column of our Statement of Cash Flows. See Note 4 for further information.

NOTE 21. GUARANTOR FINANCIAL INFORMATION

GE Capital International Funding Company Unlimited Company (the Issuer) previously issued senior unsecured registered notes that are fully and unconditionally, jointly and severally guaranteed by both the Company and GE Capital International Holdings Limited (each a Guarantor, and together, the Guarantors).

**CONDENSED CONSOLIDATING STATEMENT OF EARNINGS (LOSS) AND COMPREHENSIVE INCOME (LOSS)

NOTE 22. BAKER HUGHES SUMMARIZED FINANCIAL INFORMATION

We account for our remaining interest in Baker Hughes (comprising 377.4 million shares and a promissory note receivable) at fair value. At March 31, 2020, the fair value of our interest in Baker Hughes was \$4,083 million. Since the date of deconsolidation, we have not sold any shares of Baker Hughes and recognized an unrealized loss of \$5,710 million (\$4,631 million after-tax) for the three months ended March 31, 2020 based on a share price of \$10.50. See Notes 2 and 3 for further information.

Summarized financial information of Baker Hughes is as follows.

For the three months ended March 31, 2020 *(In millions)*

Revenues	\$	5,425
Gross profit		755
Net income (loss)		(16,098)
Net income (loss) attributable to the entity		(10,210)

Baker Hughes is a SEC registrant with separate filing requirements, and its financial information can be obtained from www.sec.gov or www.bakerhughes.com.

NOTE 23. OTHER INCOME

<i>(In millions)</i>	Three months ended March 31	
	2020	2019
Purchases and sales of business interests(a)	\$ 12,372	\$ 253
Licensing and royalty income	42	40
Associated companies	39	39
Net interest and investment income(b)	(5,632)	137
Other items	53	384
GE	6,874	852
Eliminations	(4)	(5)
Total	\$ 6,869	\$ 847

(a) Included a pre-tax gain of \$12,292 million on the sale of BioPharma in 2020. Included a pre-tax gain of \$224 million on the sale of ServiceMax in 2019. See Note 2 for further information.

(b) Included unrealized loss of \$(5,710) million related to our interest in Baker Hughes in 2020. See Note 3 for further information.

FORWARD-LOOKING STATEMENTS

Our public communications and SEC filings may contain statements related to future, not past, events. These forward-looking statements often address our expected future business and financial performance and financial condition, and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," "estimate," "forecast," "target," "preliminary," or "range." Forward-looking statements by their nature address matters that are, to different degrees, uncertain, such as statements about the potential impacts of the COVID-19 pandemic on our business operations, financial results and financial position and on the world economy; our expected financial performance, including cash flows, revenues, organic growth, margins, earnings and earnings per share; macroeconomic and market conditions and volatility; planned and potential business or asset dispositions; our de-leveraging plans, including leverage ratios and targets, the timing and nature of actions to reduce indebtedness and our credit ratings and outlooks; GE's and GE Capital's funding and liquidity; our businesses' cost structures and plans to reduce costs; restructuring, goodwill impairment or other financial charges; or tax rates.

For us, particular uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements include:

