Company Profile

Our Vision

To provide high quality products that combine performance with value pricing, while establishing a successful relationship with our customers and our suppliers. To constantly strive to meet or exceed our customer needs and expectations of price, service, and selection. To stay ahead of the competition by innovating new products and services based on the needs of our customers and market demand.

Our Mission

Our Business:

We aim to operate an ethical business in the manufacturing of disposable plastic packaging offering products and services that provide value for money.

Our Customers:

We value our customers as the foundation of our business. Our relationships with customers and suppliers are based on principles of respect and mutual benefit. We aim to develop profitable and lasting relationships. We want to build on what we do well and to innovate to meet changing customer needs.

Our Staff:

We respect the experience and skills of our staff and value the contribution that every person brings to the business team. We recognize that pride and enjoyment in the job come from commitment, leadership by example and accomplishment. Our goal is to work together to reward, train and develop our staff in ways that acknowledge performance and Individual abilities.

Company Overview

Douglas Stephen Plastics is a family-owned and operated company based in Paterson, NJ and has been in business since 1959. Our company was established with an understanding of the distributor and end-user marketplace and also a clear vision of the type Of disposable products that were missing from the industry. In fact, our founder was a distributor sales rep himself thereby giving him an understanding of the many challenges that companies face in the ever-changing Food Service industry.

From the beginning, Douglas Stephen Plastics led the industry by developing and manufacturing some of the first disposable, injection-molded plastic catering items ever produced. Thermoforming equipment was later added to produce a number of new products.

Today, Douglas Stephen Plastics continues to be an industry leader. Our Sales and Marketing efforts now extends throughout the United States through a network of distributors and broker organizations. We have dramatically expanded our product offering to an even broader line of both injection-molded and thermoformed products. A clear example of this expansion is our Ultimate Cater Service that includes, Stakmates Trays and Embassy Trays & Bowls. The DSP product line is well respected and in use throughout the Foodservice, Hospitality, Catering, Supermarket and Food Processing market segments.

Our key product categories include the following:

- Ultimate Cater Service-Cater Trays, Bowls, Plates & Serving Utensils
- Vending & Foodservice packaging- Nacho Trays, Dessert/Side Dishes
- Dome Lids for aluminum pans & catering trays
- Dome Lids for various paper/foam/plastic plates & bowls
- Ice Cream containers - Sundae Dishes, Banana Boats, Lids for paper/foam containers
- Bar Lok & Fresh Lok- Hinged-lid (clamshell) packaging
- Bakery - Specialty - Hors d'oeuvre Trays - especially designed for the Food Processor industry
- Glasscaps -for the Hospitality industry
- Micro Chef & Micro Pak - Microwaveable packaging for take-out & Home Meal Replacement

Ultimately, the mission of our company still remains ... “to make quality products that meet our customers needs, filling niche markets and designing custom products from an ever-increasing variety of raw materials.”

We appreciate your interest in the **Douglas Stephen Plastics** product line & look forward to the opportunity of servicing your disposable plastic needs in the future.

Material Guide

Douglas Stephen Plastics manufactures a broad range of disposable plastic packaging using the most popular plastic materials available in the market today. We are able to provide our customers with products that can perform in a wide variety of applications & temperature ranges.

Polystyrene (PS)

- ◆ Wide Temperature Performance (20° F to 170° F)
- ◆ Maximum Hot Fill: 185° F
- ◆ Great for Room Temperature & Chilled Food displays
 - High Clarity
 - No odor & taste transfer to or from food products
 - Low Cost, high yield material
 - Rigid material, great for stacking
 - Excellent value for merchandising displays

Polyethylene Terephthalate (PETE)

- ◆ Wide Temperature Performance (0° F to 160° F)
- ◆ Maximum Hot Fill: 140° F
- ◆ Great for Freezer, Cold Case & Room temperature application
 - High Clarity with toughness & strong impact resistance
 - Excellent for low temperature performance
 - Great performance with challenging foods (e.g. acidic, fat, grease or oil content)
 - Excellent barrier characteristics for extended shelf life

Polypropylene (PP)

- ◆ Excellent Temperature Performance {-10° F to 240° F}
- ◆ Maximum Hot Fill: 260° F
- ◆ Microwavable (food temperatures up to 230° F)
 - Great for merchandising hot or chilled prepared food
 - Great performance with challenging foods (e.g. acidic, fat, grease or oil content)
 - Excellent for Ready to Heat products (freezer/refrigerator to the microwave)

How Do We Do It?