- the severity, magnitude and duration of the COVID-19 pandemic, including impacts of the pandemic and of businesses' and governments' responses to the pandemic on our operations and personnel, and on commercial activity and demand across our and our customers' businesses, and on global supply chains;
- our inability to predict the extent to which the COVID-19 pandemic and related impacts will continue to adversely impact our business operations, financial performance, results of operations, financial position, the prices of our securities and the achievement of our strategic objectives;
- changes in macroeconomic and market conditions and market volatility (including developments and volatility arising from the COVID-19 pandemic), including interest rates, the value of securities and other financial assets (including our equity ownership position in Baker Hughes), oil and other commodity prices and exchange rates, and the impact of such changes and volatility on our financial position;
- our de-leveraging and capital allocation plans, including with respect to actions to reduce our indebtedness, the timing and amount of GE dividends, organic investments, and other priorities;
- further downgrades of our current short- and long-term credit ratings or ratings outlooks, or changes in rating application or methodology, and the related impact on our liquidity, funding profile, costs and competitive position;
- GE's liquidity and the amount and timing of our GE Industrial cash flows and earnings, which may be impacted by customer, supplier, competitive, contractual and other dynamics and conditions;
- GE Capital's capital and liquidity needs, including in connection with GE Capital's run-off insurance operations and discontinued operations, the amount and timing of required capital contributions to the insurance operations and any strategic actions that we may pursue; the impact of conditions in the financial and credit markets on GE Capital's ability to sell financial assets; the availability and cost of funding; and GE Capital's exposure to particular counterparties and markets;
- our success in executing and completing asset dispositions or other transactions, including our plan to exit our equity ownership position in Baker Hughes, the timing of closing for such transactions and the expected proceeds and benefits to GE;
- global economic trends, competition and geopolitical risks, including changes in the rates of investment or economic growth in key markets we serve, or an escalation of trade tensions such as those between the U.S. and China;
- market developments or customer actions that may affect levels of demand and the financial performance of the major industries and customers we serve, such as secular, cyclical and competitive pressures in our Power business, pricing and other pressures in the renewable energy market, levels of demand for air travel and other customer dynamics such as early aircraft retirements, conditions in key geographic markets and other shifts in the competitive landscape for our products and services;
- operational execution by our businesses, including our ability to improve the operations and execution of our Power and Renewable Energy businesses, and the performance of our Aviation business;
- changes in law, regulation or policy that may affect our businesses, such as trade policy and tariffs, regulation related to climate change, and the effects of U.S. tax reform and other tax law changes;
- our decisions about investments in new products, services and platforms, and our ability to launch new products in a cost-effective manner;
- our ability to increase margins through implementation of operational changes, restructuring and other cost reduction measures;
- the impact of regulation and regulatory, investigative and legal proceedings and legal compliance risks, including the impact of Alstom, SEC and other investigative and legal proceedings;
- the impact of actual or potential failures of our products or third-party products with which our products are integrated, such as the fleet grounding of the Boeing 737 MAX, and the timing of its return to service and return to delivery, and related reputational effects;
- the impact of potential information technology, cybersecurity or data security breaches; and
- the other factors that are described in the "Risk Factors" section of this report and of our Annual Report on Form 10-K for the year ended December 31, 2019, as such descriptions may be updated or amended in any future reports we file with the SEC.

These or other uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements. This document includes certain forward-looking projected financial information that is based on current estimates and forecasts. Actual results could differ materially.

EXHIBITS

Exhibit 10(a)	General Electric Company Annual Executive Incentive Plan, effective January 1, 2020.
Exhibit 10(b)	Separation Agreement & Release between General Electric Company and Jamie Miller, dated February 17, 2020 (Incorporated by reference to Exhibit 1.01 to GE's Current Report on Form 8-K, dated February 20, 2020 (Commission file number 001-00035)).
Exhibit 10(c)	Memorandum of Understanding between General Electric Company and Carolina Dybeck Happe, effective March 1, 2020.
Exhibit 10(d)	Three-Year Credit Agreement, dated as of April 17, 2020, among General Electric Company, as the Borrower, JPMorgan Chase, N.A., as Administrative Agent, and the lenders party thereto (Incorporated by reference to Exhibit 10.1 to GE's Current Report on Form 8-K, dated April 20, 2020 (Commission file number 001-00035)).
Exhibit 11	Computation of Per Share Earnings.*
Exhibit 31(a)	Certification Pursuant to Rules 13a-14(a) or 15d-14(a) under the Securities Exchange Act of 1934, as Amended.

General Electric Company Annual Executive Incentive Plan

(As amended and restated effective January 1, 2020)

I. Purpose

The General Electric Company Annual Executive Incentive Plan (“the “Plan”) is an annual performance-based bonus plan that incentivizes and rewards eligible executive leaders of the Company for delivering on financial, operating and strategic goals of their business during a Plan Year.

II. Eligibility

The Company has the sole discretion to determine who is eligible to participate in the Plan. It is expected, however, that the following principles shall normally apply.

Eligibility shall generally be limited to employees who (i) are assigned to a job band at the Executive Band level or above in a participating country, (ii) are compensated through the Company’s payroll and (iii) receive written notification of their eligibility from the Company. To remain eligible, employees must remain so employed for the entire Plan Year and through the date in the following year that awards are paid under the Plan (the “Active Employment Requirement”).

In its sole discretion, the Company may waive the Active Employment Requirement in any case it deems appropriate, so long as the eligible employee remained so employed (as an eligible employee) for a minimum of three consecutive months during the Plan Year. For example, the Active Employment Requirement could be waived for otherwise eligible employees who:

- (1) are on an approved leave of absence during the Plan Year;
- (2) are newly hired or newly promoted into the Executive Band or higher positions before October 1st of the Plan Year;
- (3) terminate employment during the Plan Year due to death, Disability, Retirement or involuntary termination without Cause; or
- (4) become ineligible to participate in the Plan during the Plan Year as the result of a transfer to a nonparticipating affiliate or to an ineligible position.

Any awards made in connection with a waiver of the Active Employment Requirement shall be prorated as determined by the Company in its sole discretion. No proration shall apply for the period of any approved leave of absence.

An otherwise eligible employee who gives notice of his or her intention to resign or who participates in another Company-sponsored bonus or incentive plan (for the entire Plan Year) is ineligible to receive an award under this Plan.

Receipt of an award (including an award that is deferred) for one Plan Year does not create a right to an award for any other Plan Year. All awards (including the amounts thereof) are made at the sole discretion of the Company, regardless of the individual’s, business’s or Company’s performance.

III. Awards

The Company shall determine each eligible employee's award under the Plan as follows:

Individual Target

Prior to or at the beginning of each Plan Year, each eligible employee's target award amount (the "Individual Target") is determined by the Company in its sole discretion. The Individual Target is based on the eligible employee's job band and is equal to a percentage of the eligible employee's base salary as of December 31st of the Plan Year. For example, the Individual Targets for the 2020 Plan Year are generally as follows:

Executive Band	Senior Executive Band	Officer
35%	70%	100%

For eligible employees who experience a change in band (among the three bands listed above), the Individual Target will be adjusted to reflect the number of days during the Plan Year in each band. Any Individual Target may be changed by the Company from time to time in its sole discretion. Being assigned an Individual Target does not guarantee that a bonus of any amount will be awarded.

Business Performance Target

At the beginning of each Plan Year, the financial, operating and strategic goals for each business (and Corporate as a business) are determined by the Management Development and Compensation Committee of the General Electric Company Board of Directors (the "MDCC"). Based on these performance goals, a threshold, target and maximum level of performance for each business is established by the MDCC, along with a related payout percentage. The MDCC then determines the weighting of these goals and payout percentages to set the "Business Performance Target" for each business.

Business Performance Factor

After the end of the Plan Year, the MDCC will assess each business's quantitative performance against its Business Performance Target and qualitative performance in risk management, compliance and other areas. In assessing overall business performance, the MDCC may (in its discretion) take into account the impact of external market conditions, corporate transaction activity and other considerations. This assessment is used by the MDCC to determine an overall percentage by which the Individual Target of each eligible employee within that business shall be adjusted (the "Business Performance Factor").

If an eligible employee has transferred employment from one Company business to another during a Plan Year (while remaining an eligible employee), his or her Business Performance Factor will be adjusted based on when such transfer occurs. If the transfer of employment occurs during the first quarter of a Plan Year, only the Business Performance Factor of the eligible employee's second business shall be used.

Conversely, if the transfer of employment occurs during the last quarter of a Plan Year, only the Business Performance Factor of the first business shall be used. If the transfer of employment occurs during the second or third quarter of a Plan Year, the average Business Performance Factor of both businesses shall be used.

Individual Performance Factor

Finally, each eligible employee's people leader will determine (subject to approval by the MDCC) a further factor by which to adjust his or her Individual Target based on his or her individual and/or team performance, leadership, risk management, compliance, integrity and other factors (the "Individual Performance Factor"). These determinations may not permit the size of the business's bonus pool (the sum of Individual Targets for its eligible employees, as adjusted for the Business Performance Factor) to increase.

Other Adjustments

The Company retains complete discretion to further adjust the award amount for any individual for any reason (except that, for the avoidance of doubt, the MDCC shall retain any discretion that is not delegated as described in Section V). For example, the Company may modify award levels to address internal and external factors related to individual, business unit and Company performance and current and future projected business conditions, including factors such as internal parity, industry trends and market competitiveness, retention, dispute resolution and discipline.

Consistent with the purposes of the Plan, and due to the factors that will be taken into consideration, while the Company may determine a minimum aggregate payout amount during the Plan Year, individual awards amounts, if any, will vary from year to year and will not be determined before or during the Plan Year.

IV. Payment of Awards

Awards under the Plan will be reviewed and approved by the Company following the end of the Plan Year. All individual awards are subject to review by successively higher levels of senior management, and review and approval by the MDCC.