Basics of Injection Molding

One of the most common methods of shaping plastic resins is a process called injection molding. Injection molding is accomplished by large machines called injection molding machines.

Resin is fed to the machine through the hopper. Colorants are usually fed into the machine directly after the hopper. The resins enter the injection barrel by gravity through the feed throat. Upon entrance into the barrel, the resin is heated to the appropriate melting temperatures.

The resin is injected into the mold by a reciprocating screw or a ram injector. The reciprocating screw apparatus is shown above. The reciprocating screw offers the advantage of being able to inject a smaller percentage of the total shot (amount of melted resin in the barrel). The ram injector must typically inject at least 20% of the total shot while a screw injector can inject as little as 5% of the total shot. Essentially, the screw injector is better suited for producing smaller parts.

The mold is the part of the machine that receives the plastic and shapes it appropriately. The mold is cooled constantly to a temperature that allows the resin to solidify and be cool to the touch. The mold plates are held together by hydraulic or mechanical force. The clamping force is defined as the injection pressure multiplied by the total cavity projected area. Typically molds are over designed depending on the resin to be used. Each resin has a calculated shrinkage value associated within.

How Do We Do It?

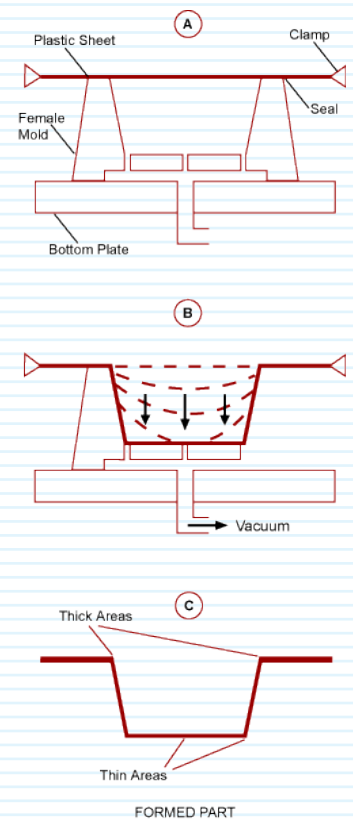

Basics of Vacuum Forming

Vacuum forming is a plastic thermoforming process that involves forming thermoplastic sheets into three-dimensional shapes through the application of heat and pressure. In general terms, vacuum forming refers to all sheet forming methods, including drape forming, which is one of the most popular. Basically during vacuum forming processes, plastic material is heated until it becomes pliable, and then it is placed over a mold and drawn in by a vacuum until it takes on the desired shape. Vacuum thermoforming is a great method for producing plastic parts that have sharp details and fit nicely to specific products.

During the vacuum forming process, a sheet of heated plastic material is placed over a male or female mold. The mold then moves towards the sheet and presses against it to create a seal. Next, the application of a vacuum draws out the air between the mold and the sheet so that the plastic conforms to the mold exactly. This is accomplished through venting holes in the mold that are joined to vacuum lines. The mold also has a water cooling system integrated into it that brings the temperature of the plastic to the set temperature needed. When the curing temperature is reached and the piece is formed, air blows back into the mold and separates the new part from the mold.

Vacuum forming produces plastic parts for various industries, such as the food, cosmetic, medical, electronics, entertainment, household products, toys, athletic equipment, appliance, automotive, office supplies and clothing industries. One of the most important industries that thermoforming serves, however, is packaging. Products like blister packs, inserts, trays and clamshells are used to house other products and are important for both preservation of the items they hold and the aesthetic designs they can provide. Consumer product manufacturers often use vacuum forming to produce plastic trays and glasses.