If not deferred, all approved awards will be paid as soon as practicable after such review, but in any event not later than March 15 of the year following the Plan Year (or such other date for participating countries outside of the United States as the Company may determine). Subject to Sections VIII and X, under no circumstances will an individual's award under the Plan be considered final unless and until after it is calculated, determined, and paid to the individual, and all other conditions are satisfied, including any terms and conditions applicable to deferred awards. Awards, net of any deferred amounts, will be issued via Company payroll (in the employee's local currency) and are subject to all applicable payroll deductions and tax withholdings.

V. Administration and Interpretation

The Plan shall be administered by the MDCC, who shall have the full power to construe and interpret the Plan in its sole discretion, including exercising any and all authority and responsibility given to the Company in this document (including the Appendix).

Without limiting the foregoing, the MDCC shall have the power to:

- (1) determine who is eligible to participate in the Plan;
- (2) determine whether to waive the Active Employment Requirement for any individual;
- (3) determine Individual Targets;
- (4) establish the performance goals for each business (including Corporate) and its Business Performance Target;
- (5) determine the Business Performance Factor for each business;
- (6) adjust each business's Business Performance Target and/or Business Performance Factor to reflect extraordinary or unusual events;
- (7) otherwise determine the amount of awards consistent with the terms of the Plan; and
- (8) establish or amend any rules or administrative procedures necessary or appropriate for Plan administration.

The MDCC may delegate its authority and responsibility under the Plan, except with respect to the determination of (i) awards for individuals at the level of Senior Vice President and above and/or (ii) the Business Performance Factor. Accordingly, the Chief Executive Officer ("CEO") or the Chief Human Resources Officer ("CHRO"), or the delegatee of either, may exercise the MDCC's authority and responsibility under the Plan with respect to the determination of awards for individuals at the level of Vice President and below (excluding the determination of the Business Performance Factor).

Nothing contained in the Plan shall be interpreted or construed as a promise of employment by the Company for the Plan Year, or any other time period, or a guarantee of payment of an award.

VI. Severability

The Plan (including any rules or administrative procedures established hereunder) represents the full and complete understanding between the Company and eligible employees with regard to terms of the Plan and any awards hereunder. The terms of the Plan (including any rules or administrative procedures) shall control in the event of inconsistencies with any other Company documents or any statements made by Company employees concerning the Plan.

If a final determination is made by a court of competent jurisdiction (or duly assigned arbitrator) that any provision contained in the Plan is unlawful, the Plan shall be considered amended in that instance to apply to such extent as the court/arbitrator may determine to be enforceable, but only to the extent consistent with the original intent of the drafter. Alternatively, if such a court/arbitrator finds that any provision contained in this Plan is unlawful -- and that provision cannot be amended, consistent with the original intent of the drafter, so as to make it lawful -- such finding shall not affect the effectiveness of any other provision of this Plan.

VII. Non-Assignability and Accounting

The right to any awards (including any deferred awards) or any other rights under the Plan, are not assignable in any manner whatsoever (except to the extent of beneficiary designations made pursuant to established administrative procedures). Any account created with respect to a deferred award shall be unfunded, unsecured and shall not constitute a trust for the benefit of any employee. No employee may create a lien or any other encumbrance on any present or future interest he or she may have under the Plan.

VIII. Additional Limitations (Clawbacks)

The Plan will be administered in compliance with Section 10D of the Securities Exchange Act of 1934, as amended, any applicable rules or regulations promulgated by the Securities and Exchange Commission or any national securities exchange or national securities association on which shares of the Company may be traded, and any Company policy adopted with respect to compensation recoupment, to the extent the application of such rules, regulations and/or policies is permissible under applicable local law. This Section VIII will not be the Company's exclusive remedy with respect to such matters.

IX. Deferrals

Eligible employees who are employed within the United States may elect to defer awards that may be granted under the Plan. All deferred awards shall be administered in accordance with established administrative procedures, including procedures relating to election requirements, the manner in which deferred awards may be invested and the time and form in which they are distributed. Such procedures are described in the Appendix.

X. Amendment & Termination

The Plan is offered at the sole discretion of the Company, which reserves the right to modify, adjust, change, or terminate the Plan at any time and for any reason. Any amounts that have been paid under the Plan are subject to modification, adjustment, change or termination only as described in Section VIII. Any amounts that have been deferred under the Plan are subject to modification, adjustment, change or termination only as described in Section VIII or as agreed upon by the employee (or beneficiary), and in each case only as permitted by the Appendix.

XI. Dispute Resolution

Questions or concerns related to the Plan or any Plan awards should be addressed to the employee's Human Resources Manager or business Compensation Manager. Any formal employee-initiated dispute relative to the Plan or awards will be addressed pursuant to the Company's then current applicable internal grievance or alternative dispute resolution program, including any final and binding arbitration procedure, consistent with applicable laws and regulations.

XII. Additional Terms

Plan Effective Date and Plan Year:

The Plan is effective as of January 1, 2018, and will run January 1st through December 31st of 2018 and each year thereafter (the "Plan Year") until such time that the Plan is modified, superseded or terminated.

Company:

"Company" shall mean the General Electric Company and any affiliates (companies or business entities in which General Electric Company has a 50% or more interest) that participate in the Plan, except as provided in the Appendix or otherwise noted.

Applicable Law:

The place of administration of the Plan shall be deemed within the State of New York. The Plan shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law provisions therein, to the extent permissible under applicable local law.

Awards that are not deferred are intended to be exempt from Section 409A of the Internal Revenue Code, and awards that are deferred are intended to be fully compliant with Section 409A. In each case, the Plan shall be administered and interpreted in a manner consistent with such intent, including in a manner that avoids the imposition of penalties under Section 409A.

Cause:

"Cause" means, as determined in the sole discretion of the Company, an eligible employee's:

- (1) breach of the Employee Innovation and Proprietary Information Agreement or any other confidentiality, non-solicitation, or non-competition agreement with the Company or breach of a material term of any other agreement between the eligible employee and the Company;
- (2) engagement in conduct that results in, or has the potential to cause, material harm financially, reputationally, or otherwise to the Company;
- (3) commission of an act of dishonesty, fraud, embezzlement or theft;
- (4) conviction of, or plea of guilty or no contest to a felony or crime involving moral turpitude;
- (5) failure to perform satisfactorily the assigned duties of the eligible employee's position after receiving written notification of the failure from the eligible employee's manager; or

(6) failure to comply with the Company's policies and procedures, including, but not limited to, The Spirit and Letter or the Fair Employment Practices Policy.

Disability:

For eligible employees employed in the United States, "Disability" shall mean separating from service with the Company after becoming eligible for disability benefits under the GE Long-Term Disability Plan. For eligible employees employed outside of the United States, "Disability" shall have the definition provided in such employing country's disability plan.

Retirement:

For eligible employees employed in the United States, "Retirement" shall mean separating from service with the Company on or after age 60. For eligible employees employed outside of the United States, "Retirement" shall have the definition provided in such employing country's retirement plan.

Overpayment:

To the extent permitted under applicable law, in the event that a Plan participant receives an overpayment or otherwise owes the Company money which has not been repaid during the course of or at the conclusion of employment with the Company, the Company reserves the right to adjust any award under the Plan by the amount of the overpayment or to otherwise recover the overpayment by any lawful means. If such deductions are insufficient, the employee will be required to reimburse the Company for the balance, unless expressly waived by the Company.

APPENDIX

ADMINISTRATIVE PROCEDURES FOR THE GENERAL ELECTRIC COMPANY ANNUAL EXECUTIVE INCENTIVE PLAN (Effective commencing with the 2018 Plan Year)

Section 1. HISTORY AND APPLICABILITY OF PRIOR RULES

Prior to 2011, incentive compensation was payable under the GE Incentive Compensation Plan. For 2011 through 2017, incentive compensation was payable pursuant to independent Company action, which included a prior iteration of the GE Annual Executive Incentive Plan for 2015 through 2017.

The rules associated with deferrals of allotments payable under the GE Incentive Compensation Plan (including participant election requirements, the manner in which deferred incentive compensation allotments may be invested and the time and form in which they are distributed) are reflected in the GE Incentive Compensation Plan document and various administrative procedures (collectively, the “Prior Rules”). The Prior Rules include, but are not limited to, the Special Administrative Procedures for the GE Incentive Compensation Plan to Ensure Compliance with Code Section 409A (the “Special Procedures”).

When the Company ceased awarding incentive compensation under the GE Incentive Compensation Plan and began awarding it pursuant to independent Company action, the Company, through the action of the Senior Vice President, Human Resources, specifically made the Prior Rules applicable to deferrals of allotments pursuant to independent Company action.