The greatest advantage to vacuum forming is that it involves less parts and tooling than injection molding, and therefore is more cost-effective. It is an economical choice that can be used for small and medium production runs, with low cost tool modifications. There is great design flexibility available, from a variety of prototypes to custom made designs that can be used to cover almost any product. Most manufacturers also offer a wide variety of trim and other decoration options that can prove quite a visual advantage. Time of production is generally short, which frees up time to do more detail-oriented aspects of production. Sharp, precise detail is available for many products, which makes vacuum formed plastics an attractive alternative to other molding processes.

Glasscaps

Hospitality will take on a new meaning when you use one of our clear RPET Glasscaps. While keeping the glass sterile and sanitized, your guests will also appreciate that elegant touch.

Obtaining a perfect fit for your glassware is made easy by using our sample sizing kits. Glasscaps are available in plain, or they can be embossed or color printed with a customized signature (see Product Branding section).

Douglas Stephen Plastics offers *Glasscaps* in a variety of sizes ranging from 51mm-96mm. We have artwork on file for a number of hotel chains.

DOUGLAS STEPHEN PLASTICS, INC.

P.O. Box 2775, 22-36 Green St., Paterson, NJ 07509
(973) 523-3030 • Fax (973) 523-0643
www.douglasstephen.com

Product Branding

The advantage of working with Douglas Stephen Plastics for your packaging needs is demonstrated in the variety of branding/customization capabilities we offer. Why offer packaging that is generic when, for reasonable minimums/upcharges/investments, you can have packaging branded with logo's and custom colors.

DSP's in house tool and die shop allows us to create custom molds that are designed to specifically meet your packaging needs. When combined with our ability to extrude HIPS, PP and PET in custom colors, plus our embossing and printing programs, DSP has the ability to create packaging that is truly unique.

EN*VISION

Our PRIDE WITH PRINTING PROGRAM! We have the capability of printing 1 and 2 color logos on a variety of our products. With a very reasonable 1000 piece minimum and plate charges, En*Vision will provide name recognition and a custom package experience.

EMBOSSING

Virtually all DSP products can be embossed with logos. Reasonable production minimums and plate charges allow customers to personalize products. A great way to make a generic package custom!

CUSTOM MATERIAL COLORS

With our own in-house extrusion, DSP is capable of running products in custom colors- HIPS, PET and PP. Packaging makes a bold statement when color is involved. Minimum orders vary depending on the product involved.

Credit Terms

1% 10 days, net 30 days from date of invoice

Minimum Order/Freight

- 150 cases for Pre-paid delivered pricing.
- Orders less than 150 cases will be shipped plus freight.
- Shipments of Douglas Stephen Plastics products as shown in catalog are F.O.B. the shipping point, with full freight pre-paid (150 cases minimum) within the Continental U.S.A. except Alaska, Hawaii and Puerto Rico.
- All shortages and claims for damaged merchandise is the responsibility of the buyer to be properly reported and/or recorded on the Bill of Lading.* Any merchandise claimed to be damaged in transit must be held for disposition by Douglas Stephen Plastics or the freight company. If freight is not held, no credit will be issued.
- All additional services and charges by the carrier, including stopover charges, lumper fees and other accessorial charges are the responsibility of the buyer.
- Douglas Stephen Plastics reserves the right of carrier selection and of shipment via most economical routing. If shipped at buyer's request, buyer shall pay additional transportation costs.
- Douglas Stephen Plastics reserves the right to maximize cube utilization trailers and containers by capping shipments.

Purchase Order Requirements

- All orders must be in writing and include the following information:
 - Douglas Stephen Plastics' item number
 - Number of cases ordered
 - Price per case
 - Purchase order number
 - Expected delivery date
 - Delivery address
 - Delivery appointment phone number
 - Customer's fax number

Lead Time

- Orders for stock items are generally available to ship within 14 days of receipt of order by Douglas Stephen Plastics.
- * Orders requiring expedited delivery service will be subject to additional freight charges that will be the responsibility of the buyer.