These procedures are effective with respect to all awards made under the Annual Executive Incentive Plan for the 2018 plan year and later. The Special Procedures (which are partially repeated below in Section 2) are also effective for all such awards. The Prior Rules continue to be effective for awards made for earlier years.

Section 2. DEFERRAL OF AWARDS

2.1. In General

A participant may elect to defer any award for which he or she is eligible. For this purpose, awards under the Plan shall be considered “New Allotments” under the Special Procedures. For convenience, certain rules in the Special Procedures applicable to “New Allotments” are repeated in the remainder of this Section 2.

2.2. Elections

Elections to defer awards (including elections under Subsection 2.3 as to the form in which such deferred awards will be paid) shall be made no later than the end of the year preceding the year for which the award is made, in accordance with established administrative procedures. All such elections shall be irrevocable.

2.3. Available Forms

A participant may choose to receive a deferred award in a lump sum or in installments of either 10, 15 or 20 years. If no election as to the form of payment is made in accordance with established administrative procedures, payments shall be made in 10-year installments.

2.4. Commencement

Payment of deferred awards (including any interest or dividend equivalents allocable thereto) shall commence on April 1 of the year following Separation from Service, or as soon thereafter as is practicable; provided, however, that in the case of a Specified Employee, no payments shall be made during the first six months following Separation from Service.

2.5. Re-employment

Any re-employment after Separation from Service shall be disregarded in determining whether deferred awards commence to be paid (or continue to be paid).

2.6. Death

If a participant dies before all payments of a deferred award have been made, payments shall continue to the beneficiary or beneficiaries at the same time and in the same form as if the participant had lived.

2.7. Compliance with Code Section 409A

The rules in this Section 2 are intended to ensure that the Plan complies with Internal Revenue Code Section 409A and applicable guidance thereunder, and the Plan shall be administered and interpreted in a manner consistent with such intent.

Without limiting the foregoing:

(a) The rules in this Section 2 override anything to the contrary either in the Plan, any other administrative procedures or the communications and election materials provided to participants in the course of administering the Plan.

(b) Under no circumstances shall a scheduled payment of a deferred award be accelerated, nor shall a subsequent deferral be permitted with respect to such amounts.

2.8. Definitions

For purposes of this Section 2, the following terms have the designated meanings:

“Company” means General Electric Company.

"Separation from Service" means a participant's termination of employment with the Company and all Affiliates (defined for this purpose as any company or business entity

in which the Company has a 50% or more interest whether or not a participating employer in the Plan); provided that Separation from Service for purposes of the Plan shall be interpreted consistent with the requirements of Code Section 409A and regulations and other guidance issued thereunder.

"Specified Employee" means a specified employee as described in the Company's Procedures for Determining Specified Employees under Code Section 409A, as amended from time to time.

Section 3. ACCOUNTING FOR DEFERRED AWARDS

3.1. In General

At the participant's election, deferred awards will be accounted for in one or more of the following three media: cash, Standard and Poor's 500 Index ("S&P 500") Units or GE common stock ("Stock") Units.

3.2. Cash

The portion of any award accounted for in cash shall be credited with interest daily based upon the prior calendar month's average yield for U. S. Treasury notes and bonds with maturities of from ten to twenty years.

3.3. S&P 500 Units

The number of S&P 500 Units credited to a participant's account with respect to any deferral will be determined by dividing (1) the average closing value of the S&P 500 Index as reported by Standard and Poor's during the measurement period by (2) the dollar amount of the deferral to be accounted for in S&P 500 Units. The measurement period will be the 20 trading days ending on the date the Company approves awards under the Plan for the year (and including that date if it is a trading date).

Each portion of an account hypothetically invested in S&P 500 Units will be credited quarterly, on GE's dividend record date for the quarter, with dividend equivalents (in the form of additional S&P 500 Units) based upon the consecutive prior calendar quarter's quarterly dividend as reported by Standard and Poor's.

3.4. Stock Units

The number of Stock Units credited to a participant's account with respect to any deferral will be determined by dividing (1) the average New York Stock Exchange closing price of GE common stock during the measurement period by (2) the dollar amount of the deferral to be accounted for in Stock Units. The measurement period will be the 20 trading days ending on the date the Company approves awards under the Plan for the year (and including that date if it is a trading date).

Each portion of an account hypothetically invested in Stock Units will be credited quarterly, on GE's dividend record date for the quarter, with dividend equivalents (in the form of additional Stock Units) based on the dividend declared on GE common stock for such quarter.

If there is any change in the GE common stock represented by any deferred award or associated dividend equivalents previously credited, whether through merger, consolidation, reorganization, recapitalization, share distribution in the nature of a stock dividend, or other change in corporate structure, appropriate adjustments shall be made, as determined by the Company in its sole discretion, in the number of shares of GE common stock represented by such deferred allotments or dividend equivalents.

3.5. Switching

Participants (and beneficiaries) may elect four times each calendar year to switch the media in which their accounts are hypothetically invested. Switches will be valued based on (1) the date they are properly effectuated in accordance with administrative procedures, and (2) the applicable New York Stock Exchange closing price of GE common stock and/or the closing value of the S&P 500 Index as reported by Standard and Poor's.

A switch must involve at least 25% of a participant's account balance.

3.6. Payments

All payments of deferred awards (including any interest or dividend equivalents allocable thereto) will be made in cash.

For purposes of making payments, the portion of a participant's account hypothetically invested in S&P 500 Units will be valued based on the average closing value of the S&P 500 Index as reported by Standard and Poor's during the 20 trading days immediately preceding March 15 of the year the payment is to be made (and including that March 15 if it is a trading date).

Similarly, the portion of a participant's account hypothetically invested in Stock Units will be valued based on the average New York Stock Exchange closing price of GE common stock during the 20 trading days immediately preceding March 15 of the year a payment is to be made (and including that March 15 if it is a trading date).

Section 4. GENERAL CONDITIONS

4.1. Creditable Compensation

Awards under the Plan shall be taken into account as creditable pay under the Company benefit plans to the same extent and in the same manner that they would have been had they been paid under the GE Incentive Compensation Plan, or pursuant to independent Company action.

4.2. Additional Rules

The Company has the sole discretion to interpret and apply these procedures and may apply other rules and procedures as it deems necessary or appropriate, including, but not limited to, rules for making deferral elections, valuing and crediting deferrals, valuing and crediting dividend equivalents, valuing and making switches, defining applicable measuring periods, determining closing prices and closing index values and determining

what days constitute trading days. Such rules may or may not be communicated to participants, may or may not be reflected in formal administrative procedures, and may change from year to year. However, no rules or procedures may be applied that would cause a failure to comply with Code Section 409A.

MEMORANDUM OF UNDERSTANDING

Reference is made to the Employment Agreement (the “Employment Agreement”), dated November 24, 2019, between General Electric Company (the “Company”) and Carolina Dybeck Happe (“you”). This Memorandum of Understanding is effective as of March 1, 2020, the date of commencement of your employment with the Company.

Pursuant to this Memorandum of Understanding, you and the Company hereby agree that in applying Section 2(e)(iv) of your Employment Agreement, for each calendar year of your employment through December 31, 2026, you shall be entitled to receive annual tax equalization payments on any increase of up to 10 percent per annum in the value of the non-U.S. pension from your previous employer(s) that you held as of the date of the Employment Agreement, to the extent subject to taxation in the United States in the applicable year. You shall not be eligible for tax assistance on pension increases in excess of that amount. Any such payments shall be in addition to any tax equalization payments unrelated to your pension that you may be entitled to receive pursuant to Section 2(e)(iv) of the Employment Agreement.

This Memorandum of Understanding shall be governed by, and constitute a part of, the Employment Agreement in all respects. For the avoidance of doubt, payments arising under this Memorandum of Understanding shall be paid in a manner consistent with Section 10 of the Employment Agreement.

GENERAL ELECTRIC COMPANY

**Certification Pursuant to
Rules 13a-14(a) or 15d-14(a) under the Securities Exchange Act of 1934, as Amended**

I, H. Lawrence Culp, Jr., certify that:

1. I have reviewed this quarterly report on Form 10-Q of General Electric Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification Pursuant to
18 U.S.C. Section 1350**

In connection with the Quarterly Report of General Electric Company (the "registrant") on Form 10-Q for the period ended March 31, 2020, as filed with the Securities and Exchange Commission on the date hereof (the "report"), we, H. Lawrence Culp, Jr. and Carolina Dybeck Happe, Chief Executive Officer and Chief Financial Officer, respectively, of the registrant, certify, pursuant to 18 U.S.C. § 1350, that to our knowledge:

- (1) The report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the report fairly presents, in all material respects, the financial condition and results of operations of the registrant.