Backorder Policy

- Douglas Stephen Plastics will ship all orders to arrive on the delivery date regardless of fill rate.
- Any backorders that occur on orders that DSP is given the required lead time will be shipped, when available, at DSP expense.
- Requests to ship a backorder, where orders have not been placed with the required lead time, will be shipped at the buyer's expense.

Special Order Policy

- Lead times and minimum quantities will vary by special order item and material.
- Once shipped, special order items are not subject to return under any circumstances (as long as the product conforms to the order).
- Purchase orders for special order items may not be canceled without written notification and full reimbursement to Douglas Stephen Plastics for all loss, cost and expense incurred to the date of cancellation.

Returned Merchandise Policy

- No return items will be accepted without prior approval.
- Product must be returned within six (6) months from shipment and invoicing by Douglas Stephen Plastics.
- Prior to making any return, buyer must obtain a written Return Merchandise Authorization (RMA) number and shipping instructions from Douglas Stephen Plastics.
- Product must be returned Pre-paid freight,
- The amount of credit issued by Douglas Stephen Plastics will be the price paid by the customer less a 15% restocking fee.
- All products being returned must be in good saleable condition and in original unopened cartons; otherwise credit will not be issued. No credit will be issued for partial cases.
- Embossed, special order items and/or products discontinued by Douglas Stephen Plastics are not eligible for return.
- Product not authorized for return will be refused back to the carrier at the buyers' expense.

***All requests for Return Authorization should be directed to Customer Service by phone: (973) 523-3030 or fax: (973) 523-0643 ***

Terms & Conditions of Sales

Samples

- Samples of DSP products shown are available upon request. Buyer is responsible for verifying that the product in the Douglas Stephen Plastics brochure will fit their particular requirement.

Customer Pick-Up Policy

- Purchase order need to clearly indicate "Pick-up".
- Pick-up allowances apply to orders that are 150 cases or more.
- Pick-up allowances are to be quoted by an authorized representative of Douglas Stephen Plastics.
- All products picked up at the DSP facility are sold on a F.O.B. basis
- The driver of the vehicle is responsible for count and in assisting in the loading of the vehicle. Any shortage, damage, or loss is the buyer's responsibility.
- Pick-up appointments are required at least 48 hours in advance.

Art and Mold/Insert Charge Policy

- The buyer understands that all custom molds and inserts will remain the property of Douglas Stephen Plastics.
- Any art, Mold and insert charges paid by the buyer only represent a contribution toward the total cost incurred by Douglas Stephen Plastics.

General Terms

- Prices are subject to change with notice.
- * All orders are subject to final acceptance by Douglas Stephen Plastics at its offices in Paterson, NJ.
- Products are subject to withdrawal from sale without notice.
- Douglas Stephen Plastics warrants only that its products will be free of substantial defects; all other express or implied warranties, including merchantability and fitness for a particular purpose, are expressly disclaimed unless specifically agreed by Douglas Stephen Plastics.
- Buyer's sole remedy for any breach of Douglas Stephen Plastics' obligation shall be the return to buyer the amount paid for any product for which there has been a breach or the replacement of such product and under no circumstances shall Douglas Stephen Plastics be liable for any consequential or incidental damages. All claims concerning the products must be made by buyer within 60 days of delivery to it, after which time the products shall be conclusively deemed to be in conformity with all warranties of Douglas Stephen Plastics.
- Douglas Stephen Plastics shall not be liable for any failure or delay in shipment of products caused by or resulting in accidents, fires, floods, acts of God, labor strikes, transportation delays, equipment failures, unavailability of materials any action of any governmental authority or from any causes beyond Douglas Stephen Plastics control.
- If Douglas Stephen Plastics engages an attorney to collect any amounts due it from buyer, Douglas Stephen Plastics will be entitled to recovery of its attorney's fees and costs. The parties agree that the courts of the state from where the products are shipped by Douglas Stephen Plastics shall have exclusive jurisdiction over all controversies arising out of the sale of products to buyer and each of the parties consents to service of process upon it in such state by registered mail at any business address of Douglas Stephen Plastics or buyer, whether such address is within or without the state from which the products are shipped.
